Benefits

Investors participate in some of the price gains when equity markets are rising, and benefit from the defensive characteristics of a bond investment in falling markets. The portfolio's return potential is considerably increased using carefully selected convertible bonds, without incurring significant additional risk.

Additional information

- Foreign currencies are largely hedged versus the reference currency.
- The portfolio manager is not tied to the benchmark in terms of investment selection or weight.

Risks

The fund invests mainly in convertible bonds. Changes in equity prices, interest rates, credit quality and other factors can subject the fund to high fluctuations in value, which are for the most part less pronounced than with equities but significantly higher than with traditional corporate bonds. The fund may use derivatives which can reduce investment risk or give rise to additional risks (inter alia the counterparty risk). The fund can invest in less liquid assets that may be difficult to sell in the case of distressed markets. The value of a unit may fall below the purchase price. This requires an elevated risk tolerance and capacity. Every fund reveals specific risks, a description of these risks can be found in the prospectus. All investments are subject to market fluctuations. Every fund has specific risks, which can significantly increase under unusual market conditions. Please consult your client advisor for more information on the investment risks of this product.

Please note that additional fees (e.g. entry or exit fees) may be charged. Please refer to your financial adviser for more details. Investors should read the Key Investor Information Document (KIID), Prospectus and any applicable local offering document prior to investing and to get complete information of the risks. Investors are acquiring units or shares in a fund, and not in a given underlying asset such as building or shares of a company. For a definition of financial terms refer to the glossary available at www.ubs.com/am-glossary.

Past performance is not a reliable indicator of future results. The calculated performance takes all costs on the fund level into consideration (ongoing costs). The entry and exit costs, which would have a negative impact on the performance, are not taken into consideration. If whole or part of the total costs to be paid is different from your reference currency, the costs may increase or decrease as a result of currency and exchange rate fluctuations. Commissions and costs have a negative impact on the investment and on the expected returns. If the currency of a financial product or financial service is different from your reference currency, the return can increase or decrease as a result of currency and exchange rate fluctuations.
