You are advised to read it so you can make an informed decision about whether to invest.

PineBridge Global Emerging Markets Local Currency Bond Fund (the "Sub-fund")

Unit Class A (ISIN: IE00B3QK8V11), a sub-fund of PineBridge Global Funds

Management Company: PineBridge Investments Ireland Limited ("PBIL")

Objectives and Investment Policy

The Sub-Fund aims to provide a high return on your investment by investing in bonds that pay an attractive rate of interest and have a potential to increase in price.

The Sub-Fund will invest the majority of its assets in bonds issued by governments, government bodies and companies located in emerging markets although bond investments will typically be spread across a minimum of six emerging market countries. These bonds may pay fixed or variable rates of interest but the majority must have long-term and short term credit ratings of at least C from a rating agency such as Standard & Poor's or Moody's. The Sub-Fund may also invest in bonds with a credit rating of Selective Default. A "selective default" occurs when a borrower fails to pay one or more of their debt obligations but continues to meet other payment obligations.

Up to 20% of the value of the Sub-Fund may be invested in bonds issued in a single emerging market country - this percentage limit applies at the time of purchase. The Sub-Fund's investment in bonds can be denominated in the local currency of any emerging market country within these regions.

The Sub-Fund uses forward foreign exchange contracts to manage and offset currency risk. Under these contracts, the Sub-Fund will buy or sell foreign currency at an agreed exchange rate. The currency will be paid for and delivered at a future date.

The Sub-Fund is actively managed, in reference to a benchmark. Many of the securities in the Sub-Fund may also be represented in the benchmark because the Investment Manager uses it as a basis for

portfolio construction, but the Investment Manager has some discretion to deviate from the Benchmark composition and risk characteristics within certain risk parameters. Examples of this are being aware of and constraining differences in sector, country or constituent weightings between Sub-Fund and Benchmark. These constraints will vary over time and are subject to change. The Investment Manager does not target a specific tracking error for the Sub-Fund but historically, tracking errors have ranged from 1-4%. This is subject to change at all times. Though the Sub-Fund may share some composition and risk characteristics with the Sub-Fund's benchmark, the Investment Manager's discretion may result in performance that differs from the Sub-Fund's benchmark.

Distribution Policy

This Unit Class seeks to pay out stable distributions consisting of income, gains and, potentially, capital. Distributions from capital may amount to a re-payment out of your original investment. Over time this could lead to the reduction or complete exhaustion of your holdings in the Unit Class. You may elect to receive payments of or reinvest distributions from your units.

Subscription and Redemption

The Unit Class of the Sub-Fund may be redeemed on demand on any dealing day.

The price you pay or receive depends on the net asset value per unit on the dealing day when the unit is bought or sold.

Risk and Reward Profile

Lower risk Potentially lower reward Higher risk Potentially higher reward

This indicator is based on historical data and may not be a reliable indication of the future risk profile of the Sub-Fund. The risk and reward category shown is not guaranteed to remain unchanged and may shift over time. The lowest category does not mean investment is 'risk free'. This indicator is not a measure of the risk that you may lose the amount you have invested.

Why is this Sub-Fund in this Category?

The Sub-Fund is in category 5 because variations in the price of its units are typically medium. The Sub-Fund invests in assets that typically carry medium risk and offer medium rewards compared with other categories of assets.

Are there any other particular Risks?

Fixed Income Default Risk: The failure of an issuer or a counterparty to meet its payment obligations of a financial asset in the Fund will have a negative impact on the Sub-Fund.

Interest Rate Risk: Fixed income securities are typically interest rate sensitive, therefore changes in interest rates can result in positive or negative fluctuations in the value of the assets held by the Fund.

Liquidity Risk: The risk that the Fund may invest some of their assets in illiquid securities and other illiquid financial instruments, in respect of which they may not always be possible to execute a buy or sell order at the desired price or to liquidate the open position.

Below Investment Grade Debt Securities Risk: Where Sub-Funds invest in securities rated below investment grade, also known as high yield securities, they may be subject to a greater credit, liquidity and market risk than investment grade debt securities.

Currency Risk – Base Currency: Securities may be denominated in currencies different from the Sub-Fund's Base currency and there is a risk that changes in exchange rates and exchange control regulations may cause the value of the assets expressed in the Base Currency to rise or fall.

Emerging Markets Risks: Emerging markets are typically smaller, less transparent, and subject to evolving, less stable political and regulatory regimes and securities from these markets may be more expensive to transact in, bear higher risk or have lower liquidity.

For a detailed description of risks, please refer to the prospectus.

Charges

The charges you pay are used to pay the cost of running the Sub-Fund, including the costs of distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest
