BNY MELLON
INVESTMENT MANAGEMENT

BNY Mellon Absolute Return Equity Fund

EURO T (HEDGED) (ISIN: IE00B3TH3V40)

a sub-fund of BNY Mellon Global Funds, plc. This Fund is managed by BNY Mellon Fund Management (Luxembourg) S.A.

Objectives and Investment Policy

OBJECTIVE

To provide a positive absolute return in all market conditions.

POLICY

The Fund will:

- invest primarily in Europe, including the UK;
- invest in company shares (i.e. equities) and similar investments;
- take positions in specific pairs of company shares or similar investments. The Fund will increase exposure (i.e. hold a long position) to the investment it favours and short (using derivatives) the investment it does not favour;
- invest in derivatives (financial instruments whose value is derived from other assets) to help achieve the Fund's investment objective. The Fund will also use derivatives with the aim of risk or cost reduction or to generate additional capital or income;
- invest on a long and short basis;
- invest significantly in cash and cash-like investments; and
- limit investment in other collective investment schemes to 10%.

The Fund may:

- invest in countries which may be considered emerging markets in Europe.

Benchmark: The Fund will measure its performance against SONIA 30-day compounded (the "Cash Benchmark"). SONIA (Sterling Over Night Index Average) is a measure of the rate at which interest is paid

on sterling short-term wholesale funds in circumstances where credit, liquidity and other risks are minimal. On each London business day, SONIA is measured as the trimmed mean, rounded to four decimal places, of interest rates paid on eligible sterling denominated deposit transactions. SONIA is a nearly risk-free rate meaning no bank credit risk is included, the rate can rise or fall as a result of central bank policy decisions or changing economic conditions.

The Cash Benchmark is used as a target against which to measure its performance on a rolling 12 month basis after fees.

The Fund is actively managed, which means the Investment Manager has discretion over the selection of investments, subject to the investment objective and policies disclosed in the Prospectus.

OTHER INFORMATION

Share Class Hedging: The Fund's base currency is GBP whereas this share class currency is EUR. In order to reduce the risk of exchange rate movements between the share class currency and the base currency, a hedging strategy is used, although its outcome is not guaranteed.

Treatment of income: net income from investments will be retained within the Fund and reflected in the value of your shares.

Dealing: you can buy and sell your shares in the Fund between 9:00 and 17:00 (Irish time) on each business day in Ireland. Instructions received before 12:00 will receive the price quoted on that day. The minimum initial investment for this share class is EUR 5,000,000.

Risk and Reward Profile

Lower risk
Potentially lower reward

Higher risk
Potentially higher reward

1 2 **3** 4 5 6 7

We have calculated the risk and reward category, as shown above, using a method of calculation derived from EU rules. It is based on the rate at which the value of the Fund has moved up and down in the past (i.e. volatility) and is not a guide to the future risk and reward category of the Fund. The category shown is not a target or guarantee and may shift over time. Even the lowest category 1 does not mean a risk-free investment.

This Fund is in category 3 because its historical value has shown moderately low volatility. With a Fund of category 3, you have a moderately low risk of losing money but your chance for gains is also moderately low.

THE FOLLOWING RISKS MAY NOT BE FULLY CAPTURED BY THE RISK AND REWARD INDICATOR:

- **Objective/Performance Risk:** There is no guarantee that the Fund will achieve its objectives.
- **Performance Aim Risk:** The performance aim is not a guarantee, may not be achieved and a capital loss may occur. Funds which have a higher performance aim generally take more risk to achieve this and so have a greater potential for returns to vary significantly.

- **Currency Risk:** This Fund invests in international markets which means it is exposed to changes in currency rates which could affect the value of the Fund.
- **Derivatives Risk:** Derivatives are highly sensitive to changes in the value of the asset from which their value is derived. A small movement in the value of the underlying asset can cause a large movement in the value of the derivative. This can increase the sizes of losses and gains, causing the value of your investment to fluctuate. When using derivatives, the Fund can lose significantly more than the amount it has invested in derivatives.
- **Emerging Markets Risk:** Emerging Markets have additional risks due to less-developed market practices.
- **Share Class Hedging Risk:** The hedging strategy is used to reduce the impact of exchange rate movements between the share class currency and the base currency. It may not completely achieve this due to factors such as interest rate differentials.
- **SRRI misrepresentation risk:** Due to the management style of this fund, the SRRI figure may at times be disproportionately low and may not accurately represent the true risk of the fund under certain market conditions
- **Counterparty Risk:** The insolvency of any institutions providing services such as custody of assets or acting as a counterparty to derivatives or other contractual arrangements, may expose the Fund to financial loss.

A complete description of risk factors is set out in the Prospectus in the section entitled "Risk Factors".

Charges

The charges cover the costs of running the Fund, including the costs of marketing and selling. These charges reduce the potential growth of your investment.
