ODDO BHF Money Market CI-EUR

This Fund is managed by ODDO BHF Asset Management GmbH.

ISIN: DE000A0YCBR6

INVESTMENT OBJECTIVES

ODDO BHF Money Market is a money market fund that actively invests in a mix of money market instruments. The Fund primarily invests in covered bonds (Pfandbriefe), variable or fixed-income debt securities, money market instruments and public issuer bonds (primarily from the European Union or a signatory state to the Agreement on the European Economic Area), and bank time deposits. As all investments are denominated in euro, there is no currency risk.

Investments are selected according to the judgement of our capital markets experts, who focus specifically on high issuer credit quality.

The fund manager does not use a benchmark index, but actively selects countries and sectors based on the macroeconomic environment. An analysis is carried out on the credit rating of the most promising issuers for the portfolio, occasionally drawing on quantitative and/or qualitative research.

The aim of investing in the Fund is to obtain a steady increase in value in line with money market interest rates.

The unit class is intended specifically for institutional investors. The minimum investment is EUR 250,000.

The Fund may not be suitable for investors who wish to withdraw their capital within a period of three months or less.

The fund currency is the euro.

The returns obtained by the unit class are reinvested in the fund, not distributed.

You can redeem your units on any trading day.

RISK AND RETURN PROFILE

The fund's risk class is determined using past data, and is therefore not an indicator of future performance. The classification is not a guarantee and may change over time. If a fund is in risk class 1, this does not mean that there is no risk that its value will fluctuate.

The fund is in risk class 1 because past data shows average annual value fluctuations of 0–0.5%. Generally speaking, higher value fluctuations come with greater risks of loss but also greater opportunities for returns.

The following risks may be significant for the fund but do not have any direct effect on its classification:

- **Liquidity risks:** Impaired Fund liquidity may render the Fund temporarily or permanently unable to meet its payment obligations and/or temporarily or permanently unable to satisfy the redemption requests of investors.
- **Credit risks:** The Fund invests mainly in money market instruments and bonds. If the creditworthiness of individual issuers decreases or they become insolvent, the value of their money market instruments and bonds will fall.
- **Concentration risk:** The Fund may invest up to 100% of its value in the following issuers: Federal Republic of Germany; the German federal states; the European Union; the EU Member States Belgium, Denmark, Finland, France, Luxembourg, Netherlands, Austria and Sweden; the signatory state to the Agreement on the European Economic Area Norway; the member state of the Organisation for Economic Cooperation and Development (excluding EEA states) Switzerland; the European Stability Mechanism (ESM); the European Investment Bank (EIB); the European Bank for Reconstruction and Development; the Council of Europe Development Bank and the International Bank for Reconstruction and Development. If the Fund invests solely in these issuers, it is dependent exclusively on their performance.

A detailed description of all risks can be found in the fund's Prospectus under "Risk Information".
