

## FUND FACTSHEET

# OSTRUM CRÉDIT EURO 1-3

SEPTEMBER 2020

### FUND HIGHLIGHTS

- Invests primarily in euro-denominated Investment-Grade corporate bonds
- Adopts an active management approach following bottom-up process, which combines two main drivers of added-value: directional exposure and issuer selection
- Every two months, a committee of credit specialists establishes directional expectations for the credit markets. The «Credit Sector Teams» (Financial, Defensive and Cyclical) select issuers and issues on a weekly basis
- Benefits from several diversification factors in order to soften the effect of a potential over-exposure to certain sectors or issuers
- Can invest up to 15% of net assets in High Yield securities and up to 10 % in securitised assets

\* Risk free rate : Performance of annualised capitalised Eonia over the period

PERFORMANCE DATA SHOWN REPRESENTS PAST PERFORMANCE AND IS NOT A GUARANTEE OF FUTURE RESULTS. Some recent performance may be lower or higher. As the value of the capital and the returns change over time (notably due to currency fluctuations), the repurchase price of the shares can be higher or lower than their initial price. The performance indicated is based on the NAV (net asset value) of the share class, and is net of all charges applying to the fund but does not account for sale commissions, taxation or paying agent fees, and assumes that dividends if any are reinvested. Taking such fees or commissions into account would lower the returns. The performance of other share classes would be higher or lower based on the differences between the fees and the entry charges. In the periods where certain share classes are not subscribed or not yet created (inactive share classes), performance is calculated based on the actual performance of an active share class of the fund whose characteristics are considered by the management company as being closest to the inactive share class concerned, after adjusting it for the differences between the total expense ratios (TER), and converting any net asset value of the active share class in the currency in which the inactive share class is listed. The performance given for the inactive share class is the result of a calculation provided for information. Please read the important information given in the additional notes at the end of this document.

SHARE CLASS : I/D (EUR)

### ABOUT THE FUND

#### Investment Objective

The Mutual Fund is a feeder fund invested in the M share (LU0935221688) of "Ostrum Euro Short Term Credit" (referred to as "master"), which is a Compartment of the SICAV Natixis AM Funds governed by Luxembourg law. ### Illustrative Growth of 10,000

The graph compares the growth of 10,000 in a fund with that of an index. The total returns are not adjusted to reflect sales charges or the effects of taxation, but are adjusted to reflect actual ongoing fund expenses, and assume reinvestment of dividends and capital gains. If adjusted, sales charges would reduce the performance quoted. The index is an unmanaged portfolio of specified securities and cannot be invested in directly. The index does not reflect any initial or ongoing expenses. A fund's portfolio may differ significantly from the securities in the index. The index is chosen by the fund manager.

### Risk Measures

The risk and reward indicator is shown as a scale of 1 to 7 representing the levels of risk and rewards in increasing order that enables you to assess the potential performance of a fund compared to the risk it represents. The general calculation method of this regulatory indicator is based on the annualized past volatility of the fund, calculated from weekly returns over a five-year period. This indicator is monitored regularly and may vary. The SRRI level indicated in this document is the level in force on the date the document was drawn up.

### Special Risk Considerations

The specific risks involved in investing in the Fund are the following risks:

- Capital loss risk
- Debt securities risk
- Changing interest rate risk
- Credit risk
- Securities rated below investment grade or unrated securities
- zero coupon securities risk
- Changes in interest rates risk
- Leverage risk
- Securitization risk
- Convertible securities risk
- Financial Derivatives instruments risk
- Counterparty risk
- Risk of management of financial guarantees (collateral)

A complete description of these risks is given in the chapter entitled "Main Risks" in the prospectus. This chapter also describes the other risks involved in investing in the Fund.

### Reference Index

### Portfolio Statistics

#### Volatility

Extent of change of a security or stock, fund, market or index over a given period. High volatility is indicative of a significant change in the share price, and therefore the risk associated with the security is high.

#### Information ratio

Indicator of the outperformance of the manager (with respect to the benchmark), given the additional risk taken by the manager with respect to the same index (fund's tracking error). The higher the value, the better the fund.

#### Tracking error

Measurement of the relative risk taken by a fund with respect to its benchmark.

#### Sharpe ratio

Outperformance indicator of a product with respect to a risk-free rate, given the risk accepted (product volatility). The higher the value, the better the fund.

#### Modified Duration

Indicator of a bond's interest rate risk, and shows changes in the value of a bond as interest rates fluctuate. Modified duration varies inversely against interest rates. E.g.: for a modified duration of 5, if interest rates fall by 1%, the value of the bond increases by 5%.

Past performance is no guarantee of future results. The value and income derived from investments can go up or down. The Morningstar rating applies to funds having at least 3 years of history. It takes into account subscription fee, the yield without risk and the standard deviation to calculate for every fund its ratio MRAR (Morningstar Risk Adjust Return). Funds are then classified in decreasing order by MRAR: first 10 per cent receive 5 stars, the following 22,5 % 4 stars, the following 35 % 3 stars, following 22,5 % 2 stars, the last 10 % receive 1 star. Funds are classified within 180 European categories.
