

Fact Sheet

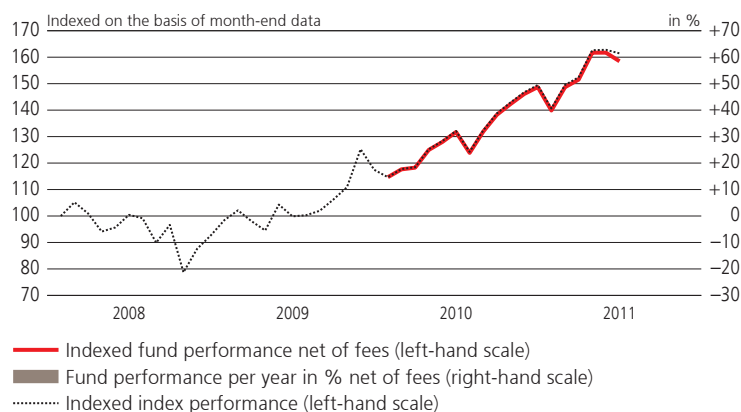

UBS-IS Gold (EUR hedged) ETF A

UBS Exchange Traded Funds

Fund description

- The fund invests in physical gold in the form of standard bars each weighing approx. 12.5kg (about 400 oz). The gold is kept in a high security vault in Switzerland.
- The investment objective is to replicate the performance of the London gold fixing hedged in EUR. The stock exchange price may differ from the net asset value.

Index description

The members of The London Gold Market Fixing Limited consist of Scotia Mocatta, Deutsche Bank, HSBC Investment Banking Group, Societe General Corporate & Investment Banking and Barclays Capital. The fix is carried out twice a day by the 5 members via a dedicated conference call facility. It provides a published benchmark price that is widely used as a pricing medium by producers, consumers, investors and central banks.

UBS-IS Gold (EUR hedged) ETF A

Key benefits

- Clients benefit from the flexibility of an exchange-traded investment and the investor protection offered by a fund.
- Provides access to the performance of gold with a single transaction.
- Feature: Right to redeem physical gold.
- The fund offers a high degree of transparency and cost efficiency and is easy to trade.

Risks

This UBS Exchange Traded Fund invests in gold and may therefore be subject to considerable fluctuations in value. Investors therefore require an investment horizon of at least five years and corresponding risk tolerance and capacity. All capital investments are subject to market fluctuations. Every fund has specific risks, which can significantly increase under unusual market conditions. The main risk of gold is that there is a lack of risk diversification due to the concentration of the investment in gold. The fund's assets are passively managed. As a result, the net asset value of the fund's assets is directly dependent on the performance of gold. Losses that could be avoided via active management (selling gold and increasing liquidity ahead of expected price falls) will not be offset.
