KEY INVESTOR INFORMATION

This document provides you with key investor information about this Investment Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Portfolio. You are advised to read it so you can make an informed decision about whether to invest.

Emerging Markets Multi-Asset Portfolio

a sub-fund of AB SICAV I

Class I Shares (ISIN: LU0633141378)

This Fund is managed by AllianceBernstein (Luxembourg) S.à r.l., part of the AB Group.

Objectives and investment policy

Investment objective

The Portfolio seeks to increase the value of your investment over time through a combination of income and capital growth (total return) while seeking to moderate volatility

Investment policy

Under normal market conditions, the Portfolio typically invests in equity securities and debt securities of any credit quality (including below Investment Grade debt securities) from emerging market issuers. The Portfolio may also seek exposure to other asset classes such as commodities, real estate, currencies and interest rates, as well as to any other eligible indices. The Portfolio is not limited in its exposure to equities, debt securities or currencies.

The Portfolio may invest in all markets on which these equity securities are traded, such as China Connect Scheme markets for China A-shares and offshore equity markets for H-shares, as well as other offshore equity markets.

The Portfolio may also invest in China through the QFI Scheme.

The Portfolio may utilise all bond markets where these debt securities are traded including Bond Connect.

The Portfolio may invest in, or be exposed up to (i) 30% in equity or debt securities from issuers in developed markets that may benefit from opportunities in emerging market countries and (ii) 20% in structured products such as asset-backed and mortgage-backed securities.

The Portfolio may be exposed to any currency. The Portfolio uses derivatives to a significant extent for hedging (reducing risks), efficient portfolio management, and other investment purposes (including to gain additional exposure and to take synthetic short positions).

Responsible Investing

The Portfolio is classified as Article 8 under SFDR. For more information, please refer to SFDR Pre-Contractual Disclosures in the prospectus.

Terms to understand

Asset-backed securities: Debt securities representing an interest in a pool of consumer debt, such as credit card debt or automobile loans.

Below Investment Grade Securities: Debt securities rated below Investment Grade that may be higher-yielding but riskier debt securities.

Bond Connect: A mutual market access scheme that allows investors from mainland China and overseas to trade in each other's respective debt securities markets.

China A-shares equity markets: Comprised currently of portions of both Shanghai Stock Exchange and the Shenzhen Stock Exchanges. A-shares are shares of mainland China-based companies.

China Connect Scheme: A system used for the trading of China Connect Securities on the Shanghai Stock Exchange and/or Shenzhen Stock Exchange.

China H-share equity markets: Exchanges or markets outside of mainland China where H-shares of Chinese companies are traded.

Debt securities: Securities that represent the obligation to pay a debt, with interest.

Derivatives: Financial instruments whose value is linked to one or more rates, indices, share prices or other values.

Duration: A measure of how much the price of a fixed-income asset will fluctuate as a result of changes in the interest rate environment. Securities with a higher duration are typically more sensitive and can have greater price fluctuations in case of changes in the interest rates.

Emerging market countries: Nations whose economies and securities markets are less established.

Equities: Securities that represent an ownership stake in a company.

Investment Grade Securities: Debt securities rated at or above BBB-/Baa3.

Mortgage-backed securities: Debt securities representing an interest in a pool of mortgages.

Offshore equity markets: Exchanges or markets located in the U.S., Hong Kong, the United Kingdom, Singapore, Korea, and Taiwan.

Other investment purposes: In line with the Portfolio's investment objective and policy, means to gain exposure and/or to manage duration.

SFDR: Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on SFDR Pre-Contractual Disclosures in the financial services sector.

Volatility: Measure of the pricing behavior of a security.

Risk And Reward Profile

Lower risk

Potentially lower reward

Higher risk

Potentially higher reward

1	2	3	4	5	6	7
---	---	---	---	---	---	---

What does this risk indicator mean?

This synthetic risk and reward indicator (SRRI) scale rating indicates how the Portfolio may perform and the risk of losing some or all of your capital. Generally the potential for higher gains also means a larger risk of losses. The lowest category does not mean a risk free investment.

The above rating is an estimate, not a guarantee. It is calculated using industry-standard methods and is based on medium-term volatility (how sharply the Portfolio's actual or estimated share price has gone up and down over five years).

Historical data may not be a reliable indication of the future risk profile of this Portfolio. The risk and reward category for this Portfolio is not guaranteed to remain unchanged and may shift over time.

Why is this Portfolio in this category?

The Portfolio is not guaranteed in capital. The Portfolio is invested in both equity and

debt securities that can face sharp variations up or down and that can generate significant gains or losses.

Risks materially relevant to the Portfolio but not adequately captured by the SRRI:

The rating does not reflect the possible effects of unusual market conditions or large unpredictable events, which could amplify everyday risks and could trigger other risks, such as:

Allocation risk: The Portfolio's allocation to various asset classes may change over time and this could impact the performance of the Portfolio positively or negatively.

Counterparty risk: If an entity with which the Portfolio does business becomes insolvent, payments owed to the Portfolio could be delayed, reduced and/or eliminated.

Liquidity risk: Certain securities could become hard to buy or to sell at a desired time or price.

Charges

The charges you pay are used to pay the cost of running the Portfolio, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest

Entry charge 1.50%

Exit charge None

This is the maximum that might be taken out of your money before it is invested/ before the proceeds of your investment are paid out.

Charges taken from the Portfolio over a year

Ongoing Charge 1.13%

Charges taken from the Portfolio under certain specific conditions

Performance fee None

The entry and exit charges shown are maximum figures. In some cases, you might pay less – you can find this out from your financial advisor.

The ongoing charges figure is based on expenses for the year ending December 2023. This figure may vary from year to year. It excludes:

- Portfolio transaction costs, except in the case of an entry/exit charge paid by the Portfolio when buying or selling units in an other collective investment undertaking.

For more information about charges, please refer to the Fund's prospectus which is available at www.alliancebernstein.com

Past Performance

Please be aware that past performance is not a reliable indicator of future results.

The past performance is shown after deduction of ongoing charges. Any entry/exit fees are excluded from the calculation.

The Portfolio was launched on 23/05/2011.

The share class of the Portfolio was launched on 01/06/2011.

Performance is shown only where full calendar-year performance history is available.

Past performance has been calculated in USD and is expressed as a percentage change of the Portfolio's net asset value at each year end.
