

Dow Jones STOXX 600 Optimised Financial Services Source ETF

SIMPLIFIED PROSPECTUS

Dated 3 July 2009

This Simplified Prospectus contains key information in relation to the Dow Jones STOXX 600 Optimised Financial Services Source ETF (the Fund), a fund of Source Markets plc (the Company). The Company was incorporated on 16 October 2008 and is an umbrella open-ended investment company with variable capital and segregated liability between its sub-funds authorised by the Irish Financial Services Regulatory Authority (the Financial Regulator) under the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations, 2003, as amended, supplemented, consolidated or otherwise modified from time to time (the Regulations). The Company currently has forty nine other funds whose names are set out in Schedule 2. Other funds may be established from time to time with the prior approval of the Financial Regulator.

Potential investors are advised to read the Prospectus of the Company dated 13 March 2009 together with the Supplement in respect of the Fund dated 3 July 2009 (the Prospectus) before making an investment decision on whether or not to invest in the Fund. The rights and duties of the investor as well as the legal relationship with the Company are set out in the Prospectus.

The base currency of the Fund is Euro.

Investment Objective	<p>The investment objective of the Fund is to achieve the Target Performance (which is the net total return performance of the Reference Index (being the Dow Jones STOXX 600 Optimised Financial Services Index) (less fees, expenses and transaction costs)). The Fund does not intend to make dividend payments.</p> <p>The Reference Index is derived from the DJ STOXX 600 Supersector Financial Services Index. The Reference Index provides a representation of STOXX Limited sector leaders based on the Industry Classification Benchmark (ICB). The Reference Index captures equal or improved liquidity and country diversification of the Dow Jones STOXX 600 Index. The Reference Index applies a sector dependent liquidity cap that reduces the weighting of only those constituents whose average daily turnover, as a fraction of its free float marketcap is below the sector average. This hybrid market cap and with the liquidity weighting methodology optimizes the tradability of the Reference Index while retaining the free float market capitalisation weighting across the larger and more liquid constituents. The Reference Index is weighted by free float market capitalisation and the composition and free float weights are reviewed quarterly.</p>
Investment policy	<p>In order to achieve the investment objective, the Company on behalf of the Fund intends to invest all or substantially all of the net proceeds of any issue of Shares in global equities (including the constituents of the Reference Index (where appropriate)) and equity related securities (including but not limited to common stocks and other securities with equity characteristics, including but not limited to preferred stocks, warrants, rights (which are issued by a company to allow holders to subscribe for additional securities issued by that company) and convertible securities, as well as depository receipts, for such securities all of which are traded on Markets), FDIs, units of other UCITS and Swaps (being an agreement between the Fund and the Approved Counterparty to exchange one stream of cash flows against another stream pursuant to a master agreement in accordance with the requirements of the International Swaps and Derivatives Association, and such "Swaps" may be funded, unfunded, total return or outperformance in nature).</p> <p>Each Approved Counterparty to the Swaps and the Company on behalf of the Fund have entered into a master agreement (including any supporting agreements) and will enter into confirmations for each Swap transaction. Such confirmations may be entered into before or after the relevant transaction and may be in electronic form.</p> <p>The Fund itself will not be leveraged for investment or efficient portfolio management purposes and will therefore not be subject to any shortfall risk. Any financial obligation arising in respect of use of the financial derivative instruments shall never exceed the available capital in the Fund.</p> <p>The Fund may invest up to 10% of its net assets in units of other UCITS.</p> <p>The Swaps, transferable securities, FDIs, units of other UCITS and ancillary cash held by the Fund shall constitute the "Fund Assets" for the purposes of the Prospectus.</p> <p>Further information relevant to the Fund's investment policy is contained in the main part of the Prospectus under "Investment Objectives and Policies" and under "Investment Restrictions".</p>
Risk Profile	<p>Certain risks relating to the Shares are set out under the heading "Risk Factors" in the Prospectus. In addition, Shareholders must also note that:</p>

	<p>(a) The value of investments and the income from them, and therefore the value of and income from the Shares relating to each Fund can go down as well as up and an investor may not get back the amount invested. The Fund's exposure is linked to the components performance of the Reference Index which, in turn, is exposed to general market movements (negative as well as positive).</p> <p>(b) The return payable under the Swaps with an Approved Counterparty is subject to the credit risk of the Approved Counterparty. In addition, the Approved Counterparty will act as the calculation agent under the Swaps (the "Calculation Agent"). Shareholders should note that not only will they be exposed to the credit risk of the Approved Counterparty but also potential conflicts of interest in the performance of the function of Calculation Agent by the Approved Counterparty. The Approved Counterparty has undertaken to use its reasonable endeavours to resolve any such conflicts of interest fairly (having regard to its respective obligations and duties) and to ensure that the interests of the Company and the Shareholders are not unfairly prejudiced. The Directors believe that the Approved Counterparty is suitable and competent to perform such functions. In addition the valuations provided by the Approved Counterparty in its role as Calculation Agent will be verified at least weekly by a party independent of the Approved Counterparty who shall either be the Administrator or sourced by the Administrator as appropriate and who has been approved for such purpose by the Custodian.</p> <p>(c) The sub-funds of the Company are segregated as a matter of Irish law and as such, in Ireland, the assets of one sub-fund will not be available to satisfy the liabilities of another sub-fund. However, it should be noted that the Company is a single legal entity which may operate or have assets held on its behalf or be subject to claims in other jurisdictions which may not necessarily recognise such segregation. There can be no guarantee that the courts of any jurisdiction outside Ireland will respect the limitations on liability as set out above.</p> <p>(d) If a Disruption Event or an Index Disruption and Adjustment Event occurs, the Calculation Agent and the Investment Manager may make such determinations and/or adjustments to determine the Target Performance of the Reference Index (in the case of the Investment Manager) and/or the Swap (in the case of the Calculation Agent). The Net Asset Value may be affected by such adjustment.</p> <p>(e) Whilst the Company has the right to use and reference the Reference Index in connection with the Fund in accordance with the terms of the Reference Index licence, in the event that the licence is terminated the Fund will be terminated or if any other Index Disruption and Adjustment Event occurs, adjustments may be made to the terms of the Swaps after negotiation with each Approved Counterparty to account for any such event including adjustment to the Reference Index or the calculation of the Reference Index level which may have a significant impact on the Net Asset Value of the Fund.</p> <p>Investors should also refer to the Prospectus for additional disclosure of risks.</p>
