## Fund objective and policy

The Fund aims to grow the value of your investment over the long term. The Fund is actively managed. It is not constrained by its comparator benchmark, the MSCI Emerging Markets NR Index and has significant freedom to invest in a portfolio that is different to the benchmark's own composition. The Fund seeks to achieve its objective by investing mainly in equity securities of a broad range of companies established in or deriving a significant amount of their income and profit from, emerging market countries worldwide, including the People's Republic of China. The Fund may also invest in Frontier markets. The Fund selects quality companies based on four key criteria: sustainable business models; robust balance sheets; proven management teams; and clear alignment of interest between majority and minority shareholders.

## Risk warning

The value of your investments and any income from them can go down as well as up and you may not get back the original amount invested. Investing in emerging markets is generally considered to involve more risk than developed markets. An investment concerns the acquisition of units or shares in a fund, and not underlying assets such as buildings or shares of a company, as these are only the underlying assets owned by the fund. The decision to invest in the promoted fund should also take into account all the characteristics or objectives of the promoted fund as described in the prospectus. Full list of relevant risks can be found in the KIID/KID and prospectus.
