Distribution type	Capitalisation
Minimum investment	EUR 1,000,000.00
Benchmark	MSCI World Small & Mid Cap Index EUR

SFDR article 9

The fund has sustainable investment objectives aligned with SFDR article 9 criteria. These objectives are:

- make money work for environmental and social change
- contribute to the transition to an economy within planetary boundaries
- contribute to the transition to an economy where all humans can enjoy a prosperous life.

Triodos Pioneer Impact Fund aims to generate positive impact and competitive financial returns from a concentrated portfolio of small- and mid-cap companies pioneering the transition to a sustainable society.

The fund mainly invests in equities of companies in developed countries and whose products or services contribute to at least one of the following transitions: resource transition, energy transition, food transition, societal transition or wellbeing transition.

Highlights

- Triodos Pioneer Impact Fund generated a return (after costs) of 4.81%, while the benchmark yielded 4.13%.
- Equity markets globally realised the fifth positive month in row. For the first time this year small- and midcaps performed better than their large cap counterparts. The market got a boost after the Federal Reserve confirmed that interest rates will be lowered during the year. Investors are more convinced about global economies avoiding a recession.
- The fund had a very strong month and is now also in positive territory for the year. The fund benefited from the performance of two companies that could potentially be acquired. Paper packaging company DS Smith was approached by two peers for a take-over. Hearing aid company GN Store Nord saw its largest shareholder Demant increasing its equity stake, fuelling expectations for a full bid at some stage. The best performing stock of 2023 BESI, fell after a report that its newest machines might be used later than expected by some clients. The fund’s largest sectors are Industrials, Consumer Discretionary and Information Technology. The fund has no exposure to Energy and Real Estate.

Net Return in %

As per end of March 2024

	1M	3M	YTD	1 Y	3Y avg	5Y avg
Fund	4.81	4.53	4.53	3.47	-0.58	8.35
Benchmark	4.13	8.39	8.39	17.94	5.48	9.20

Calendar Year Net Return in %

	2019	2020	2021	2022	2023
Fund	35.98	22.20	7.48	-13.46	7.39
Benchmark	29.35	6.34	25.35	-13.82	11.93

Risks

The risk indicator assumes you keep the product for 5 years. The actual risk can vary significantly if you cash in at an early stage and you may get back less. The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 4 out of 7, which is a medium risk class. This rates the potential losses from future performance at a medium level. The product may be exposed to risks, such as concentration risk, currency risk and small- and mid-cap equity risk. This product does not include any protection from future market performance so you could lose some or all of your investment.

Principal Adverse Impact Indicators (PAIs)

GHG intensity of investee companies: The GHG intensity is a relative measure of greenhouse gas (GHG) emissions. It is the amount of GHG produced per unit of revenue generated by the company, measured in tonnes of CO2 per EURm generated in revenue. The carbon intensity is then weighted using the portfolio weight to get a weighted average for the portfolio.

Non-recycled waste ratio: For each company the non-recycled waste ration is the total amount in metric tons of non-recycled waste produced dividend by the amount invested in EURm. This is expressed as a weighted average.

Excessive CEO pay ratio: This metric measures the ratio within investee companies of the annual total compensation for the highest compensated individual to the median annual total compensation for all employees.
