---	---	---	---	---	---	---

- This Fund is ranked at 5 because funds of this type have experienced medium to high rises and falls in value in the past.
- Please note that even the lowest risk class can lose you money and that extreme market circumstances can mean you suffer severe losses in all cases. The indicator does not take into account the following risks of investing in this Fund:
- Investing globally can bring additional returns and diversify risk. However, currency exchange rate fluctuations may have a positive or negative impact on the value of your investment.
- Bonds are affected by changes in interest rates, inflation and any decline in creditworthiness of the bond issuer. Bonds that produce a higher level of income usually also carry greater risk as such bond issuers may not be able to pay the bond income as promised or could fail to repay the capital amount used to purchase the bond.
- Currency hedged share classes aim to provide you with a return that is as close as possible to the base currency performance of a fund, by reducing the effect of exchange rate movements between the base currency and the hedged currency. However, hedging techniques may not be fully effective in completely removing the exchange rate risk. It is also important to note that these hedging techniques have transaction costs which will reduce your overall return.
