

HSBC Global Investment Funds

INDIAN EQUITY

Monthly report 31 January 2024 | Share class ADEUR

Investment objective

The Fund aims to provide long term capital growth and income by investing in a portfolio of Indian shares, while promoting environmental, social and governance (ESG) characteristics. The Fund qualifies under Article 8 of SFDR.

Investment strategy

The Fund is actively managed.

In normal market conditions, the Fund will invest at least 90% of its assets in shares (or securities similar to shares) of companies of any size, that are based in, or carry out most of their business in India. The Fund may invest up to 30% in a combination of participation notes and convertible securities.

The Fund includes the identification and analysis of an issuer's ESG Credentials as an integral part of the investment decision making process to reduce risk and enhance returns. ESG Credentials may include environmental and social factors, and corporate governance practices. The Fund conducts enhanced due diligence on companies that are considered to be non-compliant with the UN Global Compact Principles.

The Fund will not invest more than 10% in Real Estate Investment Trusts, may invest in bank deposits, money market instruments for treasury purposes and up to 10% in other funds. See the Prospectus for a full description of the investment objectives and derivative usage.

Main risks

- The value of investments and any income from them can go down as well as up and you may not get back the amount originally invested.
- Investing in assets denominated in a currency other than that of the investor's own currency exposes the value of the investment to exchange rate fluctuations
- The value of investible securities can change over time due to a wide variety of factors, including but not limited to: political and economic news, government policy, changes in demographics, cultures and populations, natural or human-caused disasters etc.

Risk disclosures

- The Fund may invest in Emerging Markets, these markets are less established, and often more volatile, than developed markets and involve higher risks, particularly market, liquidity and currency risks.
- Investment Leverage occurs when the economic exposure is greater than the amount invested, such as when derivatives are used. A Fund that employs leverage may experience greater gains and/or losses due to the amplification effect from a movement in the price of the reference source.
- Where overseas investments are held the rate of currency exchange may cause the value of such investments to go down as well as up.
- Further information on the potential risks can be found in the Key Information Document (KID) and/or the Prospectus or Offering Memorandum.

Benchmark disclosure

The Investment Advisor will use its discretion to invest in securities not included in the reference benchmark based on active investment management strategies and specific investment opportunities. It is foreseen that a significant percentage of the Fund's investments will be components of the reference benchmark. However, their weightings may deviate materially from those of the reference benchmark. Any deviations with respect to the benchmark are monitored within a comprehensive risk framework, which includes monitoring at security and sector level. The deviation of the Fund's performance relative to the benchmark is monitored, but not constrained, to a defined range. The reference benchmark has a high level of concentration. This means that a small number of securities make up a significant proportion of the benchmark.
