Janus Henderson

Global Investment Grade Bond Fund Class I2 USD ISIN: IE00B3ZSZ594

A sub-fund of Janus Henderson Capital Funds plc, an Irish Investment Company (IIC) managed by Janus Henderson Investors Europe S.A.
Fund Currency: USD Share Class Currency: USD

Objective and investment policy

Objective

The Fund aims to provide a return, from a combination of income and capital growth over the long term.

Performance target: To outperform the Bloomberg Global Aggregate Corporate Bond Hedged USD Index by 1.25% per annum, before the deduction of charges, over any 5 year period.

Investment policy

The Fund invests at least 80% of its assets in a global portfolio of investment grade (equivalent to BBB rated or higher) bonds, of issuers located anywhere in the world. Up to 20% may be invested in developing markets.

The Fund may also hold other assets including other types of bonds (including convertible bonds), preference shares, cash and money market instruments.

The Sub-Investment Adviser may use derivatives (complex financial instruments), including total return swaps, with the aim of making investment gains in line with the Fund's objective, to reduce risk or to manage the Fund more efficiently.

The Fund is actively managed with reference to the Bloomberg Global Aggregate Corporate Bond Hedged USD Index, which is broadly representative of the bonds in which it may invest, as this forms the basis of the Fund's performance target. The Sub-Investment Adviser has discretion to choose investments for the Fund with weightings different to the index or not in the index, but at times the Fund may hold investments similar to the index.

Strategy

The Sub-Investment Adviser has a forward-looking fundamental approach to credit research and seeks to create a portfolio of best ideas across all fixed

income sectors to express their high-conviction views. A fundamental company research-driven investment process focused on investment-grade corporate bonds from companies around the world committed to transforming and improving their balance sheets, free cash flow generation, quality of management and security valuation drive security selection. A dynamic 'top down' (market and economic analysis) framework enables the Sub-Investment Adviser to assess the stage of credit cycle, identify opportunities and take an appropriate amount of risk.

Other Information The Sub-Investment Adviser will seek to promote environmental, social and/or governance (ESG) principles in managing the Fund, which may include the exclusion of issuers that the Sub-Investment Adviser considers could contribute to significant ESG harm, as further described in the prospectus.

Distribution policy This share class accumulates income which is retained within the price of the share class.

Recommendation This Fund may not be appropriate for investors who plan to withdraw their money within 5 years.

The Fund is designed to be used only as one component of several in a diversified investment portfolio. Investors should consider carefully the proportion of their portfolio invested into this Fund.

You can buy, sell or switch shares in the Fund on any business day, as defined in the Company's Prospectus.

Risk and reward profile

The value of an investment and any income from it can go up or down. When you sell your shares they may be worth less than you paid for them.

The rating above is based on the historic volatility of the share class. Historic data may not be a reliable indication of the future risk profile of the Fund. The rating is not guaranteed and may change over time.

The share class appears at 4 out of 7. Share classes in higher categories have shown greater and/or more frequent variations in Net Asset Value in the past five years than those in lower categories. The lowest category does not mean risk free.

Other material risks not captured by the rating:

Credit Risk An issuer of a bond (or money market instrument) may become unable or unwilling to pay interest or repay capital to the Fund. If this happens or the market perceives this may happen, the value of the bond will fall.

Interest Rates When interest rates rise (or fall), the prices of different securities will be affected differently. In particular, bond values generally fall when interest rates rise (or are expected to rise). This risk is typically greater the longer the maturity of a bond investment.

Country or Region If a Fund has a high exposure to a particular country or geographical region it carries a higher level of risk than a Fund which is more broadly diversified.

Derivatives and Leverage The Fund may use derivatives to help achieve its investment objective. This can result in leverage (higher levels of debt), which can magnify an investment outcome. Gains or losses to the Fund may therefore be greater than the cost of the derivative. Derivatives also introduce other risks, in particular, that a derivative counterparty may not meet its contractual obligations.

Exchange Rates If the Fund holds assets in currencies other than the base currency of the Fund, or you invest in a share/unit class of a different currency to the Fund (unless hedged, i.e. mitigated by taking an offsetting position in a related security), the value of your investment may be impacted by changes in exchange rates.

Liquidity Securities within the Fund could become hard to value or to sell at a desired time and price, especially in extreme market conditions when asset prices may be falling, increasing the risk of investment losses.

Charges to Capital Some or all of the ongoing charges may be taken from capital, which may erode capital or reduce potential for capital growth.

Counterparty Risk and Operational Risk The Fund could lose money if a counterparty with which the Fund trades becomes unwilling or unable to meet its obligations, or as a result of failure or delay in operational processes or the failure of a third party provider.

For more information please see the Company's Prospectus.

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of managing and distributing it. These charges reduce the potential growth of your investment.

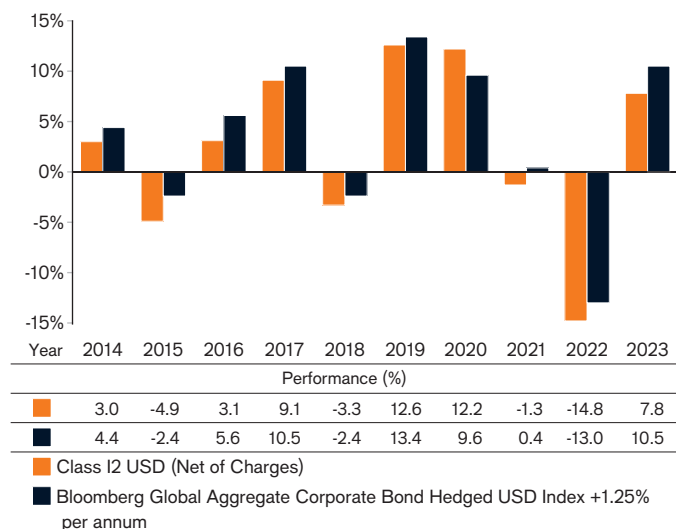

If you invest through a third party provider you are advised to consult them directly as charges, performance and terms and conditions may differ materially to those shown in this document.

One-off charges taken before or after you invest*

Entry Charge	2.00%
Exit Charge	0.00%

* The charges shown are maximum figures. In some cases you may pay less.

Past performance

Charges taken from the Fund over a year

Ongoing Charges	0.60%
-----------------	-------

The ongoing charges are based on actual annualised expenses for the period ending 20 December 2023. Ongoing charges may vary from year to year. The figure for ongoing charges excludes portfolio transaction costs, except in the case of an initial charge paid by the Fund when buying shares or units in another Fund.

For more information about Charges please see the Company's Prospectus.

The past performance is calculated in USD.

The Fund and the share class were launched in October 2010.

Past performance does not predict future returns.

The past performance takes into account all charges except one-off charges. Please note that while the Fund aims to achieve its performance target before the deduction of charges, the chart and table illustrate the actual performance of the share class after the deduction of charges.

The Fund does not aim to track the performance of the benchmark.
