A sub-fund of: Legg Mason Global Funds plc

Managed by: Franklin Templeton International Services S.à r.l., part of the Franklin Templeton group of companies.

Objectives and Investment Policy

Objective

The fund's goal is to achieve growth of the fund's value in the long term.

Investment Policy

- The fund will invest at least 70% of its assets in shares of US companies.
- The fund's portfolio managers will try to focus on companies that they believe are experiencing or have potential to experience above-average growth of earnings and/or cash flow.
- The fund will typically be invested in 50 to 70 companies.
- The fund may also invest up to 20% in companies outside of the US.

Benchmarks: Russell 3000 Growth Index and S&P 500 Index

Manager's Discretion: The fund is actively managed. The investment manager has discretion in selecting investments within the fund's objective and investment policies. The benchmarks are used for performance comparison purposes. The Russell 3000 Growth Index is considered the fund's primary benchmark because it consists of growth securities, which is aligned with the investment manager's

focus on growth securities in managing the fund. The performance of the S&P 500 Index may also be provided because it is considered a proxy for the US equity market. While most of the fund's securities will be components of one or both benchmarks, the weightings of the holdings may differ materially from the weightings in the benchmarks. The fund may also invest in securities that are not included in the benchmarks. The fund's percentage exposures to sectors and industries may differ materially from those of the benchmarks.

Fund's Base Currency: US Dollar

Share Class Currency: Euro

Transaction Costs: The fund bears costs in buying and selling investments, which may have a material impact on the fund's performance.

Dealing Frequency: You can buy, sell and switch your shares on each day that the New York Stock Exchange is open for business.

Subscription Restrictions: Grandfathered share classes are closed to any subsequent subscriptions with some exceptions. For these exceptions please refer to the "Summary" section in the prospectus.

Treatment of Income: Income and gains from the fund's investments are not paid but instead are reflected in the fund's share price.

Risk and Reward Profile

The indicator is based on the volatility of the returns (past performance) of the reported share class (calculated on a 5 year rolling return basis). Where a share class is inactive / has less than 5 years of returns, the returns of a representative benchmark are used.

There is no guarantee that the fund will remain in the indicator category shown above and the categorisation of the fund may shift over time. Historical data, which is used in calculating the indicator, may not be a reliable indicator of the future risk profile of this fund.

The lowest category does not mean a risk-free investment.

The fund does not offer any capital guarantee or protection and you may not get back the amount invested.

The fund is in its risk/reward category because a concentrated investment (the fund holds fewer investments than many other funds) in shares of US companies from various sectors has historically been subject to large fluctuations in value.

The fund is subject to the following risks which are materially relevant but may not be adequately captured by the indicator:

Investment in company shares: The fund invests in shares of companies, and the value of these shares can be negatively affected by changes in the company, its industry or the economy in which it operates.

Geographical focus: This fund invests primarily in the United States, which means that it is more sensitive to local economic, market, political or regulatory events in the United States, and will be more affected by these events than other funds that invest in a broader range of regions.

Concentrated fund: The fund invests in fewer companies than other funds which invest in shares usually do. This means that the fund does not spread its risk as widely as other funds and will therefore be affected more if an individual company has significant losses.

Sustainability: The fund's integration of sustainability risks in the investment decision process may have the effect of excluding profitable investments from the investment universe of the fund and may also cause the fund to sell investments that will continue to perform well. A sustainability risk could materialise due to an environmental, social or governance event or condition which may impact the fund's investments and negatively affect the returns of the fund.

Fund operations: The fund is subject to the risk of loss resulting from inadequate or failed internal processes, people or systems or those of third parties such as those responsible for the custody of its assets.

Class currency: The value of your investment may fall due to changes in the exchange rate between the currency of your share class and the base currency of the fund.

For further explanation on the risks associated with an investment in the fund, please refer to the section entitled "Risk Factors" in the base prospectus and "Primary Risks" in the fund supplement.
