KEY RISKS

ESG Strategy Risk: Risks associated with investment policies that take an ESG approach. The use of ESG criteria can affect the performance of a Sub-fund, which may, therefore, differ from that of other Sub-funds with similar investment policies but which do not take ESG criteria into account.

Currency Risk: Risks associated with fluctuations in exchange rates having an impact on the value of the investment when the fund invests in other currencies.

Credit Risk: Risks associated with issuers of debt securities, even those with a very high rating, may not be able to make payments to investors, or the fear associated with this risk may result in a decrease in the value of their debt securities.
