- The sub-fund invests in time deposits, short-term money market instruments and interest-bearing securities with a residual term to maturity of a maximum of thirty months as well as complex investment instruments such as swap transactions. The sub-fund may also hold cash.
- These swap transactions derive their value from broad-based commodities markets (benchmark indices) or exchange-traded commodities or similar certificates, making it possible to share in the value development of the global commodities markets.

Commodity Indexes series and/or their sub-indices or other commodity indices.

- The sub-fund may use derivatives to achieve the investment objective and for hedging purposes.
- The sub-fund is managed with reference to a benchmark. The portfolio manager has full investment discretion within the predefined investment limits.
- Any income generated will be reinvested and included in the value of your shares.
- Buying and selling securities entails transaction costs payable in addition to the charges listed.
- Redemption of shares: daily when banks in Luxembourg are open for normal business (see prospectus for details and exceptions).

Such risks include risks in connection with exceptional market events, operational errors, legal and political events. You can find a detailed list of the risks in the "Notice regarding special risks" section in the general part of the sales prospectus. The following risks have no direct influence on this category, but may still be important:

- Using derivatives creates significant leverage and entails valuation risks and operational risks. Leverage magnifies gains but also losses. Over-the-counter derivatives involve corresponding counterparty risks.
