

BLACKROCK FIXED INCOME DUBLIN FUNDS PLC

iShares UK Credit Bond Index Fund (IE) Inst GBP

SEPTEMBER 2023 FACTSHEET

Performance, Portfolio Breakdowns and Net Asset information as at: 30-Sep-2023. All other data as at: 20-Oct-2023.

This document is marketing material. Investors should read the KIID/PRIIPs document and prospectus prior to investing, and should refer to the prospectus for the funds full list of risks. Investors should read the Key Investor Information Document and Prospectus prior to investing.

FUND OVERVIEW

The BlackRock UK Credit Bond Index Fund aims to generate a total return, taking into account both capital and income returns, which reflects the total return of the sterling denominated bond market, excluding UK gilts

KEY RISKS: All financial investments involve an element of risk. Therefore, the value of your investment and the income from it will vary and your initial investment amount cannot be guaranteed. The fund invests in fixed interest securities issued by companies which, compared to bonds issued or guaranteed by governments, are exposed to greater risk of default in the repayment of the capital provided to the company or interest payments due to the fund. The fund investments may be subject to liquidity constraints, which means that shares may trade less frequently and in small volumes, for instance smaller companies. As a result, changes in the value of investments may be more unpredictable. In certain cases, it may not be possible to sell the security at the last market price quoted or at a value considered to be fairest. The fund invests in fixed interest securities such as corporate or government bonds which pay a fixed or variable rate of interest (also known as the 'coupon') and behave similarly to a loan. These securities are therefore exposed to changes in interest rates which will affect the value of any securities held. Investment risk is concentrated in specific sectors, countries, currencies or companies. This means the Fund is more sensitive to any localised economic, market, political or regulatory events.

(Continued on page 2)

CAPITAL AT RISK: The value of investments and the income from them can fall as well as rise and are not guaranteed. Investors may not get back the amount originally invested.

KEY FACTS

Asset Class	Fixed Income (FI)
Morningstar Category	GBP Corporate Bond
Fund Launch Date	30-Sep-2000

SUSTAINABILITY CHARACTERISTICS

Sustainability Characteristics can help investors integrate non-financial, sustainability considerations into their investment process. These metrics enable investors to evaluate funds based on their environmental, social, and governance (ESG) risks and opportunities. This analysis can provide insight into the effective management and long-term financial prospects of a fund.

The metrics below have been provided for transparency and informational purposes only. The existence of an ESG rating is not indicative of how or whether ESG factors will be integrated into a fund. The metrics are based on MSCI ESG Fund Ratings and, unless otherwise stated in fund documentation and included within a fund's investment objective, do not change a fund's investment objective or constrain the fund's investable universe, and there is no indication that an ESG or Impact focused investment strategy or exclusionary screens will be adopted by a fund. For more information regarding a fund's investment strategy, please see the fund's prospectus.

MSCI ESG Fund Rating (AAA-CCC)	AA	MSCI ESG Quality Score (0-10)	7.53
MSCI ESG Quality Score - Peer Percentile	86.05%	MSCI ESG % Coverage	89.85%
Fund Lipper Global Classification	Bond GBP Corporates	MSCI Weighted Average Carbon Intensity (Tons CO2E/\$M SALES)	71.15
Funds in Peer Group	430		

All data is from MSCI ESG Fund Ratings as of **21 Sep 2023**, based on holdings as of **31 May 2023**. As such, the fund's sustainable characteristics may differ from MSCI ESG Fund Ratings from time to time.

To be included in MSCI ESG Fund Ratings, 65% (or 50% for bond funds and money market funds) of the fund's gross weight must come from securities with ESG coverage by MSCI ESG Research (certain cash positions and other asset types deemed not relevant for ESG analysis by MSCI are removed prior to calculating a fund's gross weight; the absolute values of short positions are included but treated as uncovered), the fund's holdings date must be less than one year old, and the fund must have at least ten securities.

ESG GLOSSARY:

MSCI ESG Fund Rating (AAA-CCC): The MSCI ESG Rating is calculated as a direct mapping of ESG Quality Scores to letter rating categories (e.g. AAA = 8.6-10). The ESG Ratings range from leader (AAA, AA), average (A, BBB, BB) to laggard (B, CCC).

MSCI ESG Quality Score - Peer Percentile: The fund's ESG Percentile compared to its Lipper peer group.

Fund Lipper Global Classification: The fund peer group as defined by the Lipper Global Classification.

Funds in Peer Group: The number of funds from the relevant Lipper Global Classification peer group that are also in ESG coverage.

MSCI ESG Quality Score (0-10): The MSCI ESG Quality Score (0 - 10) for funds is calculated using the weighted average of the ESG scores of fund holdings. MSCI rates underlying holdings according to their exposure to industry specific ESG risks and their ability to manage those risks relative to peers.

MSCI ESG % Coverage: Percentage of the fund's holdings for which the MSCI ESG ratings data is available. The MSCI ESG Fund Rating, MSCI ESG Quality Score and MSCI ESG Quality Score – Peer Percentile metrics are displayed for funds with at least 65% coverage (or 50% for bond funds and money market funds).

MSCI Weighted Average Carbon Intensity (Tons CO2E/\$M SALES): Measures a fund's exposure to carbon intensive companies. This figure represents the estimated greenhouse gas emissions per \$1 million in sales across the fund's holdings. This allows for comparisons between funds of different sizes.

MSCI Weighted Average Carbon Intensity % Coverage: Percentage of the fund's holdings for which MSCI Carbon Intensity data is available. The MSCI Weighted Average Carbon Intensity metric is displayed for funds with any coverage. Funds with low coverage may not fully represent the fund's carbon characteristics given the lack of coverage.

IMPORTANT INFORMATION:

Certain information contained herein (the "Information") has been provided by MSCI ESG Research LLC, a RIA under the Investment Advisers Act of 1940, and may include data from its affiliates (including MSCI Inc. and its subsidiaries ("MSCI")), or third party suppliers (each an "Information Provider"), and it may not be reproduced or disseminated in whole or in part without prior written permission. The Information has not been submitted to, nor received approval from, the US SEC or any other regulatory body. The Information may not be used to create any derivative works, or in connection with, nor does it constitute, an offer to buy or sell, or a promotion or recommendation of, any security, financial instrument or product or trading strategy, nor should it be taken as an indication or guarantee of any future performance, analysis, forecast or prediction. Some funds may be based on or linked to MSCI indexes, and MSCI may be compensated based on the fund's assets under management or other measures. MSCI has established an information barrier between equity index research and certain Information. None of the Information in and of itself can be used to determine which securities to buy or sell or when to buy or sell them. The Information is provided "as is" and the user of the Information assumes the entire risk of any use it may make or permit to be made of the Information. Neither MSCI ESG Research nor any Information Party makes any representations or express or implied warranties (which are expressly disclaimed), nor shall they incur liability for any errors or omissions in the Information, or for any damages related thereto. The foregoing shall not exclude or limit any liability that may not by applicable law be excluded or limited.

GLOSSARY

Market Capitalization: is the total value of the shares issued by a company which trades on the stock exchange.

Ongoing Charge: is a figure representing all annual charges and other payments taken from the fund.

Quartile Rank: categorizes a fund into four equal bands based on their performance over a specified period within the relevant Morningstar's sector. The top or first quartile contains the top 25% of funds, through to the bottom or 4th quartile which contains the bottom 25% of funds.
