Warning

No subscription can be received on the basis of the financial statements alone. Subscriptions are only valid if made on the basis of the current prospectus, accompanied by the latest annual report and the most recent semi-annual report, if published thereafter.

The prospectus, the statutes, the annual and semi-annual reports are made available to the shareholders at the depositary bank and at the Company's registered office as well as at the local sales offices or main client servicing contacts identified in this report. They will also be sent free of charge to anyone who so requests.

The information given in this report is for reference purposes only. It is not a guide to future results.

Only the English version of the present Annual Report has been audited by the Réviseur d'Entreprises agréé. Consequently, the Audit Report only refers to the English version of the report; other versions result from a conscientious translation. In case of differences between the English version and the translation, the English version shall be the authentic text.

Management's report

Economic context

In the fourth quarter of 2017, the acceleration of global growth continued and during the past three quarters growth has been hovering a bit above the ceiling of the range seen since 2011. At the same time, the underlying composition of growth is changing. The relative importance of consumer spending has been declining and investment spending has become a bigger driver of growth, which is a positive development because of the favourable implications for productivity growth. Consumer spending growth is not likely to slow down substantially, however. Labour markets are strong, consumer confidence is high and consumer balance sheets in the developed world look healthy. We are optimistic that the current global growth momentum will be maintained until well into 2019. In the near term, the risks could even be tilted somewhat to the upside. These risks reside in a larger-than-expected United States (“US”) private sector spending response to the combination of fiscal easing as a result of the tax plan passed by Congress at the end of 2017, deregulation in some sectors and high levels of business and consumer confidence. Upward surprises in Eurozone confidence data suggest that underlying growth momentum in the euro region is more robust than previously thought. Driving this momentum is the strong feedback loop between income and spending growth, underpinned by easy financial conditions and credit supply. This momentum has a lot further to run due to pent-up demand. Supply-side constraints are not likely to put a brake on this momentum anytime soon. In Japan, Prime Minister Shinzo Abe’s victory in the October snap elections means that the government can continue to pursue constitutional reform. On the economic policy front, the continuation of “Abenomics” seems assured for the next four years. The policy mix remains extremely favourable to a continuation of the “high-pressure economy”, where strong demand is eliciting a positive supply-side response. Growth momentum in Emerging Markets (“EM”) remains strong, driven by global trade growth and a broad-based pickup in EM credit growth. Nevertheless, the positive growth momentum may soften in the coming months because of the steady increase in Federal Reserve (“Fed”) rate expectations since September and the resulting impact on EM financial conditions.

Global growth showed signs of peaking in the first quarter of 2018 after accelerating for more than a year, but remained at a robust level. The economic surprise indicator for Developed Markets (“DM”) has turned downwards, primarily driven by Europe. Industrial production has shown a mild deceleration, retail sales have begun to feel the impact of rising oil prices and the global capital expenditure (“capex”) cycle is showing signs of reaching its peak. Following the passage in December of a tax bill that included a big reduction in the corporate tax rate, the US Congress agreed in February on a spending bill that could boost spending by 300 billion USD over the next two years. We raised our US growth forecasts in February on the back of the expected increase in US government spending. We also raised our Eurozone growth forecasts somewhat in response to strong survey and real data. There was a moderate decline in some survey indicators in February, as would be expected once activity levels off at a sturdy pace. More fundamentally the region is benefitting from the confluence of an upturn in three types of investment cycle: inventories, capex and construction. This should keep growth pretty strong in the near term. Wage increases agreed in mid-March among some of Japan’s biggest companies added to doubts that the Bank of Japan (“BoJ”) will be able to hit its 2.00% inflation target. Meanwhile the Japanese government has begun laying the groundwork for increased spending next year to offset the impact of a planned nationwide sales tax hike and to prevent growth from slowing. In EM, the key trend of the past few quarters continued: domestic demand indicators strengthen while export-related indicators soften or no longer strengthen. At the basis of this stands the steady recovery of EM credit growth ex-China to currently 10.00%. The Chinese economic picture remained rather good, with limited risk of a substantial growth slowdown in the short term and financial-system risk continuing to decline.

The month of April featured ongoing trade disputes between the US and China, and geopolitical tensions while May was dominated by a flare-up of political risk in the Eurozone. The resulting weakness of the euro had a big impact on the performance of the different asset classes. Equities, real estate and commodities all benefitted from this. Also Bund yields came under pressure following weaker Purchasing Managers Index (“PMI”) data in the Eurozone and a flight to safety caused by the Italian political swings. The only asset class that lagged was fixed income spreads. Especially the riskier categories high yield and Emerging Markets Debt (“EMD”) came further under pressure. While the political developments in Italy remain a source of uncertainty, the appointment of a less “euro-sceptic” finance minister, Giovanni Tria, combined with recent statements by leaders of the new coalition that a euro exit was never part of the program, could point to a less confrontational tone when the budget debate begins with Brussels. However, we note that the Five Star Movement (“M5s”)/Northern League (“LN”) program is still far from being compliant with European Union (“EU”) budget rules and Brussels has in the past shown only limited flexibility on that front.

Management's report (continued)

The risk of a widespread global downturn appears to have receded since the first quarter, although we still cannot exclude it completely. With most of the first quarter GDP (“Gross domestic product”) reports in, it turns out that the slowdown in the first quarter was concentrated in the goods sector. The resilience of the non-goods sector was mirrored in the services PMI and the strong uptrend in service sector new orders suggests the potential for some future strengthening here. This is good news because the non-goods sector is actually 80.00% of the global economy. As far as the DM consumer is concerned it stands to reason that the slowdown is the result of payback from a strong fourth quarter, higher oil prices and idiosyncratic factors such as weather and strike distortions. The weakness of consumption was pretty evident in GDP reports in the US, Europe and Japan but the good news is that the higher-frequency data suggest a rebound in the second quarter may be in the offing.

In June, fears of an escalating trade conflict between the US and its trading partners dominated the headlines and caused a rise in market volatility. Commodities were the weakest asset class despite the oil price stabilising after the Organization of the Petroleum Exporting Countries (“OPEC”) meeting. Equities were flat but displayed a big divergence between the cyclical and the search-for-yield sectors. The latter benefitted from the stable to slightly lower government bond yields and a rise in risk aversion in the second half of the month. This also helped the performance of real estate, which in the meantime sits in pole position year to date. Fixed income spreads continue to struggle with EM debt especially weak.

Eurozone politics pose another threat to the investment environment. Developments in Italy, where a populist government is in charge, need close monitoring. Their stance on Eurozone budget requirements is key. If the Italian government opts for the confrontational approach, we are in for a spike in volatility and a sharp underperformance of Italian assets, as witnessed by the market gyrations at the end of May. A more conciliatory stance would reinstall calm. September 20, when the new Italian government presents its new budget, will be a crucial date.

Emerging Markets have been coping with a number of headwinds since the middle of the second quarter, and these are showing no signs of fading. Fed expectations keep rising after the somewhat hawkish FOMC (“Federal Open Market Committee”) decision at the June meeting. Secondly, the oil price has stabilised, but a further rise would increase pressure on oil importers and impact inflation expectations and government budgets. The strengthening US dollar also remains a headwind for EM. These three elements are not new, but they come on top of the increasing trade war fears and political uncertainty in several countries and they may start to dent economic data and earnings expectations for EM. The initial signs of this happening are appearing in the form of a sharp decline in EM economic surprises.

The global economy was still very much in a consolidation phase during the third quarter of 2018. While no longer accelerating at the pace of recent years, growth remained at a healthy level. Business and consumer confidence remained strong, and consumer spending growth accelerated.

One of the potential cross-currents for the global economy was the regional divergence in growth rates, following the synchronized upswing in 2016 and 2017, when we saw broad-based recovery in profits and business confidence and EM imbalances mostly digested. The US economy was feeling a one-off “sugar high” from the Trump tax cuts that took effect this year, while growth in the Eurozone and Japan encountered a soft patch. For EM, the dollar’s appreciation and risks to international trade created a headwind for flows, which resulted in a modest tightening of financial conditions and credit supply.

In the first three quarters of 2018, the US had already imposed three rounds of tariffs on a total of 250 billion USD worth of Chinese products. The first two rounds placed 25.00% tariffs on 50 billion USD worth of imports from China, and were answered by Chinese tariffs on US goods. The US escalated the conflict in September with another set of tariffs on Chinese goods worth 200 billion USD. China initially retaliated, but in a modest way, by levying import duties on “only” 60 billion USD of US imports. China then announced more infrastructure spending and a reduction of import tariffs for other trading partners.

The US economy continued to grow solidly above potential. Growth in the third quarter was supported by a strong feedback loop between income and spending in both the household and corporate sectors. The six-month trend in monthly payroll growth increased from around 175K USD in the beginning of the year to around 220K USD in July. On top of this US corporates maintained their appetite for capex spending. Investment intentions in various regional and national surveys held up at historically high levels. Despite some volatility, the uptrend in core capital goods orders and shipments remained fairly solid.

Management's report (continued)

Monetary policy

In November 2017, President Donald Trump announced the nomination of Jerome Powell to succeed Janet Yellen as the next chair of the Fed. A Fed governor who has voted in favour of every Fed policy decision since 2012, Powell is unlikely to break with the current policy-setting. The Fed announced, as expected, a quarter percentage-point rate increase in December. The European Central Bank ("ECB") announced in October the tapering of its asset purchase program from 60 billion EUR per month to 30 billion EUR from January to September 2018. The program remained open-ended. At the December meeting, President Mario Draghi expressed increased confidence that inflation will return towards the target in the medium term because of a strong cyclical momentum and a significant reduction of slack. This gradually building confidence in the inflation outlook will be the main signal the ECB will use to communicate the likelihood that net asset purchases will be brought back to zero by the end of 2018. The BoJ did not make any policy changes during the fourth quarter. Prime Minister Abe's electoral victory in October makes it likely that Haruhiko Kuroda will be reappointed as BoJ Governor, and that the bank's accommodative yield curve control policy will be around for the next few years. In the week following the Fed's December rate hike, four central banks in EM moved rates. China increased the rates it charges in open-market operations and on its medium-term lending facility with 5 basis points. Russia cut its policy rate by 50 basis points in response to more orthodox currency and rate management and benign inflation. Turkey hiked rates by 50 basis points, as the Turkish economy is clearly overheating. Mexico hiked by 25 basis points, as inflation had started to move higher again.

Inflation remained subdued in the first quarter of 2018, allowing the big three central banks – the US Fed, the ECB and the BoJ – to maintain a gradual approach to their withdrawal from the exceptional monetary policies of the post-crisis decade. At its March meeting, the US Fed raised rates by 25 basis points to a target band of 1.50-1.75%. The press statement suggested the central bank's assessment of the economic outlook remains upbeat. Growth forecasts were revised upwards, while also the 2020 inflation forecast was raised to 2.10% from 2.00%. This small but significant change means the Fed is now projecting inflation a bit above target, strengthening the case for more rate hikes. The ECB, which reduced its monthly asset purchases in January from 60 billion EUR to 30 billion EUR, is expected to apply a "soft taper" towards zero between September and December and implement a first rate hike around the middle of 2019. The risks are tilted towards hiking at a later date if progress on the inflation front disappoints. In this respect, the ECB is openly toying with the idea that the strong rate of expansion may well push supply side growth onto a permanently higher path. If this happens it will serve to mitigate the inflationary consequences of strong demand growth. The BoJ is expected to remain on hold in 2018 and implement a first hike in the 10-year bond yield target in the first half of 2019. The risk is tilted towards a later hike, which could happen if the yen's recent appreciation leaves a more lasting negative effect on business confidence. Such a development could mitigate the extent to which core wage growth and core inflation increase. Inflation in EM remains more stable than it has been in decades, despite the clear acceleration in growth in the past two years. This helps EM central banks to keep their easy monetary policy stance. In the first quarter, Russia, Brazil and South Africa cut their policy rate. There are currently more EM central banks that are cutting policy rates than banks which are increasing rates.

The renewed dollar appreciation in April and May is most likely explained by a switch in relative growth momentum in favour of the US combined with a continued rise in US Treasury yields as the Fed has become more confident it can continue on its path of hiking once per quarter.

This trend is very much related to increased monetary policy divergence and the potential for further rises in the oil price to make this cross-current stronger. One of the big drivers behind the US taking the lead in relative growth momentum again is the large upside surprise in its fiscal policy stance, which could double the fiscal deficit from 2.50% of GDP to a little over 5.00%. Before the fiscal sugar-high shock, the US economy seemed to be at a glide path towards potential growth and an unemployment rate that was only somewhat below the Fed's central estimate of the Non-Accelerating Inflation Rate of Unemployment ("NAIRU"). Because of the fiscal shock, the risk of substantially overshooting the NAIRU on the downside has increased substantially. It is unclear exactly how "bad" this will be, because we do not know where the point of full employment actually is. Hence, while all this is not a reason for the Fed to accelerate the pace of rate hikes, it is a reason to believe that the terminal rate will be higher than previously thought.

Management's report (continued)

Meanwhile, the story for the ECB and the BoJ has changed as well, but in a different direction. This is only partly due the growth slowdowns in both regions, as these central banks remain confident that these slowdowns are driven by temporary factors. Still the growth soft patch has probably alerted both the ECB and the BoJ to a greater extent that they are standing with their backs against the wall in the sense that they have little ammunition left to deploy in the event of a more severe and protracted downturn. As such these central banks may have become even more aware that they should err on the side of remaining too easy for too long. On top of all this, recent core inflation data in both economies have been somewhat disappointing even though wage growth does show some tentative signs of improvement. Below-target inflation expectations that are stickier than generally believed are a clear candidate for explanation here. As a result of all this, the ECB is trying to defer the decision on Quantitative Easing ("QE") as much as possible to maintain the embedded option value.

The ECB will taper its quantitative easing program in towards zero in the fourth quarter, but has at the same time introduced time- and state-dependent forward guidance on the timing of the first rate hike. We still consider this move as a hawkish shift in the ECB reaction function. There is a risk that this will prevent the central bank from fulfilling its price stability mandate. The ECB has indicated it will not raise rates before the summer of next year.

The US Fed announced, as expected, a quarter percentage-point rate increase in June. The Fed had become somewhat more hawkish, raising its median forecasts to four hikes this year and three next year, in line with our own expectations. We consider the risk of unexpected monetary tightening in DM space as low.

In the third quarter, the US Fed remained fully focused on the domestic economy, which was under the influence of the Trump tax cuts. Financial conditions remained accommodative. The Fed raised interest rates at its September meeting and left intact its plans to steadily tighten monetary policy, as it forecast that the US economy would enjoy at least three more years of growth.

Fixed Income Markets

Volatility in core government bond markets was relatively low in the fourth quarter 2017. Bond yields did overall not show significant moves in the fourth quarter, with the exception of the US 2-year yield which increased quite substantially as a result of rising Fed interest rate expectations. In 10-year bond yields, the gap between the US and German yield widened. US Treasury yields rose somewhat, on the back of strong economic data and the progress made on US tax reforms. The German Bund yield on the other hand declined, despite ongoing macroeconomic strength in the euro region. Main reason for the lower Bund yield was the dovish tone of the ECB, which pushed peripheral Eurozone bond yields lower as well. At the short end of the curve, the yield differential between the US and Germany increased as well. Particularly the 2-year US yield rose quite a bit as a result of rising Fed rate expectations. This contributed to a flattening of the US yield curve, chiefly driven by the front end of the curve while the 10-year yield is slightly below end-2016 levels. The German 2-year yield remains in negative territory mainly as an ECB rate hike is not expected before 2019. The German curve flattened a bit as well, as the 10-year yield declined slightly. Investment Grade ("IG") credits had a strong fourth quarter; spreads tightened as macro data and statements by politicians and policy makers spurred hopes for stronger growth on the back of US tax reforms and a continuation of loose monetary policy, in the absence of concerns on inflation. This led European credit spreads to tighten to the tightest level in more than 10 years. Global high yield credits had a positive quarter as well, although less pronounced than IG credits. The US tax plan and the rise in oil prices as a result of the extension of the deal between OPEC and other oil producing countries supported the high yield credit market. The EMD asset class overall had a moderately positive fourth quarter in terms of total return. Inflows into the EMD asset class remained solid and passed the 100 billion USD mark in November.

Management's report (continued)

After a broad rise in government bond yields in January 2018 and some consolidation in February, we have seen a general decline in yields in March. The US 10-year yield still increased considerably over the first quarter, though. The Treasury yield increased from 2.41% at the beginning of the year to 2.95% by the February 20, and fell thereafter. The German 10-year yield also rose sharply in January, and reached a peak in mid-February around 0.72%. However, the Bund yield consequently fell back to 0.49%. As a result, the gap between US and German 10-year yields widened further to 225 basis points, a level last seen at the end of 2016. At the short end of the curve, the US-German yield differential increased as well. The gap between 2-year bond yields in Germany and the US widened to 293 basis points by March 20, a level last seen in 1989. The US 2-year yield continued its solid rise that started in September 2017 on the back of rising Fed rate expectations. As a result, the flattening of the US yield curve continued. Credit markets started the year strongly. Despite tight valuations, spread levels managed to fall further in January. The environment changed in February, which started with the equity market sell-off. Initially, spread markets looked quite resilient compared to the sharp rise in equity market volatility. But spread widening continued further in March, particularly in IG credits. By the end of March, the gains of January had been given up in most spread categories. EMD showed resilience, despite intensified market nervousness at the end of the first quarter. Local bond yields did not move much and hard-currency spreads widened by about 20 basis points.

In April, a continued increase in oil prices and a conciliatory tone during China President Xi Jinping's keynote address to the annual Bo'ao forum resulted in a renewed rise in US bond yields. In the last week of April, US 10-year bonds rose above 3.00% again. This was despite the fact that confidence and activity data showed clear signs of rolling over. The increase in yields might be one reason why risky assets were under pressure again in the second half of the month. Globally, yields on core government bonds rose following US Treasuries which ended the month at 2.95% (+21 basis points). German Bunds yields rose to 0.56% (+6 basis points). US-Germany 10 years rate differential reached all-time high levels in April, ending at 2.40% which is above the previous peak of December 2016 post-Trump election. In EUR periphery, performance was mixed with Spanish spreads widening 5 basis points to 0.72% and Italian spreads tightening 6 basis points to 1.23%. The US curve continued to flatten, while the EUR curve steepened this month. Breakevens yields increased, more significantly in the US than in EUR.

Credit markets spreads, measured as spreads over Libor OAS, tightened only slightly with IG almost flat (-1 basis points) and High Yield (-15 basis points) both in US and EUR. Note that the Libor-OIS spread corrected from end-of March peak of 60 basis points but remain still elevated at 53 basis points.

In May there was a further underperformance of credits as a result of the risk-off environment. Across spread categories, spreads widened, although this was initially more pronounced in EMD, and later more so in DM. All in all, we have seen a widening trend across spread categories since February. On balance, the yield on 10-year US Treasuries ended the month at 2.86% (-9 basis points). German 10-year Bund yields dropped to 0.34% (-22 basis points). As a result, the US-Germany 10-year rate differential reached new highs in May, ending at 2.52%. In the Eurozone periphery, Italian 10-year spreads jumped by 122 basis points to 2.45% (having traded above 3.20% on May 29). The US and Euro curve continued to flatten. Breakeven yields decreased, more significantly in the US than in EUR. Credit markets spreads, measured as spreads over Libor OAS, widened over the month, especially in Europe. Euro IG and High Yield widened by 28 and 78 basis points, respectively. For the US, these numbers were +7 and +34 basis points.

In the last two weeks of May, a flare-up of political risk in the Eurozone stemming from the Italian government formation resulted in a huge selloff in Italian bonds. In contrast, US Treasuries and to a greater extent German Bunds benefited from safe-haven flows. These moves reversed somewhat after more conciliatory statements by Italian politicians. Later in June, however, escalating trade tensions contributed to a more broad-based risk-off environment, pushing developed bond yields down again.

The 10-year yield spread between the US and Germany continued to rise, reaching 2.55% by the end of June and approaching a 30-year high. This spread is not likely to narrow anytime soon, as we still see more momentum in the Fed monetary normalization than in the ECB's.

During the third quarter of 2018, most developed bond markets moved in relatively tight trading ranges. This was remarkable, given the fact that there continued to be headlines on Brexit, trade war, the Italian budget and some EM. This relative calm was probably caused by the fact that a lot was already priced in, which made it difficult to surprise the market. What also helped was that the slowdown of the US and Eurozone economies in the first half of this year seems to have run its course. The economies are still growing at a healthy pace. Labour markets continue to improve while inflation continues to look well-behaved. This economic backdrop has a soothing influence on financial markets.

Management's report (continued)

Yields on 10-year German government bond yields moved between 0.30% and 0.55% during the quarter. These were very low levels, mainly explained by continued loose monetary policy and a flight-to-quality premium caused by a whole range of (geo) political worries. On balance, German 10-year yields ended 17 basis points higher, moving from the lower end to the upper end of the range. The German yield curve remained more or less unchanged over the quarter. Italian yield spreads (versus Germany) continued to be volatile as the new Italian government started working on next year's budget. On balance, however, spreads did not move significantly over the quarter as the market is awaiting the budget plan (expected in the first weeks of October). Interestingly, other peripheral spreads were not really affected by the volatility in Italian spreads and were relatively stable over the quarter. This suggests that the markets no longer see the Italian political developments as a threat to the single currency but only as a risk to Italian's creditworthiness.

US 10-year Treasury yields continued to move in the fairly narrow range they have traded in since the middle of February. As far as the third quarter is concerned, this was very much in line with the behaviour of German yields, as a result of which the German-US 10-year yield spread hardly moved in the last three months. The US yield curve remained more or less unchanged over the quarter.

Equity markets

The post-summer equity rally continued in the fourth quarter 2017 as the fundamental backdrop remained strong. Global equities rose in October, hardly moved in November but resumed gains in December. All in all, the MSCI World Index increased 4.00% in the fourth quarter in euro terms. The impact of currency movements on equity returns was less profound than in previous quarters. The euro rose 1.60% against the US dollar, after gains of 6.60% in the second quarter and 5.00% in the third quarter. Contributing to the market's gains was a renewed interest in growth trades. Emerging Markets rebounded and remained by far the best performing region. Japan benefitted from the election outcome. The cyclical sectors Information Technology ("IT") and consumer discretionary were the strongest-performing sectors, although noteworthy was the turn in the IT performance and the outperformance of telecom and consumer staples, particularly in November and December. This rotation was probably linked to positioning and profit-taking, as well as the news around the US tax plan. The plan benefits the domestic sectors like telecom and retail more than the more internationally oriented sectors like technology. A reduction of the headline corporate tax rate to 21.00% would increase US profits by ten percentage points in 2018, all else being equal.

The first quarter of 2018 may have marked the beginning of a new investment regime in equity markets. Indeed, the correction in early February was primarily driven by technical factors as it was to a large extent driven by the unwinding of some very crowded trades, and not by a reassessment of the fundamentals. Yet, we cannot ignore the rise in (real) bond yields driven by (ill-timed) expansionary US fiscal policy, a bigger focus on inflation data and subtle shifts in central bank speak. In addition, economic data in DM started to struggle beating ever-optimistic expectations, even if the absolute level of macro data is still pointing towards robust economic growth. Also global earnings momentum started to come down after reaching its highest point in two years. On top of that, market sentiment took another hit in March by something that many had feared after the election of Donald Trump in November 2016; the risk of trade protectionism. Trade tensions between the US and its trade partners escalated in March after Trump announced import tariffs on steel and aluminium. For cyclical sectors this is bad news, especially as they were the engine for the market over the past 18 months. Cyclical resumed their outperformance versus defensives in January and February, but in March this picture was less straightforward. Over the first quarter they still managed to be among the best performing sectors though. With regard to regions, EM equities again outperformed their DM counterparts.

Global equities bounced back in April. Especially the European markets were strong. The strength of the USD has certainly helped but also good earnings, combined with a softening in political risk perception has contributed to the strong performance. Emerging markets lagged as these were subject to headwinds coming from a stronger USD, increasing Fed fund expectations and a higher oil price. From a sector point of view, the Energy sector was by far the best performer. This is no surprise given the bounce in the oil price that supports the profitability of the sector. One interesting observation was also the bounce in the bond-proxies, Telecom, Utilities and Real Estate despite the rise in bond yields. On the other side, Financials lagged despite strong results and the rise in bond yields. One of the explanations is high positioning and the flattening of the US yield curve. High positioning is also the most likely explanation for the underperformance of the technology sector. Over the month, value outperformed growth and large caps did marginally better than small caps. The differences were however limited.

Management's report (continued)

In May, two regions stood out: the US and the United Kingdom (“UK”). The latter benefitted from the strength of the US dollar and higher oil and metal prices. Emerging Markets underperformed as dollar strength and higher oil prices acted as a drag on EM, together with a sharp drop in the Brazilian market. Eurozone equities were also weak, dragged down by the Italian political uncertainty. All sectors except Telecoms ended month in the green. Cyclical outperformed defensives, driven by the bounce in IT stocks and commodity sectors, which was the result of higher oil and industrial metals prices. Financials had a difficult month, pressured by lower bond yields and the Italian worries.

In June, fears of an escalating trade conflict between the US and its trading partners dominated the headlines and caused a rise in market volatility. Equities were flat but displayed a big divergence between the cyclical and the search-for-yield sectors. The latter benefitted from the stable to slightly lower government bond yields and a rise in risk-aversion in the second half of the month. This also helped the performance in real estate.

Regionally, EM were the weakest as the headwinds of a stronger USD, high oil, a more hawkish Fed, trade war fears and some country-specific factors continued unabated. In this environment the US market resisted better as it is considered as a safe haven in the current uncertain environment. There was a clear split between the cyclical sectors, which suffered from trade war fears and risk aversion, and the defensive sectors. Utilities and consumer staples were the strongest, and consumer discretionary, which includes media stocks, also did well. Financials continued to struggle with lower bond yields and a flattening yield curve.

In July, improving corporate fundamentals prevailed over trade tensions. The strongest earnings season in several quarters in the US gave a boost to equities, which were up more than 3.00% over the month. Regionally, the US and the Eurozone outperformed while Japan and EM lagged. However, in the second half of the month, EM staged a turnaround, driven by news of China’s easing measures to counter the growth impact of trade sanctions. Some of the other headwinds EM were facing also faded. The USD stabilized, oil declined and Fed expectations were increasingly priced in. By month-end, the US market also suffered from weakness in the technology sector following profit/guidance warnings. All sectors were up over the month. The commodity sectors were the weakest, following the drop in cyclical commodity prices. De-escalating trade tensions and Chinese easing turned this trend around in the final part of July. The strength of the financial sector on the back of higher bond yields and a slightly steeper US yield curve was particularly noteworthy.

Despite a rise in EM-induced volatility around the middle of the month, growth assets performed well in August. Equities and real estate were up more than 1.00%, affirming their status as best-performing asset class year to date. The drivers were the back end of a strong earnings season and the perception that trade risks can go either way. The strong performance in equities was limited to the US market, however. Japan was flat, helped by a stronger yen. Emerging Markets were weak due to fears of contagion from Turkey and Argentina. The US outperformance can be attributed to its relative safe-haven status (a result of its GDP and earnings growth as well as its limited trade vulnerability) and its high exposure to the strong technology sector. Sector performance showed substantial divergence. The technology sector was the positive outlier, whereas the commodity sectors ended the month in the red. Disparities were also sizeable among the defensive sectors, as bond proxies and staples underperformed the health care sector. Declining bond yields weighed on financials. Pressure on the sector was particularly heavy in Europe, where the ECB expressed fears about several banks’ exposure to Turkey.

In September, we observed a big shift in the regional performance. In contrast to previous months, the US was not the sole driver. Other markets led the pack in the second half of the month. Emerging Markets did particularly well, helped by subsiding trade fears. The rise in industrial commodity prices and a recovery in the previously hard-hit currencies like the Turkish lira and the Brazilian real also helped. Japan, the UK and the Eurozone initially benefitted from the increased interest in cyclical and in case of the UK, higher commodity prices. The Italian budget put a damper on Eurozone equities, which sold off heavily on the last trading day of the quarter. The sector performance showed big divergence that was the opposite of past months. Commodity sectors did well, driven by the increase in oil and metal prices, whereas the IT sector lagged. Utilities and real estate were hurt by the rise in bond yields. The underperformance of financials can be explained by EM and Italian risks and a flat US yield curve. Within defensives, health care and telecom did well while staples underperformed.

Management's report (continued)

Outlook

An escalation in the rhetoric on import tariffs between the US and its main trading partners remains a dominant market risk. At the same time, trade risks can run both ways, as we saw in July following Trump's meeting with European Commission President Jean-Claude Juncker, and again in August when the US cut a preliminary agreement with Mexico to replace North American Free Trade Agreement ("NAFTA").

The direct impact on the growth outlook of the current measures is still limited, but the indirect impact that runs through business confidence and financial conditions could be more harmful. Global supply chains may also be impacted. So far there is no evidence this is already happening.

In the Eurozone, budget developments in Italy need close monitoring. Election promises on one side clash with the European budget rules on the other side. The downward revision of Italian GDP growth further limits the room for fiscal expansion. The market has nevertheless taken a positive view on this issue and is counting on a budget that would represent a compromise between the two sides. Italian assets made a strong recovery in September.

In the US, mid-term election fever will rise. Equities have historically performed well after the mid-term elections, regardless of the outcome. This is linked to the removal of uncertainty. Macro and corporate fundamentals are in any case more important. Before the elections, we may expect more market volatility.

In Japan, the re-election of Prime Minister Shinzo Abe as leader of the Liberal Democratic Party ("LDP") and the renewal of BoJ Governor Haruhiko Kuroda's mandate should create the political and policy stability that some other DM may be lacking.

The macro fundamentals may no longer improve from this point, but they remain supportive for equities. Corporate fundamentals remain strong. The third quarter expected earnings growth is around 19.00% in the US. This is somewhat below the second quarter number, which represented the peak in the current cycle, but is still robust.

Earnings momentum, or the ratio of upgrades versus downgrades, has turned positive for every region, including EM. Record-high US corporate buybacks (2.80% of capital) are also supporting the market.

To the Shareholders of NN (L)
3, rue Jean Piret
L-2350 Luxembourg

REPORT OF THE REVISEUR D'ENTREPRISES AGREE

Opinion

We have audited the accompanying financial statements of NN (L) and each of its sub-funds ("the Fund"), which comprise the statement of net assets, the securities portfolio and the financial derivative instruments as at September 30, 2018 and the statement of operations and changes in net assets for the year then ended, and notes to the financial statements, including a summary of significant accounting policies.

In our opinion, the accompanying financial statements give a true and fair view of the financial position of NN (L) and each of its sub-funds as at September 30, 2018, and of the results of their operations and changes in their net assets for the year then ended in accordance with Luxembourg legal and regulatory requirements relating to the preparation and presentation of the financial statements.

Basis for opinion

We conducted our audit in accordance with the Law of 23 July 2016 on the audit profession ("Law of 23 July 2016") and with International Standards on Auditing ("ISAs") as adopted for Luxembourg by the Commission de Surveillance du Secteur Financier ("CSSF"). Our responsibilities under the Law of 23 July 2016 and ISAs are further described in the « Responsibilities of "Réviseur d'Entreprises agréé" for the Audit of the Financial Statements » section of our report. We are also independent of the Fund in accordance with the International Ethics Standards Board for Accountants' Code of Ethics for Professional Accountants ("IESBA Code") as adopted for Luxembourg by the CSSF together with the ethical requirements that are relevant to our audit of the financial statements, and have fulfilled our other ethical responsibilities under those ethical requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Other information

The Board of Directors of the Fund is responsible for the other information. The other information comprises the information stated in the annual report but does not include the financial statements and our report of "Réviseur d'Entreprises agréé" thereon.

Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report this fact. We have nothing to report in this regard.

REPORT OF THE REVISEUR D'ENTREPRISES AGREE (continued)

Responsibilities of the Board of Directors of the Fund for the financial statements

The Board of Directors of the Fund is responsible for the preparation and fair presentation of these financial statements in accordance with Luxembourg legal and regulatory requirements relating to the preparation and presentation of the financial statements, and for such internal control as the Board of Directors of the Fund determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the Board of Directors of the Fund is responsible for assessing the Fund's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the Board of Directors of the Fund either intends to liquidate the Fund or to cease operations, or has no realistic alternative but to do so.

Responsibilities of the "Réviseur d'Entreprises agréé" for the audit of the financial statements

The objectives of our audit are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue a report of "Réviseur d'Entreprises agréé" that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with the Law of 23 July 2016 and with ISAs as adopted for Luxembourg by the CSSF will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with the Law of 23 July 2016 and with ISAs as adopted for Luxembourg by the CSSF, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Fund's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the Board of Directors of the Fund.
- Conclude on the appropriateness of the Board of Directors of the Fund's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Fund's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our report of the "Réviseur d'Entreprises agréé" to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our report of the "Réviseur d'Entreprises agréé". However, future events or conditions may cause the Fund to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

REPORT OF THE REVISEUR D'ENTREPRISES AGREE (continued)

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

Portfolio turnover in %*	30/09/2018		(6.25%)

* The portfolio turnover data has been calculated by the Administrative Agent, using the method described in the CSSF Circular 2003/122 issued on December 19, 2003 (see note 19). The ongoing charges figure corresponds to the ongoing charges figure as mentioned in the latest available Key Investor Information Document ("KIID") as at the date of this report. Transaction costs are included in the purchase/sale price of the securities (if any). These costs, which are not treated as operating expenses, are not included in the calculation of the ongoing charges.

The ongoing charges and the portfolio turnover rate are calculated for the last twelve months.

The ongoing charges are annualised for periods less than one year. The portfolio turnover rate is not annualised for periods less than one year.

** Official net asset value per share including a swing pricing adjustment, if any.

* The portfolio turnover data has been calculated by the Administrative Agent, using the method described in the CSSF Circular 2003/122 issued on December 19, 2003 (see note 19). The ongoing charges figure corresponds to the ongoing charges figure as mentioned in the latest available Key Investor Information Document ("KIID") as at the date of this report. Transaction costs are included in the purchase/sale price of the securities (if any). These costs, which are not treated as operating expenses, are not included in the calculation of the ongoing charges.

The ongoing charges and the portfolio turnover rate are calculated for the last twelve months.

The ongoing charges are annualised for periods less than one year. The portfolio turnover rate is not annualised for periods less than one year.

** Official net asset value per share including a swing pricing adjustment, if any.

Capitalisation X (EUR)	30/09/2018		1.45%
Capitalisation Z (EUR)	30/09/2018		0.13%
Distribution D (Q) (EUR)	30/09/2018		0.95%
Distribution N (Q) (EUR)	30/09/2018		0.60%
Distribution P (EUR)	30/09/2018		0.95%
Distribution R (EUR)	30/09/2018		0.70%
Portfolio turnover in %*	30/09/2018		97.33%

* The portfolio turnover data has been calculated by the Administrative Agent, using the method described in the CSSF Circular 2003/122 issued on December 19, 2003 (see note 19). The ongoing charges figure corresponds to the ongoing charges figure as mentioned in the latest available Key Investor Information Document ("KIID") as at the date of this report. Transaction costs are included in the purchase/sale price of the securities (if any). These costs, which are not treated as operating expenses, are not included in the calculation of the ongoing charges.

The ongoing charges and the portfolio turnover rate are calculated for the last twelve months.

The ongoing charges are annualised for periods less than one year. The portfolio turnover rate is not annualised for periods less than one year.

** Official net asset value per share including a swing pricing adjustment, if any.

* The portfolio turnover data has been calculated by the Administrative Agent, using the method described in the CSSF Circular 2003/122 issued on December 19, 2003 (see note 19). The ongoing charges figure corresponds to the ongoing charges figure as mentioned in the latest available Key Investor Information Document ("KIID") as at the date of this report. Transaction costs are included in the purchase/sale price of the securities (if any). These costs, which are not treated as operating expenses, are not included in the calculation of the ongoing charges.

The ongoing charges and the portfolio turnover rate are calculated for the last twelve months.

The ongoing charges are annualised for periods less than one year. The portfolio turnover rate is not annualised for periods less than one year.

** Official net asset value per share including a swing pricing adjustment, if any.

* The portfolio turnover data has been calculated by the Administrative Agent, using the method described in the CSSF Circular 2003/122 issued on December 19, 2003 (see note 19). The ongoing charges figure corresponds to the ongoing charges figure as mentioned in the latest available Key Investor Information Document ("KIID") as at the date of this report. Transaction costs are included in the purchase/sale price of the securities (if any). These costs, which are not treated as operating expenses, are not included in the calculation of the ongoing charges.

The ongoing charges and the portfolio turnover rate are calculated for the last twelve months.

The ongoing charges are annualised for periods less than one year. The portfolio turnover rate is not annualised for periods less than one year.

** Official net asset value per share including a swing pricing adjustment, if any.

* The portfolio turnover data has been calculated by the Administrative Agent, using the method described in the CSSF Circular 2003/122 issued on December 19, 2003 (see note 19). The ongoing charges figure corresponds to the ongoing charges figure as mentioned in the latest available Key Investor Information Document ("KIID") as at the date of this report. Transaction costs are included in the purchase/sale price of the securities (if any). These costs, which are not treated as operating expenses, are not included in the calculation of the ongoing charges.

The ongoing charges and the portfolio turnover rate are calculated for the last twelve months.

The ongoing charges are annualised for periods less than one year. The portfolio turnover rate is not annualised for periods less than one year.

** Official net asset value per share including a swing pricing adjustment, if any.

Distribution Y (M) Hedged (i) (ZAR)	30/09/2018		2.82%
Portfolio turnover in %*	30/09/2018		51.97%

* The portfolio turnover data has been calculated by the Administrative Agent, using the method described in the CSSF Circular 2003/122 issued on December 19, 2003 (see note 19). The ongoing charges figure corresponds to the ongoing charges figure as mentioned in the latest available Key Investor Information Document ("KIID") as at the date of this report. Transaction costs are included in the purchase/sale price of the securities (if any). These costs, which are not treated as operating expenses, are not included in the calculation of the ongoing charges.

The ongoing charges and the portfolio turnover rate are calculated for the last twelve months.

The ongoing charges are annualised for periods less than one year. The portfolio turnover rate is not annualised for periods less than one year.

** Official net asset value per share including a swing pricing adjustment, if any.

Portfolio turnover in %*	30/09/2018		77.52%

* The portfolio turnover data has been calculated by the Administrative Agent, using the method described in the CSSF Circular 2003/122 issued on December 19, 2003 (see note 19). The ongoing charges figure corresponds to the ongoing charges figure as mentioned in the latest available Key Investor Information Document ("KIID") as at the date of this report. Transaction costs are included in the purchase/sale price of the securities (if any). These costs, which are not treated as operating expenses, are not included in the calculation of the ongoing charges.

The ongoing charges and the portfolio turnover rate are calculated for the last twelve months.

The ongoing charges are annualised for periods less than one year. The portfolio turnover rate is not annualised for periods less than one year.

** Official net asset value per share including a swing pricing adjustment, if any.

* The portfolio turnover data has been calculated by the Administrative Agent, using the method described in the CSSF Circular 2003/122 issued on December 19, 2003 (see note 19). The ongoing charges figure corresponds to the ongoing charges figure as mentioned in the latest available Key Investor Information Document ("KIID") as at the date of this report. Transaction costs are included in the purchase/sale price of the securities (if any). These costs, which are not treated as operating expenses, are not included in the calculation of the ongoing charges.

The ongoing charges and the portfolio turnover rate are calculated for the last twelve months.

The ongoing charges are annualised for periods less than one year. The portfolio turnover rate is not annualised for periods less than one year.

** Official net asset value per share including a swing pricing adjustment, if any.

* The portfolio turnover data has been calculated by the Administrative Agent, using the method described in the CSSF Circular 2003/122 issued on December 19, 2003 (see note 19). The ongoing charges figure corresponds to the ongoing charges figure as mentioned in the latest available Key Investor Information Document ("KIID") as at the date of this report. Transaction costs are included in the purchase/sale price of the securities (if any). These costs, which are not treated as operating expenses, are not included in the calculation of the ongoing charges.

The ongoing charges and the portfolio turnover rate are calculated for the last twelve months.

The ongoing charges are annualised for periods less than one year. The portfolio turnover rate is not annualised for periods less than one year.

** Official net asset value per share including a swing pricing adjustment, if any.

* The portfolio turnover data has been calculated by the Administrative Agent, using the method described in the CSSF Circular 2003/122 issued on December 19, 2003 (see note 19). The ongoing charges figure corresponds to the ongoing charges figure as mentioned in the latest available Key Investor Information Document ("KIID") as at the date of this report. Transaction costs are included in the purchase/sale price of the securities (if any). These costs, which are not treated as operating expenses, are not included in the calculation of the ongoing charges.

The ongoing charges and the portfolio turnover rate are calculated for the last twelve months.

The ongoing charges are annualised for periods less than one year. The portfolio turnover rate is not annualised for periods less than one year.

** Official net asset value per share including a swing pricing adjustment, if any.

* The portfolio turnover data has been calculated by the Administrative Agent, using the method described in the CSSF Circular 2003/122 issued on December 19, 2003 (see note 19). The ongoing charges figure corresponds to the ongoing charges figure as mentioned in the latest available Key Investor Information Document ("KIID") as at the date of this report. Transaction costs are included in the purchase/sale price of the securities (if any). These costs, which are not treated as operating expenses, are not included in the calculation of the ongoing charges.

The ongoing charges and the portfolio turnover rate are calculated for the last twelve months.

The ongoing charges are annualised for periods less than one year. The portfolio turnover rate is not annualised for periods less than one year.

** Official net asset value per share including a swing pricing adjustment, if any.

* The portfolio turnover data has been calculated by the Administrative Agent, using the method described in the CSSF Circular 2003/122 issued on December 19, 2003 (see note 19). The ongoing charges figure corresponds to the ongoing charges figure as mentioned in the latest available Key Investor Information Document ("KIID") as at the date of this report. Transaction costs are included in the purchase/sale price of the securities (if any). These costs, which are not treated as operating expenses, are not included in the calculation of the ongoing charges.

The ongoing charges and the portfolio turnover rate are calculated for the last twelve months.

The ongoing charges are annualised for periods less than one year. The portfolio turnover rate is not annualised for periods less than one year.

** Official net asset value per share including a swing pricing adjustment, if any.

* The portfolio turnover data has been calculated by the Administrative Agent, using the method described in the CSSF Circular 2003/122 issued on December 19, 2003 (see note 19). The ongoing charges figure corresponds to the ongoing charges figure as mentioned in the latest available Key Investor Information Document ("KIID") as at the date of this report. Transaction costs are included in the purchase/sale price of the securities (if any). These costs, which are not treated as operating expenses, are not included in the calculation of the ongoing charges.

The ongoing charges and the portfolio turnover rate are calculated for the last twelve months.

The ongoing charges are annualised for periods less than one year. The portfolio turnover rate is not annualised for periods less than one year.

** Official net asset value per share including a swing pricing adjustment, if any.

* The portfolio turnover data has been calculated by the Administrative Agent, using the method described in the CSSF Circular 2003/122 issued on December 19, 2003 (see note 19). The ongoing charges figure corresponds to the ongoing charges figure as mentioned in the latest available Key Investor Information Document ("KIID") as at the date of this report. Transaction costs are included in the purchase/sale price of the securities (if any). These costs, which are not treated as operating expenses, are not included in the calculation of the ongoing charges.

The ongoing charges and the portfolio turnover rate are calculated for the last twelve months.

The ongoing charges are annualised for periods less than one year. The portfolio turnover rate is not annualised for periods less than one year.

** Official net asset value per share including a swing pricing adjustment, if any.

* The portfolio turnover data has been calculated by the Administrative Agent, using the method described in the CSSF Circular 2003/122 issued on December 19, 2003 (see note 19). The ongoing charges figure corresponds to the ongoing charges figure as mentioned in the latest available Key Investor Information Document ("KIID") as at the date of this report. Transaction costs are included in the purchase/sale price of the securities (if any). These costs, which are not treated as operating expenses, are not included in the calculation of the ongoing charges.

The ongoing charges and the portfolio turnover rate are calculated for the last twelve months.

The ongoing charges are annualised for periods less than one year. The portfolio turnover rate is not annualised for periods less than one year.

** Official net asset value per share including a swing pricing adjustment, if any.

* The portfolio turnover data has been calculated by the Administrative Agent, using the method described in the CSSF Circular 2003/122 issued on December 19, 2003 (see note 19). The ongoing charges figure corresponds to the ongoing charges figure as mentioned in the latest available Key Investor Information Document ("KIID") as at the date of this report. Transaction costs are included in the purchase/sale price of the securities (if any). These costs, which are not treated as operating expenses, are not included in the calculation of the ongoing charges.

The ongoing charges and the portfolio turnover rate are calculated for the last twelve months.

The ongoing charges are annualised for periods less than one year. The portfolio turnover rate is not annualised for periods less than one year.

** Official net asset value per share including a swing pricing adjustment, if any.

Capitalisation Z (USD)	30/09/2018		0.16%
Portfolio turnover in %*	30/09/2018		12.21%

* The portfolio turnover data has been calculated by the Administrative Agent, using the method described in the CSSF Circular 2003/122 issued on December 19, 2003 (see note 19). The ongoing charges figure corresponds to the ongoing charges figure as mentioned in the latest available Key Investor Information Document ("KIID") as at the date of this report. Transaction costs are included in the purchase/sale price of the securities (if any). These costs, which are not treated as operating expenses, are not included in the calculation of the ongoing charges.

The ongoing charges and the portfolio turnover rate are calculated for the last twelve months.

The ongoing charges are annualised for periods less than one year. The portfolio turnover rate is not annualised for periods less than one year.

** Official net asset value per share including a swing pricing adjustment, if any.

* The portfolio turnover data has been calculated by the Administrative Agent, using the method described in the CSSF Circular 2003/122 issued on December 19, 2003 (see note 19). The ongoing charges figure corresponds to the ongoing charges figure as mentioned in the latest available Key Investor Information Document ("KIID") as at the date of this report. Transaction costs are included in the purchase/sale price of the securities (if any). These costs, which are not treated as operating expenses, are not included in the calculation of the ongoing charges.

The ongoing charges and the portfolio turnover rate are calculated for the last twelve months.

The ongoing charges are annualised for periods less than one year. The portfolio turnover rate is not annualised for periods less than one year.

** Official net asset value per share including a swing pricing adjustment, if any.

* The portfolio turnover data has been calculated by the Administrative Agent, using the method described in the CSSF Circular 2003/122 issued on December 19, 2003 (see note 19). The ongoing charges figure corresponds to the ongoing charges figure as mentioned in the latest available Key Investor Information Document ("KIID") as at the date of this report. Transaction costs are included in the purchase/sale price of the securities (if any). These costs, which are not treated as operating expenses, are not included in the calculation of the ongoing charges.

The ongoing charges and the portfolio turnover rate are calculated for the last twelve months.

The ongoing charges are annualised for periods less than one year. The portfolio turnover rate is not annualised for periods less than one year.

** Official net asset value per share including a swing pricing adjustment, if any.

* The portfolio turnover data has been calculated by the Administrative Agent, using the method described in the CSSF Circular 2003/122 issued on December 19, 2003 (see note 19). The ongoing charges figure corresponds to the ongoing charges figure as mentioned in the latest available Key Investor Information Document ("KIID") as at the date of this report. Transaction costs are included in the purchase/sale price of the securities (if any). These costs, which are not treated as operating expenses, are not included in the calculation of the ongoing charges.

The ongoing charges and the portfolio turnover rate are calculated for the last twelve months.

The ongoing charges are annualised for periods less than one year. The portfolio turnover rate is not annualised for periods less than one year.

** Official net asset value per share including a swing pricing adjustment, if any.

* The portfolio turnover data has been calculated by the Administrative Agent, using the method described in the CSSF Circular 2003/122 issued on December 19, 2003 (see note 19). The ongoing charges figure corresponds to the ongoing charges figure as mentioned in the latest available Key Investor Information Document ("KIID") as at the date of this report. Transaction costs are included in the purchase/sale price of the securities (if any). These costs, which are not treated as operating expenses, are not included in the calculation of the ongoing charges.

The ongoing charges and the portfolio turnover rate are calculated for the last twelve months.

The ongoing charges are annualised for periods less than one year. The portfolio turnover rate is not annualised for periods less than one year.

** Official net asset value per share including a swing pricing adjustment, if any.

* The portfolio turnover data has been calculated by the Administrative Agent, using the method described in the CSSF Circular 2003/122 issued on December 19, 2003 (see note 19). The ongoing charges figure corresponds to the ongoing charges figure as mentioned in the latest available Key Investor Information Document ("KIID") as at the date of this report. Transaction costs are included in the purchase/sale price of the securities (if any). These costs, which are not treated as operating expenses, are not included in the calculation of the ongoing charges.

The ongoing charges and the portfolio turnover rate are calculated for the last twelve months.

The ongoing charges are annualised for periods less than one year. The portfolio turnover rate is not annualised for periods less than one year.

** Official net asset value per share including a swing pricing adjustment, if any.

* The portfolio turnover data has been calculated by the Administrative Agent, using the method described in the CSSF Circular 2003/122 issued on December 19, 2003 (see note 19). The ongoing charges figure corresponds to the ongoing charges figure as mentioned in the latest available Key Investor Information Document ("KIID") as at the date of this report. Transaction costs are included in the purchase/sale price of the securities (if any). These costs, which are not treated as operating expenses, are not included in the calculation of the ongoing charges.

The ongoing charges and the portfolio turnover rate are calculated for the last twelve months.

The ongoing charges are annualised for periods less than one year. The portfolio turnover rate is not annualised for periods less than one year.

** Official net asset value per share including a swing pricing adjustment, if any.

* The portfolio turnover data has been calculated by the Administrative Agent, using the method described in the CSSF Circular 2003/122 issued on December 19, 2003 (see note 19). The ongoing charges figure corresponds to the ongoing charges figure as mentioned in the latest available Key Investor Information Document ("KIID") as at the date of this report. Transaction costs are included in the purchase/sale price of the securities (if any). These costs, which are not treated as operating expenses, are not included in the calculation of the ongoing charges.

The ongoing charges and the portfolio turnover rate are calculated for the last twelve months.

The ongoing charges are annualised for periods less than one year. The portfolio turnover rate is not annualised for periods less than one year.

** Official net asset value per share including a swing pricing adjustment, if any.

* The portfolio turnover data has been calculated by the Administrative Agent, using the method described in the CSSF Circular 2003/122 issued on December 19, 2003 (see note 19). The ongoing charges figure corresponds to the ongoing charges figure as mentioned in the latest available Key Investor Information Document ("KIID") as at the date of this report. Transaction costs are included in the purchase/sale price of the securities (if any). These costs, which are not treated as operating expenses, are not included in the calculation of the ongoing charges.

The ongoing charges and the portfolio turnover rate are calculated for the last twelve months.

The ongoing charges are annualised for periods less than one year. The portfolio turnover rate is not annualised for periods less than one year.

** Official net asset value per share including a swing pricing adjustment, if any.

* The portfolio turnover data has been calculated by the Administrative Agent, using the method described in the CSSF Circular 2003/122 issued on December 19, 2003 (see note 19). The ongoing charges figure corresponds to the ongoing charges figure as mentioned in the latest available Key Investor Information Document ("KIID") as at the date of this report. Transaction costs are included in the purchase/sale price of the securities (if any). These costs, which are not treated as operating expenses, are not included in the calculation of the ongoing charges.

The ongoing charges and the portfolio turnover rate are calculated for the last twelve months.

The ongoing charges are annualised for periods less than one year. The portfolio turnover rate is not annualised for periods less than one year.

** Official net asset value per share including a swing pricing adjustment, if any.

* The portfolio turnover data has been calculated by the Administrative Agent, using the method described in the CSSF Circular 2003/122 issued on December 19, 2003 (see note 19). The ongoing charges figure corresponds to the ongoing charges figure as mentioned in the latest available Key Investor Information Document ("KIID") as at the date of this report. Transaction costs are included in the purchase/sale price of the securities (if any). These costs, which are not treated as operating expenses, are not included in the calculation of the ongoing charges.

The ongoing charges and the portfolio turnover rate are calculated for the last twelve months.

The ongoing charges are annualised for periods less than one year. The portfolio turnover rate is not annualised for periods less than one year.

** Official net asset value per share including a swing pricing adjustment, if any.

* The portfolio turnover data has been calculated by the Administrative Agent, using the method described in the CSSF Circular 2003/122 issued on December 19, 2003 (see note 19). The ongoing charges figure corresponds to the ongoing charges figure as mentioned in the latest available Key Investor Information Document ("KIID") as at the date of this report. Transaction costs are included in the purchase/sale price of the securities (if any). These costs, which are not treated as operating expenses, are not included in the calculation of the ongoing charges.

The ongoing charges and the portfolio turnover rate are calculated for the last twelve months.

The ongoing charges are annualised for periods less than one year. The portfolio turnover rate is not annualised for periods less than one year.

** Official net asset value per share including a swing pricing adjustment, if any.

Portfolio turnover in %*

30/09/2018	(22.73%)
------------	----------

* The portfolio turnover data has been calculated by the Administrative Agent, using the method described in the CSSF Circular 2003/122 issued on December 19, 2003 (see note 19). The ongoing charges figure corresponds to the ongoing charges figure as mentioned in the latest available Key Investor Information Document ("KIID") as at the date of this report. Transaction costs are included in the purchase/sale price of the securities (if any). These costs, which are not treated as operating expenses, are not included in the calculation of the ongoing charges.

The ongoing charges and the portfolio turnover rate are calculated for the last twelve months.

The ongoing charges are annualised for periods less than one year. The portfolio turnover rate is not annualised for periods less than one year.

** Official net asset value per share including a swing pricing adjustment, if any.

* The portfolio turnover data has been calculated by the Administrative Agent, using the method described in the CSSF Circular 2003/122 issued on December 19, 2003 (see note 19). The ongoing charges figure corresponds to the ongoing charges figure as mentioned in the latest available Key Investor Information Document ("KIID") as at the date of this report. Transaction costs are included in the purchase/sale price of the securities (if any). These costs, which are not treated as operating expenses, are not included in the calculation of the ongoing charges.

The ongoing charges and the portfolio turnover rate are calculated for the last twelve months.

The ongoing charges are annualised for periods less than one year. The portfolio turnover rate is not annualised for periods less than one year.

** Official net asset value per share including a swing pricing adjustment, if any.

* The portfolio turnover data has been calculated by the Administrative Agent, using the method described in the CSSF Circular 2003/122 issued on December 19, 2003 (see note 19). The ongoing charges figure corresponds to the ongoing charges figure as mentioned in the latest available Key Investor Information Document ("KIID") as at the date of this report. Transaction costs are included in the purchase/sale price of the securities (if any). These costs, which are not treated as operating expenses, are not included in the calculation of the ongoing charges.

The ongoing charges and the portfolio turnover rate are calculated for the last twelve months.

The ongoing charges are annualised for periods less than one year. The portfolio turnover rate is not annualised for periods less than one year.

** Official net asset value per share including a swing pricing adjustment, if any.

* The portfolio turnover data has been calculated by the Administrative Agent, using the method described in the CSSF Circular 2003/122 issued on December 19, 2003 (see note 19). The ongoing charges figure corresponds to the ongoing charges figure as mentioned in the latest available Key Investor Information Document ("KIID") as at the date of this report. Transaction costs are included in the purchase/sale price of the securities (if any). These costs, which are not treated as operating expenses, are not included in the calculation of the ongoing charges.

The ongoing charges and the portfolio turnover rate are calculated for the last twelve months.

The ongoing charges are annualised for periods less than one year. The portfolio turnover rate is not annualised for periods less than one year.

** Official net asset value per share including a swing pricing adjustment, if any.

* The portfolio turnover data has been calculated by the Administrative Agent, using the method described in the CSSF Circular 2003/122 issued on December 19, 2003 (see note 19). The ongoing charges figure corresponds to the ongoing charges figure as mentioned in the latest available Key Investor Information Document ("KIID") as at the date of this report. Transaction costs are included in the purchase/sale price of the securities (if any). These costs, which are not treated as operating expenses, are not included in the calculation of the ongoing charges.

The ongoing charges and the portfolio turnover rate are calculated for the last twelve months.

The ongoing charges are annualised for periods less than one year. The portfolio turnover rate is not annualised for periods less than one year.

** Official net asset value per share including a swing pricing adjustment, if any.

* The portfolio turnover data has been calculated by the Administrative Agent, using the method described in the CSSF Circular 2003/122 issued on December 19, 2003 (see note 19). The ongoing charges figure corresponds to the ongoing charges figure as mentioned in the latest available Key Investor Information Document ("KIID") as at the date of this report. Transaction costs are included in the purchase/sale price of the securities (if any). These costs, which are not treated as operating expenses, are not included in the calculation of the ongoing charges.

The ongoing charges and the portfolio turnover rate are calculated for the last twelve months.

The ongoing charges are annualised for periods less than one year. The portfolio turnover rate is not annualised for periods less than one year.

** Official net asset value per share including a swing pricing adjustment, if any.

* The portfolio turnover data has been calculated by the Administrative Agent, using the method described in the CSSF Circular 2003/122 issued on December 19, 2003 (see note 19). The ongoing charges figure corresponds to the ongoing charges figure as mentioned in the latest available Key Investor Information Document ("KIID") as at the date of this report. Transaction costs are included in the purchase/sale price of the securities (if any). These costs, which are not treated as operating expenses, are not included in the calculation of the ongoing charges.

The ongoing charges and the portfolio turnover rate are calculated for the last twelve months.

The ongoing charges are annualised for periods less than one year. The portfolio turnover rate is not annualised for periods less than one year.

** Official net asset value per share including a swing pricing adjustment, if any.

* The portfolio turnover data has been calculated by the Administrative Agent, using the method described in the CSSF Circular 2003/122 issued on December 19, 2003 (see note 19). The ongoing charges figure corresponds to the ongoing charges figure as mentioned in the latest available Key Investor Information Document ("KIID") as at the date of this report. Transaction costs are included in the purchase/sale price of the securities (if any). These costs, which are not treated as operating expenses, are not included in the calculation of the ongoing charges.

The ongoing charges and the portfolio turnover rate are calculated for the last twelve months.

The ongoing charges are annualised for periods less than one year. The portfolio turnover rate is not annualised for periods less than one year.

** Official net asset value per share including a swing pricing adjustment, if any.

* The portfolio turnover data has been calculated by the Administrative Agent, using the method described in the CSSF Circular 2003/122 issued on December 19, 2003 (see note 19). The ongoing charges figure corresponds to the ongoing charges figure as mentioned in the latest available Key Investor Information Document ("KIID") as at the date of this report. Transaction costs are included in the purchase/sale price of the securities (if any). These costs, which are not treated as operating expenses, are not included in the calculation of the ongoing charges.

The ongoing charges and the portfolio turnover rate are calculated for the last twelve months.

The ongoing charges are annualised for periods less than one year. The portfolio turnover rate is not annualised for periods less than one year.

** Official net asset value per share including a swing pricing adjustment, if any.

* The portfolio turnover data has been calculated by the Administrative Agent, using the method described in the CSSF Circular 2003/122 issued on December 19, 2003 (see note 19). The ongoing charges figure corresponds to the ongoing charges figure as mentioned in the latest available Key Investor Information Document ("KIID") as at the date of this report. Transaction costs are included in the purchase/sale price of the securities (if any). These costs, which are not treated as operating expenses, are not included in the calculation of the ongoing charges.

The ongoing charges and the portfolio turnover rate are calculated for the last twelve months.

The ongoing charges are annualised for periods less than one year. The portfolio turnover rate is not annualised for periods less than one year.

** Official net asset value per share including a swing pricing adjustment, if any.

Portfolio turnover in %*	30/09/2018		(34.66%)

* The portfolio turnover data has been calculated by the Administrative Agent, using the method described in the CSSF Circular 2003/122 issued on December 19, 2003 (see note 19). The ongoing charges figure corresponds to the ongoing charges figure as mentioned in the latest available Key Investor Information Document ("KIID") as at the date of this report. Transaction costs are included in the purchase/sale price of the securities (if any). These costs, which are not treated as operating expenses, are not included in the calculation of the ongoing charges.

The ongoing charges and the portfolio turnover rate are calculated for the last twelve months.

The ongoing charges are annualised for periods less than one year. The portfolio turnover rate is not annualised for periods less than one year.

** Official net asset value per share including a swing pricing adjustment, if any.

* The portfolio turnover data has been calculated by the Administrative Agent, using the method described in the CSSF Circular 2003/122 issued on December 19, 2003 (see note 19). The ongoing charges figure corresponds to the ongoing charges figure as mentioned in the latest available Key Investor Information Document ("KIID") as at the date of this report. Transaction costs are included in the purchase/sale price of the securities (if any). These costs, which are not treated as operating expenses, are not included in the calculation of the ongoing charges.

The ongoing charges and the portfolio turnover rate are calculated for the last twelve months.

The ongoing charges are annualised for periods less than one year. The portfolio turnover rate is not annualised for periods less than one year.

** Official net asset value per share including a swing pricing adjustment, if any.

* The portfolio turnover data has been calculated by the Administrative Agent, using the method described in the CSSF Circular 2003/122 issued on December 19, 2003 (see note 19). The ongoing charges figure corresponds to the ongoing charges figure as mentioned in the latest available Key Investor Information Document ("KIID") as at the date of this report. Transaction costs are included in the purchase/sale price of the securities (if any). These costs, which are not treated as operating expenses, are not included in the calculation of the ongoing charges.

The ongoing charges and the portfolio turnover rate are calculated for the last twelve months.

The ongoing charges are annualised for periods less than one year. The portfolio turnover rate is not annualised for periods less than one year.

** Official net asset value per share including a swing pricing adjustment, if any.

* The portfolio turnover data has been calculated by the Administrative Agent, using the method described in the CSSF Circular 2003/122 issued on December 19, 2003 (see note 19). The ongoing charges figure corresponds to the ongoing charges figure as mentioned in the latest available Key Investor Information Document ("KIID") as at the date of this report. Transaction costs are included in the purchase/sale price of the securities (if any). These costs, which are not treated as operating expenses, are not included in the calculation of the ongoing charges.

The ongoing charges and the portfolio turnover rate are calculated for the last twelve months.

The ongoing charges are annualised for periods less than one year. The portfolio turnover rate is not annualised for periods less than one year.

** Official net asset value per share including a swing pricing adjustment, if any.

* The portfolio turnover data has been calculated by the Administrative Agent, using the method described in the CSSF Circular 2003/122 issued on December 19, 2003 (see note 19). The ongoing charges figure corresponds to the ongoing charges figure as mentioned in the latest available Key Investor Information Document ("KIID") as at the date of this report. Transaction costs are included in the purchase/sale price of the securities (if any). These costs, which are not treated as operating expenses, are not included in the calculation of the ongoing charges.

The ongoing charges and the portfolio turnover rate are calculated for the last twelve months.

The ongoing charges are annualised for periods less than one year. The portfolio turnover rate is not annualised for periods less than one year.

** Official net asset value per share including a swing pricing adjustment, if any.

* The portfolio turnover data has been calculated by the Administrative Agent, using the method described in the CSSF Circular 2003/122 issued on December 19, 2003 (see note 19). The ongoing charges figure corresponds to the ongoing charges figure as mentioned in the latest available Key Investor Information Document ("KIID") as at the date of this report. Transaction costs are included in the purchase/sale price of the securities (if any). These costs, which are not treated as operating expenses, are not included in the calculation of the ongoing charges.

The ongoing charges and the portfolio turnover rate are calculated for the last twelve months.

The ongoing charges are annualised for periods less than one year. The portfolio turnover rate is not annualised for periods less than one year.

** Official net asset value per share including a swing pricing adjustment, if any.

* The portfolio turnover data has been calculated by the Administrative Agent, using the method described in the CSSF Circular 2003/122 issued on December 19, 2003 (see note 19). The ongoing charges figure corresponds to the ongoing charges figure as mentioned in the latest available Key Investor Information Document ("KIID") as at the date of this report. Transaction costs are included in the purchase/sale price of the securities (if any). These costs, which are not treated as operating expenses, are not included in the calculation of the ongoing charges.

The ongoing charges and the portfolio turnover rate are calculated for the last twelve months.

The ongoing charges are annualised for periods less than one year. The portfolio turnover rate is not annualised for periods less than one year.

** Official net asset value per share including a swing pricing adjustment, if any.

* The portfolio turnover data has been calculated by the Administrative Agent, using the method described in the CSSF Circular 2003/122 issued on December 19, 2003 (see note 19). The ongoing charges figure corresponds to the ongoing charges figure as mentioned in the latest available Key Investor Information Document ("KIID") as at the date of this report. Transaction costs are included in the purchase/sale price of the securities (if any). These costs, which are not treated as operating expenses, are not included in the calculation of the ongoing charges.

The ongoing charges and the portfolio turnover rate are calculated for the last twelve months.

The ongoing charges are annualised for periods less than one year. The portfolio turnover rate is not annualised for periods less than one year.

** Official net asset value per share including a swing pricing adjustment, if any.

* The portfolio turnover data has been calculated by the Administrative Agent, using the method described in the CSSF Circular 2003/122 issued on December 19, 2003 (see note 19). The ongoing charges figure corresponds to the ongoing charges figure as mentioned in the latest available Key Investor Information Document ("KIID") as at the date of this report. Transaction costs are included in the purchase/sale price of the securities (if any). These costs, which are not treated as operating expenses, are not included in the calculation of the ongoing charges.

The ongoing charges and the portfolio turnover rate are calculated for the last twelve months.

The ongoing charges are annualised for periods less than one year. The portfolio turnover rate is not annualised for periods less than one year.

** Official net asset value per share including a swing pricing adjustment, if any.

* The portfolio turnover data has been calculated by the Administrative Agent, using the method described in the CSSF Circular 2003/122 issued on December 19, 2003 (see note 19). The ongoing charges figure corresponds to the ongoing charges figure as mentioned in the latest available Key Investor Information Document ("KIID") as at the date of this report. Transaction costs are included in the purchase/sale price of the securities (if any). These costs, which are not treated as operating expenses, are not included in the calculation of the ongoing charges.

The ongoing charges and the portfolio turnover rate are calculated for the last twelve months.

The ongoing charges are annualised for periods less than one year. The portfolio turnover rate is not annualised for periods less than one year.

** Official net asset value per share including a swing pricing adjustment, if any.

* The portfolio turnover data has been calculated by the Administrative Agent, using the method described in the CSSF Circular 2003/122 issued on December 19, 2003 (see note 19). The ongoing charges figure corresponds to the ongoing charges figure as mentioned in the latest available Key Investor Information Document ("KIID") as at the date of this report. Transaction costs are included in the purchase/sale price of the securities (if any). These costs, which are not treated as operating expenses, are not included in the calculation of the ongoing charges.

The ongoing charges and the portfolio turnover rate are calculated for the last twelve months.

The ongoing charges are annualised for periods less than one year. The portfolio turnover rate is not annualised for periods less than one year.

** Official net asset value per share including a swing pricing adjustment, if any.

* The portfolio turnover data has been calculated by the Administrative Agent, using the method described in the CSSF Circular 2003/122 issued on December 19, 2003 (see note 19). The ongoing charges figure corresponds to the ongoing charges figure as mentioned in the latest available Key Investor Information Document ("KIID") as at the date of this report. Transaction costs are included in the purchase/sale price of the securities (if any). These costs, which are not treated as operating expenses, are not included in the calculation of the ongoing charges.

The ongoing charges and the portfolio turnover rate are calculated for the last twelve months.

The ongoing charges are annualised for periods less than one year. The portfolio turnover rate is not annualised for periods less than one year.

** Official net asset value per share including a swing pricing adjustment, if any.

* The portfolio turnover data has been calculated by the Administrative Agent, using the method described in the CSSF Circular 2003/122 issued on December 19, 2003 (see note 19). The ongoing charges figure corresponds to the ongoing charges figure as mentioned in the latest available Key Investor Information Document ("KIID") as at the date of this report. Transaction costs are included in the purchase/sale price of the securities (if any). These costs, which are not treated as operating expenses, are not included in the calculation of the ongoing charges.

The ongoing charges and the portfolio turnover rate are calculated for the last twelve months.

The ongoing charges are annualised for periods less than one year. The portfolio turnover rate is not annualised for periods less than one year.

** Official net asset value per share including a swing pricing adjustment, if any.

* The portfolio turnover data has been calculated by the Administrative Agent, using the method described in the CSSF Circular 2003/122 issued on December 19, 2003 (see note 19). The ongoing charges figure corresponds to the ongoing charges figure as mentioned in the latest available Key Investor Information Document ("KIID") as at the date of this report. Transaction costs are included in the purchase/sale price of the securities (if any). These costs, which are not treated as operating expenses, are not included in the calculation of the ongoing charges.

The ongoing charges and the portfolio turnover rate are calculated for the last twelve months.

The ongoing charges are annualised for periods less than one year. The portfolio turnover rate is not annualised for periods less than one year.

** Official net asset value per share including a swing pricing adjustment, if any.

Capitalisation Zz (EUR)	30/09/2018		0.01%
Portfolio turnover in %*	30/09/2018		(20.50%)

* The portfolio turnover data has been calculated by the Administrative Agent, using the method described in the CSSF Circular 2003/122 issued on December 19, 2003 (see note 19). The ongoing charges figure corresponds to the ongoing charges figure as mentioned in the latest available Key Investor Information Document ("KIID") as at the date of this report. Transaction costs are included in the purchase/sale price of the securities (if any). These costs, which are not treated as operating expenses, are not included in the calculation of the ongoing charges.

The ongoing charges and the portfolio turnover rate are calculated for the last twelve months.

The ongoing charges are annualised for periods less than one year. The portfolio turnover rate is not annualised for periods less than one year.

** Official net asset value per share including a swing pricing adjustment, if any.

* The portfolio turnover data has been calculated by the Administrative Agent, using the method described in the CSSF Circular 2003/122 issued on December 19, 2003 (see note 19). The ongoing charges figure corresponds to the ongoing charges figure as mentioned in the latest available Key Investor Information Document ("KIID") as at the date of this report. Transaction costs are included in the purchase/sale price of the securities (if any). These costs, which are not treated as operating expenses, are not included in the calculation of the ongoing charges.

The ongoing charges and the portfolio turnover rate are calculated for the last twelve months.

The ongoing charges are annualised for periods less than one year. The portfolio turnover rate is not annualised for periods less than one year.

** Official net asset value per share including a swing pricing adjustment, if any.

* The portfolio turnover data has been calculated by the Administrative Agent, using the method described in the CSSF Circular 2003/122 issued on December 19, 2003 (see note 19). The ongoing charges figure corresponds to the ongoing charges figure as mentioned in the latest available Key Investor Information Document ("KIID") as at the date of this report. Transaction costs are included in the purchase/sale price of the securities (if any). These costs, which are not treated as operating expenses, are not included in the calculation of the ongoing charges.

The ongoing charges and the portfolio turnover rate are calculated for the last twelve months.

The ongoing charges are annualised for periods less than one year. The portfolio turnover rate is not annualised for periods less than one year.

** Official net asset value per share including a swing pricing adjustment, if any.

* The portfolio turnover data has been calculated by the Administrative Agent, using the method described in the CSSF Circular 2003/122 issued on December 19, 2003 (see note 19). The ongoing charges figure corresponds to the ongoing charges figure as mentioned in the latest available Key Investor Information Document ("KIID") as at the date of this report. Transaction costs are included in the purchase/sale price of the securities (if any). These costs, which are not treated as operating expenses, are not included in the calculation of the ongoing charges.

The ongoing charges and the portfolio turnover rate are calculated for the last twelve months.

The ongoing charges are annualised for periods less than one year. The portfolio turnover rate is not annualised for periods less than one year.

** Official net asset value per share including a swing pricing adjustment, if any.

* The portfolio turnover data has been calculated by the Administrative Agent, using the method described in the CSSF Circular 2003/122 issued on December 19, 2003 (see note 19). The ongoing charges figure corresponds to the ongoing charges figure as mentioned in the latest available Key Investor Information Document ("KIID") as at the date of this report. Transaction costs are included in the purchase/sale price of the securities (if any). These costs, which are not treated as operating expenses, are not included in the calculation of the ongoing charges.

The ongoing charges and the portfolio turnover rate are calculated for the last twelve months.

The ongoing charges are annualised for periods less than one year. The portfolio turnover rate is not annualised for periods less than one year.

** Official net asset value per share including a swing pricing adjustment, if any.

* The portfolio turnover data has been calculated by the Administrative Agent, using the method described in the CSSF Circular 2003/122 issued on December 19, 2003 (see note 19). The ongoing charges figure corresponds to the ongoing charges figure as mentioned in the latest available Key Investor Information Document ("KIID") as at the date of this report. Transaction costs are included in the purchase/sale price of the securities (if any). These costs, which are not treated as operating expenses, are not included in the calculation of the ongoing charges.

The ongoing charges and the portfolio turnover rate are calculated for the last twelve months.

The ongoing charges are annualised for periods less than one year. The portfolio turnover rate is not annualised for periods less than one year.

** Official net asset value per share including a swing pricing adjustment, if any.

* The portfolio turnover data has been calculated by the Administrative Agent, using the method described in the CSSF Circular 2003/122 issued on December 19, 2003 (see note 19). The ongoing charges figure corresponds to the ongoing charges figure as mentioned in the latest available Key Investor Information Document ("KIID") as at the date of this report. Transaction costs are included in the purchase/sale price of the securities (if any). These costs, which are not treated as operating expenses, are not included in the calculation of the ongoing charges.

The ongoing charges and the portfolio turnover rate are calculated for the last twelve months.

The ongoing charges are annualised for periods less than one year. The portfolio turnover rate is not annualised for periods less than one year.

** Official net asset value per share including a swing pricing adjustment, if any.

* The portfolio turnover data has been calculated by the Administrative Agent, using the method described in the CSSF Circular 2003/122 issued on December 19, 2003 (see note 19). The ongoing charges figure corresponds to the ongoing charges figure as mentioned in the latest available Key Investor Information Document ("KIID") as at the date of this report. Transaction costs are included in the purchase/sale price of the securities (if any). These costs, which are not treated as operating expenses, are not included in the calculation of the ongoing charges.

The ongoing charges and the portfolio turnover rate are calculated for the last twelve months.

The ongoing charges are annualised for periods less than one year. The portfolio turnover rate is not annualised for periods less than one year.

** Official net asset value per share including a swing pricing adjustment, if any.

* The portfolio turnover data has been calculated by the Administrative Agent, using the method described in the CSSF Circular 2003/122 issued on December 19, 2003 (see note 19). The ongoing charges figure corresponds to the ongoing charges figure as mentioned in the latest available Key Investor Information Document ("KIID") as at the date of this report. Transaction costs are included in the purchase/sale price of the securities (if any). These costs, which are not treated as operating expenses, are not included in the calculation of the ongoing charges.

The ongoing charges and the portfolio turnover rate are calculated for the last twelve months.

The ongoing charges are annualised for periods less than one year. The portfolio turnover rate is not annualised for periods less than one year.

** Official net asset value per share including a swing pricing adjustment, if any.

	30/09/2016	USD	3,572.70				

* The portfolio turnover data has been calculated by the Administrative Agent, using the method described in the CSSF Circular 2003/122 issued on December 19, 2003 (see note 19). The ongoing charges figure corresponds to the ongoing charges figure as mentioned in the latest available Key Investor Information Document ("KIID") as at the date of this report. Transaction costs are included in the purchase/sale price of the securities (if any). These costs, which are not treated as operating expenses, are not included in the calculation of the ongoing charges.

The ongoing charges and the portfolio turnover rate are calculated for the last twelve months.

The ongoing charges are annualised for periods less than one year. The portfolio turnover rate is not annualised for periods less than one year.

** Official net asset value per share including a swing pricing adjustment, if any.

* The portfolio turnover data has been calculated by the Administrative Agent, using the method described in the CSSF Circular 2003/122 issued on December 19, 2003 (see note 19). The ongoing charges figure corresponds to the ongoing charges figure as mentioned in the latest available Key Investor Information Document ("KIID") as at the date of this report. Transaction costs are included in the purchase/sale price of the securities (if any). These costs, which are not treated as operating expenses, are not included in the calculation of the ongoing charges.

The ongoing charges and the portfolio turnover rate are calculated for the last twelve months.

The ongoing charges are annualised for periods less than one year. The portfolio turnover rate is not annualised for periods less than one year.

** Official net asset value per share including a swing pricing adjustment, if any.

* The portfolio turnover data has been calculated by the Administrative Agent, using the method described in the CSSF Circular 2003/122 issued on December 19, 2003 (see note 19). The ongoing charges figure corresponds to the ongoing charges figure as mentioned in the latest available Key Investor Information Document ("KIID") as at the date of this report. Transaction costs are included in the purchase/sale price of the securities (if any). These costs, which are not treated as operating expenses, are not included in the calculation of the ongoing charges.

The ongoing charges and the portfolio turnover rate are calculated for the last twelve months.

The ongoing charges are annualised for periods less than one year. The portfolio turnover rate is not annualised for periods less than one year.

** Official net asset value per share including a swing pricing adjustment, if any.

* The portfolio turnover data has been calculated by the Administrative Agent, using the method described in the CSSF Circular 2003/122 issued on December 19, 2003 (see note 19). The ongoing charges figure corresponds to the ongoing charges figure as mentioned in the latest available Key Investor Information Document ("KIID") as at the date of this report. Transaction costs are included in the purchase/sale price of the securities (if any). These costs, which are not treated as operating expenses, are not included in the calculation of the ongoing charges.

The ongoing charges and the portfolio turnover rate are calculated for the last twelve months.

The ongoing charges are annualised for periods less than one year. The portfolio turnover rate is not annualised for periods less than one year.

** Official net asset value per share including a swing pricing adjustment, if any.

* The portfolio turnover data has been calculated by the Administrative Agent, using the method described in the CSSF Circular 2003/122 issued on December 19, 2003 (see note 19). The ongoing charges figure corresponds to the ongoing charges figure as mentioned in the latest available Key Investor Information Document ("KIID") as at the date of this report. Transaction costs are included in the purchase/sale price of the securities (if any). These costs, which are not treated as operating expenses, are not included in the calculation of the ongoing charges.

The ongoing charges and the portfolio turnover rate are calculated for the last twelve months.

The ongoing charges are annualised for periods less than one year. The portfolio turnover rate is not annualised for periods less than one year.

** Official net asset value per share including a swing pricing adjustment, if any.

* The portfolio turnover data has been calculated by the Administrative Agent, using the method described in the CSSF Circular 2003/122 issued on December 19, 2003 (see note 19). The ongoing charges figure corresponds to the ongoing charges figure as mentioned in the latest available Key Investor Information Document ("KIID") as at the date of this report. Transaction costs are included in the purchase/sale price of the securities (if any). These costs, which are not treated as operating expenses, are not included in the calculation of the ongoing charges.

The ongoing charges and the portfolio turnover rate are calculated for the last twelve months.

The ongoing charges are annualised for periods less than one year. The portfolio turnover rate is not annualised for periods less than one year.

** Official net asset value per share including a swing pricing adjustment, if any.

* The portfolio turnover data has been calculated by the Administrative Agent, using the method described in the CSSF Circular 2003/122 issued on December 19, 2003 (see note 19). The ongoing charges figure corresponds to the ongoing charges figure as mentioned in the latest available Key Investor Information Document ("KIID") as at the date of this report. Transaction costs are included in the purchase/sale price of the securities (if any). These costs, which are not treated as operating expenses, are not included in the calculation of the ongoing charges.

The ongoing charges and the portfolio turnover rate are calculated for the last twelve months.

The ongoing charges are annualised for periods less than one year. The portfolio turnover rate is not annualised for periods less than one year.

** Official net asset value per share including a swing pricing adjustment, if any.

* The portfolio turnover data has been calculated by the Administrative Agent, using the method described in the CSSF Circular 2003/122 issued on December 19, 2003 (see note 19). The ongoing charges figure corresponds to the ongoing charges figure as mentioned in the latest available Key Investor Information Document ("KIID") as at the date of this report. Transaction costs are included in the purchase/sale price of the securities (if any). These costs, which are not treated as operating expenses, are not included in the calculation of the ongoing charges.

The ongoing charges and the portfolio turnover rate are calculated for the last twelve months.

The ongoing charges are annualised for periods less than one year. The portfolio turnover rate is not annualised for periods less than one year.

** Official net asset value per share including a swing pricing adjustment, if any.

Distribution P (USD)	30/09/2018	1.60%
Distribution R (USD)	30/09/2018	0.95%
Portfolio turnover in %*	30/09/2018	72.93%

* The portfolio turnover data has been calculated by the Administrative Agent, using the method described in the CSSF Circular 2003/122 issued on December 19, 2003 (see note 19). The ongoing charges figure corresponds to the ongoing charges figure as mentioned in the latest available Key Investor Information Document ("KIID") as at the date of this report. Transaction costs are included in the purchase/sale price of the securities (if any). These costs, which are not treated as operating expenses, are not included in the calculation of the ongoing charges.

The ongoing charges and the portfolio turnover rate are calculated for the last twelve months.

The ongoing charges are annualised for periods less than one year. The portfolio turnover rate is not annualised for periods less than one year.

** Official net asset value per share including a swing pricing adjustment, if any.

* The portfolio turnover data has been calculated by the Administrative Agent, using the method described in the CSSF Circular 2003/122 issued on December 19, 2003 (see note 19). The ongoing charges figure corresponds to the ongoing charges figure as mentioned in the latest available Key Investor Information Document ("KIID") as at the date of this report. Transaction costs are included in the purchase/sale price of the securities (if any). These costs, which are not treated as operating expenses, are not included in the calculation of the ongoing charges.

The ongoing charges and the portfolio turnover rate are calculated for the last twelve months.

The ongoing charges are annualised for periods less than one year. The portfolio turnover rate is not annualised for periods less than one year.

** Official net asset value per share including a swing pricing adjustment, if any.

* The portfolio turnover data has been calculated by the Administrative Agent, using the method described in the CSSF Circular 2003/122 issued on December 19, 2003 (see note 19). The ongoing charges figure corresponds to the ongoing charges figure as mentioned in the latest available Key Investor Information Document ("KIID") as at the date of this report. Transaction costs are included in the purchase/sale price of the securities (if any). These costs, which are not treated as operating expenses, are not included in the calculation of the ongoing charges.

The ongoing charges and the portfolio turnover rate are calculated for the last twelve months.

The ongoing charges are annualised for periods less than one year. The portfolio turnover rate is not annualised for periods less than one year.

** Official net asset value per share including a swing pricing adjustment, if any.

* The portfolio turnover data has been calculated by the Administrative Agent, using the method described in the CSSF Circular 2003/122 issued on December 19, 2003 (see note 19). The ongoing charges figure corresponds to the ongoing charges figure as mentioned in the latest available Key Investor Information Document ("KIID") as at the date of this report. Transaction costs are included in the purchase/sale price of the securities (if any). These costs, which are not treated as operating expenses, are not included in the calculation of the ongoing charges.

The ongoing charges and the portfolio turnover rate are calculated for the last twelve months.

The ongoing charges are annualised for periods less than one year. The portfolio turnover rate is not annualised for periods less than one year.

** Official net asset value per share including a swing pricing adjustment, if any.

* The portfolio turnover data has been calculated by the Administrative Agent, using the method described in the CSSF Circular 2003/122 issued on December 19, 2003 (see note 19). The ongoing charges figure corresponds to the ongoing charges figure as mentioned in the latest available Key Investor Information Document ("KIID") as at the date of this report. Transaction costs are included in the purchase/sale price of the securities (if any). These costs, which are not treated as operating expenses, are not included in the calculation of the ongoing charges.

The ongoing charges and the portfolio turnover rate are calculated for the last twelve months.

The ongoing charges are annualised for periods less than one year. The portfolio turnover rate is not annualised for periods less than one year.

** Official net asset value per share including a swing pricing adjustment, if any.

Notes to the financial statements

1- GENERAL INFORMATION

NN (L) (the "Company" or the "SICAV" or the "Fund") is a "Société d'Investissement à Capital Variable" ("SICAV") incorporated on September 6, 1993 for an unlimited period as a société anonyme (public limited company), governed by Part I of the Luxembourg law of December 17, 2010 on undertakings for collective investment, as amended.

The Memorandum and Articles of Association of the Company were published in the "Mémorial C, Recueil Spécial des Sociétés et Associations" of the Grand Duchy of Luxembourg and filed with the Register of the Luxembourg District Court where they may be consulted and copies may be obtained upon payment of registry fees.

The Company is registered with the Luxembourg Register of Companies under number B 44 873.

The Company currently offers the following share classes to the investors:

Share class name	Description
Capitalisation I	Capitalisation shares dedicated to institutional investors.
Capitalisation I Duration Hedged	Capitalisation shares dedicated to institutional investors. Where a Share-Class is described as duration hedged, the intention will be to minimize the interest rate sensitivity through reducing the duration of that Share-Class of the sub-fund to close to zero. Profits and losses associated with such hedging transactions will be allocated to the applicable Duration Hedged Share-Class. This Share-Class is closed for subscriptions.
Capitalisation I Hedged*	Capitalisation shares dedicated to institutional investors and denominated in a currency other than the reference currency of the sub-fund. These shares use hedging techniques against the exposure on the reference currency of the sub-fund.
Capitalisation M	Capitalisation shares reserved for institutional investors yet differing from Share-Class "I" in that it attracts a maximum management fee of 1.5% and a subscription fee of maximum 5%. It is distributed by affiliates to the Management Company, or at the discretion of the Board of Directors, by distributors and/or in certain countries where market conditions require this fee structure.
Capitalisation N	Capitalisation shares that do not pay any rebates and are intended for individual investors in the Dutch market. The maximum management fee for Share-Class "N" is lower than the maximum management fee for Share-Class "P". The fixed service fee for Share-Class "N" is equal to the fixed service fee for Share-Class "P". Subscription and conversion fees are not applicable for these Share-Class type.
Capitalisation N Hedged*	Capitalisation shares that do not pay any rebates and are intended for individual investors in the Dutch market and denominated in a currency other than the reference currency of the sub-fund. The maximum management fee for Share-Class "N" is lower than the maximum management fee for Share-Class "P". The fixed service fee for Share-Class "N" is equal to the fixed service fee for Share-Class "P". Subscription and conversion fees are not applicable for these Share-Class type. These shares use hedging techniques against the exposure on the reference currency of the sub-fund.
Capitalisation O	Capitalisation shares intended for individual investors who are clients of Distributors who have signed, at the discretion of the Management Company, an O Share-Class agreement with the Management Company in relation to their clients' investment in the Company. Neither retrocessions nor rebates are paid. The maximum management fee for Share-Class "O" is lower than the maximum fee for Share-Class "P". The fixed service fee for Share-Class "O" is equal to the fixed service fee for Share-Class "P". The maximum subscription fee and conversion fee for Share-Class "O" is equal to maximum subscription fee and conversion fee of Share-Class "P".
Capitalisation O Hedged*	Capitalisation shares intended for individual investors who are clients of Distributors who have signed, at the discretion of the Management Company, an O Share-Class agreement with the Management Company in relation to their clients' investment in the Company and denominated in a currency other than the reference currency of the sub-fund. Neither retrocessions nor rebates are paid. The maximum management fee for Share-Class "O" is lower than the maximum fee for Share-Class "P". The fixed service fee for Share-Class "O" is equal to the fixed service fee for Share-Class "P". The maximum subscription fee and conversion fee for Share-Class "O" is equal to maximum subscription fee and conversion fee of Share-Class "P". These shares use hedging techniques against the exposure on the reference currency of the sub-fund.
Capitalisation P	Capitalisation shares intended for individual investors.
Capitalisation P Hedged*	Capitalisation shares intended for individual investors denominated in a currency other than the reference currency of the sub-fund. These shares use hedging techniques against the exposure on the reference currency of the sub-fund.
Capitalisation Q	Capitalisation shares reserved for institutional investors. Neither retrocessions nor rebates are paid. The maximum management fee for Share-Class "Q" is lower than the maximum fee for Share-Class "I". The fixed service fee for Share-Class "Q" is equal to the fixed service fee for Share-Class "I". Subscription and conversion fees are not applicable for this Share-Class type.

Notes to the financial statements (continued)

Share class name	Description
Capitalisation R	Capitalisation shares intended for individual investors who are clients of Distributors which provide investment advisory services based on separate fee arrangements. No retrocessions or rebates are paid. The maximum management fee for Share-Class "R" is lower than the maximum management fee for Share-Class "P". The fixed service fee for Share-Class "R" is equal to the fixed service fee for Share-Class "P". The maximum subscription and conversion fees for Share-Class "R" are equal to those of Share-Class "P".
Capitalisation R Hedged*	Capitalisation shares intended for individual investors who are clients of Distributors which provide investment advisory services based on separate fee arrangements and denominated in a currency other than the reference currency of the sub-fund. No retrocessions or rebates are paid. The maximum management fee for Share-Class "R" is lower than the maximum management fee for Share-Class "P". The fixed service fee for Share-Class "R" is equal to the fixed service fee for Share-Class "P". The maximum subscription and conversion fees for Share-Class "R" are equal to those of Share-Class "P". These shares use hedging techniques against the exposure on the reference currency of the sub-fund.
Capitalisation S	Capitalisation shares for corporate beneficial owners with a minimum subscription amount of EUR 1,000,000 or equivalent and subject to subscription tax of 0.05% per year on net assets.
Capitalisation T	Capitalisation shares reserved for institutional investors yet differing from Share-Class "I" in that it attracts a lower or equal management fee and a subscription fee of maximum 5%. It is distributed by affiliates to the Management Company, or at the discretion of the Board of Directors, by distributors and/or in certain countries where market conditions require this fee structure.
Capitalisation U	Capitalisation shares for which no rebates will be paid and which are reserved for selected institutional investors with their headquarters based in Switzerland, for the purpose of discretionary management that, at the discretion of the Management Company, entered into a special "U" Share-Class agreement with the Management Company in relation to their investment in the Company.
Capitalisation V	Capitalisation shares dedicated to institutional investors yet differing from Share-Class "I" in that they attract a higher management fee.
Capitalisation X	Capitalisation shares for individual investors yet differing from Share-Class "P" in that they attract a higher management fee and are distributed in certain countries where market conditions require a higher fee structure.
Capitalisation X Hedged*	Capitalisation shares for individual investors yet differing from Share-Class "P" in that they attract a higher management fee and are distributed in certain countries where market conditions require a higher fee structure and denominated in a currency other than the reference currency of the sub-fund. These shares use hedging techniques against the exposure on the reference currency of the sub-fund.
Capitalisation Y	Capitalisation shares dedicated to individual investors who are clients of Distributors that entered into specific distribution arrangements with the Management Company subject to a CDSC ("Contingent Deferred Sales Charge"), differing from Share-Class "X" in that they apply an additional distribution fee of 1%. No subscription fee is applicable for these shares.
Capitalisation Y Hedged*	Capitalisation shares dedicated to individual investors who are clients of Distributors that entered into specific distribution arrangements with the Management Company subject to a CDSC ("Contingent Deferred Sales Charge"), differing from Share-Class "X" in that they apply an additional distribution fee of 1% and denominated in a currency other than the reference currency of the sub-fund. No subscription fee is applicable for these shares. These shares use hedging techniques against the exposure on the reference currency of the sub-fund.
Capitalisation Z	Capitalisation shares dedicated to institutional investors that, at the discretion of the Management Company, have signed a special management agreement ("Special Agreement") in addition to their subscription agreement in relation to their investment in the Fund. For this Share-Class, the management fee is levied and collected by the Management Company directly from the Shareholder as determined in the Special Agreement. The investment in this Share-Class requires a minimum holding amount of EUR 5,000,000 or the equivalent in another currency.
Capitalisation Z Hedged*	Capitalisation shares dedicated to institutional investors that, at the discretion of the Management Company, have signed a special management agreement ("Special Agreement") in addition to their subscription agreement in relation to their investment in the Fund and denominated in a currency other than the reference currency of the sub-fund. For this Share-Class, the management fee is levied and collected by the Management Company directly from the Shareholder as determined in the Special Agreement. The investment in this Share-Class requires a minimum holding amount of EUR 5,000,000 or the equivalent in another currency. These shares use hedging techniques against the exposure on the reference currency of the sub-fund.

Notes to the financial statements (continued)

Share class name	Description
Capitalisation Zz	Capitalisation shares reserved for institutional investors yet differing from Share-Class "Z" in that, a fund management services fee covering the management fee, the Service Fee and any other fees will be levied and collected by the Management Company directly from the Shareholder as determined in the fund management services agreement ("Fund Management Services Agreement") signed with the Management Company at its discretion.

The fixed service fee for Share-Class "O" is equal to the fixed service fee for Share-Class "P". The maximum subscription fee and conversion fee for Share-Class "O" is equal to maximum subscription fee and conversion fee of Share-Class "P". These shares use hedging techniques against the exposure on the reference currency of the sub-fund.
Distribution P	Distribution shares intended for individual investors.
Distribution P Duration Hedged	Distribution shares dedicated to individual investors. Where a Share-Class is described as duration hedged, the intention will be to minimize the interest rate sensitivity through reducing the duration of that Share-Class of the sub-fund to close to zero. Profits and losses associated with such hedging transactions will be allocated to the applicable Duration Hedged Share-Class. This Share-Class is closed for subscriptions.
Distribution P Hedged*	Distribution shares dedicated to individual investors and denominated in a currency other than the reference currency of the sub-fund. These shares use hedging techniques against the exposure on the reference currency of the sub-fund.
Distribution P (Q)	Distribution shares intended for individual investors - Quarterly dividend.
Distribution R	Distribution shares intended for individual investors who are clients of distributors which provide investment advisory services based on separate fee arrangements. No retrocessions or rebates are paid. The maximum management fee for Share-Class "R" is lower than the maximum management fee for Share-Class "P". The fixed service fee for Share-Class "R" is equal to the fixed service fee for Share-Class "P". The maximum subscription and conversion fees for Share-Class "R" are equal to those of Share-Class "P".
Distribution R Hedged*	Distribution shares intended for individual investors who are clients of distributors which provide investment advisory services based on separate fee arrangements and denominated in a currency other than the reference currency of the sub-fund. No retrocessions or rebates are paid. The maximum management fee for Share-Class "R" is lower than the maximum management fee for Share-Class "P". The fixed service fee for Share-Class "R" is equal to the fixed service fee for Share-Class "P". The maximum subscription and conversion fees for Share-Class "R" are equal to those of Share-Class "P". These shares use hedging techniques against the exposure on the reference currency of the sub-fund.
Distribution R (Q)	Distribution shares intended for individual investors who are clients of distributors which provide investment advisory services based on separate fee arrangements. No retrocessions or rebates are paid. The maximum management fee for Share-Class "R" is lower than the maximum management fee for Share-Class "P". The fixed service fee for Share-Class "R" is equal to the fixed service fee for Share-Class "P". The maximum subscription and conversion fees for Share-Class "R" are equal to those of Share-Class "P". Quarterly dividend.
Distribution S	Distribution shares intended for corporate beneficial owners with a Minimum Subscription Amount of EUR 1,000,000 subject to subscription tax of 0.05% per year on net assets.
Distribution T	Distribution shares reserved for Institutional Investors yet differing from Share-Class "I" in that it attracts a lower or equal management fee and a subscription fee of maximum 5%. It is distributed by affiliates to the Management Company, or at the discretion of the Board of Directors, by distributors and/or in certain countries where market conditions require this fee structure.

Notes to the financial statements (continued)

Share class name	Description
Distribution X	Distribution shares for individual investors yet differing from Share-Class "P" in that they attract a higher management fee and are distributed in certain countries where market conditions require a higher fee structure.
Distribution X Hedged*	Distribution shares for individual investors yet differing from Share-Class "P" in that they attract a higher management fee and are distributed in certain countries where market conditions require a higher fee structure and denominated in a currency other than the reference currency of the sub-fund. These shares use hedging techniques against the exposure on the reference currency of the sub-fund.
Distribution X (M)	Distribution shares for individual investors yet differing from Share-Class "P" in that they attract a higher management fee and are distributed in certain countries where market conditions require a higher fee structure - Monthly dividend.
Distribution X (M) Hedged*	Distribution shares for individual investors yet differing from Share-Class "P" in that they attract a higher management fee and are distributed in certain countries where market conditions require a higher fee structure and denominated in a currency other than the reference currency of the sub-fund - Monthly dividend. These shares use hedging techniques against the exposure on the reference currency of the sub-fund.
Distribution X (Q)	Distribution shares dedicated for individual investors yet differing from Share-Class "P" in that they attract a higher management fee and are distributed in certain countries where market conditions require a higher fee structure - Quarterly dividend.
Distribution X (Q) Hedged*	Distribution shares dedicated for individual investors yet differing from Share-Class "P" in that they attract a higher management fee and are distributed in certain countries where market conditions require a higher fee structure and denominated in a currency other than the reference currency of the sub-fund - Quarterly dividend. These shares use hedging techniques against the exposure on the reference currency of the sub-fund.
Distribution Y (M)	Distribution shares dedicated to individual investors who are clients of Distributors that entered into specific distribution arrangements with the Management Company subject to a CDSC ("Contingent Deferred Sales Charge"), differing from Share-Class "X" in that they apply an additional distribution fee of 1% - Monthly dividend. No subscription fee is applicable for these shares.
Distribution Y (M) Hedged*	Distribution shares dedicated to individual investors who are clients of Distributors that entered into specific distribution arrangements with the Management Company subject to a CDSC ("Contingent Deferred Sales Charge"), differing from Share-Class "X" in that they apply an additional distribution fee of 1% and denominated in a currency other than the reference currency of the sub-fund - Monthly dividend. No subscription fee is applicable for these shares. These shares use hedging techniques against the exposure on the reference currency of the sub-fund.
Distribution Z	Distribution shares dedicated to institutional investors that, at the discretion of the Management Company, have signed a special management agreement ("Special Agreement") in addition to their subscription agreement in relation to their investment in the Fund. For this Share-Class, the management fee is levied and collected by the Management Company directly from the Shareholder as determined in the Special Agreement. The investment in this Share-Class requires a minimum holding amount of EUR 5,000,000 or the equivalent in another currency.
Distribution Z Hedged*	Distribution shares dedicated to institutional investors that, at the discretion of the Management Company, have signed a special management agreement ("Special Agreement") in addition to their subscription agreement in relation to their investment in the Fund and denominated in a currency other than the reference currency of the sub-fund. For this Share-Class, the management fee is levied and collected by the Management Company directly from the Shareholder as determined in the Special Agreement. The investment in this Share-Class requires a minimum holding amount of EUR 5,000,000 or the equivalent in another currency. These shares use hedging techniques against the exposure on the reference currency of the sub-fund.
Distribution Z (M) Hedged*	Distribution shares dedicated to institutional investors that, at the discretion of the Management Company, have signed a special management agreement ("Special Agreement") in addition to their subscription agreement in relation to their investment in the Fund and denominated in a currency other than the reference currency of the sub-fund - Monthly dividend. For this Share-Class, the management fee is levied and collected by the Management Company directly from the Shareholder as determined in the Special Agreement. The investment in this Share-Class requires a minimum holding amount of EUR 5,000,000 or the equivalent in another currency. These shares use hedging techniques against the exposure on the reference currency of the sub-fund.

Notes to the financial statements (continued)

Share class name	Description
Distribution Z (Q)	Distribution shares dedicated to institutional investors that, at the discretion of the Management Company, have signed a special management agreement ("Special Agreement") in addition to their subscription agreement in relation to their investment in the Fund - Quarterly dividend. For this Share-Class, the management fee is levied and collected by the Management Company directly from the Shareholder as determined in the Special Agreement. The investment in this Share-Class requires a minimum holding amount of EUR 5,000,000 or the equivalent in another currency.
Distribution Z (Q) Hedged*	Distribution shares dedicated to institutional investors that, at the discretion of the Management Company, have signed a special management agreement ("Special Agreement") in addition to their subscription agreement in relation to their investment in the Fund and denominated in a currency other than the reference currency of the sub-fund - Quarterly dividend. For this Share-Class, the management fee is levied and collected by the Management Company directly from the Shareholder as determined in the Special Agreement. The investment in this Share-Class requires a minimum holding amount of EUR 5,000,000 or the equivalent in another currency. These shares use hedging techniques against the exposure on the reference currency of the sub-fund.
Distribution Zz Hedged*	Distribution shares reserved for institutional investors yet differing from Share-Class "Z" in that, a fund management services fee covering the management fee, the Service Fee and any other fees will be levied and collected by the Management Company directly from the Shareholder as determined in the fund management services agreement ("Fund Management Services Agreement") signed with the Management Company at its discretion and denominated in a currency other than the reference currency of the sub-fund. These shares use hedging techniques against the exposure on the reference currency of the sub-fund.

*The intention is to hedge full or part of the value of the net assets in the reference currency of the sub-fund or the currency exposure of certain (but not necessarily all) assets of the relevant sub-fund into either the reference currency of the currency hedged share class, or into an alternative currency. It is generally intended to carry out such hedging through the use of various derivative financial instruments including, but not limited to over-the-counter currency forward contracts and foreign exchange swap agreements. Profits and losses associated with such hedging transactions are allocated to the applicable currency hedged share class or classes.

The techniques used for share class hedging may include:

- i. hedging transactions to reduce the effect of fluctuations in the exchange rate between the currency in which the share class is denominated and the reference currency of the relevant sub-fund ("Base Currency Hedging");
- ii. hedging transactions to reduce the effect of fluctuations in the exchange rate between the currency exposure arising from the holdings of the relevant sub-fund and the currency in which the share class is denominated ("Portfolio Hedging at Share-Class Level");
- iii. hedging transactions to reduce the effect of fluctuations in the exchange rate between the currency exposure arising from the holdings of the relevant benchmark and the currency in which the share class is denominated ("Benchmark Hedging at Share-Class Level");
- iv. hedging transactions to reduce the effect of fluctuations in the exchange rate based on correlations between currencies arising from the holdings of the relevant sub-fund and the currency in which the share class is denominated ("Proxy Hedging at Share-Class Level").

The investors must be aware that every share class is not offered by every sub-fund of the Company.

Investment policies

Shareholders are advised that detailed investment policies of each sub-fund are described in the prospectus, which is made available to the shareholders at the depositary bank and at the Company's registered office as well as at the Local Sales offices or Main Client servicing contacts identified in this report. The prospectus will also be sent free of charge to anyone who so requests.

The following sub-funds are invested in other sub-funds of the Fund. As at September 30, 2018, such investments are as follows:

Notes to the financial statements (continued)

2- SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The financial statements are prepared and presented in accordance with generally accepted accounting principles and regulations in force in Luxembourg.

Currency conversion

The financial statements have been drawn up in the accounting currency of each sub-fund. Assets and liabilities expressed in currencies other than the accounting currency of the sub-fund are converted into that currency at the exchange rates prevailing on the closing date.

Income and expenses expressed in currencies other than the accounting currency of the sub-fund are converted into that currency at the exchange rates prevailing on the transaction date.

The various items in the combined statements correspond to the sum of the corresponding items in the financial statements of each sub-fund, converted if applicable into EUR, the Company's consolidation currency, at the exchange rates prevailing on the closing date.

As at September 30, 2018, the exchange rates used were as follows:

1 EUR =	4.2662	AED	1 EUR =	9.0886	HKD	1 EUR =	4.2814	PLN

Notes to the financial statements (continued)

Securities valuation

The value of all assets is determined under the responsibility of the Company's Board of Directors.

The transferable securities admitted to an official listing or to any other regulated market are valued at the last known prices. If these transferable securities are traded on several markets, the valuation is made on the basis of the last known price on the main market on which the transferable securities are listed. The last known price used for the bonds is the Bid price.

Transferable securities not listed or not traded on a stock exchange or on any other regulated market and transferable securities listed or traded on such a market but whose last known price is not representative, are valued with prudence and in good faith on the basis of their probable realisation value as determined by or under the direction of the Board of Directors of the SICAV.

Money market instruments and other short-term securities are valued using the straight-line amortisation method provided these instruments or securities have an initial or residual maturity at the time of their purchase by the Company of less than 12 months and if it appears that the last known price on the main market for the security in question cannot be considered as representative of the price of that security.

Investments in investment funds, either listed or not, are valued on the basis of their last available net asset value per share/unit.

The loans are not quoted and are valued by means of a recognized actuarial method.

Bonds (including ABS) are valued clean (excluding interest receivable) except those identified in the securities portfolio of each concerned sub-fund. The ones valued dirty are identified by an asterisk in the portfolio.

Financial derivative instruments valuation

The value of all assets is determined under the responsibility of the Company's Board of Directors.

Financial derivative instruments listed on a regulated market are valued at the last available published price applicable at the closing date.

Financial derivative instruments not listed on a regulated market are valued by means of an actuarial method recognised in the market.

Swaps are valued on the basis of their market value, which depends on several parameters (level and volatility of the index, market interest rate, remaining life of the swap).

Swaps are valued clean (excluding interest receivable/payable) except those identified in the financial derivative instruments of each concerned sub-fund.

Positive fair values of financial derivative instruments are disclosed as assets and negative fair values as liabilities in the statement of net assets, under the item "Total financial derivative instruments".

Interest to be received on swaps is included in the item "Other assets".

Interest to be paid on swaps is included in the item "Current liabilities".

Income

Dividends are accounted for on the ex-date, net of withholding tax.

Interest is accrued on a daily basis.

Discounts are accreted and premiums are amortised as adjustments to interest on bonds and other debt instruments.

3- SWINGING SINGLE PRICING

A sub-fund may suffer "dilution" of its net asset value per share because the price at which investors subscribe or redeem shares of the sub-fund does not reflect the dealing and other costs that arise when security trades are undertaken by the Investment Manager to accommodate the cash inflows or outflows related to these subscriptions or redemptions.

In order to counter this impact, a swing pricing mechanism may be applied to protect the interest of the shareholders of the sub-fund. If on any valuation day, the aggregate net transactions in shares of a sub-fund exceed a pre-determined threshold, as determined and reviewed for each sub-fund on a periodic basis by the Management Company under the responsibility of the Board of Directors, the net asset value per share may be adjusted upwards or downwards to compensate expected transaction costs related to these net capital inflows or outflows respectively.

Notes to the financial statements (continued)

The net inflows and net outflows will be determined by the Management Company based on the latest available information at the time of calculation of the net asset value per share.

The swing pricing mechanism may be applied across all sub-funds of the SICAV except for NN (L) Euro Liquidity. The extent of the price adjustment will be set by the Management Company in order to reflect dealing and other costs. Such adjustment may vary across the sub-funds.

As at September 30, 2018, a swing factor was applied on NN (L) Euro Credit and NN (L) Global High Yield sub-funds.

4- OTHER ASSETS AND CURRENT LIABILITIES

Other assets account includes mainly accrued interest, receivables on sales of securities and other instruments, receivables on subscriptions, other receivables, cash collateral due from brokers, interest to be received on swaps and anti dilution swing up receivables.

Current liabilities account includes mainly fee accruals, payables on purchases of securities and other instruments, payables on redemptions, other payables, cash collateral due to brokers, interest to be paid on swaps.

5- MANAGEMENT FEES

In accordance with the terms and conditions of the "Collective Portfolio Management Agreement" between NN Investment Partners Luxembourg S.A. and the SICAV, the sub-funds pay NN Investment Partners Luxembourg S.A. an annual management fee calculated on the average net assets of each class of shares as described in the table below. This fee is payable monthly in arrears.

As at September 30, 2018, the effective management fees rates for the active share classes are as follows:

Sub-funds	Management fees rate (p.a.)															
	Class D (in %)	Class I (in %)	Class M (in %)	Class N (in %)	Class O (in %)	Class P (in %)	Class Q (in %)	Class R (in %)	Class S (in %)	Class T (in %)	Class U (in %)	Class V (in %)	Class X (in %)	Class Y (in %)	Class Z* (in %)	Class Zz* (in %)

* for this share class, the management fee is not charged to the share class. Instead, a specific management fee is levied and collected by the Management Company directly from the shareholders.

⁽¹⁾ The sub-fund NN (L) Emerging Markets Debt Short Duration (Hard Currency) was launched on March 29, 2018.

⁽²⁾ The sub-fund NN (L) European Participation Equity was launched on November 27, 2017.

⁽³⁾ The sub-fund NN (L) Global Convertible Bond was launched on April 23, 2018.

⁽⁴⁾ The sub-fund NN (L) US High Yield was launched on December 11, 2017.

In the event of investment in UCITS and other target UCIs and where the Management Company or the investment manager by delegation is paid a management fee charged directly to the assets of these UCITS and other UCIs, such payments shall be deducted from the remuneration payable to the Management Company or the Investment Manager by delegation.

In the case where the management fees paid by the investee funds exceed the management fees to be paid by the sub-funds of the SICAV, the balance ("management fees excess") is recorded in the item "Other income" in the statement of operations and changes in net assets.

6- FIXED SERVICE FEES

A fixed service fee is charged at the level of the share classes of each sub-fund. The fixed service fee is paid to the Management Company and used by the latter to pay in the name of the Company the administration fees, the depositary fees, the transfer agent fees, the Belgian subscription tax and other on-going operating and administrative expenses billed to the Company.

The fixed service fee is fixed in the sense that the Management Company will bear the excess of any expenses above the annual paid fixed service fee for each share class of each sub-fund.

Conversely, the Management Company will be entitled to retain any amount of service fee charged to the share class which exceeds the actual related expenses incurred by the respective share class.

This fee, calculated on the average net assets of each class of shares, is payable monthly in arrears.

Notes to the financial statements (continued)

As at September 30, 2018, the effective fixed service fees rates for the active share classes are as follows:

Sub-funds	Fixed service fees rate (p.a.)															
	Class D (in %)	Class I (in %)	Class M (in %)	Class N (in %)	Class O (in %)	Class P (in %)	Class Q (in %)	Class R (in %)	Class S (in %)	Class T (in %)	Class U (in %)	Class V (in %)	Class X (in %)	Class Y* (in %)	Class Z** (in %)	Class Zz** (in %)

*for this share class, an additional distribution fee of 1.00% per annum is charged.

**for this share class, a service fee is charged to cover the administration and safe-keeping of assets and other on-going operating and administrative expenses.

***for this share class there are two different fixed service fee rates, for Capitalisation – 0.15 and for Distribution – 0.08.

⁽¹⁾ The sub-fund NN (L) Emerging Markets Debt Short Duration (Hard Currency) was launched on March 29, 2018.

⁽²⁾ The sub-fund NN (L) European Participation Equity was launched on November 27, 2017.

⁽³⁾ The sub-fund NN (L) Global Convertible Bond was launched on April 23, 2018.

⁽⁴⁾ The sub-fund NN (L) US High Yield was launched on December 11, 2017.

7- OVERLAY FEES

The Management Company may be entitled to receive a uniform Share-Class Overlay Fee of maximum 0.04% which is to be paid from the assets of the applicable Share-Class and based on actual costs. The Share-Class Overlay Fee is accrued at each calculation of the Net Asset Value and is set as a maximum in the sense that the Management Company may decide to lower the Overlay Fee charged to the respective Share-Class if economies of scale will allow.

The Overlay Fee is applicable to all the Currency Hedged Share-Classes, Duration Hedged Share-Classes and Overwriting Share-Classes, as defined in the prospectus. In case of Z and Zz Share-Classes those fees may be specified in the Special Agreement or Fund Management Services Agreement which will be levied and collected by the Management Company directly from the Shareholder.

As at September 30, 2018, the overlay fee is 0.021%.

8- ENHANCED TAX SERVICE FEE

In an effort to optimise the performance of the Company and/or the relevant sub-funds, the Management Company may in certain circumstances pursue tax reclaim or relief opportunities that are not processed by the Depositary and that would otherwise be foregone. The provision of these specific services must be considered an additional service of the Management Company to the relevant sub-funds. In case of positive outcome, the Management Company may be entitled to receive a fee as consideration for such services. Such fee is a set percentage of the amounts of tax recovered or otherwise saved as a consequence of performing the service and amounts to maximum 15% of tax recovered or saved. In case the recovery is unsuccessful, the Company and/or the relevant sub-funds shall not be charged for the services provided to them.

Notes to the financial statements (continued)

9- PERFORMANCE FEES

NN Investment Partners Luxembourg S.A. is entitled to receive a performance fee with respect to share classes of NN (L) Absolute Return Bond (except for share classes D, N, R and Z) which is to be paid from the assets of the applicable share class.

The factsheet of the sub-fund in the prospectus shows which share classes may apply a performance fee, what the percentage of the performance fee is and the applicable outperformance target. If a share class is denominated in another currency or applies special hedging techniques, the outperformance target may be adjusted accordingly.

The performance fee of a particular share class is accrued on each valuation day and is either crystallized and paid at the end of each financial year or, if shares are redeemed during the financial year, crystallized however not paid until the end of each financial year, if the applicable share class of the sub-fund exceeds the higher of the outperformance target and the relevant high water mark. The shares subscribed during the financial year do not contribute to the performance fee accrued in the period preceding the subscription.

The performance fee is calculated based on the all time high water mark principle which means that it is calculated if the net asset value per share of the applicable share class is higher compared to the net asset value per share at the end of previous financial years at which a performance fee was crystallized. In case no performance fee has been crystallized, the high water mark is equal to the launch price of the applicable share class or will remain unchanged if performance fee was crystallized in previous financial years.

Under no circumstances the applicable share classes will accrue a negative performance fee to compensate a decrease in value or underperformance. The Company does not apply equalization on shareholder level with regard to the calculation of the performance fee. The Board of Directors may close a share class which applies a performance fee for subscriptions while redemptions will continue to be allowed.

In this case a new share class with high watermark which equals to the launch price of the applicable new share class may be made available for new subscriptions.

The performance fee is calculated and accrued on each valuation day.

For the year ended September 30, 2018, no performance fees were to be charged.

10- TRANSACTION COSTS

The sub-funds of the SICAV incurred transaction costs which have been defined as brokerage fees relating to purchases or sales of transferable securities, money market instruments and financial derivative instruments (or other eligible assets traded in by the sub-funds) and/or commissions relating to subscriptions or redemptions of UCITS/UCI shares/units, if applicable.

In case of cross-investments or investment in the shares/units of other UCITS and/or other UCIs that are managed directly or by delegation by the Management Company (the "NNIP Luxembourg funds"), no transaction costs are applicable.

Transaction costs are included in the purchase/sale price of the securities.

For the year ended September 30, 2018, the amount of transaction costs incurred by each sub-fund is detailed in the following table:

Sub-funds	Currency	Transaction costs

⁽¹⁾ The sub-fund NN (L) Emerging Markets Debt Short Duration (Hard Currency) was launched on March 29, 2018.

⁽²⁾ The sub-fund NN (L) European Participation Equity was launched on November 27, 2017.

⁽³⁾ The sub-fund NN (L) Global Convertible Bond was launched on April 23, 2018.

⁽⁴⁾ The sub-fund NN (L) US High Yield was launched on December 11, 2017.

11- SUBSCRIPTION TAX

The Company is liable in Luxembourg to a subscription tax ("Taxe d'abonnement") of 0.01% per annum of its net assets for all shares restricted to institutional investors and all shares of the money market sub-fund NN (L) Euro Liquidity and of 0.05% per annum of its net assets for all the other shares.

The subscription tax is paid quarterly and calculated on the net asset value at the end of the relevant calendar quarter.

No subscription tax is paid on the assets held by the Company in other UCIs already subject to that tax in Luxembourg.

12- OTHER INCOME

This account mainly includes the security lending income, consent payment income on bonds, management fees excess defined in Note 5 and special reserve on prescribed coupons.

13- OTHER EXPENSES

This account mainly includes investment interest on Cash Collateral, Total Return Swaps and Capital Gain Tax.

14- SECURITIES LENDING

Under an agreement dated February 26, 2008 and subsequently amended on May 2, 2011, the SICAV has appointed Goldman Sachs International Bank to act as securities lending agent for the SICAV.

The totality of the income generated from the securities lending program is credited to the participating sub-funds. The fee structure of the securities lending activity is based on the yield generated and the revenue offered by counterparties borrowing securities. NN Investment Partners Luxembourg S.A. and/or the external lending agents do not charge a management fee in that respect.

As at September 30, 2018, the sub-funds of the SICAV which are mentioned below were engaged in securities lending transactions.

Notes to the financial statements (continued)

The value of the securities lent and the market value of the collateral received for each sub-fund is detailed in the following table:

Sub-funds	Currency	Market value of securities lent	Market value of collateral received*	Securities lending income
NN (L) Asian Debt (Hard Currency)	USD	5,031,720.06	5,610,425.78	43,751.04

NN (L) US Growth Equity	USD	2,076.22
NN (L) Utilities	USD	6,150.91

Revenues from securities lending transactions are included in the caption "Other income".

Notes to the financial statements (continued)

15- CHANGES IN THE COMPOSITION OF THE SECURITIES PORTFOLIO

These changes are made available to the shareholders at the depository bank and at the Company's registered office as well as at the Local Sales offices or Main Client servicing contacts identified in this report. They will also be sent free of charge to anyone who so requests.

16- INFORMATION TO SHAREHOLDERS

Under the Belgian Finance Act of December 22, 2003, that came into effect on January 1, 2004, a 0.06% yearly tax was applied on all money originating from Belgium included in the Company at December 31 of the prior year. This tax rate has been increased to 0.07% in 2005, to 0.08% in 2007, to 0.0965% in 2013 and decreased to 0.0925% from 2014 onwards.

The Company has lodged a complaint with the European Commission against the Belgian State for this tax to be recognized as contravening the Community law. That complaint has been rejected by the European Commission. Following another complaint introduced by the Company before the Belgian Courts, the Brussels Court of First Instance has delivered a positive judgment condemning the Belgian State to refund the amounts unduly paid. The Belgian State has, however, appealed against that decision. The procedure before the Court of Appeals is still pending. The decision of the Court in the two test cases is expected by September 2018 but can also be later than September.

17- COLLATERAL RELATED TO OVER-THE-COUNTER FINANCIAL DERIVATIVE INSTRUMENTS

In order to reduce the counterparty risk linked to over-the-counter financial derivative instruments, the Company received/(delivered) collateral from/to the counterparties as listed below.

As at September 30, 2018, the value of the collateral received/(delivered) is as follows:

Sub-fund	Counterparty	Type of Collateral	Currency	Total Collateral received / (delivered)
NN (L) Absolute Return Bond	Goldman Sachs	Cash	EUR	(130,000.00)

18- SECURITIES FINANCING TRANSACTION REGULATION

Securities Financing Transaction Regulation ("SFTR") introduces reporting requirements for securities financing transactions ("SFTs") and total return swaps in the framework of transparency of securities financing transactions and of reuse.

A Securities Financing Transaction (SFT) is defined as per Article 3(11) of the SFTR as:

- repurchase/reverse repurchase agreement;
- securities or commodities lending and securities or commodities borrowing;
- buy-sell back transaction or sell-buy transaction;
- margin lending transaction.

As at September 30, 2018 the Funds held securities lending and total return swaps as a type of instruments under the scope of the SFTR.

Notes to the financial statements (continued)

Global data

The amount of assets across all SFTs as at September 30, 2018 is as follows:

Sub-fund	Type of Asset	Currency	Market Value	% of AUM	% of lendable assets
NN (L) Asian Debt (Hard Currency)	Securities lending	USD	5,031,720.06	1.56	1.60
NN (L) Banking & Insurance	Securities lending	USD	2,460,678.39	2.15	2.16
NN (L) Consumer Goods	Securities lending	USD	1,186,809.56	1.00	1.01
NN (L) Emerging Europe Equity	Securities lending	EUR	1,313,188.72	2.71	2.73
NN (L) Emerging Markets Corporate Debt	Securities lending	USD	3,614,301.23	2.76	2.91

* The amounts reported relate to OTC derivatives positions and not only to total return swaps positions.

The maturity of SFTs and TRS is as follows:

As at September 30, 2018, all the securities lending trades have an open maturity.

As at September 30, 2018, the maturity of each Total Return Swap is disclosed in the statement "Financial derivative instruments" of each sub-fund.

For the sub-fund NN (L) Multi Asset Factor Opportunities the maturity of one of the total return swaps is between one week to one month and the maturity of the remaining total return swaps is between one month to three months.

For the sub-fund NN (L) Global Bond Opportunities, the maturity of the total return swaps is between three months to one year.

For the sub-fund NN (L) Euro Fixed Income, the maturity of the first total return swap is between one month to three months and the maturity of the second total return swap is between three months to one year.

Safekeeping of collateral granted

The collateral granted is on a title transfer basis and the fund can recover this collateral at any time. The counterparty only has the obligation to return the same amount back to the fund and the fund cannot request to return this amount "at any time" as long as there is exposure to the underlying transaction.

There was no collateral granted during the year ended September 30, 2018.

Return/Costs

The net returns presented in the note 18 cannot be compared to the securities lending income from Note 14 because of timing difference related to communication and processing of data between the parties involved.

Return and cost for each type of SFTs and total return swaps for the year ended September 30, 2018 is as follows:

Returns	Currency	Amount	% of overall returns

19- PORTFOLIO TURNOVER RATIO

The Portfolio Turnover Ratio is an indicator of the relevance of the additional costs incurred by a fund when buying and selling investments according to its investment policy.

The Portfolio Turnover Ratio is calculated using the method described in the CSSF Circular 2003/122, as below:

$$\text{Turnover} = \frac{(\text{Total 1} - \text{Total 2})}{M} * 100$$

Total 1 = Total securities transactions during the period = X + Y

X = purchases

Y = sales

Total 2 = Total capital transactions during the period = S + R

S = subscriptions

R = redemptions

M = Average Net Assets

The Portfolio Turnover Ratio is expressed as a percentage. The Portfolio Turnover calculation excludes the trades instructed into NN (L) Liquid which are linked to cash facility management.

20- SUBSEQUENT EVENTS

With regard to the sub-fund "NN (L) Emerging Markets High Dividend"; with effect as from October 1, 2018, "Part II: sub-fund factsheets" of the Prospectus will clarify the role of the parties involved in the Investment Management activities of the sub-fund as follow:

Investment Manager
NN Investment Partners B.V.

On December 10, 2018, the sub-fund NN (L) European ABS has been launched and has absorbed the sub-fund NN (L) Flex - European ABS, a sub-fund of NN (L) Flex.

With regards to the Money Market Fund Regulation (European Directive 2017/1131 dated of June 14, 2017) that will be applicable on January 21, 2019, the sub fund NN (L) Euro Liquidity is qualified as Short term VNAV.

On December 03, 2018 the changes of sub-fund name below have been done:

- NN (L) Euro Green Bond into NN (L) Green Bond
- NN (L) Telecom into NN (L) Communication Services

During the OGM dated of October 10, 2018 two Directors have been appointed:

Patrick Den Besten

Head of Financial Risk

NN Investment Partners (the "Group")

Ivo Frielink

Head Product Management & Development

NN Investment Partners (the "Group")

Other information to shareholders (unaudited)

ALFI Code of Conduct

It is hereby confirmed that NN (L) adheres and complies to the principles of the ALFI “Code of Conduct for Luxembourg Investment Funds”.

Remuneration policy

A) General

The Management Company NN Investment Partners Luxembourg S.A. has implemented a Remuneration Policy that is designed as not to encourage taking excessive risks. In that context, it integrates in its performance management system, risk criteria, specific to the activities of the business units concerned. The Management Company has implemented a series of safeguards that refrain to staff taking undue risk compared to the activity profile.

The governance structure of the Remuneration Policy aims at preventing internal as also external conflicts of interests. The Policy is formulated by the Management and approved by the Board of Directors. The Policy follows a defined process establishing the principles, the approval, communication, implementation, review and update of the Policy which involves the Board of Directors, Management, Human Resources, Internal Audit and other control functions.

Performance is assessed on Group and Management Company level. Individual staff assessments are based on a weighting of financial and non-financial targets linked to the specific job scope and role. As such, the principle of individual performance assessment is based on an assessment of objectives reached as well an appreciation of the employee’s long-term value creation. Furthermore, the performance reflects an assessment of business and interpersonal skills and is linked to the achievement of the individual. The criteria applied to establish fixed remuneration are job complexity, level of responsibility, performance and local market conditions.

In accordance with Article 33 of the Law of May 10, 2016, modifying Article 151 of the Law of December 17, 2010, further details on remuneration are published on nnp.com – country Luxembourg website under “our policies”.

B) Quantitative information

The tables below provide aggregated information on the remuneration of all staff employed on December 31, 2017, which is the financial year-end of the Management Company, and performing activities for NN Investment Partners Luxembourg during the year 2017, including all Identified Staff selected on the basis of UCITS Directive.

Aggregate fixed and variable remuneration for the performance year 2017

Fixed and variable remuneration awarded in relation to the performance-year 2017		
Amounts in EUR 1,000 and gross	NN Investment Partners Luxembourg S.A. (Identified Staff)	NN Investment Partners Luxembourg S.A. (all staff – excluding Identified Staff)
Number of employees (#)	7	34
Fixed remuneration	953.37	2,770.33
Variable remuneration (1)	360	289
Aggregate of Fixed and Variable remuneration	1,313.37	3,059.33

Note 1): Variable remuneration includes all conditional and unconditional awards in relation to the performance year 2017 as approved by the relevant committees and authorised per March 9, 2018. This includes all payments to be processed through payroll per March/April 2018, upfront NN Group shares and NNIP Investment Entitlements (Fund-of-Fund with a one year holding period) as awarded to Identified Staff as well as all conditional deferred NN Group shares and NNIP Investment Entitlements.

Comments:

⁽¹⁾ Commitment or VaR approach. When the VaR approach is used to calculate the global exposure, the table indicates whether the Absolute VaR or Relative VaR is used.

⁽²⁾ In accordance with the UCITS regulation, the expected maximum level of leverage is outlined for the Sub-Funds using the VaR approach. The expected maximum level of leverage is expressed as the ratio between the market risk exposure of the Sub-Fund's positions and its net asset value. The ratio is calculated in accordance with the commitment method ("net approach") and the sum of notional method ("gross approach"). While the net approach takes into account netting and hedging arrangements, the gross approach does not take into account such arrangements, hence triggering results that are generally higher and not necessarily representative from an economic exposure point of view. Irrespective of the approach used, the expected maximum level of leverage is an indicator and not a regulatory limit. A Sub-Fund's observed level of leverage may be higher than the expected maximum level as long as it remains in line with its risk profile and complies with its VaR limit. Depending on market movements, the expected maximum level of leverage may vary over time. In case no derivatives positions are included in the portfolio, the base value for the leverage is "0" (i.e. 0%). The leverage ratio aims to approximate the impact of the use of derivatives instruments on the overall market risk of a given Sub-Fund. For a complete picture of the risk profile associated to each Sub-Fund, please refer to the risk profile section disclosed in each Sub-Fund's Factsheet.

⁽³⁾ Changes of the maximum expected level of leverage: The following maximum expected levels of gross and net leverages will be increased in the next prospectus of December 2018. Main reason is the increased FX turnover, which is consequence of higher market volatility:

- NN (L) Emerging Markets Debt (Local Bond):
 - Net Leverage: from 100% to 175%
 - Gross Leverage: from 200% to 400%
- NN (L) Emerging Markets Debt (Local Currency):
 - Net Leverage: from 200% to 250%
 - Gross Leverage: from 300% to 500%
- NN (L) Emerging Markets Debt Opportunities:
 - Net Leverage: from 125% to 175%
 - Gross Leverage: from 225% to 400%

^(*) The calculation period is from 02/10/2017 to 28/09/2018, except for the following Sub-Fund:

- NN (L) US High Yield which was launched on 11/12/2017.
- NN (L) Emerging Markets Debt Short Duration (Hard Currency) which was launched on 29/03/2018.
