

## E Class Accumulation and Income Shares

### Fund Description

The Global Multi-Asset Fund is a 3-in-1 integrated asset allocation mutual fund that integrates: a risk diversified multi-asset class portfolio, relative value strategies designed to provide return-enhancement potential and hedging strategies to help protect against systematic risk. The fund holds a combination of PIMCO Funds and other instruments.

### Investor Benefits

This fund's beta, alpha, and tail-risk hedging strategies form a comprehensive asset allocation solution.

### The Fund Advantage

The fund's focus on diversification across global risk factors and hedging may offer superior risk management and diversification.

### Risk Profile

Share value can go up as well as down and any capital invested in the Fund may be at risk. The Fund may invest in non-U.S. and non-Eurozone securities which involve potentially higher risks including currency fluctuations and political or economic developments. These may be enhanced when investing in emerging markets. Funds that invest in high-yield, lower-rated securities, will generally involve greater volatility and risk to principal than investments in higher-rated securities. The Fund may use derivatives for hedging or as part of its investment strategy which may involve certain costs and risks. Portfolios investing in derivatives could lose more than the principal amount invested. For more details on the fund's potential risks, please read the Key Investor Information Document.

## About the Benchmark

The benchmark is a blend of 60% MSCI World Index and 40% USD Hedged Barclays Global Aggregate Index. The MSCI World Index is a free float-adjusted market capitalization weighted index that is designed to measure the equity market performance of developed markets. As of May 27, 2010 the MSCI World Index consisted of the following 24 developed market country indices: Australia, Austria, Belgium, Canada, Denmark, Finland, France, Germany, Greece, Hong Kong, Ireland, Israel, Italy, Japan, Netherlands, New Zealand, Norway, Portugal, Singapore, Spain, Sweden, Switzerland, the United Kingdom, and the United States. The index represents the unhedged performance of the constituent stocks, in US dollars. It is not possible to invest directly in an unmanaged index. Barclays Global Aggregate Index provides a broad-based measure of the global investment-grade fixed income markets. The three major components of this index are the U.S. Aggregate, the Pan-European Aggregate, and the Asian-Pacific Aggregate Indices. The index also includes Eurodollar and Euro-Yen corporate bonds, Canadian Government securities, and USD investment grade 144A securities. It is not possible to invest directly in an unmanaged index. Prior to November 1st, 2008, this index was published by Lehman Brothers.
