# Features of the Company

UBS (Lux) SICAV 1 (hereinafter referred to as the “Company”) offers investors various subfunds (“umbrella construction”) which invest in accordance with the investment policy described in the sales prospectus. The specific details on each subfund are defined in the sales prospectus, which will be updated on the inception of each new subfund.

The Company was established on 24 March 2006 as an open-ended investment fund in the form of a SICAV pursuant to Part I of the Law of 20 December 2002 and is subject to the amended Law of 17 December 2010 as of 1 July 2011. With effect from 15 April 2011, the Company has appointed UBS Fund Management (Luxembourg) S.A. as its Management Company.

The Articles of Association were published in the “Mémorial, Recueil des Sociétés et Associations” (hereinafter called “Mémorial”) on 20 April 2006, and deposited at the Commercial and Companies Register of the District Court in Luxembourg for inspection. All amendments are published with a deposit notice in the “Mémorial”. Amendments become legally binding in respect of all shareholders subsequent to their approval by the general meeting of shareholders.

The entirety of the individual subfunds’ net assets forms the total net assets of the Company which correspond, at all times, to the share capital of the Company and consist of fully paid in and no-par-value shares (the “shares”).

At general meetings, shareholders have the right to one vote per share held, irrespective of the difference in value of shares in the respective subfunds. Shares of a particular subfund carry the right of one vote per share held when voting at meetings affecting this subfund.

The Company forms a legal entity. With respect to the shareholders, each subfund is regarded as being independent from the others. The assets of a subfund can be used to offset only the liabilities which the subfund concerned has assumed.

The Company is empowered, at all times, to liquidate existing subfunds and/or to establish new subfunds as well as different share classes with specific characteristics within these subfunds. The sales prospectus will be updated each time a new subfund or an additional share class is launched.

As at 31 March 2023, the following subfunds are active:

UBS (Lux) SICAV 1	Currency
– All-Rounder (USD)	USD
– Medium Term USD Corporate Bonds Sustainable (USD)	USD

Various share classes can be offered for the subfunds. Information on which share classes are available for which subfund can be obtained from the Administrative Agent or at [www.ubs.com/funds](http://www.ubs.com/funds).

Shares are issued as registered shares only.

Additional characteristics:

#### **Currencies**

The share classes may be denominated in AUD, BRL, CAD, CHF, CZK, DKK, EUR, GBP, HKD, JPY, NOK, NZD, PLN, RMB, RUB, SEK, SGD, USD or ZAR. For share classes issued in the currency of account of the subfund, this currency will not be included in the share class name. The currency of account features in the name of the relevant subfund.

#### **“hedged”**

For share classes with “hedged” in their name and with reference currencies different to the subfund’s currency of account (“**classes in foreign currencies**”), the risk of fluctuations in the value of the reference currency is hedged against the subfund’s currency of account. This hedging shall be between 95% and 105% of the total net assets of the share class in foreign currency. Changes in the market value of the portfolio, as well as

subscriptions and redemptions of share classes in foreign currencies, can result in the hedging temporarily surpassing the aforementioned range. The Company and the Portfolio Manager will take all necessary steps to bring the hedging back within the aforementioned limits.

The hedging described has no effect on possible currency risks resulting from investments denominated in a currency other than the subfund's currency of account.

#### **"BRL hedged"**

The Brazilian real (ISO 4217 currency code: BRL) may be subject to exchange control regulations and repatriation limits set by the Brazilian government. Prior to investing in BRL classes, investors should also bear in mind that the availability and tradability of BRL classes, and the conditions under which they may be available or traded, depend to a large extent on the political and regulatory developments in Brazil. The risk of fluctuations is hedged as described above under "hedged". Potential investors should be aware of the risks of reinvestment, which could arise if the BRL class has to be liquidated early due to political and/or regulatory circumstances. This does not apply to the risk associated with reinvestment due to liquidation of a share class and/or the subfund in accordance with the section "Liquidation of the Company and its subfunds; merger of subfunds".

#### **"RMB hedged"**

Investors should note that the renminbi (ISO 4217 currency code: CNY), the official currency of the People's Republic of China (the "PRC"), is traded on two markets, namely as onshore RMB (CNY) in mainland China and offshore RMB (CNH) outside mainland China.

Shares in classes with "RMB hedged" in their name are shares whose net asset value is calculated in offshore RMB (CNH).

Onshore RMB (CNY) is not a freely convertible currency and is subject to foreign exchange control policies and repatriation restrictions imposed by the PRC government. Offshore RMB (CNH), on the other hand, may be traded freely against other currencies, particularly EUR, CHF and USD. This means the exchange rate between offshore RMB (CNH) and other currencies is determined on the basis of supply and demand relating to the respective currency pair.

Convertibility between offshore RMB (CNH) and onshore RMB (CNY) is a regulated currency process subject to foreign exchange control policies and repatriation restrictions imposed by the PRC government in coordination with offshore supervisory and governmental agencies (e.g. the Hong Kong Monetary Authority).

Prior to investing in RMB classes, investors should bear in mind that the requirements relating to regulatory reporting and fund accounting of offshore RMB (CNH) are not clearly regulated. Furthermore, investors should be aware that offshore RMB (CNH) and onshore RMB (CNY) have different exchange rates against other currencies. The value of offshore RMB (CNH) can potentially

differ significantly from that of onshore RMB (CNY) due to a number of factors including, without limitation, foreign exchange control policies and repatriation restrictions imposed by the PRC government at certain times, as well as other external market forces. Any devaluation of offshore RMB (CNH) could adversely affect the value of investors' investments in the RMB classes. Investors should therefore take these factors into account when calculating the conversion of their investments and the ensuing returns from offshore RMB (CNH) into their target currency.

Prior to investing in RMB classes, investors should also bear in mind that the availability and tradability of RMB classes, and the conditions under which they may be available or traded, depend to a large extent on the political and regulatory developments in the PRC. Thus, no guarantee can be given that offshore RMB (CNH) or the RMB classes will be offered and/or traded in future, nor can there be any guarantee as to the conditions under which offshore RMB (CNH) and/or RMB classes may be made available or traded. In particular, since the currency of account of the relevant subfunds offering the RMB classes would be in a currency other than offshore RMB (CNH), the ability of the relevant subfund to make redemption payments in offshore RMB (CNH) would be subject to the subfund's ability to convert its currency of account into offshore RMB (CNH), which may be restricted by the availability of offshore RMB (CNH) or other circumstances beyond the control of the Company.

The risk of fluctuations is hedged as described above under "hedged".

Potential investors should be aware of the risks of reinvestment, which could arise if the RMB class has to be liquidated early due to political and/or regulatory circumstances. This does not apply to the risk associated with reinvestment due to liquidation of a share class and/or the subfund in accordance with the section "Liquidation of the Company and its subfunds; merger of subfunds".

#### **"acc"**

The income of share classes with "-acc" in their name is not distributed unless the Company decides otherwise.

#### **"dist"**

For share classes with "-dist" in their name, income is distributed unless the Company decides otherwise.

#### **"qdist"**

Shares in classes with "-qdist" in their name may make quarterly distributions, gross of fees and expenses. Distributions may also be made out of the capital (this may include, inter alia, realised and unrealised net gains in net asset value) ("**capital**"). Distributions out of capital result in the reduction of an investor's original capital invested in the subfund. Furthermore, any distributions from the income and/or involving the capital result in an immediate reduction of the net asset value per share of the subfund. Investors in certain countries may be

subject to higher tax rates on distributed capital than on any capital gains from the sale of fund units. Some investors may therefore prefer to subscribe to accumulating (-acc) rather than distributing (-dist, -qdist) share classes. Investors may be taxed at a later point in time on income and capital arising on accumulating (-acc) share classes compared with distributing (-dist) share classes. Investors should consult qualified experts for tax advice regarding their individual situation.

#### **“mdist”**

Shares in classes with “-mdist” in their name may make monthly distributions, gross of fees and expenses. Distributions may also be made out of capital. Distributions out of capital result in the reduction of an investor’s original capital invested in the subfund. Furthermore, any distributions from the income and/or involving the capital result in an immediate reduction of the net asset value per share of the subfund. Investors in certain countries may be subject to higher tax rates on distributed capital than on any capital gains from the sale of fund units. Some investors may therefore prefer to invest in accumulating (-acc) rather than distributing (-dist, -mdist) share classes. Investors may be taxed at a later point in time on income and capital arising on accumulating (-acc) share classes compared with distributing (-dist) share classes. Investors should consult qualified experts for tax advice regarding their individual situation. The maximum entry costs for shares in classes with “-mdist” in their name are 6%.

#### **“UKdist”**

The aforementioned share classes can be issued as those with “UKdist” in their name. In these cases, the Company intends to distribute a sum which corresponds to 100% of the reportable income within the meaning of the **UK reporting fund** rules when the share classes are subject to these reporting fund rules. The Company does not intend to make taxable values for these share classes available in other countries, as they are intended for investors whose investment in the share class is liable to tax in the UK.

#### **“2%”, “4%”, “6%”, “8%”**

Shares in classes with “2%” / “4%” / “6%” / “8%” in their name may make monthly (-mdist), quarterly (-qdist) or annual (-dist) distributions at the respective aforementioned annual percentage rates, gross of fees and expenses. The distribution amount is calculated based on the net asset value of the respective share class at the end of the month (in the case of monthly distributions), financial quarter (in the case of quarterly distributions) or financial year (in the case of annual distributions). These share classes are suitable for investors who wish for more stable distributions, unrelated to past or expected returns or income of the relevant subfund.

Distributions may thus also be made from the capital. Distributions out of capital result in the reduction of an investor’s original capital invested in the subfund. Furthermore, any distributions from the income and/or involving the capital result in an immediate reduction of

the net asset value per share of the subfund. Investors in certain countries may be subject to higher tax rates on distributed capital than on any capital gains from the sale of fund units. Some investors may therefore choose to invest in the accumulating (-acc) instead of the distributing (-dist, -qdist, -mdist) share classes. Investors may be taxed at a later point in time on income and capital arising on accumulating (-acc) share classes compared with distributing (-dist, -qdist, -mdist) share classes. Investors should consult qualified experts for tax advice regarding their individual situation.

#### **“seeding”**

Shares with “seeding” in their name are only offered for a limited period of time. At the end of this period, no further subscriptions are permitted unless the Company decides otherwise. However, shares can still be redeemed in accordance with the conditions for share redemptions. Unless otherwise decided by the Company, the smallest tradeable unit, the initial issue price and the minimum subscription amount shall correspond to the characteristics of the share classes listed above.

The Company is unlimited with regard to duration and total assets.

The Company’s financial year ends on 30 September.

The ordinary general meeting shall be held annually on 20 March at 10.15 am at the head office of the Company. # Notes to the Financial Statements

## Note 1 – Summary of significant accounting policies

The financial statements have been prepared in accordance with the generally accepted accounting principles for investment funds in Luxembourg. The significant accounting policies are summarised as follows:

### a) Calculation of the net asset value

The net asset value and the issue and redemption price per share of each subfund and share class are expressed in the currency of account of the subfund or the share class concerned, and are calculated every settlement date for the previous banking day by dividing the overall net assets per subfund for each share class by the number of shares issued in the respective share class of the subfund. However, the net asset value of a share may also be calculated on days where no shares are issued or redeemed, as described in the following section. In this case, the net asset value may be published, but it may only be used for the purpose of calculating performance, statistics or fees. Under no circumstances should it be used as a basis for subscription and redemption orders.

Subfund shares are issued and redeemed on every business day. A “business day” is a normal bank business day in Luxembourg (i.e. a day when the banks are open during normal business hours), except for 24 and 31 December; individual, non-statutory days of rest in Luxembourg; and days on which stock exchanges in the main countries in which the respective subfund invests are closed, or on which 50% or more of the investments of the subfund cannot be adequately valued.

### b) Valuation principles

- Liquid funds – whether in the form of cash, bank deposits, bills of exchange and sight securities and receivables, prepaid expenses, cash dividends and declared or accrued interest that has not yet been received – are valued at their full value unless it is unlikely that this value will be fully paid or received, in which case their value is determined by taking into consideration a deduction that seems appropriate in order to portray their true value.
- Securities, derivatives and other investments listed on a stock exchange are valued at the last-known market prices. If these securities, derivatives or other investments are listed on several stock exchanges, the latest available price on the stock exchange that represents the major market for these investments will apply.  
In the case of securities, derivatives and other investments infrequently traded on a stock exchange

and for which a secondary market among securities traders exists with pricing in line with the market, the Company may value these securities, derivatives and other investments based on these prices. Securities, derivatives and other investments not listed on a stock exchange but which are traded on another regulated market which operates regularly and is recognised and open to the public are valued at the last available price on this market.

- Securities and other investments that are not listed at a stock exchange or traded on another regulated market, and for which no appropriate price can be obtained, will be valued by the Company according to other principles chosen by it in good faith on the basis of the likely sales prices.
- Derivatives that are not listed at a stock exchange (OTC-derivatives) will be valued on the basis of independent pricing sources. In case only one independent pricing source of a derivative is available, the plausibility of the valuation obtained will be verified by means of calculation methods recognised by the Company and its auditors, based on the market value of the underlying instrument from which the derivative originates.
- Units of other undertakings for collective investment in transferable securities (UCITS) and/or undertakings for collective investment (UCIs) are valued at their last-known net asset value. Certain units or shares of other UCITS and/or UCIs may be valued on the basis of an estimate of their value provided by permissible service providers that are independent of the Portfolio Manager or the Investment Advisor of the target funds (price estimate).
- Money market instruments not traded on a stock exchange or on another regulated market open to the public will be valued on the basis of the relevant curves. The valuation based on the curve is with reference to the two components of interest rate and credit spread. The following principles are applied in this process: for each money market instrument, the interest rates nearest the residual maturity are interpolated. The interest rate calculated in this way is converted into a market price by adding a credit spread that reflects the underlying borrower. This credit spread is adjusted if there is a significant change in the credit rating of the borrower.
- Securities, money market instruments, derivatives and other investments denominated in a currency other than the reference currency of the relevant subfund and not hedged by foreign-exchange transactions, are valued at the middle-market rate of exchange (midway between the bid and offer rate) known in

Luxembourg or, if not available, on the most representative market for this currency.

- Fixed-term deposits and fiduciary investments are valued at their nominal value plus accumulated interest.
- The value of swaps is calculated by an external service provider and a second independent valuation is provided by another external service provider. The calculation is based on the net present value of all cash flows, both inflows and outflows. In some specific cases, internal calculations (based on models and market data made available from Bloomberg), and/or broker statement valuations may be used. The valuation methods depend on the respective security and are determined pursuant to the UBS Valuation Policy.

The Company is authorised to apply other generally recognised and verifiable valuation criteria in good faith in order to achieve an appropriate valuation of the net assets if, due to extraordinary circumstances, a valuation in accordance with the aforementioned regulations proves to be unfeasible or inaccurate.

In extraordinary circumstances, additional valuations can be carried out over the course of the day. These new valuations will then be authoritative for subsequent issues and redemptions of shares.

Due to fees and charges as well as the buy-sell spread for the underlying investments, the actual costs of buying and selling assets and investments for a subfund may differ from the last available price or, if applicable, the net asset value used to calculate the net asset value per share. These costs have a negative effect on the value of a subfund and are termed “dilution”. To reduce the effects of dilution, the Board of Directors may at its own discretion make a dilution adjustment to the net asset value per share (swing pricing).

Shares are generally issued and redeemed based on a single price: the net asset value. To reduce the effects of dilution, the net asset value per share is nevertheless adjusted on valuation days as described below; this takes place irrespective of whether the subfund is in a net subscription or net redemption position on the relevant valuation day. If no trading is taking place in any subfund or class of a subfund on a particular valuation day, the unadjusted net asset value per share is applied. The circumstances in which such a dilution adjustment takes place are determined at the discretion of the Board of Directors. The requirement to carry out a dilution adjustment generally depends on the scale of subscriptions or redemptions of shares in the relevant subfund. The Board of Directors may carry out a dilution adjustment if, in its view, the existing shareholders (in the case of subscriptions) or remaining shareholders (in the case of redemptions) could be put at a disadvantage. The dilution adjustment may take place if:

(a) a subfund records a steady fall (i.e. a net outflow due to redemptions);

(b) a subfund records a considerable volume of net subscriptions relative to its size;

(c) a subfund shows a net subscription or net redemption position on a particular valuation day; or

(d) In all other cases in which the Board of Directors believes a dilution adjustment is necessary in the interests of the shareholders.

When a valuation adjustment is made, a value is added to or deducted from the net asset value per share depending on whether the subfund is in a net subscription or net redemption position; the extent of the valuation adjustment shall, in the opinion of the Board of Directors, adequately cover the fees and charges as well as the spreads of buy and sell prices. In particular, the net asset value of the respective subfund will be adjusted (upwards or downwards) by an amount that (i) reflects the estimated tax expenses, (ii) the trading costs that may be incurred by the subfund, and (iii) the estimated bid-ask spread for the assets in which the subfund invests. As some equity markets and countries may show different fee structures on the buyer and seller side, the adjustment for net inflows and outflows may vary. The adjustments are generally limited to a maximum of 2% of the prevailing net asset value per share at the time. The Board of Directors may decide to temporarily apply a dilution adjustment of more than 2% of the prevailing net asset value per share at the time in respect of any subfund and/or valuation date in exceptional circumstances (e.g. high market volatility and/or liquidity, exceptional market conditions, market disruption, etc.), provided the Board of Directors can justify that this is representative of the prevailing market conditions and that it is in the best interest of the shareholders. This dilution adjustment will be calculated in accordance with the method determined by the Board of Directors. Shareholders will be informed via the usual communication channels when the temporary measures are introduced and when they end.

The net asset value of each class of the subfund is calculated separately. However, dilution adjustments affect the net asset value of each class to the same degree in percentage terms. The dilution adjustment is made at subfund level and relates to capital activity, but not to the specific circumstances of each individual investor transaction.

For all subfunds the Swing Pricing methodology is applied.

If there were Swing Pricing adjustments to the net asset value at the end of the period, this can be seen from the most important figures of the net asset value information of the subfunds. The issue and redemption price per share represents the adjusted net asset value.

#### *c) Valuation of forward foreign exchange contracts*

The unrealized gain (loss) of outstanding forward foreign exchange contracts is valued on the basis of the forward exchange rates prevailing at valuation date.

#### d) Conversion of foreign currencies

Bank accounts, other net assets and the valuation of the investments in securities denominated in currencies other than the reference currency of the different subfunds are converted at the mid closing spot rates on the valuation date. Income and expenses denominated in currencies other than the currency of the different subfunds are converted at the mid closing spot rates at payment date. Profit or loss on foreign exchange is included in the statement of operations.

The cost of the securities denominated in currencies other than the reference currency of the different subfunds is converted at the mid closing spot rate on the day of acquisition.

#### e) Valuation of financial futures contracts

Financial futures contracts are valued based on the latest available published price applicable on the valuation date. Realized gains and losses and the changes in unrealized gains and losses are recorded in the statement of operations. The realized gains and losses are calculated in accordance with the FIFO method, i.e. the first contracts acquired are regarded as the first to be sold.

#### f) Net realized gains (losses) on sales of securities

The realized gains or losses on the sales of securities are calculated on the basis of the average cost of the securities sold.

#### g) Valuation of swaps and synthetic equity swaps

The SICAV may enter into interest rate swap contracts, forward rate agreements on interest rates swaptions and credit default swaps, if they are executed with first-class financial institutions that specialize in transactions of this kind.

The value of swap transactions is calculated by an external service provider and a second independent valuation is made available by another external service provider. The calculation is based on the net present value of all cash flows, both inflows and outflows. In some specific cases, internal calculations based on models and market data available from Bloomberg and/or broker statement valuations may be used. The valuation methods depend on the respective security and are determined pursuant to the UBS Valuation Policy. This valuation method is approved by the Board of Directors of the Management Company.

Changes in unrealized profits and losses are reflected in the statement of operations under the changes in "Unrealized appreciation (depreciation) on swaps" and "Unrealized appreciation (depreciation) on synthetic equity swaps".

Gains or losses on swaps incurred when closed-out or matured are recorded as "Realized gain (loss) on swaps" and "Realized gain (loss) on synthetic equity swaps" in the statement of operations. The Management Company is

authorised to apply other generally recognized and auditable valuation criteria in good faith in order to achieve an appropriate determination of the valuation of the net asset value if, due to extraordinary circumstances, a valuation in accordance with the aforementioned regulations proves to be unfeasible or inaccurate.

#### h) Combined financial statements

The combined financial statements are expressed in EUR. The various items of the combined statement of net assets and the combined statement of operations at 31 March 2023 of the investment company are equal to the sum of the corresponding items in the financial statements of each subfund converted into EUR at the following exchange rates.

The following exchange rate was used for the conversion of the combined financial statements as of 31 March 2023:

Exchange rate	
EUR 1	= USD 1.086450

#### i) Accounting of securities' portfolio transactions

The securities' portfolio transactions are accounted for the bank business day following the transaction day.

#### j) Receivable on securities sales,

#### Payable on securities purchases

The position "Receivable on securities sales" can also include receivables from foreign currency transactions. The position "Payable on securities purchases" can also include payables from foreign currency transactions.

Receivables and payables from foreign exchange transactions are netted.

#### k) Income recognition

Dividends, net of withholding taxes, are recognized as income on the date upon which the relevant securities are first listed as "ex-dividend". Interest income is accrued on a daily basis.

The aforementioned flat fee shall be used as follows:

1. For the management, administration, portfolio management and distribution of the Company (if applicable), as well as for all the tasks of the Depositary, such as the safekeeping and supervision of the Company's assets, the handling of payment transactions and all other tasks listed in the section "Depositary and Main Paying Agent" of the sales prospectus, a maximum flat fee based on the net asset value of the Company is paid from the Company's assets, in accordance with the following provisions: This fee is charged to the Company's assets on a pro rata basis upon every calculation of the net asset value and is paid on a monthly basis (maximum flat fee). The maximum flat fee for share classes with "hedged" in their name may include foreign exchange risk hedging charges. The relevant maximum flat fee will not be charged until the corresponding share classes have been launched. An overview of the maximum flat fees can be seen in "The Subfunds and their special investment policies" of the sales prospectus.
2. The maximum flat fee does not include the following fees and additional expenses which are also charged to the Company:

This fee is shown in the Statement of Operations as "Flat fee".

- a) all additional expenses related to management of the Company's assets for the sale and purchase of assets (bid/offer spread, brokerage fees in line with the market, commissions, fees, etc.). These expenses are generally calculated upon the purchase or sale of the respective assets. In derogation hereto, these additional expenses, which arise through the sale and purchase of assets in connection with the settlement of the issue and redemption of units, are covered by the application of the swing pricing principle pursuant to the section entitled "Net asset value, issue, redemption and conversion price" of the sales prospectus;
- b) fees of the supervisory authority for the establishment, modification, liquidation and merger of the Company, as well as all fees of the supervisory authorities and any stock exchanges on which the Subfunds are listed;
- c) auditor's fees for the annual audit and certification in connection with the establishment, modification, liquidation and merger of the Company, as well as any other fees paid to the auditor for the services it provides in relation to the administration of the Fund and as permissible by law;
- d) fees for legal and tax advisers, as well as notaries, in connection with the establishment, registration in distribution countries, modification, liquidation and merger of the Company, as well as for the general safeguarding of the interests of the Company and its investors, insofar as this is not expressly prohibited by law;

- e) costs for the publication of the Company's net asset value and all costs for notices to investors, including translation costs;
- f) costs for the Company's legal documents (prospectuses, KID, annual and semi-annual reports, as well as all other documents legally required in the countries of domiciliation and distribution);
- g) costs for the Company's registration with any foreign supervisory authorities, if applicable, including fees, translation costs and fees for the foreign representative or paying agent;
- h) expenses incurred through use of voting or creditors' rights by the Company, including fees for external advisers;
- i) costs and fees related to any intellectual property registered in the Company's name or usufructuary rights of the Company;
- j) all expenses arising in connection with any extraordinary measures taken by the Management Company, Portfolio Manager or Depositary for protecting the interests of the investors;
- k) if the Management Company participates in class-action suits in the interests of investors, it may charge the Company's assets for the expenses arising in connection with third parties (e.g. legal and Depositary costs). Furthermore, the Management Company may charge for all administrative costs, provided these are verifiable and disclosed, and taken into account in the disclosure of the Company's total expense ratio (TER);
- l) Fees, costs and expenses payable to the directors of the Company (including reasonable out-of-pocket expenses, insurance coverage and reasonable travel expenses in connection with meetings of the Board and remuneration of directors);

These commissions and fees are shown in the Statement of Operations as "Other commissions and fees".

3. The Management Company may pay retrocessions in order to cover the distribution activities of the Company.

All taxes levied on the income and assets of the Company, particularly the *taxe d'abonnement*, will also be borne by the Company.

For purposes of general comparability with fee rules of different fund providers that do not have a flat fee, the term "maximum management fee" is set at 80% of the flat fee.

For share class "I-B" a fee is charged to cover the costs of fund administration (comprising the costs of the Company, administration and the Depositary). The costs for asset management and distribution are charged outside of the Company under a separate contract concluded directly between the investor and UBS Asset Management Switzerland AG or one of its authorised representatives.

Costs in connection with the services to be performed for share classes "I-X", "K-X" and "U-X" pertaining to asset management, fund administration (comprising the costs of the Company, the administration and the Depositary) and distribution will be settled via the compensation to which UBS Asset Management Switzerland AG is entitled under a separate contract with the investor.

Costs relating to the services to be performed for share classes "K-B" for asset management purposes are covered by the compensation to which UBS Asset Management Switzerland AG or one of its authorised distribution partners is entitled under a separate contract with the investor.

All costs which can be allocated to individual Subfunds will be charged to these Subfunds.

Costs which can be allocated to share classes will be charged to these share classes. If costs pertain to several or all Subfunds/share classes, however, these costs will be charged to the Subfunds/share classes concerned in proportion to their relative net asset values.

In the Subfunds that may invest in other UCI or UCITS under the terms of their investment policies, fees may be incurred both at the level of the relevant investment fund as well as at the level of the Subfund.

The management fees of the target fund in which the assets of the subfund are invested may amount to a maximum of 3.00%, taking into account any trailer fees.

In the case of investments in units of funds managed directly or indirectly by the Management Company or another company related to it by common management or control, or by a substantial direct or indirect holding, the Subfunds making the investment may not be charged any of the target fund's issue or redemption commissions.

Details on the ongoing charges of the Company can be found in the KID.
