## Investment strategy

BANTLEON YIELD is a balanced bond fund that seeks to achieve high interest income and additional returns without incurring excessive debtor risk.

The fund management is based on BANTLEON's immunisation strategy, which combines various return components: management of average bond maturities ranging from normally 2 to 6 years, management of the yield curve, management of sector, industry and bond allocation based on a medium to good credit rating (investment grade) and occasional inclusion of inflation-indexed bonds. The fund invests solely in investment grade bonds, especially global government bonds and also bonds from public authorities or companies from a member country of the OECD.

## Additional information and disclaimer

\* The bar chart illustrates the performance in the past. In the presentation of the gross performance (BVI method), all costs incurred at fund level (e.g. management and custodian bank fees) have already been taken into account. In the presentation of the net performance, the current maximum front-end load included in the issue price was also deducted. Since the front-end load for a one-time investment is only payable in the first year, the net performance differs from the BVI performance only in the first year. Investor-specific costs such as custody account fees are not taken into account. The figures are historical data and do not constitute a guarantee of future developments.
