LYXOR PLANET

A class - ISIN code: (C) FR0010755744

French UCITS managed by Amundi Asset Management, an Amundi company

Objectives and Investment Policy

The Fund is an active UCITS. Its investment strategy is not tied to a benchmark index but there is a performance fee calculated based on an index plus a minimum rate of return of 2% (the "Benchmark") as described in the performance fee section of the prospectus.

Lyxor Planet is a fund of funds with an investment objective of providing capital appreciation through the performance of various global asset classes (equities, fixed income, commodities and currencies) by investing in UCITS ETFs, while restricting the Fund's average annual volatility to around 7%.

The Fund may also invest in ETNs.

The Fund's Management Company may use derivative financial instruments traded on regulated markets and/or over the counter.

The Fund manager may operate in these markets to get exposure to or hedge against currency risk, equity risk, bond risk or interest rate risk.

Exposure limits:

- Equity exposure will be between 0% and 80% of the Fund's assets, with no more than 20% exposed to small- or mid-cap equities;
- Bond exposure will be between 0% and 80% of the Fund's assets, with no more than 30% exposed to high-yield bonds (speculative securities);
- Commodity exposure will be between 0% and 30% of the Fund's assets;
- Fixed-income exposure will be between 0% and 30% of the Fund's assets;
- Emerging-market exposure will be between 0% and 20% of the Fund's assets; The Fund may be exposed to currency, equity, bond and interest rate risk on two levels, which in some cases may cumulatively account for up to 100% of the Fund's assets:

1. At Fund asset level, when the Fund acquires real securities or units of UCITS and/or AIFs denominated in a currency other than the euro.

This will be limited to a maximum of approximately 30% of the Fund's assets; and

2. Within the selected UCITS and/or AIFs, when these are exposed to currency risk.

This will not be constrained at Fund level.

The Fund's net profit as well as its net realised capital gains are automatically reinvested.

You may redeem your units each day, as buyback are carried out on a daily basis.

Recommendation: this Fund may not be appropriate for investors who plan to withdraw their money within five years.

Risk and reward profile

This Fund's risk level reflects the risk of its allocation, which is exposed to the bond market and the equity market in roughly equal proportions.

Historical data used to calculate the digital risk indicator may not be a reliable indicator of the future risk profile of the Fund.

The risk category associated with this Fund is not guaranteed and may evolve over time.

The lowest category does not mean "risk free".

The initial capital invested is not guaranteed.

Particular risks for the Fund not included in these indicator are:

- Credit risk: The Fund is exposed directly or indirectly to insolvency risk or to any other type of event that affects the creditworthiness of one or more debt securities issuers. The occurrence of this risk or these events may lead to a decline in the net asset value of the Fund.
- Counterparty risk: The Fund is exposed to the risk of insolvency or other types of default of any counterparty with which it enters into an agreement or transaction, particularly in the case of financial derivative instruments traded over the counter or securities delivered under securities financing transactions. Such an event may result in a significant decline in the net asset value of the Fund. In accordance with the regulations applicable to the Fund, this risk may not exceed 10% of the total assets of the Fund for a given counterparty.
- Risk related to the use of derivative instruments: The Fund may use financial contracts that involve different types of risk, such as leverage risks, risks related to high volatility, valuation risk or liquidity risk.

The occurrence of one of these risks may lead to a decrease in the net asset value of the portfolio.
