Fund Manager comments

Echiquier Positive Impact Europe A turned in a positive monthly performance of 3.94% and of 16.85% year-to-date. The end-of-year rally continued in December, buoyed by the rate cut. The Fed is forecasting monetary easing in 2024, against a backdrop of falling inflation and a desire to achieve a soft landing for the economy. This will benefit cyclical stocks and small and mid-caps in particular. Against this backdrop, the fund outperformed its benchmark index in December. Among the best contributors were the semiconductor sector with ASML and companies exposed to construction such as SCHNEIDER ELECTRIC. EXPERIAN continues to benefit from its reassuring quarterly publication. In contrast, our defensive stocks such as MUNICH RE, COLOPLAST and SCA underperformed. Over the month, we increased our exposure to small and mid-caps and interest-rate-sensitive stocks such as HALMA, EDPR and ESKER, taking profits on defensive stocks AIR LIQUIDE and SAP and reducing our exposure to financials. The fund participated in the CAREL capital increase.
