Mirova Euro Green and Sustainable Corporate Bond Fund is a sub-fund of Mirova Funds (the "SICAV").

R/A (EUR) ISIN LU0552643842

Natixis Investment Managers International, part of the BPCE Group, is the Management Company of the Fund.

OBJECTIVES AND INVESTMENT POLICY

The Product's sustainable investment objective is to invest in bonds that generate environmental and/or social benefits provided that such sustainable investment does not significantly harm any of the sustainable objectives as defined by EU Law and that the selected issuers follow good governance practices. The Product will invest principally in bonds, among which euro-denominated bonds, green, green&social as well as social bonds, issued by corporate issuers, while systematically including Environmental, Social and Governance (ESG) considerations, with an objective to outperform the Bloomberg Barclays Capital Euro Aggregate Corporate Index (EUR Hedged) over the recommended minimum investment period of 3 years. This index is representative of the fixed income market for eurodenominated bonds issued by corporate issuers rated at least BBB- or Baa3.

The Product is actively managed. For indicative purposes only, the Product's performance may be compared to the Benchmark. In practice, the portfolio of the Sub-Fund is likely to include constituents of the Benchmark, but the Investment Manager has full discretion in the selection of the securities comprising the portfolio within the limits of the Sub-Fund's investment policy. However, it does not aim to replicate that Benchmark and may therefore significantly deviate from it.

It invests at least 70% of its net assets in euro-denominated debt securities among which green, social bonds issued by corporate issuers. The green bonds finance projects with a positive environmental impact and social bonds are those raising funds for socially sound and sustainable projects that achieve greater social benefits. They are aligned with the Green and Social Bonds Principles as defined by the ICMA. The Investment Manager aims at building a diversified portfolio of debt securities based on ESG criteria and fundamental analysis of credit quality and valuation. The Product also implements a top-down and broader approach on fixed income markets.

The Product follows an ESG thematic and “Best-In-Universe” approach (complemented by sectoral exclusion, commitment and voting policies) which aims at assessing systematically the social and environmental impacts of each company in relation to the achievement of UN SDGs. It involves the rating of each company in respect of the criteria: Environmental (such as environmental recycling), Social (such as employee health) and Governance (such as business ethics). An ESG strategy may comprise methodological limitations such as the ESG Driven Investments Risk. Please refer to the sections “Description of the extra-financial analysis and consideration of the ESG criteria” and “Principal risks” of the Prospectus for additional information.

The Product principally invests in bonds which are rated Investment Grade (minimum BBB- or equivalent), no more than 10% of its total assets in High-Yield securities (at least B+ or equivalent) and no more than 10% in unrated securities. The Product may invest up to 10% of its total assets in convertible bonds, up to 10% in contingent convertible bonds, up to 30% in bonds issued by supra-national organisations, sovereign governments and government agencies issuers and up to 20% of its net assets in debt securities issued or guaranteed by issuers in emerging markets countries.

The Product may use derivatives for hedging and investment purposes.

Income earned by the Sub-Fund is reinvested.

Shareholders may redeem Shares on demand on any business day in France and Luxembourg at 13h30.

- **Liquidity risk:** Liquidity risk represents the price reduction which the UCITS should potentially accept to have to sell certain securities for which there is one insufficient request on the market.
