BNY MELLON GLOBAL FUNDS, PLC

BACKGROUND TO THE COMPANY

The following information is derived from and should be read in conjunction with the full text and definitions section in the prospectus.

STRUCTURE

BNY Mellon Global Funds, plc (the “Company”) was incorporated in the Republic of Ireland as a public limited company on 27 November 2000 with registration number 335837 under the Companies Act 2014, as amended. The Company changed its name from Mellon Global Funds, plc to BNY Mellon Global Funds, plc, effective 3 June 2008.

The Company is an open-ended umbrella type investment

company with variable capital organised under the laws of Ireland, with segregated liability between sub-funds, individually referred to as the “Fund” and collectively the “Funds”. The Company qualifies and is authorised in Ireland by the Central Bank of Ireland (the “Central Bank”) as an undertaking for collective investment in transferable securities pursuant to the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations, 2011 (as amended) (the “UCITS Regulations”). The Company currently comprises of 51 active Funds as at 31 December 2022 (31 December 2021: 49).

The history of the Funds within the Company as at the date of approval of this report and accounts is as follows:

* Please refer to Note 19 of the financial statements.

** Please refer to Note 20 of the financial statements.

A separate pool of assets (a "Portfolio") is maintained for each Fund, each being invested in accordance with the investment objective applicable to the Fund to which the Portfolio relates.

INVESTMENT OBJECTIVE

The assets of each Fund are invested separately in accordance with the investment objectives and policies of the relevant Fund, which are set out in the relevant supplements to the prospectus.

OTHER RELEVANT INFORMATION

Audited annual reports and financial statements and unaudited semi-annual reports are available to the public at the registered office of the Company or on www.bnymellonim.com. They can also be sent to shareholders at their registered address.

BNY MELLON GLOBAL FUNDS, PLC

DIRECTORS' REPORT

The Directors submit their annual report together with the audited financial statements for the financial year ended 31 December 2022.

PRINCIPAL ACTIVITIES

The investment objective of each of the Funds is outlined in the prospectus and discussed in the Investment Managers' Reports.

DIRECTORS' RESPONSIBILITIES

The Directors are responsible for preparing the Directors' Report and financial statements in accordance with the Companies Act 2014, as amended.

Irish company law requires the Directors to prepare financial statements for each financial year. Under that law, the Directors have elected to prepare the financial statements in accordance with Financial Reporting Standard ("FRS") 102: "The Financial Reporting Standard applicable in the United Kingdom and the Republic of Ireland" ("FRS 102"). Under company law, the Directors must not approve the financial statements unless they are satisfied that they give a true and fair view of the assets, liabilities and financial position of BNY Mellon Global Funds, plc (the "Company") at the financial year end date and of the profit or loss of the Company for the financial year and otherwise comply with the Companies Act 2014, as amended. In preparing the financial statements, the Directors are required to:

- select suitable accounting policies and then apply them consistently;
- make judgements and estimates that are reasonable and prudent;
- state whether the financial statements have been prepared in accordance with applicable accounting standards, identify those standards and note the effect and the reasons for any material departure from those standards; and
- prepare the financial statements on the going concern basis unless it is inappropriate to presume that the Company will continue in operation.

The Directors confirm that they have complied with the above requirement when preparing the financial statements.

DIRECTORS' COMPLIANCE STATEMENT

The Directors, in accordance with Section 225 (2) of the Companies Act 2014 (the "Act"), acknowledge that they are responsible for securing the Company's compliance with its "Relevant Obligations" as defined in that section and which constitute: (i) certain provisions under the Act, a breach of which is a category 1 or 2 offence; (ii) serious market abuse offences as referred to in Section 1368 of the Act; and (iii) the Irish tax laws referred to in Section 225 of the Act.

It is the policy of the Company to secure compliance with its Relevant Obligations and to foster an environment in the Company which raises awareness of, and promotes a culture of compliance with, those obligations (the "Compliance

Policy").

In order to give effect to the Compliance Policy, the Board, with the assistance of the relevant advisers, have identified the Relevant Obligations that they consider applicable to the Company.

The Directors confirm that:

- appropriate arrangements and structures (the "Compliance Arrangements") that, in their opinion, are designed to secure material compliance with the Company's Relevant Obligations, have been put in place; and
- a review has been conducted, during the financial year, of the Compliance Arrangements that have been put in place to secure the Company's compliance with its Relevant Obligations.

This Compliance Policy Statement will be subject to periodic review and may be supplemented from time to time. The Compliance Arrangements will be subject to annual review with the aim of establishing that they continue to provide a reasonable assurance of compliance, in all material respects, with the Company's Relevant Obligations.

ACCOUNTING RECORDS

The Directors are responsible for keeping adequate accounting records which disclose with reasonable accuracy at any time the financial position of the Company and to enable them to ensure that the financial statements are prepared in accordance with FRS 102 and comply with the Companies Act 2014, as amended, the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations, 2011 (as amended) (the "UCITS Regulations") and the Central Bank (Supervision and Enforcement) Act 2013 (Section 48(1)) (Undertakings for Collective Investment in Transferable Securities) Regulations 2019 (the "Central Bank UCITS Regulations").

The measures taken by the Directors to secure compliance with the Company's obligation to keep adequate accounting records are the use of appropriate systems and procedures and employment of competent persons. To this end, BNY Mellon Fund Services (Ireland) Designated Activity Company (the "Administrator") has been appointed for the purpose of maintaining adequate accounting records. Accordingly, the accounting records are kept at One Dockland Central, Guild Street, IFSC, Dublin 1, D01E4XO, Ireland. The Directors are also responsible for safeguarding the assets of the Company and hence for taking reasonable steps for the prevention and detection of fraud and other irregularities. Under the Central Bank UCITS Regulations, the Directors are required to entrust the assets of the Company to the depository for safe-keeping. In carrying out this duty, the Company has appointed The Bank of New York Mellon SA/NV, Dublin Branch, which provides trustee, depository and custody services.

The financial statements of the Company are published on the website of BNY Mellon Investment Management EMEA Limited (www.bnymellonim.com). The Directors

are responsible for the maintenance and integrity of the corporate and financial information of the Company included on this website. Legislation in the Republic of Ireland governing the preparation and dissemination of financial statements may differ from legislation in other jurisdictions.

DISTRIBUTIONS

Distributions to redeemable participating shareholders are recognised in the Statement of Comprehensive Income as finance costs.

Distributions are declared to the extent necessary to enable the Company to pursue a full distribution policy in accordance with the current UK tax legislation.

REVIEW OF BUSINESS AND FUTURE DEVELOPMENT

The Company is an open-ended investment company with variable capital which has been authorised by the Central Bank under the UCITS Regulations. There was no change in the nature of the Company's business during the financial year.

There is a detailed review in the Investment Managers' Reports of factors contributing to the Funds' performance. The Directors do not anticipate any change in the structure or investment objectives of the Company.

The consequences of Russia's invasion of Ukraine in February 2022 were significant area of focus for the Manager and Investment Managers over the financial year and continues to be so. Exposures to Russia and Ukraine and any liquidity and valuation related issues for all associated holdings have been closely monitored and all applicable sanctions have been followed. For more information on the impact to the Sub-Funds, please refer to the Investment Managers' Reports on pages 11 to 45 of the Report & Accounts.

RISK MANAGEMENT OBJECTIVES AND POLICIES

The Company's investment activities expose it to the various types of risk, which are associated with the financial instruments and markets in which it invests.

Details of the risks inherent in investing in the Company are disclosed in Note 16 to the financial statements.

RESULTS

The results for the financial year are set out in the Statement of Comprehensive Income.

EVENTS SINCE THE FINANCIAL YEAR END

There have been no significant events affecting the Company since the financial year end other than as disclosed in Note 20 to the financial statements.

RELATED PARTY TRANSACTIONS AND BALANCES

Other than as disclosed in Note 11 to the financial statements, the Directors are not aware of any contracts or arrangements of any significance in relation to the business of the Company in which the Directors had any beneficial interest as defined in the Companies Act 2014, as amended, at any time during the financial year ended 31 December 2022 and 31 December 2021.

CONNECTED PERSON TRANSACTIONS

In accordance with the requirements of Section 43(1) of the Central Bank UCITS Regulations, any transaction carried out with the Company by its management company or depositary, and the delegates or sub-delegates of such a management company or depositary (excluding any non-group company sub-custodian appointed by a depositary), and any associated or group company of such a management company, depositary, delegate or sub-delegate ("connected persons") must be carried out as if negotiated at arm's length. Such transactions must be in the best interests of the shareholders. In addition to those transactions, there are also transactions carried out by connected persons on behalf of the Company to which the Directors have no direct access and in respect of which the Directors must rely upon assurances from its delegates that the connected persons carrying out those transactions do carry them out on a similar basis.

Shareholders should have regard to the governance structure of the Company as more particularly described in the Corporate Governance Statement section of this Directors' Report and the roles and responsibilities of the Company's respective delegates subject to the overall supervision of the Directors. Further, shareholders should refer to the prospectus which identifies many of the connected person transactions and the general nature of the contractual arrangements with the principal connected persons but it is not exhaustive of all connected person transactions. Shareholders should also refer to the provisions of the prospectus dealing with conflicts of interest.

Therefore, having regard to confirmations from BNY Mellon Fund Management (Luxembourg) S.A. and its relevant delegates, the Board of Directors of the Company is satisfied that:

- (i) there are arrangements (as evidenced by written procedures documented by the Investment Managers) in place to ensure that the obligations described above are applied to all transactions with connected persons; and
- (ii) transactions with connected persons entered into during the financial year complied with these obligations, as attested by the Investment Managers through regular updates to the Directors.

Note 11 details related party transactions during the financial year as required by Section 33 "Related Party Disclosures" of FRS 102. However, shareholders should understand that not all "connected persons" are related parties as defined by Section 33 of FRS 102.

CORPORATE GOVERNANCE STATEMENT

The Company is subject to corporate governance practices imposed by:

- (i) The Memorandum and Articles of Association of the Company;
- (ii) The Companies Act 2014, as amended; and

(iii) The Central Bank UCITS Regulations.

Copies of all of the above documents are available for inspection at the Company's registered office at One Dockland Central, Guild Street, IFSC, Dublin 1, D01E4XO, Ireland.

On 14 December 2011, the Irish Funds Industry Association ("IF") published a corporate governance code ("IF Code") which may be inspected on/obtained from the IF website (www.irishfunds.ie). It should be noted that the IF Code reflects the existing corporate governance policies imposed on Irish authorised collective investment schemes.

The Directors have reviewed the IF Code and adopted this code on 20 December 2012 following assessment of the measures included in the IF Code as being consistent with its existing corporate governance principles and procedures for the financial year. Consistent with the regulatory framework applicable to investment fund companies such as the Company (and in contrast to normal operating companies with a full time executive management and employees), the Company, consequently, operates under the delegated model whereby it has delegated management (including investment management), administration and distribution functions to third parties without abrogating the Directors' overall responsibility. The Directors have in place mechanisms for monitoring the exercise of such delegated functions, which are always subject to the supervision and direction of the Directors. These delegations of functions and the appointment of regulated third party entities are detailed in the Company's prospectus. In summary, they are:

- (1) The Company has appointed BNY Mellon Fund Management (Luxembourg) S.A. as its Manager pursuant to the Management Agreement. Under the terms of the Management Agreement, the Manager has responsibility for the management and administration of the Company's affairs and the distribution of the shares of the Funds. The Manager is authorised and regulated by the Commission de Surveillance du Secteur Financier ("CSSF").
- (2) The Manager has delegated the performance of the investment management functions in respect of the Company and of its Funds to the respective Investment Managers as detailed in the prospectus and listed in the directory to these financial statements.

The respective Investment Managers have direct responsibility for the decisions relating to the day-to-day running of the Funds which they manage and they are accountable to the Directors for the investment performance of the Funds which they manage. The respective Investment Managers have internal controls and risk management processes in place to ensure that all applicable risks pertaining to their management of the Funds are identified, monitored and managed at all times and appropriate reporting is made to the Directors on a regular basis. The Investment Managers are regulated by and under the supervision of the regulator of their operating jurisdiction;

(3) The Manager has delegated its responsibility as Administrator, Registrar and Transfer Agent to the Administrator, which has responsibility for the day-to-day administration of the Company and the Funds including the calculation of the net asset values. The Administrator is regulated by and under the supervision of the Central Bank; and

(4) BNY Mellon Investment Management EMEA Limited and BNY Mellon Fund Management (Luxembourg) S.A. act as distributors for the Funds of the Company.

In accordance with the Central Bank UCITS Regulations, the Directors are required to entrust the assets of the Company to the Depositary for safekeeping. In carrying out this duty, the Company has appointed The Bank of New York Mellon SA/NV, Dublin Branch, which provides trustee, depositary and custody services. The entity is authorised by the European Central Bank under the supervision of the Central Bank.

The Directors receive reports on a regular (and at least quarterly) basis from each of its delegate service providers and the Depositary which enable it to assess the performance of the delegate service providers and the Depositary (as the case may be).

FINANCIAL REPORTING PROCESS – DESCRIPTION OF MAIN FEATURES

The Directors are responsible for establishing and maintaining adequate internal control and risk management systems of the Company in relation to the financial reporting process. Such systems are designed to manage rather than eliminate the risk of error or fraud in achieving the Company's financial reporting objectives and can only provide reasonable and not absolute assurance against material misstatement or loss. The Directors have entrusted the administration of the accounting records to the Administrator.

The Directors, through delegation to the Administrator, have procedures in place to ensure all relevant accounting records are properly maintained and are readily available, including production of annual and semi-annual financial statements. The annual and semi-annual financial statements of the Company are required to be approved by the Directors of the Company and filed with the Central Bank. The annual financial statements are also required to be filed with the Companies Registration Office and be audited by independent auditors who report annually to the Board on their findings.

The Directors have hired an independent external audit firm to audit the financial statements in accordance with the Companies Act 2014, as amended. The Directors evaluate and discuss significant accounting and reporting issues as the need arises.

The Administrator has operating responsibility in respect of its internal controls in relation to the financial reporting process and the Administrator's report to the Directors. The Administrator is authorised and regulated by the Central Bank and complies with the rules imposed by the Central Bank.

SHAREHOLDER MEETINGS

The convening and conduct of shareholders' meetings are governed by the Memorandum and Articles of Association of the Company and the Companies Act 2014, as amended. Although the Directors may convene an extraordinary general meeting of the Company at any time, the Directors are required to convene an annual general meeting of the Company within eighteen months of incorporation and fifteen months of the date of the previous annual general meeting thereafter provided that an annual general meeting is held within nine months of the end of each accounting period for the Company.

In accordance with the Companies Act 2014, as amended, shareholders representing not less than one-tenth of the paid up share capital of the Company may also request the Directors to convene a shareholders' meeting. Not less than twenty one clear days' notice of every annual general meeting and any meeting convened for the passing of a special resolution must be given to shareholders.

Two shareholders present either in person or by proxy constitutes a quorum at a general meeting. Votes may be cast in person or by proxy. On a show of hands, every shareholder who is present in person or by proxy shall have one vote and every management shareholder shall have one vote in respect of all non-participating shares. On a poll, every shareholder is entitled to one vote in respect of each participating share held by him and every management shareholder is entitled to one vote in respect of all non-participating shares held by him. The chairman of a general meeting of the Company or at least five shareholders present or a shareholder or shareholders representing at least one tenth of the shares in issue having the right to vote at such meeting may demand a poll.

Shareholders may resolve to sanction an ordinary resolution or special resolution at a shareholders' meeting. An ordinary resolution of the Company or of the shareholders of a particular fund or class requires an absolute majority of the votes cast by the shareholders voting in person or by proxy at the meeting at which the resolution is proposed. A special resolution of the Company or of the shareholders of a particular fund or share class requires a majority of not less than 75% of the shareholders present in person or by proxy and voting in general meeting in order to pass a special resolution including a resolution to amend the Memorandum and Articles of Association.

COMPOSITION AND OPERATION OF BOARD OF DIRECTORS AND COMMITTEES

Unless otherwise determined by an ordinary resolution of the Company in general meeting, the number of Directors may not be less than two nor more than twelve. Currently, the Board of Directors of the Company is composed of six Directors, being those listed in the directory in these financial statements.

The business of the Company is managed by the Directors, who exercise all such powers of the Company in accordance with the Companies Act 2014, as amended, or by the Articles of Association of the Company. A Director may, and the company secretary of the Company on the requisition

of a Director will, at any time summon a meeting of the Directors. Questions arising at any meeting of the Directors are determined by a majority of votes. In the case of an equality of votes, the chairman has a second or casting vote. The quorum necessary for the transaction of business at a meeting of the Directors may be fixed by the Directors and unless so fixed is two. The key management functions of the Manager are delegated to the designated Directors in accordance with its business plan.

The Sub-Fund Application Approval Committee (the "Committee") has been established by the Boards of Directors of the Company and the Manager. It exists primarily to assist the respective Boards in fulfilling their oversight responsibilities with regards to the submission of new Sub-Fund applications or where specifically delegated modifications to existing Sub-Funds or fund documentation (e.g., required as a result of regulatory updates or material changes) to the Central Bank.

DIVERSITY STATEMENT

In recognition of the importance and value of diversity, the Board adopted a Diversity Policy in September 2019, which was ratified at the board meeting in January 2020. The Diversity Policy recognises the benefits of having individuals with diverse background, experience and viewpoints including individuals who contribute to the heterogeneity of the Board. The objective of the Diversity Policy is to promote diversity on the Board. The Diversity Policy will be implemented going forward through ensuring that new appointments to the Board should be made on merit, taking account of the specific skills and experience, independence, and knowledge needed to ensure a rounded board and the diversity benefits each candidate would bring to the overall board composition. There has been four appointments and two resignations to the Board since the Diversity Policy was adopted.

DIRECTORS

The names of the persons who were Directors at any time during the financial year ended 31 December 2022 are set out below:

David Dillon (Irish) <[^]
 Gerald Rehn (American) (Resigned 8 February 2023)
 Greg Brisk (British)
 Claire Cawley (Irish) ^
 Caylie Stallard (New Zealand) (Appointed 8 June 2022)
 Mark Flaherty (Irish) (Appointed 22 July 2022)
 Sarah Cox (British) (Appointed 9 February 2023)

All Directors are non-executive Directors.

< Chairman of the Board of Directors

^ Independent Director

DIRECTORS AND SECRETARY'S INTERESTS

The Directors (including their families) and the Secretary, Tudor Trust Limited, had no interests in the shares of the Company at any time during the financial year ended 31 December 2022 and 31 December 2021.

Greg Brisk and Gerald Rehn** are full time executives of the BNY Mellon Group. Greg Brisk, Gerald Rehn** and Mark Flaherty* also serve as Directors of the Manager. Greg Brisk and Gerald Rehn** also serve as Directors of the Global Sub-Distributor, BNY Mellon Investment Management EMEA Limited; and Caylie Stallard* is an employee of same. Greg Brisk, Gerald Rehn**, Mark Flaherty* and Caylie Stallard* have waived their right to receive a fee for their services as Directors of the Company. Management fees of USD 94,932,927 (31 December 2021: USD 112,390,536) were incurred during the financial year.

* Please refer to Note 19 of the financial statements.

** Please refer to Note 20 of the financial statements.

POLITICAL DONATIONS

There were no political donations made by the Company during the financial year ended 31 December 2022 and 31 December 2021.

DISCLOSURE OF INFORMATION TO THE AUDITORS

So far as each person who was a Director at the date of approving this report is aware, there is no relevant audit information, being information needed by the auditors in connection with preparing their report, which they have not disclosed to the auditors. Each Director has taken all the steps that they are obliged to take as a Director in order to make themselves aware of any relevant audit information and to ensure that it is disclosed to the auditors.

INDEPENDENT AUDITORS

The Directors appointed Ernst & Young as auditors for the Company, with effect from 2 September 2014.

Ernst & Young have indicated their willingness to remain in office in accordance with Section 383 (2) of the Companies Act 2014.

On behalf of the Board

Director – **David Dillon**

Director – **Claire Cawley**

Date: 13 April 2023

BNY MELLON GLOBAL FUNDS, PLC

DEPOSITARY'S REPORT

For the period from 1 January 2022 to 31 December 2022
(the "Period")

The Bank of New York Mellon SA/NV, Dublin Branch (the "Depositary", "us" "we", or "our"), has enquired into the conduct of BNY Mellon Global Funds plc (the "Company") for the Period, in its capacity as depositary to the Company.

This report including the opinion has been prepared for and solely for the shareholders in the Company, in accordance with our role as depositary to the Company and for no other purpose. We do not, in giving this opinion, accept or assume responsibility for any other purpose or to any other person to whom this report is shown.

RESPONSIBILITIES OF THE DEPOSITARY

Our duties and responsibilities are outlined in Regulation 34 of the of the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations 2011 (S.I. No 352 of 2011), as amended (the "Regulations").

Our report shall state whether, in our opinion, the Company has been managed in that period in accordance with the provisions of the Company's constitutional documentation and the Regulations. It is the overall responsibility of the Company to comply with these provisions. If the Company has not been so managed, we as depositary must state in what respects it has not been so managed and the steps which we have taken in respect thereof.

BASIS OF DEPOSITARY OPINION

The Depositary conducts such reviews as it, in its reasonable opinion, considers necessary in order to comply with its duties and to ensure that, in all material respects, the Company has been managed (i) in accordance with the limitations imposed on its investment and borrowing powers by the provisions of its constitutional documentation and the appropriate regulations and (ii) otherwise in accordance with the Company's constitutional documentation and the appropriate regulations.

OPINION

In our opinion, the Company has been managed during the period, in all material respects:

- (i) in accordance with the limitations imposed on the investment and borrowing powers of the Company by the constitutional documentation and by the Regulations; and
- (ii) otherwise in accordance with the provisions of the constitutional documentation and the Regulations.

BNY MELLON GLOBAL FUNDS, PLC

INDEPENDENT AUDITORS' REPORT TO THE MEMBERS OF BNY MELLON GLOBAL FUNDS, PLC

OPINION

We have audited the financial statements of BNY Mellon Global Funds, plc ('the Company') for the year ended 31 December 2022, which comprise the Statement of Financial Position, Statement of Comprehensive Income, Statement of Changes in Net Assets Attributable to Redeemable Participating Shareholders and notes to the financial statements, including the summary of significant accounting policies set out in note 1. The financial reporting framework that has been applied in their preparation is Irish Law and Accounting Standards including FRS 102, the Financial Reporting Standard applicable in the UK and Republic of Ireland issued in the United Kingdom by the Financial Reporting Council.

In our opinion the financial statements:

- give a true and fair view of the assets, liabilities and financial position of the company as at 31 December 2022 and of its profit for the year then ended;
- have been properly prepared in accordance with FRS 102 The Financial Reporting Standard applicable in the UK and Republic of Ireland; and
- have been properly prepared in accordance with the requirements of the Companies Act 2014, the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations, 2011 and the Central Bank (Supervision and Enforcement) Act 2013 (Section 48(1)) (Undertakings for Collective Investment in Transferable Securities) Regulations 2019.

BASIS FOR OPINION

We conducted our audit in accordance with International Standards on Auditing (Ireland) (ISAs (Ireland)) and applicable law. Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report.

We are independent of the Company in accordance with ethical requirements that are relevant to our audit of financial statements in Ireland, including the Ethical Standard as applied to public interest entities issued by the Irish Auditing and Accounting Supervisory Authority (IAASA), and we have fulfilled our other ethical responsibilities in accordance with these requirements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

CONCLUSIONS RELATING TO GOING CONCERN

In auditing the financial statements, we have concluded that the Directors' use of the going concern basis of accounting in the preparation of the financial statements is appropriate.

Based on the work we have performed, we have not identified any material uncertainties relating to events or conditions that, individually or collectively, may cast significant doubt on the Company's ability to continue as a going concern for a period of at least twelve months from the date when the financial statements are authorised for issue.

Our responsibilities and the responsibilities of the Directors with respect to going concern are described in the relevant sections of this report. However, because not all future events or conditions can be predicted, this statement is not a guarantee as to the Company's ability to continue as a going concern.

OTHER INFORMATION

The Directors are responsible for the other information. The other information comprises the information included in the Annual Report other than the financial statements and our auditor's report thereon. Our opinion on the financial statements does not cover the other information and, except to the extent otherwise explicitly stated in our report, we do not express any form of assurance conclusion thereon.

Our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated. If we identify such material inconsistencies or apparent material misstatements, we are required to determine whether there is a material misstatement in the financial statements or a material misstatement of the other information. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact.

We have nothing to report in this regard.

OPINIONS ON OTHER MATTERS PRESCRIBED BY THE COMPANIES ACT 2014

In our opinion, based solely on the work undertaken in the course of the audit, we report that:

- the information given in the Directors' report for the financial year ended for which the financial statements are prepared is consistent with the financial statements; and
- the Directors' report has been prepared in accordance with the applicable legal requirements.

We have obtained all the information and explanations which we consider necessary for the purposes of our audit.

In our opinion the accounting records of the Company were sufficient to permit the financial statements to be readily and properly audited and the Company statement of financial position is in agreement with the accounting records.

MATTERS ON WHICH WE ARE REQUIRED TO REPORT BY EXCEPTION

Based on the knowledge and understanding of the company and its environment obtained in the course of the audit, we have not identified material misstatements in the Directors' report.

The Companies Act 2014 requires us to report to you if, in our opinion, the disclosures of Directors' remuneration and transactions required by sections 305 to 312 of the Act are not complied with by the Company.

We have nothing to report in this regard.

RESPECTIVE RESPONSIBILITIES

Responsibilities of directors for the financial statements

As explained more fully in the Directors' responsibilities statement set on page 3, the Directors are responsible for the preparation of the financial statements in accordance with the regulatory framework that give a true and fair view, and for such internal control as they determine is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the Directors are responsible for assessing the parent Company's ability to continue as going concerns, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

Auditors' responsibilities for the audit of the financial statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs (Ireland) will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

A further description of our responsibilities for the audit of the financial statements is located on the IAASA's website at: http://www.iaasa.ie/getmedia/b2389013-1cf6-458b-9b8f-a98202dc9c3a/Description_of_auditors_responsibilities_for_audit.pdf.

This description forms part of our auditors' report.

THE PURPOSE OF OUR AUDIT WORK AND TO WHOM WE OWE OUR RESPONSIBILITIES

Our report is made solely to the Company's members, as a body, in accordance with section 391 of the Companies Act 2014. Our audit work has been undertaken so that we might state to the Company's members those matters we are required to state to them in an auditor's report and for no other purpose. To the fullest extent permitted by law, we do not accept or assume responsibility to anyone other than the Company and the Company's members, as a body, for our audit work, for this report, or for the opinions we have formed.

INVESTMENT MANAGERS' REPORTS

ECONOMIC & MARKET OVERVIEW

Introduction

Both equities and bonds produced negative returns in the twelve-months to December 2022. The investment backdrop for both asset classes was very challenging as inflation levels soared, interest rates shot up and the global economic outlook deteriorated. Additionally, Russia's invasion of Ukraine early in the year, and the continued conflict throughout 2022, was a hugely negative factor. The invasion caused markets to lurch downwards in late February. They remained on a downward tack throughout most of the period, only recovering in the final quarter on hopes that the pace of monetary policy tightening might be easing. Many market indices, including the bellwether S&P 500 Index, quickly moved into bear market territory (a fall of more than 20% from the peak) early in the year. Indeed, the S&P 500 Index endured its worst first half for approximately 50 years.

Equity markets swung away from growth to value. The technology sector which had led markets for a considerable period of time, notably through the Covid period, sank substantially in 2022. Energy and commodity stocks rallied initially, particularly oil stocks, as the price of oil surged following the invasion of Ukraine by Russian forces. Oil and gas prices soared as several nations, including the US and the UK, placed an embargo on the export of Russian oil and gas into their countries. Financials also performed strongly, especially banks, which benefited from rising interest rates.

The world's central banks grew notably more hawkish through the period; inflation, far from being a temporary issue, became more and more embedded in the global economy. Inflation rose in the UK and the US to 40-year highs by April and a record high in the eurozone. While it appeared to peak in June in the US, the level of inflation continued to rise to new highs in the UK and the eurozone. The Bank of England (BoE) had begun to raise interest rates in December 2021 and was followed by the US Federal Reserve (Fed), which first raised rates in March 2022. The European Central Bank (ECB) only began to raise rates in July and remained behind the other two central banks in terms of its tightening cycle.

The global economic outlook notably deteriorated over the year, with a recession looking likely for many economies across the world. The US fell into a technical recession in the first half of the year, although it recovered in the third quarter. Growth rates remained meagre in most large economies, including China, Japan, the eurozone and the UK. Gross Domestic Product (GDP) in the UK fell in the third quarter and was expected to fall again in the fourth quarter and through 2023, according to institutions such as the BoE.

North America

The US market fell over the period, as inflation rose strongly, the Fed raised interest rates and geopolitical concerns were to the fore – not least Russia's invasion of Ukraine, but also the troubled bilateral relations with China.

The S&P 500, the Dow Jones Industrial Average and the Nasdaq indices fell substantially, hitting bear market territory (a fall of over 20% from the peak) in the spring, while the S&P 500 had its worst first six months of the year for around 50 years. Technology stocks were particularly hard hit as the market rotated away from growth (as a factor) towards value. Conversely, energy and materials-related stocks performed strongly as commodity prices, particularly oil and gas prices, surged in the first half of the year, with strong upward momentum provided by sanctions placed on Russia for the export of oil, following its invasion of Ukraine. The market remained volatile through most of the period, albeit in a pronounced downward trend for much of the time, although it did rally in the final quarter of the year, in US dollar terms, on hopes of a reduced pace in monetary tightening.

Inflation, which first began to pick up in mid-2021, surged to new generational highs. The annual consumer inflation rate touched a new 41-year high in June, of 9.1%, before falling over the following five months, culminating in a reading of 6.5% in December. The Fed became increasingly hawkish through the year, recognising that higher inflation was in danger of becoming entrenched. It tapered its bond-purchasing programme, finally ending it in March. In the same month, the Fed first raised interest rates and continued to do so throughout the year, taking the Fed Funds rate from 0.25% to 4.5% (upper bound of the target rate) including four successive 75-basis-points (bps) hikes. The final hike of 50 bps in December, encouraged investors to believe that the pace of monetary tightening might be easing.

The outlook for economic growth worsened through the year despite a recovery in GDP in the third quarter and a still tight labour market. GDP fell by 1.6% in the first quarter of 2022, on an annualised basis, and was followed by a fall of 0.6% in the second quarter, confirming a recession. However, GDP recovered in the third quarter, rising by 3.2%. Employment generally remained strong through much of the year, with job creation robust and jobless claims dwindling to the lowest levels in years in the spring. However, by the end of the period, the labour market showed signs of weakening. Worries about the rising cost of living and the impact of Russia's war in Ukraine on basic foodstuffs and energy sources weighed on confidence.

Europe

European markets fell over the period but outperformed the global market index in aggregate, as soaring inflation, tighter monetary policy, a deteriorating economic outlook and the war in Ukraine all converged to unsettle investors. Initially, Europe was slow to recover from Covid-19. Tight lockdown restrictions in certain countries over the winter lingered into the early months of 2022, as the Omicron variant of Covid raged. Russia's invasion of Ukraine at the end of February caused European markets to lurch downward. Despite the occasional rally, they never fully recovered until the final quarter of the year. Sentiment worsened as higher consumer prices, exacerbated by the sanctions placed on Russia, began to impact household spending. However, European markets did recover in the final few months of the year, on hopes of a slowing in the pace of interest rate hikes and warmer winter weather reducing natural gas prices.

Within Europe, the UK market was the strongest-performing major market and one of the very few developed markets to eke out a positive return in 2022. This was despite political turmoil, higher inflation and tighter monetary policy. The make-up of the UK index, heavily weighted in oil and other commodity stocks, aided the relatively superior returns. Norway was also strong, benefiting from an economy significantly geared to oil and gas. The weakest markets included the Netherlands, Ireland and Germany. Germany was plagued by worries about its gas supply given its historic reliance on Russia.

Inflation picked up steadily throughout the period in both the UK and the eurozone. In the UK, annual inflation touched 11.1% in October, the highest level since 1981, while in the eurozone, it rose to an all-time high of 10.6%, also in October. The BoE tightened interest rates at every policy meeting during the year, taking them from 0.25% to 3.5%. The ECB belatedly raised rates at its July policy meeting, and did so a further three times, taking the benchmark rate from 0% to 2.5%. Prior to that, the ECB had ended its PEPP (Pandemic Emergency Purchase Programme) in March 2022.

Economic growth was relatively meagre across Europe. Eurozone GDP remained positive, growing by 0.6% in the first quarter, on a quarterly basis, by 0.9% in the second, and by only 0.3% in the third quarter of the year. In the UK, GDP slowed through the period, growing by 0.6% quarter on quarter, in the first quarter, by a mere 0.1% in the second, and falling 0.3% in the third quarter of the year. Despite the weaker economic growth, the labour market remained relatively tight. Unemployment declined through much of the year in both the eurozone and the UK. It picked up a little in the UK in the final months of the year to 3.7%, but in the eurozone, unemployment touched new lows of 6.5%.

Asia

Asian markets weakened in aggregate over the period and underperformed global equities. Markets were weighed down by worries over inflation, tightening monetary policy, the strength in the US dollar, still lingering and high levels of Covid-19 in certain countries (notably China, Japan and South Korea) and the war in Ukraine (even though Asia was less directly impacted by it). Covid restrictions in China remained tight throughout most of the entire year until nationwide demonstrations in late November appeared to force the government to change its 'zero-Covid' approach to the pandemic. By the end of the year, almost all restrictions had been relaxed. Japan also kept its restrictions relatively tight during the first half of the year but eased them in the second half.

The Chinese market fell and underperformed other Asian markets in aggregate. Taiwan and South Korea were notably weak, impacted by Covid issues and declining global trade. Indonesia was one of the strongest markets, benefiting from the strong commodity cycle.

In terms of monetary policy, nearly all Asian countries raised interest rates during the year, except China and Japan. Inflation rates picked up in most countries. Supply chains, disrupted largely by Covid, remained strained and the strength in the US dollar resulted in steeply higher imported inflation, especially in those countries dependent on imported commodities. However, inflation remained generally lower than the levels seen in the West. In Japan, inflation remained relatively low early on in the year. However, it began to pick up later in the year and hit 4.0% in December – the highest rate for over 40 years – which caused some speculation that the Bank of Japan (BoJ) might consider raising interest rates, although it kept its main policy rate unchanged at -0.1%. Inflation levels remained relatively muted in China. The People's Bank of China lowered loan rates of different maturities during the year in order to boost economic growth.

The outlook for Asian economies generally deteriorated throughout the year, as both the global and regional economic environment worsened. In China, GDP grew by less than 5% on a year-on-year basis in each of the first three quarters of the year. The tight Covid-related restrictions, which severely impacted both domestic and global supply chains, tighter regulations surrounding mainly service-related industries such as online shopping and gaming, as well as difficulties in the country's property sector, were all headwinds to growth. GDP was firm in India, rising by 13.5% in the second quarter, as Covid-related restrictions were eased, before slowing to 6.3% in the third quarter.

Japan also continued to be negatively affected by Covid-19 early in the year and generally had lacklustre economic growth at home and abroad. GDP flitted between negative and positive growth quarter by quarter during the year.

Fixed Income

It was a tough period for bond markets, indeed the worst for several decades, as they fell substantially. This was largely due to soaring global inflation levels, which caused most central banks to alter their previous monetary stance and begin to tighten monetary policy aggressively. Government bond yields followed inflation rates higher, as long-term inflation expectations in the market adjusted upwards. Corporate, especially high yield and emerging market bonds, also fell as investors became more risk averse.

Inflation levels rose to generational highs in many countries – annual consumer inflation hit 40-year highs of 9.1% in June in the US and 11.1% in October in the UK. Meantime, in the eurozone, it hit an all-time high of 10.6% in October. The war in Ukraine lit a further flame under inflation, as commodity prices, especially oil and natural gas, leapt higher as the West implemented sanctions against Russia, with the US and UK banning Russian oil imports. Oil and gas prices subsequently declined in the latter half of the period, but the cost of living remained high nevertheless.

The Fed began to raise rates in March and continued to do so throughout the year, taking them from 0.25% to 4.5% over the year, including four successive 75-basis-points (bps) hikes. The final hike of 50 bps encouraged investors to believe that the pace of monetary tightening might be easing, which caused a short-term rally in the market. The Fed had also announced that its bond-purchasing programme would be wound down by March 2022. The BoE tightened interest rates at every policy meeting during the year, taking them from 0.25% to 3.5%. The ECB belatedly raised rates at its July policy meeting, and did so a further three times, taking the benchmark rate from 0% to 2.5%.

The US 10-year Treasury yield had risen to a 15-year high near the end of the period of over 4%, with the yield more than doubling from 1.5% in early January. Short rates rose even more, and the two-year Treasury yield hit 4.7% in early November. The US Treasury two-year/10-year bond yield spread inverted in July and remained inverted for the rest of the year – often seen as a sign of an impending recession. In the UK, the 10-year Gilt yield rose from approximately 1.0% at the beginning of the period to nearly 4.5% in the autumn, its highest level in 14 years. In Germany, the 10-year Bund yield went positive for the first time in several years in late January, finishing the year at just over 2.5%, its highest level for over 10 years.

Currency and Commodities

The key feature of currency markets in 2022 was the persistent strength of the US dollar. It touched 20-year highs against a basket of other currencies in the autumn, driven by tightening monetary policy from the Fed and a relatively robust economy. It hit a peak in late September, before falling back a little over the following months. Sterling, which had been relatively strong through the final months of 2021, fell in 2022 as inflation soared and the cost-of-living crisis intensified. Sterling was undermined by weak projections for economic growth, from not only institutions such as the World Bank and OECD, but also the BoE which forecast a recession in 2023. Sterling hit an all-time low of just above parity in late September following Liz Truss's 'mini-budget' but recovered thereafter.

Conversely, the euro, which had been weak early in the period began to recover. While it weakened against the dollar, falling below parity for a time, it rose against the pound. The euro had been undermined initially by relatively weak growth in the eurozone, the relatively easy monetary policy from the ECB and the problems of Covid. However, as the ECB became increasingly hawkish, the euro recovered. The yen weakened dramatically against the US dollar, touching a multi-decade low of over 150 JPY/USD in October, as the monetary policy stances of the BoJ and the Fed diverged massively. It recovered in the final two months of the year, as the BoJ intervened and speculation grew that the central bank might be forced to change its monetary stance owing to rising inflation levels.

Commodities were higher in aggregate. They rallied strongly in the first half of the period, peaking in June and then falling thereafter. Higher inflation levels and supply disruption kept them underpinned early in the year, but it was Russia's invasion of Ukraine that turbo-charged their rise. Western sanctions against Russia, notably the banning of Russian oil imports by the US and the UK, caused commodities to surge. West Texas Intermediate rose to a 14-year high and Brent Crude rose to an 11-year high in March – in both cases over US\$120 per barrel. Natural gas prices also rose dramatically during the period, especially given that Russia was a major provider of gas, meeting a huge amount of Europe's gas requirements. However, by the end of the period, oil and gas prices had fallen on fears of a global recession. Oil finished the year close to its annual lows.

Other major industrial metals, such as copper, rallied strongly in the first half of the year (it touched an all-time high in March) before declining in the second half of the year on worries about the global economy, and especially demand from China. Other key industrial metals, such as zinc and aluminium, also weakened over the year.

The gold price was mildly higher over the year. It initially spiked, rising to a near all-time high (established in August 2020) in March, benefiting from its 'safe-haven' status. However, it was negatively affected by rising interest rates and a robust US dollar thereafter.

All performance data is from 1 January 2022 to 31 December 2022, total return in local currency terms unless otherwise indicated, sourced from Lipper Hindsight and Bloomberg.

ABSOLUTE RETURN, ALTERNATIVE & MULTI-ASSET

BNY MELLON ABSOLUTE RETURN BOND FUND

Over the twelve-month period under review, the Fund's Euro W (Acc.) share class returned 0.84%, net of fees, compared with 0.34% for the EURIBOR 3-month, both in euro terms.

The Fund generated a positive return and outperformed its benchmark.

Market sentiment in the year under review was dominated by the trend of higher interest rates in response to rising inflation. Market volatility was elevated, which undermined investor confidence.

The first half of the period was characterised by rising bond yields, with both government and corporate bonds coming under pressure. High yield markets were particularly weak, as investor appetite for relatively riskier assets was diminished. Volatility persisted into the second half of the year, with tighter monetary policy translating into further weakness in credit markets. October and November offered some respite, with both sovereign and corporate bonds delivering positive returns; however, the year concluded with further weakness as government bonds yields rose again.

Throughout the year, the Fund's interest rate exposure benefited performance. In the first six months, duration proved the most supportive, with the Fund's short positions in US Treasuries and UK Gilts proving profitable. Interest rate volatility remained elevated in the second half of the year, which resulted in positive performance from the Fund's short positions in German, US and UK government bonds during the third quarter. Duration positioning continued to contribute in the final quarter of the year, as yields rose sharply in December.

In contrast, emerging market exposure detracted from performance during the first half of the year. This was caused by the Fund's long exposure in hard currency sovereign bonds, which performed poorly during the second quarter. The Fund's inflation positioning detracted during the third quarter, though this reversed as the year came to an end.

The portfolio's positioning was adjusted across its various strategies throughout the period. During the first half of the year, the manager modified the Fund's duration, country exposure, and yield curve positions. The Fund also adopted a marginally long position in credit and favoured investment grade bonds over high yield. In the second half of the year, the Fund continued to favour a moderately long credit position, with a bias towards Europe over the US. The Fund also moved towards a short duration position in anticipation of

central banks raising interest rates more aggressively than markets were pricing in.

The manager anticipates slowing global growth in the year ahead. Headline inflation could continue to fall as supply chains recover and energy prices decline. The Fund is positioned with the expectation that interest rates will peak during 2023, though the manager believes subsequent rate cuts will not come as soon as market participants seem to be pricing in. After a volatile 2022, the manager remains cautious about unexpected events that could create economic and market turmoil.

Insight Investment Management (Global) Limited January 2023

BNY MELLON ABSOLUTE RETURN EQUITY FUND

Over the twelve-month period under review, the Fund's Sterling R (Acc.) share class returned 1.76%, net of fees, compared with a return of 1.35% from SONIA 30 day compounded. The Fund generated a positive return and outperformed its comparative benchmark.

It was a challenging environment for investors over the twelve-months under review. The war in Ukraine, higher-than-expected inflation, fears of recession, and higher interest rates resulted in increased volatility and poor returns from conventional equities and bonds.

The Fund's long exposure to oil majors was the main contributor towards positive performance in a period characterised by high energy prices. The market rewarded Royal Dutch Shell and BP for their increased focus on shareholder returns over further capital expenditure. Equinor, the Norwegian energy company was a significant beneficiary of higher European natural gas prices, as a result of the war in Ukraine.

Outside of energy stocks, eyewear and vision care giant EssilorLuxotica was another main positive contributor to performance. Its shares found favour after a solid trading update; sales were slightly better than expected and management reiterated all mid-term targets.

In contrast, the Fund's long positions in hospitality group Hostmore and online retailer Unbound, were the main detractors from performance, as consumer confidence declined owing to the cost-of-living crisis. These holdings were hedged with custom baskets of other consumer-facing UK companies, which helped to cushion the negative impact on performance. The Fund's long position in Segro, hedged against the retail sector and a custom basket sensitive to bond prices, also detracted from performance. Amazon's decision to stop pursuing physical capacity caused weakness across the logistics real estate sector.

Gross equity exposure fluctuated during the year, reflecting evolving market conditions. Risk was reduced as market volatility became elevated with Russia's invasion of Ukraine. Later in the year, the managers added back to gross exposure, as market

ABSOLUTE RETURN, ALTERNATIVE & MULTI-ASSET cont'd

BNY MELLON ABSOLUTE RETURN EQUITY FUND cont'd

dislocations presented interesting tactical opportunities, including a marked sell-off in UK equities in response to the UK Government's 'mini-budget' in September. The Fund's activity included new long positions in the sports retailer, JD Sports and UK banking group, Natwest. In each case, negative investor sentiment was seen to be at odds with healthy fundamentals.

Looking ahead, the macroeconomic outlook remains nuanced and markets are likely to remain volatile. There is evidence that economic activity is slowing, yet the reopening of the Chinese economy could mean higher demand that supports corporate earnings. At the same time, the manager believes equity valuations are currently less rich than in previous years and therefore provide good opportunities to invest at attractive prices.

In a market environment where interest rates are higher and volatility is elevated, the manager believes the Fund's market-neutral equity strategy is well positioned to provide positive, low-correlation returns as part of a diversified portfolio.

**Insight Investment Management (Global) Limited
January 2023**

BNY MELLON ABSOLUTE RETURN GLOBAL CONVERTIBLE FUND

Over the twelve-month period under review, the Fund's Euro U (Acc.) share class returned -4.40%, net of fees, compared with a return of 0.09% for 1-month EURIBOR, both in euro terms. The Fund generated a negative return and underperformed its benchmark.

It was a challenging period for risk assets in 2022. Market participants were concerned about rising interest rates, surging inflation, the prospect of an economic downturn and further geopolitical turmoil instigated by the Russia-Ukraine war. This resulted in a widespread equity market sell-off and credit spreads widening. Global convertible bond issuance was particularly affected.

Key detractors from performance included consumer cyclicals such as Ford, Mercedes and Jet2, a British low-cost airline. Liquid issues including Ford and Mercedes suffered as market participants sought to raise capital. Jet2 was adversely affected by a lack of airport operators in Europe. In the final quarter of the year, global pharmaceuticals leader Sanofi, cyber security leaders Palo Alto and Cyberark, semiconductor company Silicon Laboratories, and the Fund's equity hedges were all detractors from performance.

Conversely, the Fund benefited from positions in high quality names throughout the year. Positive contributors to returns included Sika, the Swiss manufacturer of chemical-based products for construction, which posted record sales; Booking Holidays, the internet travel company; and Southwest Airlines, the US low-cost carrier. The manager favours these positions as their robust credit profiles are attractive during times of high market stress.

Due to the heightened levels of volatility in the first half of the year, the manager focused on preserving capital by significantly cutting the number of investments, specifically targeting exposure to the technology sector. Gross leverage and duration were reduced as well. Net equity exposure decreased to March 2020 levels and exposures to individual stocks remained small.

As market conditions improved slightly in the third quarter, the manager added some risk back into the portfolio; however, after Federal Reserve Chairman Jerome Powell's aggressively hawkish tone at the Jackson Hole symposium, the manager felt that downside risks had increased. Therefore, the Fund pivoted back to a portfolio of fewer strategies, lower leverage, less equity exposure, shorter duration and more robust portfolio hedges to minimise potential market risks.

Overall, the Fund's exposures were reasonably stable during the fourth quarter, although individual strategies, positioning and hedges were actively managed given constantly changing market conditions.

Looking forward, the manager expects 2023 to start as 2022 ended: choppy and volatile. That being said, the manager believes that central banks will eventually get inflation under control and risk assets will rebound. The manager also anticipates an improved new issue calendar in 2023, which should provide more new investment opportunities. The Fund is positioned with a robust credit profile, shorter duration, and a dynamic mix of portfolio strategies, which the manager believes will play out well during the anticipated movements in equities in the first quarter of the year.

**Insight Investment Management (Global) Limited
January 2023**

BNY MELLON DYNAMIC FACTOR PREMIA V10 FUND

Over the twelve-months under review, the Fund's USD W (Acc.) share class returned -5.68%, net of fees, against 1.50% for the FTSE 3 Month Treasury Bill TR Index. The Fund generated a negative return and underperformed its benchmark.

Financial markets were weighed down by Russia's unexpected invasion of Ukraine and ongoing supply chain complications, as well as slowing global growth, surging inflation, and hawkish monetary policy from developed market central banks. The post-pandemic inflation shock led to a departure from the decades-long pattern of low interest rates and dovish monetary policy,

ABSOLUTE RETURN, ALTERNATIVE & MULTI-ASSET cont'd

BNY MELLON DYNAMIC FACTOR PREMIA V10 FUND cont'd

both of which enhanced returns for riskier assets. The US Federal Reserve (Fed) continually hiked interest rates over the course of seven policy meetings in an attempt to tame inflation. The Fed's target rate range of 4.25%–4.50%, a level reached at its December meeting, was the highest since 2007.

This environment was challenging for the Fund. Among equities, value-oriented holdings performed well, as they were supported by higher interest rates, though declines in most equity markets cost returns. Elsewhere, quality and momentum factors were flat or down—selling off at the beginning of the year and rallying toward the end—as perceptions about the economy and markets led to a shift in favoured stocks. Fixed income and currency positioning also added value, while momentum holdings underperformed. Exposure to certain fixed income positions detracted.

The Fund is positioned to seek diversifying returns in a transparent, liquid, and cost-effective manner. The Fund is designed to deliver returns across the economic cycle and to diversify traditional exposures. The Fund aims to capture a broad set of hedge fund factors through direct investment in global markets, across asset classes.

Newton Investment Management North America LLC January 2023

BNY MELLON GLOBAL REAL RETURN FUND (EUR)

Over the twelve-month period under review, the Fund's Euro A share class returned -11.61%, net of fees, compared with a return of 4.08% for the 1-month EURIBOR + 4%, both in euro terms. The Fund generated a negative return and underperformed its benchmark.

The main detractor from the Fund's performance was the return-seeking core, particularly global equities. At the stock level, there was weak contribution to returns from positions in Microsoft and ASML, as both companies suffered from investors' rotation away from growth stocks towards value stocks. Shares in e-commerce giant Alibaba were held back by stringent Covid-19 policies being maintained in China. Conversely, positive performance came from the Fund's commodity-related stocks, including oil companies ConocoPhillips, Royal Dutch Shell and Marathon Petroleum. Defence-related stock BAE Systems was boosted by the commitment from NATO members to increase defence spending, while AstraZeneca and Eli Lilly benefited from the defensive nature of their businesses and earnings. Elsewhere within the return-seeking core, corporate bonds detracted. Alternatives, however, mildly

contributed to returns, notably the Fund's commodities and renewables exposure, which acted as strong diversifiers.

The stabilising layer also generated negative returns, although it performed relatively better than the return-seeking core. The Fund's exposure to gold, through exchange-traded commodity (ETC) notes, was a negative factor, as the rise in the US dollar and global interest rates weighed on the gold price. Government bonds had a negative impact as interest rates rose. Direct hedging helped dampen volatility, particularly during the challenging second quarter, while the active long exposure to the US dollar also displayed strong negative correlation with risk assets in some of the toughest phases, notably in the second and third quarters.

Regarding portfolio activity, the key change over the year was the reduction of the Fund's equity exposure. This was done initially through the sale of stocks, including Salesforce, Alphabet and Amazon.com. Later in the year, positions in Chubb, Ecolab and Accenture were also sold. The mix of the equity portion was progressively shifted towards more defensive stocks. For example, the position in US eye care company Cooper was bolstered in the second half of the year due to the attraction of fast-growing earnings at both its vision and fertility business. Additions were also made to energy firms, including Royal Dutch Shell and Anglo American. The Fund's exposure to corporate debt was raised through an allocation to a short-dated corporate bond exchange-traded fund, while UK investment grade credit was also raised. An increase in equity market protection was made by expanding the scale of the short futures positions on the S&P 500 and Eurostoxx 50 indices. Short positions against the Nasdaq 100 and DAX indices were also introduced.

In the stabilising layer, positions in government bonds were reintroduced in the first quarter of the year through a combination of physical positions and futures on US, Australian and German bonds. Gold was similarly added through an ETC position having the appeal of a hedge against a broad range of outcomes, including those connected to equity and credit risk, but also against fiat money debasement, geopolitical tail events, and high-inflationary regimes.

In the manager's view, there is merit in taking a relatively cautious approach at the present juncture. While the considerable declines endured by equities in 2022 have enhanced prospective returns, there are clear, and material risks at large. Consequently, capital preservation is the Fund's current focus.

Newton Investment Management Limited January 2023

BNY MELLON GLOBAL REAL RETURN FUND (GBP)

Over the twelve-month period under review, the Fund's sterling C (Inc.) share class returned -8.04%, compared with a return of 5.35% for SONIA (30-day compounded) +4%, both in sterling terms. The Fund generated a negative return and underperformed its benchmark.

ABSOLUTE RETURN, ALTERNATIVE & MULTI-ASSET cont'd

BNY MELLON GLOBAL REAL RETURN FUND (GBP) cont'd

The main detractor from the Fund's performance was the return-seeking core, particularly global equities. At the stock level, positions in Microsoft and ASML hampered returns, as both companies suffered from investors' rotation away from growth stocks and towards value stocks. Shares in e-commerce giant Alibaba were held back by stringent Covid-19 policies being maintained in China. Conversely, positive performance came from the Fund's commodity-related stocks, including oil companies ConocoPhillips, Royal Dutch Shell and Marathon Petroleum. Defence-related stock BAE Systems was boosted by the commitment from NATO members to increase defence spending, while AstraZeneca and Eli Lilly benefited from the defensive nature of their businesses and earnings. Elsewhere within the return-seeking core, corporate bonds detracted. Alternatives, however, mildly contributed to returns, notably the Fund's commodities and renewables exposure, which acted as strong diversifiers.

The stabilising layer also generated negative returns, although these holdings performed relatively better than those within the return-seeking core. The Fund's exposure to gold, through exchange-traded commodity (ETC) notes, was a negative factor, as the rise in the US dollar and global interest rates weighed on the gold price. Government bonds had a negative impact as interest rates rose. Direct hedging helped dampen volatility, particularly during the challenging second quarter, while the active long exposure to the US dollar also displayed strong negative correlation with risk assets in some of the toughest phases, notably in the second and third quarters.

Regarding portfolio activity, the key change over the year was the reduction of the Fund's equity exposure. This was done initially through the sale of stocks including Salesforce, Alphabet and Amazon.com. Later in the year, positions in Chubb, Ecolab and Accenture were also sold. The mix of the equity portion was progressively shifted towards more defensive stocks. For example, the position in US eye care company Cooper was bolstered in the second half of the year due to the attraction of fast-growing earnings at both its vision and fertility business. Additions were also made to energy and commodity firms such as Royal Dutch Shell and Anglo American. The Fund's exposure to corporate debt was raised through an allocation to a short-dated corporate bond exchange-traded fund, while new investment was made in emerging market debt, in local Brazilian and Mexican issues. In alternatives, some profits were taken on the crude oil

ETC after a surge in the oil price in the first half of the year. An increase in equity market protection was made by expanding the scale of the short futures positions on the S&P 500 and Eurostoxx 50 indices. Short positions against the Nasdaq 100 and DAX indices were also introduced.

In the stabilising layer, positions in government bonds were reintroduced in the first quarter of the year through a combination of physical positions and futures on US, Australian and German bonds. Gold was similarly added through an ETC position having the appeal of a hedge against a broad range of outcomes, including those connected to equity and credit risk, but also against fiat money debasement, geopolitical tail events, and high-inflationary regimes.

In the manager's view, there is merit in taking a relatively cautious approach at the present juncture. While the considerable declines endured by equities in 2022 have enhanced prospective returns, there are clear and material risks at large. Consequently, capital preservation is the Fund's current focus.

Newton Investment Management Limited January 2023

BNY MELLON GLOBAL REAL RETURN FUND (USD)

Over the twelve-month period under review, the Fund's A share class returned -9.25%, net of fees, compared with a return of 5.48% for SOFR (30-day compounded) + 4%, both in US dollar terms. The Fund generated a negative return and underperformed its benchmark.

The main detractor from the Fund's performance was the return-seeking core, particularly global equities. At the stock level, there was a weak contribution to returns from positions in Microsoft and ASML, as both companies suffered from investors' rotation away from growth stocks and towards value stocks. Shares in e-commerce giant Alibaba were held back by stringent Covid-19 policies being maintained in China. Conversely, positive performance came from the Fund's commodity-related stocks, including oil companies ConocoPhillips, Royal Dutch Shell and Marathon Petroleum. Alternatives, however, mildly contributed to returns, notably the Fund's commodities and renewables exposure, which acted as strong diversifiers.

The stabilising layer also generated negative returns, although these holdings performed relatively better than those within the return-seeking core. The Fund's exposure to gold, through exchange-traded commodity (ETC) notes, was a negative factor, as the rise in the US dollar and global interest rates weighed on the gold price. Government bonds had a mildly negative impact as interest rates rose. Direct hedging helped dampen volatility, particularly during the challenging second quarter, while the

ABSOLUTE RETURN, ALTERNATIVE & MULTI-ASSET cont'd

BNY MELLON GLOBAL REAL RETURN FUND (USD) cont'd

active long exposure to the US dollar also displayed strong negative correlation with risk assets in some of the toughest phases, notably in the second and third quarters. Currency hedging back into the Fund's base currency, the US dollar, which was strong through much of the period, was a positive factor.

Regarding portfolio activity, the key change over the year was the reduction of the Fund's equity exposure. This was achieved initially through the sale of stocks including Salesforce, Alphabet and Amazon.com. Later in the year, positions in Chubb, Ecolab and Accenture were also sold. The mix of the equity portion was progressively shifted towards more defensive stocks. For example, the position in US eye care company Cooper was bolstered in the second half of the year due to the attraction of its fast-growing earnings at both its vision and fertility businesses. The Fund's exposure to corporate debt was raised through an allocation to a short-dated corporate bond exchange-traded fund, while UK investment grade credit was also raised. An increase in equity market protection was made by expanding the scale of the short futures positions on the S&P 500 and Eurostoxx 50 indices. Short positions against the Nasdaq 100 and DAX indices were also introduced.

In the stabilising layer, positions in government bonds were reintroduced in the first quarter of the year through a combination of physical positions and futures on US, Australian and German bonds. Gold was similarly added through an ETC position having the appeal of a hedge against a broad range of outcomes, including those connected to equity and credit risk, but also against fiat money debasement, geopolitical tail events, and high-inflationary regimes.

In the manager's view, there is merit in taking a relatively cautious approach at the present juncture. While the considerable declines endured by equities in 2022 have enhanced prospective returns, there are clear and material risks at large. Consequently, capital preservation is the Fund's current focus.

Newton Investment Management Limited
January 2023

BNY MELLON GLOBAL UNCONSTRAINED FUND

Over the twelve-month review period, the Fund's USD W (Acc.) share class returned -15.72%, net of fees, compared with a return of -17.84% for the MSCI AC World/JP Morgan GBI (60:40) benchmark and -14.58% for the LIPPER Mixed Asset USD Balanced Global Average. The Fund outperformed its comparative benchmark but underperformed the sector average.

At the stock level, exposure to gold through an iShares exchange-traded commodity was the top-performing position as the gold price performed better than most other assets over the year, benefiting from its 'safe haven' status. Hong Kong insurer AIA Group contributed strongly as rates rose and China eased its Covid-related restrictions. Hubbell performed well on good results and a robust outlook for the electrification of US infrastructure – a key part of Hubbell's business. The avoidance of Meta Platforms and Tesla also helped returns, as both companies' stock prices fell substantially. A short-dated US government bond also produced positive returns.

On the negative side, shares in Sony fell, hampered by uncertainties affecting the games and semiconductor businesses. The holding in Hipgnosis Songs Fund detracted on investors' concerns about the rising cost of servicing its debt. In addition, shares in Ecolab fell; quarterly results were hampered by Covid-19 complications and supply chain headwinds. Long-dated US and Austrian government bonds also detracted from returns.

Early in the year, a new position was initiated in Exelon. The stock offers defensive exposure to growth markets as electrification trends gather pace. A holding in Switzerland's Lonza Group was established. As a drug contract development and manufacturing organisation, Lonza stands to benefit from growing demand for next-generation biological drugs. A stake was also purchased in Fanuc, a Japan-based company mainly engaged in the provision of factory automation machinery and robotics. The stock should benefit from long-term trends such as low unemployment, higher wage costs, and the growing penetration of automation in factories. A US Treasury inflation-protected 2028 bond was bought late in the period, as the manager felt it offers an attractive real yield for a low-risk asset in an uncertain economic environment. Additional purchases included Sanofi, Eli Lilly, Trane Technologies, TE Connectivity, Cooper Companies and Chubb.

The Fund's holding in Taiwan Semiconductor was sold early in the year following a strong period for the semiconductor cycle. While the sector is benefiting from several structural tailwinds, concerns around the strength of future demand and geopolitical tensions resulted in the manager selling the stock. Certification business Bureau Veritas was also sold, as the manager felt that there could be some weakness in near-term trading given the potential for an economic slowdown. Other sales included CRH, Texas Instruments, Citigroup, Fresenius Medical Care and GlaxoSmithKline.

As monetary policy tightening begins to affect the outlook for both growth and inflation, investor focus may shift from interest rates towards the earnings cycle. Those companies with resilient earnings profiles are likely to be best placed in a weaker economic environment.

Newton Investment Management Limited
January 2023

ABSOLUTE RETURN, ALTERNATIVE & MULTI-ASSET cont'd

BNY MELLON SUSTAINABLE GLOBAL REAL RETURN FUND (EUR)

The Fund's Euro W (Accumulation) share class generated a return -14.32% over the twelve-month period, compared with a return of 4.08% for the 1-Month EURIBOR + 4% comparative benchmark. The Fund produced a negative return, net of fees, and underperformed its benchmark.

The main detractor from the Fund's performance was the return-seeking core, and particularly global equities. At the stock level, one of the the largest detractors was Nasdaq-quoted stock HeadHunter Group, which has exposure to the Russian online recruitment market. It was caught up in the rout in Russian stocks in the wake of the attack on Ukraine, and trading was halted. Technology stocks such as Microsoft and ASML both suffered from investor rotation away from growth stocks and towards value stocks. China's LONGi Green Energy Technology detracted as the Chinese market fell.

More positively, healthcare stocks such as AstraZeneca and Eli Lilly aided returns, as they benefited from the defensive nature of their businesses and encouraging earnings results. Hubbell also performed well, helped by the successful execution of its strategy and favourable tailwinds for increased electrification spending. Elsewhere within the core, alternatives detracted, partly through the Fund's exposure to carbon, as proposed reforms by the European Parliament exerted downward pressure on the carbon price. Additionally, UK-listed investment trusts underperformed owing to rising bond yields.

The decision to have a sizeable US dollar exposure through the period was a positive contributor, as the dollar strengthened against the euro. The Fund's exposure to gold, through exchange-traded commodity notes, proved negative as a strengthening US dollar and global interest rates weighed on the gold price. Government bonds had a mildly negative impact as interest rates rose.

Regarding portfolio activity, the key change over the year was the reduction of the Fund's equity exposure. This was done initially through the sale of stocks such as Salesforce, Alphabet and Amazon.com. Later in the year, positions in Chubb, Ecolab and Accenture were sold. The Fund's equity holdings were progressively shifted towards more defensive stocks. US eye-care company Cooper was a key new addition in the second half of the year. Another major purchase was mining group Anglo American. The company has significantly improved its environmental, social and corporate governance (ESG) profile in recent years. The rationale for investment in this company is also highly aligned

with ESG objectives in that its fastest-growing commodity exposure is to copper, a key component in the transition to a greener world.

In fixed income, the Fund's exposure to corporate debt was raised through an allocation to a short-dated corporate bond exchange-traded fund, while UK investment grade credit holdings were also increased.

In the stabilising layer, positions in government bonds were enlarged via a combination of physical positions and futures in US, Australian and German bonds. The manager also added to the gold exchange-traded commodity position.

Looking forward, the manager believes there is merit in a relatively cautious approach. While the considerable declines endured by equities in 2022 have clearly enhanced prospective returns, there are material risks at large. Consequently, the Fund's focus is on capital preservation.

Newton Investment Management Limited January 2023

BNY MELLON TARGETED RETURN BOND FUND

Over the twelve months under review, the Fund's USD A share class returned -2.43%, net of fees, compared with -11.62% for the LIPPER Bond Global USD Average, in US dollar terms. The Fund generated a negative return but outperformed its benchmark.

In 2022, Russia's invasion of Ukraine shocked global markets, exacerbating inflation concerns and slowing global economic growth. A combination of rising government bond yields and widening credit spreads created a perfect storm for bond investors throughout the year.

During the first half of the year, the Fund's overweight positions in the US, UK, Europe and Australia were the primary drivers of negative returns. An overweight allocation to riskier assets, notably corporate credit, securitised instruments and emerging markets were additional factors in the Fund's performance, as the spread on most 'risk assets' rose significantly during the period. The third quarter was also challenging for the Fund, with an overweight to developed market duration the main detractor from performance. Active positioning in the UK rates space detracted, as unfunded spending plans called the sustainability of the UK government balance sheet into question and pushed rates significantly higher.

In the first half of the year, the Fund benefited generally from its positioning in anticipation of a flatter yield curve. In the final quarter of the year, most of the positive returns can be attributed to the Fund's overweight to developed market duration. With material overweight positions in US, UK and European rates, the Fund benefited significantly from moderating developed market

ABSOLUTE RETURN, ALTERNATIVE & MULTI-ASSET cont'd

BNY MELLON TARGETED RETURN BOND FUND cont'd

inflation, as yields dropped precipitously from their late October peaks.

In terms of investment activity, in the first half of the year, the manager significantly increased the Fund's duration from approximately 0.7 years to 1.7 years. The Fund also increased its overweight to Australian dollar duration, moved to a less underweight position in Sterling duration, and adjusted from an underweight to a material overweight in US dollar duration.

In the Fund's currency holdings, the manager moved from an underweight to overweight position in the euro, a neutral to underweight stance in the South Korean won, and from underweight to neutral in the New Taiwan dollar, as well as modestly reducing the size of the Fund's long US dollar position.

At a sector level, the manager made changes that included selling industrial corporates and hard currency emerging market sovereigns, and instead adding to US Treasury assets and modestly increasing the Fund's exposure to financials.

Looking forward, yields and spreads have risen markedly, such that there may be real potential for generating meaningful income from bonds for the first time in a decade or more, while also having the potential for enjoying capital gains should yields decline over time.

**Insight North America LLC
January 2023**

GLOBAL EQUITY

BNY MELLON GLOBAL EQUITY FUND**

Over the twelve-month review period, the USD A share class of the Fund returned -21.79%, net of fees, compared with a return of -18.36% for the MSCI All-Country World Index NR, both in US dollar terms. The Fund produced a negative return and underperformed its comparative benchmark.

Both stock selection and sector allocation detracted from the Fund's returns. While selection was notably positive in information technology, it was weak in healthcare and consumer staples. Underweight exposure to energy also weighed on performance.

At the stock level, the Fund's position in Amazon was one of the weakest performers; the company's management warned on the state of consumer spending, and revenue and operating income guidance for the fourth quarter underwhelmed. Shares in Sony fell, hampered by uncertainties affecting the games and semiconductor businesses, and Darling Ingredients declined following third-quarter results in which earnings fell short of expectations. The company's feed unit was the primary source of disappointment, offsetting better performance in its food and fuel segments.

On the positive side, AIA Group shares contributed to returns following a relaxation of China's Covid-19 restrictions and approval for the insurer to establish a branch in Henan province. Electrical manufacturer Hubbell was another of the Fund's top performers, producing strong earnings results and raising guidance for 2022. Trane Technologies was a notable contributor, as its second-quarter revenue and earnings came in ahead of expectations. The avoidance of Tesla and Meta Platforms also helped temper losses, as their share prices fell markedly in late autumn.

Regarding portfolio activity, a purchase was made in US utility Exelon, a switch from Eversource Energy, as the former company is expected to achieve better growth than the latter. The manager purchased Nestle, attracted by the business's strong cash generation and defensive attributes. A position was added in electricity network company SSE. The company is engaged in generating renewable electricity and is well positioned to benefit from the decarbonisation of power markets through its renewable energy arm. Other new additions included Chubb, Sanofi, the aforementioned Trane and Hubbell, SCOR, Progressive, and Bank Mandiri.

Vivendi was sold owing to evidence of an increasingly poor track record of capital allocation and corporate governance. The manager also sold Unilever, acknowledging the growing intensity of the squeeze on consumer incomes paired with commodity price pressures on the input side. The Fund's semiconductor exposure was reduced via the sale of Texas Instruments, owing to the possibility of an associated cyclical downturn in technology hardware. Other sales included Ferguson, Citigroup, Suzuki Motor, Costco Wholesale, Informa and TE Connectivity.

GLOBAL EQUITY cont'd

BNY MELLON GLOBAL EQUITY FUND** cont'd

Inflation and the interest-rate-tightening cycle have resulted in a step change in bond yields, which has in turn had a negative impact on the valuation of financial assets over the recent past. As tighter monetary policy begins to affect the outlooks for both growth and inflation, investor focus may shift from the rate cycle towards the earnings cycle. In the manager's opinion, those companies with resilient earnings profiles are likely to be best placed in a weaker economic environment.

Newton Investment Management Limited January 2023

BNY MELLON GLOBAL EQUITY INCOME FUND

Over the twelve-month review period, the Fund's USD A share class generated a return of -4.73%, net of fees, compared with a return of -17.54% for the FTSE World Index TR, both in US dollar terms. The Fund produced a negative return but outperformed its comparative benchmark, driven mainly by strong stock selection.

At the stock level, the biggest stock contributor was Marathon Petroleum. Its quarterly profits exceeded market estimates; the US refiner benefited from a surge in fuel prices. BAE Systems performed well, as the defence contractor is expected to benefit from increased government spending as geopolitical tensions persist. British American Tobacco was another strong performer owing to its robust cash flow attributable to strong cigarette pricing. The zero weightings in low yielding Meta Platforms and Tesla were positive factors, as the share prices of both stocks fell substantially.

On the negative side, Taylor Wimpey detracted from returns owing to news that developers are being forced by the government to foot a large bill for cladding remediation on medium-sized buildings. The potential impact of rising interest rates and energy bills on the housing market also weighed on sentiment. Shares in Continental were weak, with the German tyre maker's earnings falling short of market forecasts. Medtronic was also weak, as supply chain issues led to weaker growth and the strong US dollar affected reported results.

Regarding portfolio activity, a holding in Johnson Controls was purchased. As supply-chain bottlenecks ease, reduced input costs could boost margins. The manager believes that higher product pricing and expanding margins should lead to greater earnings power and free cash flow generation, ahead of what the market currently expects. A position in Broadcom was established as it has an impressive track record in mergers and acquisitions; the company transforms profitability by only focusing on the core business and largest customers. A position was taken in the German

BNY MELLON GLOBAL EQUITY INCOME FUND cont'd

automotive engineering company Mercedes-Benz. The management has a clear emphasis on profitability over volumes and is successfully implementing fixed cost reductions. Further new additions included FedEx, Fidelity National Information Services, Enel and Garmin.

The holding in Citigroup was sold, as the bank was expected to lose revenue as a result of Russia's removal from the financial system. The position in Merck & Co. was also sold. The stock had performed well, latterly buoyed by rumours that it was seeking to acquire the pharmaceutical company Seagen. The holding in Hasbro was exited owing to emerging questions concerning the sustainability of revenues in its 'Wizards of the Coast' division.

The manager believes that an environment of slower growth, higher rates and high inflation represents a relatively favourable backdrop for income stocks in 2023. Balance sheets have improved post Covid-19, and earnings have recovered quickly, leaving dividends well covered. In the manager's view, income stocks are trading on attractive valuations.

Newton Investment Management Limited** January 2023

BNY MELLON GLOBAL LEADERS FUND

Over the twelve-month review period, the Fund's USD A (Acc.) share class returned -22.92%, net of fees, versus -18.14% for the MSCI World Index and a fall of 20.87% in the LIPPER Equity Global Average, all in US dollar terms. The Fund generated a negative return and underperformed both its benchmark and the sector average.

Equity markets endured a turbulent 2022. Russia's invasion of Ukraine dented already fragile investor confidence early in the year, disrupting supply chains and putting pressure on commodity and energy prices. Inflation and the reactions of central banks were at the forefront of investor thinking for much of the year. With prices rising further and faster than many had expected, policymakers were forced into aggressive interest rate hikes. In turn, this fuelled fears of a slowdown in global economic activity, although economic data proved more resilient than many expected in the final months of the year.

The single biggest drag on performance was security selection in the healthcare sector. A lack of exposure to the energy sector was also detrimental, as the sector experienced strong gains due to higher oil and gas prices. However, the portfolio's holdings in the weak consumer discretionary sector outperformed their peers and were the Fund's major source of positive returns. While the information technology sector was also weak, the Fund's holdings in the sector performed better than those the benchmark held.

GLOBAL EQUITY cont'd

BNY MELLON GLOBAL LEADERS FUND cont'd

From a company perspective, two healthcare holdings, Illumina and Edwards Lifesciences, were notable detractors from performance. The former struggled due to disappointing results, while the latter reported weaker-than-expected sales of its transcatheter aortic valve replacement therapy. Both companies, in the manager's view, retain compelling long-term prospects.

More positive was the performance of Danish pharmaceutical firm Novo Nordisk. Sales of its diabetes and obesity therapies were robust throughout the year. Asian insurance company AIA Group also performed well, helped particularly in the final quarter of the year by the relaxation of pandemic-related restrictions in China and Hong Kong.

There were three sales during the year: Ecolab, Fanuc, and Tencent Holdings. As all three were experiencing challenges, it was felt that superior fundamentals and long-term growth potential were to be found elsewhere. New additions to the Fund were Fastenal, West Pharmaceutical Services, and Old Dominion Freight Line.

Concerns about economic growth remain in light of persistent inflation and higher interest rates. Consumers across many countries continue to be squeezed by higher prices at a time when some companies are being challenged by shrinking demand and elevated costs. However, while the post-Covid growth momentum has ebbed and some regions are in danger of recession, economic data has remained relatively resilient. In China, the removal of Covid-19 restrictions may invigorate growth, although it remains to be seen if the subsequent surge in the virus hinders recovery. Ever present in the background are events in Ukraine and the tensions between China and the West, which may persist as sources of volatility throughout 2023.

Walter Scott & Partners Limited January 2023

BNY MELLON GLOBAL OPPORTUNITIES FUND

Over the twelve-month period under review, the USD A share class of the Fund generated a return of -22.40%, net of fees, against a return of -18.36% for the MSCI AC World Index NR, both in US dollar terms. The Fund generated a negative return and underperformed its comparative benchmark.

Stock selection in the US detracted from returns at the regional level. Healthcare was the worst performing sector and also detracted. Sony was the weakest-performing position in the Fund, hampered by uncertainties affecting the games and semiconductor businesses. Shares in Amazon were also weak. The company's management warned on the state of consumer spending, and revenue and operating income guidance for the fourth quarter underwhelmed. Ferguson's shares declined as investors became concerned about slowing volume and margin momentum. Not owning

shares in Exxon Mobil also weighed on performance, as the share price was buoyed by the rally in energy prices.

On the positive side, the information technology sector performed strongly, with Mastercard and NVIDIA helping to temper losses. A position in AIA Group was the Fund's top contributor. The stock rallied following a relaxation of China's Covid-19 restrictions and an approval for the insurer to establish a branch in Henan province. Electrical manufacturer Hubbell performed well, producing strong earnings results while raising guidance for 2022. Trane Technologies was another notable contributor, as its revenue and earnings came in ahead of expectations. No exposure to either Tesla or Meta Platforms was beneficial as their share prices fell markedly.

A holding in Exelon was purchased early in the period, as the manager believes the company will achieve higher asset base growth than some of its peers. A stake in Hubbell was purchased. The stock provides quality exposure to US utility capital expenditure and the manager believes it could also benefit from broader electrification tailwinds. Exposure to electricity network company SSE was also established. The company is engaged in generating renewable electricity and is well positioned to benefit from the decarbonisation of power markets. A further addition was Fanuc, a Japan-based company mainly engaged in the provision of factory automation machinery and robotics. It is the manager's belief that industry trends are set to improve. These include low unemployment, higher wage costs, and the growing penetration of automation in factories.

The manager exited the position in Unilever owing to the intensity of the squeeze on consumer incomes, alongside commodity price pressures on the input side. The holding in Ferguson, an industrial supplies distributor, was sold owing to a weaker economic outlook and the manager's expectations of limited margin expansion going forward. Having performed well in an inflationary environment, the holding in Costco Wholesale was disposed of. The stock's rating appeared high relative to the company's underlying growth.

Elevated inflation, in conjunction with higher interest rates, has resulted in a step change in bond yields that has negatively impacted the valuation of financial assets in the recent past. As tighter monetary policies begin to affect the outlooks for both growth and inflation, the manager believes investor focus may shift from the interest rate cycle towards the earnings cycle. In the manager's view, those companies with resilient earnings profiles are likely to be best placed in a weaker economic environment.

Newton Investment Management Limited** January 2023

GLOBAL EQUITY cont'd

BNY MELLON LONG-TERM GLOBAL EQUITY FUND

Over the twelve-month review period, the Fund's Euro A share class returned -15.41%, net of fees, versus -12.78% for the MSCI World Index and -15.67% for the Lipper Equity Global Average, all in euro terms. The Fund produced a negative return and underperformed both its benchmark and the sector average.

Equity markets were weak in 2022 given concerns about rising inflation. This was exacerbated by war in Ukraine, and the consequent raising of interest rates by key central banks. Fears that a significant economic downturn would adversely impact the near-term outlook for corporate earnings abounded.

One of the largest detractors from performance at the sector level was the absence of energy stocks, which did well in the year thanks to higher oil and gas prices. Other detractors of note included industrials; the portfolio's holdings in this sector were weak compared with the benchmark's.

Over the year, concerns about economies and rising interest rates brought about a shift in investor preference, from growth to value stocks. However, the Fund's holdings in the weak consumer discretionary sector significantly outperformed their peers and ultimately contributed to performance over the period. The Fund's information technology (IT) holdings also performed better than those held in the benchmark.

However, two large IT companies, Taiwan Semiconductor and Keyence, were among the biggest detractors from performance at the stock level. While these companies both experienced good earnings growth, the shares were affected by the market's preference for value stocks. Furthermore, concerns over China-Taiwan relations negatively impacted Taiwan Semiconductor. The Fund's position in diabetes and obesity treatment company Novo Nordisk helped to temper losses. The company has continued to deliver excellent results due to good sales of its GLP1 products, and its new obesity drug, Wegovy, continues to capture the market's attention. Shares of Pan-Asian life insurer AIA Group were also strong over the year; the relaxation of lockdowns in China and Hong Kong helped investor sentiment. Healthcare company Johnson & Johnson also performed well over the year.

Regardless, the manager decided to sell Johnson & Johnson towards the end of the period in response to concerns relating to the company's use of a controversial legal structure to address potential liability claims relating to their talcum powder products. Other sales of note included Fanuc, Colgate-Palmolive, and Oracle. The manager elected to reinvest the proceeds into companies with more attractive financial profiles, given the deterioration of Oracle's balance sheet.

Positions in Costco Wholesale, a global leader in membership-only warehouse clubs, and West Pharmaceutical Services, which produces containment consumables for injectable drugs, were purchased.

The manager expects equity market volatility in the short term. The battle against inflation is not yet won, and central banks remain in defensive mode. More positively, several commodity and energy prices have fallen from their highs and supply chain pressures have eased, although some of this is due to weaker growth. However, so far, economic indicators have proved more resilient than forecasts suggested. Geopolitical uncertainty remains elevated given the war in Ukraine and the sour relationship between the West and China, although with regard to the latter, economic pragmatism may temper the extent of any further deterioration.

Walter Scott & Partners Limited
January 2023

REGIONAL EQUITY

BNY MELLON ASIAN INCOME FUND

Over the twelve-month period, the Fund's USD W (Inc.) share class returned -11.11% compared with a return of 16.41% from the FTSE Asia Pacific ex Japan Index TR, in US dollar terms. The Fund produced a negative return but outperformed its comparative benchmark, driven by both positive stock selection and asset allocation.

At the stock level, Indian tobacco company ITC was the Fund's top-performing position, with its defensive attributes appealing in light of the uncertain economic outlook. The Fund also notably benefited from its sector positioning in financials, with bank holdings DBS, United Overseas Bank and Bank Rakyat Indonesia performing well in the rising interest rate environment. Insurance Australia Group also contributed strongly given an expected earnings recovery from improved pricing trends.

Conversely, Samsung Electronics was the weakest performing stock, owing to a cyclical downturn in the memory sector and general weakness in technology shares. Other technology stocks, such as semiconductor chipmaker MediaTek, Indian IT services company Infosys, and copper-clad laminate producer Elite Materials, were also weak given sluggish end-demand and disappointing earnings results.

Regarding portfolio activity, the manager bought South Korea's Hanon Systems, a company principally involved in the production and sale of heating, ventilation and air conditioning (HVAC) systems for cars. Hanon is one of the leaders in HVAC technology. A position was established in National Australia Bank. Its business has undergone a significant transformation, with upgrades to its technology systems and disposals of non-core businesses. The relative robustness of the Australian economy could provide further tailwinds for the company. A new position was made in Taiwan's Advantech, the world's leading industrial computer company. In the manager's view, Advantech is a high-quality company with competitive solutions in both hardware and software across the industrial internet of things. Additional purchases included Woodside Energy, Singapore Exchange, and KT Corporation.

Australian casino operator Star Entertainment was sold given its lack of dividend. Regulatory concerns continued to weigh on the stock, with Australia's financial crime regulator broadening its ongoing investigation into the company. In a similar vein, New Zealand casino operator SkyCity Entertainment was sold owing to continued regulatory concerns and constraints on discretionary consumer spending in a rising interest rate environment. The Fund sold Delta Electronics, with the dividend yield coming close to breaching the Fund's limit. Further sales included Bank Central Asia and Kasikornbank.

Looking forward, the tightening of financial conditions in conjunction with high inflation could strain outlooks for both

BNY MELLON ASIAN INCOME FUND cont'd

consumer spending and corporate profitability. However, in Asia, China's reopening from Covid-19 restrictions could provide some support, with the region's largest economy likely to see some normalisation in economic activity.

Against a backdrop of a fragile global economy, the arguments for income investing remain strong. The manager believes the Fund's focus on quality companies with strong balance sheets and pricing power should help to mitigate volatile times ahead.

Newton Investment Management Limited January 2023

BNY MELLON ASIAN OPPORTUNITIES FUND*

Over the twelve-month period under review, the USD A share class of the Fund generated a return of -22.31%, net of fees, against a return of -17.19% for the MSCI All-Country Asia Pacific ex Japan Index TR, in US dollar terms. The Fund produced a negative return and underperformed the comparative benchmark, as both stock selection and sector allocation weighed on relative returns.

A non-holding in BHP Group was the biggest detractor from returns at the stock level, as the Australian miner performed well amid a buoyant commodity price environment. Chinese battery maker Wuxi Lead Intelligent Equipment underperformed, as investors considered the resilience of orders in a recessionary environment and demand challenges for electric vehicles. Tencent Music Entertainment was also weak after reporting a fall in revenue from social entertainment services amid a tough competitive environment and a weak economic backdrop. ASML was a further detractor from returns despite robust results and its commitment to increase capacity to meet soaring demand for its extreme ultraviolet lithography machines.

On the positive side, Hong Kong insurer AIA Group materially contributed to relative performance following strong results, the announcement of a large buyback programme and improved prospects for new business. Delta Electronics also performed well, with its second-quarter sales and earnings coming in ahead of consensus expectations. Indian car maker Maruti Suzuki was a positive contributor over the year, as the company continued to achieve record domestic sales and exports.

Regarding portfolio activity, Indonesia's e-commerce and gaming platform company, Sea, was purchased as it appears well placed to capitalise on the large e-commerce opportunity in the ASEAN (Association of Southeast Asian Nations) region. A new position was taken in Taiwan's Delta Electronics, which is engaged in manufacturing and selling power supplies. The company is well positioned to capture long-term growth in industry automation and clean energy within emerging markets. Bank Mandiri was a further

REGIONAL EQUITY cont'd

BNY MELLON ASIAN OPPORTUNITIES FUND* cont'd

addition to the Fund. The macroeconomic dynamics in Indonesia appear to be attractive and Mandiri is, in the manager's view, a competitively advantaged business that could earn superior returns on invested capital. Further additions included HDFC Life, NetEase and Meituan.

The holding in Indian jeweller Titan was sold after a period of strong relative performance. The position in copper-clad laminate producer Elite Materials was also exited in anticipation of a deteriorating earnings cycle following a period of strong relative performance. The holding in LG Chem was sold following its strong relative performance. Further sales included Jubilant Foodworks and Alibaba.

Asian-market equities currently trade at an unusually high discount to developed markets, providing a conducive backdrop for emerging markets. There are clear long-term opportunities in Asian markets, based on relatively high levels of income growth, rapid increases in product penetration and scope for industry consolidation. In the manager's view, there is a unique opportunity for Asian-market companies which are well-exposed to reliable secular growth trends and that can exploit this opportunity to a greater extent than their peers with their differentiated customer offering and execution.

Newton Investment Management Limited** January 2023

BNY MELLON BRAZIL EQUITY FUND

Over the twelve-months under review, the Fund's USD A share class returned 1.44%, net of fees, compared to a return of 8.77% for the MSCI Brazil 10/40 NR Index and 4.06% for the LIPPER Equity Brazil Average, all in US dollar terms.

The Fund generated a positive return although it underperformed its comparative index, net of fees.

At the industry level, the Fund's investments (mostly the manager's stock selection) in logistics and the overweight and stock selection in steel were the main positive contributors to the Fund's performance relative to the benchmark. Negative relative performance was generated by the Fund's allocation to global capital goods, an underweight position in oil & gas and selection within the utilities sector.

At the stock level, the Fund benefited most from exposures to Assaí and Santos Brasil. Shares in Assaí delivered strong results during the year, as consumers moved to more cost-effective food retailers in an environment of high inflation and interest rates. Additionally, the controlling shareholder announced it may sell its stake in the company, which would be expected to improve governance. Santos Brasil also delivered strong results in all segments, with high volumes compared to already strong results in 2021.

Some of the negative highlights at the stock level included Americanas, Marfrig, Embraer and BRF. Americanas shares tumbled on another round of weakness in consumer stocks owing to the sell-off in global growth companies and higher domestic interest rates. Marfrig shares declined as US beef spreads fell during the year and because of its 33% stake in BRF, which fell on concerns regarding its leverage as interest rates remained high. Embraer shares suffered, as problems in the supply chain caused delays which led to lower margins, while the company is still bearing the costs related to the arbitration process against Boeing.

During the year, the manager added the following new stocks to the Fund: BB Seguridade (defensive financial services), Banco Pactual (banks), BRF (food producer), Eletrobras (utilities) and 3R (oil & gas). The manager also sold the Fund's exposures to C&A (consumer discretionary), CESP (utilities) and Petrobras (oil & gas).

In 2022, the stock markets were affected by several factors, which included global inflation, the rise in interest rates in most developed countries, the restrictions imposed by the zero-Covid policy in China and the risk of a global recession. As a consequence, most developed markets had a down year (in some cases, like the US, the major indices dropped significantly). In addition to the external factors, general elections were held in Brazil over the period under review, which added volatility to market prices.

However, despite those challenges, some sectors in the Brazilian stock market, especially those related to commodities (oil & gas and mining, for example) delivered strong performances, accounting for the significant differences in returns among sectors.

Although there are several challenges for the new government, the manager believes that prices already reflect a lot of the potential risks ahead, especially relating to the fiscal situation. Despite the market scepticism, the new cabinet has proposed measures that expect to reach zero primary deficit by 2024. In that scenario, the manager believes the Fund will be well positioned to take advantage of good opportunities at very reasonable prices.

ARX Investimentos Ltda January 2023

BNY MELLON GLOBAL EMERGING MARKETS OPPORTUNITIES FUND*

Over the twelve-month review period, the Fund's USD A share class returned -24.57%, net of fees, compared with a return of -20.09% for the MSCI Emerging Markets Index NR, both in US dollar terms. The Fund produced a negative return and underperformed its comparative benchmark, largely owing to weak stock selection.

At the stock level, technology company EPAM Systems was notably weak as the market rotated away from growth

REGIONAL EQUITY cont'd

BNY MELLON GLOBAL EMERGING MARKETS OPPORTUNITIES FUND* cont'd

stocks. The company was further affected by its employee exposure to Russia and Ukraine. The flight to 'safe havens' and the high oil price meant Info Edge India underperformed. Other detractors from the Fund's performance included holdings in Globant and Sea. Chinese battery maker Wuxi Lead Intelligent Equipment underperformed, as investors' concerns grew over the resilience of orders in a recessionary environment and demand challenges for electric vehicles.

On the positive side, HDFC Bank, in India, performed well owing to strength in its consumer lending business that led to robust earnings growth. A positive contribution within financials came from holdings in Chinese/Hong Kong insurer AIA Group, as the prospects for new business improved and China began to recover from its tough Covid-related restrictions.

Regarding activity in the Fund, share price weakness provided an opportunity to initiate a position in Indonesia's Sea, an e-commerce and gaming platform. The manager believes the company is well placed to capitalise on the large e-commerce opportunity in the ASEAN (Association of Southeast Asian Nations) region. A position was established in Bank Mandiri, which is the largest bank by assets in Indonesia. The macroeconomic dynamics in Indonesia are attractive and it is the manager's belief that Mandiri is a competitively advantaged business that could earn superior returns on invested capital. A further addition was XP, which is a technology-driven investment platform and a provider of low-fee financial products and services in Brazil. In the manager's view, the company has significant growth potential, as the asset management market in Brazil has consistently grown at a double-digit pace over the last 14 years. Other new additions included SK Hynix, Delta Electronics, ICICI Prudential Life Insurance, Netease and ICICI Bank.

The holding in EPAM Systems was sold given the inherent risks of having the majority of employees based in Russia, Ukraine and Belarus. Copper-clad laminate producer Elite Materials was also sold. The manager anticipates a deteriorating earnings cycle following a period of strong relative performance for the stock. The position in Alibaba was also exited. While the company remains the dominant e-commerce platform in China, growth has started to stall owing to increased competition and a slowdown in consumer demand. Holdings in Bilibili, Titan, Jubilant Foodworks, Tencent Music Entertainment and Flat Glass were also sold.

Emerging market equities look to be trading at an unusually high discount to developed markets. The manager feels there are clear long-term opportunities in emerging markets, based on relatively high levels of income growth, rapid increases in product penetration and scope for industry consolidation. This could provide a unique opportunity for

investment in companies that are exposed to reliable secular growth trends.

Newton Investment Management Limited** January 2023

BNY MELLON JAPAN SMALL CAP EQUITY FOCUS FUND

Over the twelve-month period under review, the Fund's JPY W share class returned -1.03%, net of fees, compared with 1.26% for the Russell/Nomura Small Cap Index and -8.72% for the Lipper Global Equity Japan Small & Mid Cap sector average, all in Japanese yen terms. The Fund produced a negative return behind the benchmark but ahead of the sector average.

Sector selection was the main detractor from the Fund's performance.

At the industry level, the main detractors were services, information & communication where the Fund was overweight, and banks where the Fund held no position. Conversely, the main positive contributors to performance were other financing business, nonferrous metals where the Fund was overweight, and pharmaceuticals where the Fund held no positions.

At the individual stock level, the main negative contributors to performance were Atrac, an IT service provider in the human resources field; Japan Medical Dynamic Marketing, a medical equipment provider; and Anicom Holdings, which provides health insurance policies for pets. The main contributors to performance included m-up holdings, which operates fan club sites and an electronic ticket business; Premium Group, which provides automotive loans and consumer micro-lending; and Nippon Gas, a supplier of LP gas and city gas.

The Fund added three new positions including ADEKA, which produces a wide range of chemical and food products; Minkabu The Infonoid, which is a leading financial information provider in Japan; and Nakanishi, which focuses on dental products, surgical products, and general industrial products. In addition, the Fund completed the sale of Arata, which is a wholesaler of cosmetics, daily goods, and household goods; Takeuchi MFG, one of the largest manufacturers of construction machinery; Totetsu Kogyo, a leading company in railway maintenance; and Anritsu, a leading global manufacturer of electronic test and measurement. The Fund also increased weight of stocks which were at attractive levels on a medium-term basis, funding them from stocks which have held up relatively well.

At the end of December 2022, the portfolio held 30 stocks and was overweight services, information & communication, and other financing business.

REGIONAL EQUITY cont'd

BNY MELLON JAPAN SMALL CAP EQUITY FOCUS FUND cont'd

The largest overweight positions in the portfolio included Vector, which operates sales promotion businesses including press release support; m-up holdings; Direct Marketing MiX, which provides marketing services through its outbound call centres; TechMatrix, which provides system integration and solution services with strengths in cybersecurity and cloud-based services for healthcare information; and OPTORUN, which produces optical thin film deposition tools.

After the adjustment of yield curve control by the Bank of Japan, bond prices dropped, the yen strengthened and growth stocks fell. Although the manager believes the change in monetary policy could have a limited impact on the Japanese economy, there is a possibility that a stronger yen will hurt export companies that, so far, have offset the impact of an economic downturn during the weaker currency environment.

The Russian invasion of Ukraine is adding to inflation through supply disruption that was already evident from the COVID-19 pandemic. A combination of war and monetary tightening is creating added uncertainty over the financial markets. Investors' willingness to take risks is declining and, as a result, asset prices may remain volatile at least in the near term until the Ukrainian situation becomes clearer.

In terms of strategy, the Fund will continue to hold stocks that appear to have attractive growth prospects. Once economic conditions have normalised, the longer-term theme that Japan has transitioned to an expansionary phase after many years of nominal GDP contraction due to deflation will once again become a focus.

BNY Mellon Asset Management Japan Limited** January 2023

BNY MELLON SMALL CAP EUROLAND FUND

Over the twelve-month period under review, the Fund's Euro A share class returned -14.58%, net of fees, against -15.85% for the S&P Eurozone Small & Mid Cap Average Index. The Fund generated a negative return but outperformed its comparative benchmark.

Equity markets ended a rollercoaster year in negative territory amid an increasingly challenging landscape for the capital markets. The Russia/Ukraine war exacerbated investors' worries that were already high owing to decades-high inflation and central bank monetary policy tightening. In this environment, the Fund outperformed the benchmark.

Positive stock selection in France led the contributors to relative returns, followed by favourable stock selection in Germany. Conversely, challenged stock selection and positioning in Ireland and the Netherlands weighed on relative returns. On a sector basis, real estate and consumer discretionary were the largest relative contributors to

performance, while financials and healthcare were the largest detractors.

Favourable stock selection, particularly among German holdings, was the primary driver of outperformance in real estate. Positive stock selection and positioning in consumer discretionary also boosted relative results. The Fund's zero weight in Finnish holdings, and effective stock selection among German holdings, buoyed sector results. The Fund's position in Rheinmetall, a German aerospace and defence company, bolstered performance as the company delivered triple-digit returns.

In the financials sector, weak stock selection and underweight positioning detracted most from relative performance. The Fund's zero weights in Irish and Spanish holdings particularly weighed on sector results. Challenged stock selection and positioning in the healthcare sector, including a lack of exposure to Dutch holdings and an out-of-benchmark position in a Danish company, weighed on relative returns. The Fund's position in German real estate management and development company CORESTATE Capital Holding was a top detractor during the period.

The manager increased the Fund's exposure to communication services and industrials, initiating positions in JCDecaux in communication services and Sacyr in Industrials. The manager decreased the Fund's exposure to financials and utilities. The Fund sold a holding in Unipol Gruppo in financials and trimmed several other existing positions in this sector and the utilities sector.

The outlook for Euroland equities remains positive heading into 2023. Following a great deal of strength in the US dollar and weakness in the euro, it appears that central bank monetary policies are generally aligned, leading the manager to believe that a similar trend in currencies over the next twelve-months will be unlikely.

Euroland valuations remain supportive relative to US equities, and with global growth waning, that should be even more significant headed into next year. The manager continues to see opportunity in the utilities sector. An improving regulatory backdrop, attractive valuations, and defensive business models will likely set the sector up well for 2023. Consumer businesses around the globe have discounted a great deal of negativity over the next six months. Compared to the US, much of Europe has already experienced a substantial amount of consumer pain over the last year, and the manager believes comparisons will ease in the first quarter of 2023.

Given the lower global growth backdrop headed into 2023, and considering where the Fund sits today with currencies, valuations, and sector weightings, the manager remains constructive on the Fund's outlook for international equities.

Newton Investment Management North America LLC** January 2023

REGIONAL EQUITY cont'd

BNY MELLON SUSTAINABLE GLOBAL EMERGING MARKETS FUND

Over the short period from the Fund's launch on 23 September 2022 to 31 December 2022, the Fund's USD W (Acc.) class returned 6.90% net of fees, compared with a return of 6.13% for the MSCI Emerging Markets Index NR. The Sub-fund produced a positive return and outperformed its comparative benchmark.

Stock selection was weak, particularly in the industrials and materials sectors, while sector allocation was mildly positive. The Fund's position in AIA Group was the top contributor. The stock outperformed on optimism that the scaling back of social restrictions in China would boost economic growth. The position in Brazilian industrial electronic equipment manufacturer WEG was also beneficial, as the company experienced strong demand for its energy efficiency technology. Chipmaker ASML was boosted by positive earnings momentum as well as investor confidence in its long-term growth outlook. By-health, which produces and sells nutritional and dietary supplements, also performed well.

On the other hand, lithium miner Livent detracted as investors became concerned that potential overcapacity and short-term headwinds for electric vehicle sales could weigh on the lithium market. Within the consumer staples sector, the holdings in Indian consumer products companies Hindustan Unilever, Marico and Godrej weighed on returns; the defensive qualities that had helped them outperform for much of the year were out of favour in the fourth quarter's 'risk-on' environment. LONGi Green Energy Technology was also weaker owing to concerns about intensifying competition. The zero weighting in Chinese internet giant Tencent Holdings was an additional negative factor, as the large index-weighted stock rallied.

Emerging market equities look to be trading at an unusually high discount as compared with developed markets. The manager feels there are clear long-term opportunities in emerging markets, based on relatively high levels of income growth, rapid increases in product penetration and scope for industry consolidation. As such, this could provide a unique opportunity for investment in companies that are exposed to reliable secular growth trends.

Newton Investment Management Limited
January 2023

BNY MELLON U.S. EQUITY INCOME FUND

Over the twelve-months under review, the USD C (Inc.) share class of the Fund returned 3.48%, net of fees, against -18.51% for the S&P 500 NR Index, both in US dollar terms. The Fund generated a positive return and outperformed its comparative benchmark.

Equity markets ended a rollercoaster year in negative territory amid an increasingly challenging landscape for the capital markets. The Russia/Ukraine war exacerbated investors' worries that were already high owing to decades-high inflation and central bank monetary policy tightening. In this environment, the Fund outperformed the benchmark.

On a sector basis, energy and information technology (IT) contributed most to relative performance. Consumer staples was the only sector that detracted from relative results during the period.

Overweight positioning and effective stock selection in the energy sector buoyed performance over the period, as the sector benefitted from rising oil prices earlier in the year. The Fund's major contributors included two notable names in the oil, gas and consumable fuels subsector. The Fund's underweight to the IT sector contributed to relative returns, largely owing to a zero weight in software. Underweight positioning in the defensive consumer staples sector detracted from relative performance. Underweights in both beverages and food products and a zero weight in household products particularly lagged.

The Fund remained overweight financials, energy, utilities and healthcare and underweight IT, consumer discretionary, communication services and consumer staples. The manager increased the Fund's exposure to Industrials by initiating positions in Caterpillar, FedEx and Raytheon Technologies. The Fund's allocation to real estate was eliminated by selling positions in equity real estate investment trusts Medical Properties Trust and Weyerhaeuser Company. The manager reduced the Fund's overweight in utilities by exiting positions in AES, Clearway Energy and Vistra Corp. Financials continue to be the largest absolute weight.

The manager believes value-oriented companies with better relative earnings trends are well positioned to outperform the broader market in 2023. In the manager's view, companies with robust balance sheets and cash-flow generation, trading at attractive prices compared to their future cash-flow-generating power, can provide compelling investment opportunities. The manager also believes it is important to be effectively positioned for when this period of stifled economic growth eventually abates, and cyclical companies can take advantage of a potential upswing in the market. Such cyclical companies are well represented in the value space and have historically led in market upcycles following a downturn.

The manager expects segments of the market will continue to digest the pull forward of demand brought on by the pandemic. Furthermore, the manager anticipates 'old economy' investment strength, supported by several drivers including onshoring, automation, electrical infrastructure and efforts which alleviate supply constraints. This new market regime should place greater emphasis on profitable and sound business models as investors hunt for returns.

REGIONAL EQUITY cont'd

BNY MELLON U.S. EQUITY INCOME FUND cont'd

The manager believes the market in 2023 will be conducive to the Fund's long-standing US large-cap value and income philosophy of focusing on opportunities at the intersection of valuation, fundamentals and business momentum.

As always, the manager will continue to use pockets of near-term volatility to try to identify attractive relative opportunities. The Fund continues to be constructive on cyclical areas of the market that provide positive relative value and robust balance sheets through uncertain times. The manager is selectively finding cash-flow stability at attractive valuations and catalyst-driven business improvement.

Newton Investment Management North America LLC
January 2023**

SPECIALIST EQUITY

BNY MELLON BLOCKCHAIN INNOVATION FUND

Over the twelve-months under review, the Fund's USD W (Acc.) share class returned -46.68%, net of fees, in US dollar terms. Its benchmark, the MSCI AC World NR USD, returned -18.36%.

Equity markets ended a rollercoaster year in negative territory amid an increasingly challenging landscape for capital markets. The Russia-Ukraine war exacerbated investors' worries about decades-high inflation and ascendent interest rates. In this environment, the Fund underperformed the benchmark.

Challenging stock selection in banks detracted most from performance. An out-of-benchmark position in Silvergate Capital was particularly detrimental. Overweight positioning and unfavourable stock selection in capital markets and IT services also weighed on results.

Effective stock selection among semiconductors and semiconductor equipment contributed to returns over the period, largely owing to a position in Enphase Energy. Favourable stock selection in automobiles and a lack of exposure to technology hardware storage and peripherals also helped to stem losses.

The manager increased the Fund's exposure to the textiles, apparel and luxury goods subsector by adding to an existing position and increased the weighting in insurance by initiating a position in Zurich Insurance. Exposure to the banks sector was decreased by exiting positions in Metropolitan Bank, the afore-mentioned Silvergate Capital, and SVB Financial. Several positions in the software industry, including MicroStrategy, Unity Software, and Hut 8 Mining, were eliminated. Relative to the benchmark, the Fund was most overweight capital markets and most underweight technology hardware storage and peripherals. One of blockchain's compelling attributes is that it is a flexible construct that can be customised to meet a wide variety of uses across multiple end markets. Blockchain solutions have many permutations; they can be public or private, permissioned or permissionless, and governance can be centralised or decentralised. Proper construction is essential to align the incentives of network participants, reduce risk and improve operational efficiency. These considerations underscore the need for third-party providers, or enablers, to advise and implement robust blockchain solutions for both individual enterprises and industry consortiums.

In response to this emerging theme, the Fund increased its exposure to enablers of blockchain over the course of 2022. There are several names in the Fund that provide differentiated blockchain products, services and solutions for enterprise clients and financial institutions.

SPECIALIST EQUITY cont'd

BNY MELLON BLOCKCHAIN INNOVATION FUND cont'd

Recent disruption in cryptocurrency markets further highlights the need for robust advisory and technical expertise in blockchain ecosystems. Both regulated and non-regulated digital asset platforms have faced operational, compliance and governance issues, which the manager believes could have been mitigated by the thoughtful implementation of proper organisational structures. The manager continues to see the friction associated with adoption as an opportunity for the enablers of blockchain technology held in the Fund.

**Newton Investment Management North America LLC
January 2023**

BNY MELLON DYNAMIC U.S. EQUITY FUND

During the twelve-month period under review, the Fund's USD A (Inc.) share class returned -22.43%, net of fees, against -18.51% for the S&P 500 NR Index, both in US dollar terms. The Fund generated a negative return and underperformed its comparative benchmark.

Financial markets were weighed down by Russia's unexpected invasion of Ukraine, ongoing supply-chain effects from the pandemic, slowing global growth, surging inflation, and hawkish monetary policy from many central banks. Overall, the post-pandemic inflation shock led to a departure from the decades-long pattern of low interest rates and dovish monetary policy. The Fund's allocations to higher risk assets caused the Fund to underperform.

The Fund's allocation to equities began the year at approximately 115%. The equity risk premium over bonds (expected return on equities vs. bonds) was attractive, supported by forecasts of strong economic growth and S&P 500 Index earnings growth. While rising inflation and ongoing supply-chain bottlenecks were looming threats, the risk of recession was relatively muted. However, inflation surged, global growth decelerated and, in a quest to restore price stability, central banks began to tighten monetary policy. In May, the Fund reduced its target equity allocation from 110% to 100% amid heightened asset-class volatility and a stock/bond correlation near zero.

From mid-May until early September, the Fund maintained a 100% target weight to equities, which did not have a major impact on performance. While the macroeconomic backdrop remained on shaky footing, stocks rebounded from mid-June until mid-September. The Fund held a neutral equity stance given the manager's top-down macro forecasts that indicated inflation staying higher for longer, economic growth slowing, and earnings growth decelerating. Additionally, the sharp increase in long-term bond yields made equities less attractive on a relative basis. By mid-September, the Fund moved to a 90% target equity exposure which remained in place through the end of the year. The manager's estimate of the equity risk premium had

compressed meaningfully, primarily due to the manager's forecast of lower earnings over the next twelve-months. This led to lower equity expected returns.

At the start of the year, the Fund had a 10% target weight to bonds (implemented at 5%) and a 0% target weight to cash. The Fund invests in long-term US Treasury bonds; historically, such long-term bonds have been a very effective hedge during equity market corrections. From a positioning perspective, the Fund maintained a 10% target weight to bonds until the beginning of September, when the manager lowered the targets to 90% equity, 0% bond, and 10% cash. Throughout the first eight months of the year, the average bond allocation, at 6%, reflected a more cautious stance but proved detrimental to excess returns, as 30-year US Treasury yields rose. In mid-September, the estimate for long-term cash had risen higher than long-dated US Treasury yields. As a result, the strategy moved to a 0% bond target and a 10% cash target.

At the end of 2022, the Fund was underweight equities, has no bond exposure, and was targeting a positive cash allocation of 10%. The manager's current equity risk premium forecast is in line with the long-term average, but the manager expects flat earnings growth for the S&P 500 Index over the next twelve-months with an elevated probability of an earnings contraction. The Fund does not hold any bonds as the manager's forecast for US long-term bonds remains unattractive. Given the high level of short-term interest rates, cash is a more attractive alternative to long-dated bonds.

**Newton Investment Management North America LLC
January 2023**

BNY MELLON FUTURE EARTH FUND

Over the twelve-month period under review, the Fund's W (Acc.) share class returned -20.99%, net of fees, while its benchmark, the MSCI AC World NR Index, returned -18.36%, both in US dollar terms. The Fund produced a negative return and underperformed its comparative benchmark.

For the Future Earth Fund, 2022 was a transition year that saw a change of portfolio managers and an enhanced investment process adopted for managing the Fund. These changes shifted the Fund from a light touch thematic fund to an article 9 environmental fund. Accordingly, there was a higher than normal level of portfolio turnover in 2022. However, it was encouraging to see performance improve from March onwards as the changes started to be enacted.

Stock selection detracted from the Fund's returns. Genit struggled against a deterioration in the macroeconomic backdrop and trading conditions. Infineon Technologies was weak amid concerns about challenges in the semiconductor industry, and Nidec was hampered by a challenging period for the company's earnings. Smurfit Kappa exhibited

SPECIALIST EQUITY cont'd

BNY MELLON FUTURE EARTH FUND cont'd

weakness in the immediate aftermath of the Russia/Ukraine crisis given concerns about demand in Europe as well as the possibility that soaring commodity prices would apply downward pressure on margins.

On the positive side, Hubbell was the top-performing position in the Fund. The stock is a clear beneficiary of capital expenditure in the US utility sector, as well as electrification tailwinds. Deere & Co performed well; a favourable demand outlook appeared to encourage investors. Results were also driven by higher production rates and a reduction in the inventory of partially completed machines. NextEra Energy, a world-class developer of renewable energy and a strong operator of regulated assets in Florida, also performed well. The defensive attributes of the business appealed against an uncertain economic outlook, while a renewed focus on the energy transition and energy security also proved supportive.

Regarding portfolio activity, the manager purchased a stake in Voltronic Power Technology early in the year. The company should benefit from an acceleration in end-market growth due to prominent electrification trends. The manager added some exposure to SolarEdge Technologies, believing it to be one of the leading residential and commercial solar inverter and optimiser makers worldwide. Growth is being driven by supportive environmental regulation, incrementally lower equipment costs and defensible competitive positioning. A stake in Darling Ingredients was also established. As a high-quality global leader in waste circularity, the business has an important role to play in the agri-food industry. The company collects animal by-products and recycled oils (i.e., cooking oil, animal fats) and uses them to create a wide range of products, including biofuel. A further addition was in Ingersoll Rand, a leading provider of compression technology. In the manager's opinion, the company is well positioned to benefit from energy efficiency trends, with its products significantly reducing factory emissions and energy intensity for its customers. Additional purchases included LONGi Green Energy Technology, Sungrow Power Supply, RWE, Aker Carbon Capture, Epiroc and Contemporary Amperex Technology.

Positions in Vestas, Texas Instruments, Eversource Energy, Ebara, Microsoft, Unilever, Johnson Matthey, Kubota and Weyerhaeuser were sold during the year.

The manager's opinion is that 2023 is unlikely to see the same level of interest rate increases as 2022, and therefore, the direction of company earnings is likely to be of greater importance. The Fund's focus remains on finding investments that can benefit from, and contribute towards, global initiatives that combat climate change and alleviate the stresses on the natural world.

Newton Investment Management Limited
January 2023

BNY MELLON FUTURE FOOD FUND**

Over the twelve-month period under review, the Fund's USD W (Acc.) share class generated a return of -13.52%, net of fees, compared with a return of -18.36% from the MSCI AC World NR, in US dollar terms. The Fund produced a negative return but outperformed its benchmark.

The key driver of the Fund's outperformance was sector allocation, most notably the material overweight to consumer staples. However, stock selection detracted from returns. Trimble was the weakest-performing position in the Fund. The stock declined as guidance for the full year was lowered due to foreign exchange and supply chain headwinds, alongside some moderation of demand in certain end-markets. Shares in Genus, an animal-genetics business, fell as the near-term outlook for its porcine division was challenged by weak pig prices. Hampered by cost increases and supply constraints, Ecolab, a provider of water, hygiene and energy technologies and services, declined on quarterly results that were hampered by Covid-19 and supply chain headwinds.

On the positive side was Deere & Co, which performed well. The company reported robust quarterly results, driven by strong demand, higher production rates and a reduction in inventory. Given its sizeable exposure to a strengthening potash market, shares in Nutrien surged following Russia's invasion of Ukraine. Corteva earnings results were encouraging as well. AGCO also aided returns, with strong crop prices supportive of further spending on machinery by farmers.

Regarding portfolio activity, the manager purchased Sysco, the largest operator in a relatively fragmented US food service distribution sector. Despite being stunted by Covid-19-related lockdowns and temporary cost pressures, the company could emerge from the pandemic in a stronger position, in the manager's view. Another addition was Grocery Outlet; the manager sought to increase the portfolio's exposure to discount retail given the squeeze on consumer incomes in the face of higher inflation. A stake in Darling Ingredients was also established. As a high-quality global leader in waste circularity, the business has an important role to play in the agri-food industry. The company collects animal by-products and recycled oils (i.e., cooking oil, animal fats) and uses these inputs to create a wide range of products, including biofuel. Further purchases included Zebra Technologies, Twist Bioscience, and Archer Daniels Midland.

Commercial vehicle manufacturer Iveco was sold given a deterioration in the long-term investment case, a result of weakening demand trends. Delivery Hero was sold given the manager's growing concern about its long-term business model and profitability. Other sales included Tyson Foods, Ingredion, Givaudan and Beyond Meat.

SPECIALIST EQUITY cont'd

BNY MELLON FUTURE FOOD FUND cont'd

In the manager's opinion, 2023 is unlikely to see the same level of interest rate increases as 2022, and therefore, the direction of company earnings is likely to hold greater importance.

The Fund's focus remains on humanity's need to research, invest and innovate to discover new and improved ways to feed a growing population, particularly as concerns around global food supply have been exacerbated by war in Ukraine and climate-related shocks.

Newton Investment Management Limited January 2023

BNY MELLON FUTURE LIFE FUND

Over the twelve-month period under review, the Fund's W (Acc.) share class returned -10.61%, net of fees, while its benchmark, the MSCI AC World NR Index, returned -18.36%, both in US dollar terms. The Fund produced a negative return but outperformed its comparative benchmark.

Sector allocation, most notably an overweight to healthcare, was the key driver of the Fund's returns, while stock selection detracted. Investors generally shifted away from high-growth stocks during the year. Edwards Lifesciences was the weakest-performing stock in the Fund. It registered a series of underwhelming quarterly results, which were principally hampered by hospital staffing shortages. Teladoc Health fell as revised guidance for 2022 came up short of expectations owing to challenges in its direct-to-consumer behavioural health and chronic care businesses. Abbott Laboratories underperformed on concerns about the earnings power of the business following the Covid-19 pandemic. Home Depot was hindered by concerns about rising interest rates and their effect on consumers, as well as by a subdued outlook for the year ahead.

Conversely, Eli Lilly's shares were notably strong; investors continued to take encouragement from the potential opportunity for Tirzepatide, a drug to treat patients with type-2 diabetes. Similarly, shares in Novo Nordisk moved higher after the company highlighted the substantial growth potential it sees in the areas of diabetes and obesity. UnitedHealth Group rose upon announcing plans to acquire home health provider LHC Group, thereby enhancing its capability in home healthcare. AstraZeneca performed strongly as its earnings beat expectations. Positive data also emerged from a key trial for its breast cancer drug, Enhertu.

Regarding portfolio activity, Eli Lilly, a global biopharmaceutical company focused on developing medicines for metabolic diseases, oncology, immunology and other conditions, was bought. The growth outlook for the business looks promising given the strength of its pipeline opportunities. The manager added Edwards Lifesciences, a manufacturer of heart valve systems and repair products. The high-quality and innovative company has been a pioneer

in less invasive but high-growth solutions. Illumina, a leading provider of sequencing and array-based solutions for genetic and genomic analysis, was also added. The secular trend towards the use of genetic sequencing tools represents the main attraction for holding the stock. Further purchases included Alnylam Pharmaceuticals, a biopharmaceutical company focused on the development of RNA interference drugs; Boston Scientific, a developer, manufacturer and marketer of medical devices; and Regeneron Pharmaceuticals, an integrated biotechnology company that discovers, invents, develops, manufactures, and commercialises medicines for serious diseases.

The key sales in the year included Novartis, GSK, Teladoc Health, Straumann, Fresenius Medical Care, Sugi Holdings, Lonza Group, Thermo Fisher Scientific, and Ping An Insurance.

As higher interest rates increasingly impact the outlooks for both growth and inflation, investor focus may shift from the rate cycle towards the earnings cycle. Those companies with resilient earnings profiles are likely best placed in a weaker economic environment. The manager's focus remains on companies that offer innovative products, services and solutions that will serve the needs and tastes of an aging global population.

Newton Investment Management Limited January 2023

BNY MELLON GLOBAL INFRASTRUCTURE INCOME FUND

Over the twelve-months under review, the Fund's USD W (Acc.) share class returned -7.56%, net of fees, against -0.99% for the S&P Global Infrastructure NR, both in US dollar terms. The Fund generated a negative return, net of fees, and underperformed its comparative benchmark.

Equity markets ended a rollercoaster year in negative territory amid an increasingly challenging landscape for the capital markets. The Russia/Ukraine war exacerbated investors' worries that were already high owing to decades-high inflation and central bank monetary policy tightening. In this environment, the Fund underperformed the benchmark.

On a sector basis, utilities and real estate detracted most from relative performance. There were no relative contributors on a sector basis during the period.

The utility sector detracted most from returns, owing to challenged stock selection and overweight positioning. Out-of-index exposure to the real estate sector also detracted from performance. The Fund's positions in Exelon and Enel, both in the electric utilities space, were among the top individual stock detractors. Medical Properties Trust, an equity real estate investment trust (REIT), also weighed on results over the period under review.

SPECIALIST EQUITY cont'd

BNY MELLON GLOBAL INFRASTRUCTURE INCOME FUND cont'd

On an absolute basis, top individual stock contributors that helped temper losses included Antero Midstream and ONEOK, in the oil, gas and consumable fuels subsector, and Drax Group, in the independent power and renewable electricity producers space.

The Fund remained overweight real estate, communication services and utilities and underweight industrials. A position in US-based utility Dominion Energy was initiated toward the end of the year. A regulatory review caused weakness in the shares, which the manager used as an opportunity to start a position. The manager reduced the Fund's overweight to utilities by eliminating positions in Exelon, Naturgy Energy and Public Service Enterprise Group. The manager reduced the Fund's underweight to industrials by initiating a position in VINCI and adding to several existing positions.

From the manager's perspective, the outlook for global infrastructure remains positive; in their view inflation has effectively passed through these revenue models. With higher borrowing costs flowing through regulated businesses, the manager continues to believe that this area is unique in its ability to mechanically pass through these pressures. The energy transition remains in focus, and in the manager's view, the greatest opportunity for value creation in this area within Europe. Having gone through another quarter of earnings reports, the manager believes these inflation pass-through mechanisms will continue to play out in earnings.

Newton Investment Management North America LLC** January 2023

BNY MELLON MOBILITY INNOVATION FUND

Over the twelve-month period under review, the USD A (Acc.) share class of the Fund returned -35.14%, net of fees, against -18.77% for the MSCI AC World Mid Cap TR USD, both in US dollar terms. The Fund generated a negative return and underperformed its comparative benchmark.

Equity markets ended a rollercoaster year in negative territory amid an increasingly challenging landscape for the capital markets. The Russia/Ukraine war exacerbated investors' worries that were already high owing to decades-high inflation and central bank monetary policy tightening. In this environment, the Fund underperformed the benchmark.

A meaningful overweight and unfavourable stock selection in semiconductors and semiconductor equipment detracted most from performance. Positioning and stock selection in automobiles also weighed on returns, largely owing to off-index exposure to several names that lagged over the period. On an individual stock basis, MP Materials was a top detractor. Shares of the rare earth materials company underperformed, as rare earth prices softened throughout the year on global recession fears. Among semiconductors

and semiconductor equipment, Semtech also weighed on results, as semiconductor fundamentals entered a downturn. Favourable stock selection in chemicals helped to temper losses, owing primarily to the Fund's position in a global lithium supplier. A lack of exposure to life sciences tools and services also contributed positively. On an individual stock basis, Hubbell, a leading provider of electrical equipment and utility infrastructure was the top contributor. The manager believes the company should continue to benefit from the secular tailwind of electrification and grid investment to connect renewables and build resiliency. Visteon, a global automotive electronics supplier, was also a top contributor. In the manager's view, Visteon is a pure-play cockpit electronics supplier with both cyclical and secular potential growth.

The manager increased the Fund's exposure to electronic equipment instruments and components through a new position in Trimble. The Fund's exposure to machinery was increased through new positions in Epiroc, Fanuc, and Knorr-Bremse. The manager reduced the Fund's exposure to semiconductors and semiconductor equipment as well as interactive media and services by trimming existing positions.

Supply-chain issues, particularly for semiconductors, continue to improve and be less disruptive to auto production. The manager believes the positive trends in 2022, coming from the secular growth within the theme, should continue into 2023, especially in the electric vehicles and growing advanced driver-assistance systems (ADAS) content.

The Fund retains the conviction that the secular growth outlook over the mid to long-term in the mobility theme remains very attractive for its auto-related holdings. In the manager's opinion, areas including ADAS/autonomous, connectivity and electrification remain places for above average growth. ADAS content and functionality per vehicle continue to increase in key markets. The underlying secular shift to vehicle electrification, which remains a key focus for China and Europe, also continues to increase led by regulations and consumer interest. Other markets like the US should see continuing positive momentum in 2023. The manager expects the US Inflation Reduction Act to give a boost to the growth of electric vehicles in the US.

Newton Investment Management North America LLC** January 2023

BNY MELLON SMART CURES INNOVATION FUND

Over the twelve-months under review, the Fund's USD W (Acc.) share class returned -27.38%, net of fees, against a return of -18.36% for the MSCI All-Country World NR Index. The Fund generated a negative return and underperformed its benchmark.

Equity markets ended a rollercoaster year in negative territory amid an increasingly challenging landscape for capital markets. The Russia-Ukraine war exacerbated

SPECIALIST EQUITY cont'd

BNY MELLON SMART CURES INNOVATION FUND cont'd
investors' worries about decades-high inflation and rising interest rates.

In support of the Smart Cures thematic view, the portfolio is positioned 60% in clinical pioneer investments and 40% in 'supporting cast' investments.

The Fund's position in Intellia Therapeutics, an in vivo gene editing pioneer, detracted from results. The company's data presentations were robust throughout 2022. However, increasingly crowded markets weighed on the stock. Still, the manager retains conviction in the technology and its longer-term commercial prospects. A position in Kymera Therapeutics also weighed on results, owing in part to unfavourable performance from the small-cap biotechnology sector. An unforeseen potential safety signal in a pipeline programme for atopic dermatitis represented a challenge for the business, but further clinical work determined that the signal could be managed with different dosing approaches, and the company's partner decided to move the programme into Phase 2. The manager remains positive on Kymera's protein degrader platform and its multiple uses in many genetic diseases.

A position in biopharmaceutical company Eli Lilly helped to temper losses. The company benefited from positive prescription growth trends for its newly launched diabetes medicine, Mounjaro, as well as clarity on the company's plan to file its obesity indication for the same drug by mid-2023. BioMarin Pharmaceuticals was also a contributor. The company made substantial progress on its haemophilia A gene therapy, which could potentially provide long-term functional cures for patients versus chronic therapy. The company secured approval in the EU, and it is expected to be approved in the US by mid-year 2023. The manager believes this new therapy could help transform the company's fundamental prospects, along with a solid core portfolio and a pipeline of other genetic medicines.

2022 was a year of solid progress for the sector. In the manager's opinion, we are on the cusp of several new potential genetic medicine approvals in the areas of haemophilia A, Duchenne muscular dystrophy and sickle cell disease. The past year witnessed success in using mRNA science in personalised cancer vaccines, as well as continued success with in vivo gene editing. Cellular therapy advanced to earlier stages of cancer therapy, suggesting the clinical community is becoming more confident in a single-dose cancer treatment.

In the manager's view, 2023's clinical catalysts and commercial launches could improve sector fundamentals, as well as investor sentiment. It's very possible that genetic medicines, from gene therapy and gene editing to RNA-based therapies and cellular engineering, could be a disruptive force in healthcare over the next two decades.

January 2023**

GLOBAL FIXED INCOME

BNY MELLON EFFICIENT GLOBAL HIGH YIELD BETA FUND

Over the twelve-months to 31 December 2022, the Fund's USD A (Inc.) share class returned -11.84%, net of fees, compared with a return of -10.73% for the Bloomberg Global High Yield Corporate TR Index (USD Hedged). The Fund generated a negative return and underperformed its benchmark.

In 2022, global stocks and bonds declined simultaneously. Tight financial conditions, the dual threat of inflation and recession, and war between Russia and Ukraine drove markets lower, most notably during the first half. In bond markets, the five-year US Treasury yield rose from 1.26% to 4.00% during the year on the back of four consecutive 75-basis-point (bps) interest rate hikes by the US Federal Reserve (Fed). Energy and energy-related sectors fared well in the year, while communications, non-cyclicals and finance companies declined.

Pricing source differences (the Fund is priced at IDC bid while the benchmark is priced at Bloomberg bid) accounted for the majority of the Fund's underperformance in 2022, though its results were modestly negative net of pricing as well.

The model-driven component proved positive in 2022, as did value, quality and exposure to fallen angels (bonds that have recently lost their investment grade status). However, this was not enough to offset losses from security selection across a variety of sectors (such as technology, communications, and capital goods).

Heading into 2023, the macroeconomic environment remains uncertain. Inflation, though in retreat from peak levels, remains elevated. Leading indicators such as oil prices, housing, employment and purchasing managers' indices have slowed and should have a dampening effect on inflation. Given this backdrop, and after four consecutive 75bps rate hikes from the Fed, the manager believes the pace of interest rate rises is likely to slow in 2023.

Furthermore, high yield corporate balance sheets appear strong. The current credit environment varies from previous pre-recession environments in that high yield companies have reasonably low leverage and strong cash ratios and have pushed debt repayments out until 2025 and beyond, resulting in little need to immediately refinance at higher costs.

The manager believes yields and spreads are attractive and expects a mild default cycle given the strength of corporate balance sheets. With defaults remaining well below average and equity market turbulence, investors are increasingly turning to more liquid, income-generating assets, including high yield.

**Insight North America LLC
January 2023**

GLOBAL FIXED INCOME cont'd

BNY MELLON EFFICIENT GLOBAL IG CORPORATE BETA FUND

Over the twelve-month review period, the Fund's USD A (Acc.) share class returned -14.94%, net of fees, versus -14.11% for the Bloomberg Global Aggregate Corporate TR Index, both in US dollar terms. The Fund generated a negative return and underperformed its benchmark.

The negative returns for both the Fund and the index reflected rising interest rates and widening corporate spreads during the year. Investors increasingly worried that higher rates would drive a global economic recession. In the US, inflationary pressures proved persistent, pushing the Federal Reserve to begin aggressively tightening monetary policy in March. The Federal funds rate, set at a target range of 0.00% to 0.25% in early January, was raised several times throughout the year, ultimately closing 2022 at a range of 4.25% to 4.50%.

Overseas, the impact of the Russia-Ukraine war, combined with decades-high inflation, pressured the European Central Bank to begin raising rates for the first time in more than 10 years. In the UK, political woes added to the strife; in September, a new government's attempt to shore up the economy and curb 40-year-high inflation with tax cuts backfired, driving sterling down and necessitating central bank intervention. These economic plans were led by Liz Truss, who promptly resigned as prime minister and was replaced by Rishi Sunak. While Japan spent much of the year maintaining a dovish stance, the end of December saw policymakers loosening control of the yield curve, which should allow the country's long-term interest rates to continue rising.

The Fund is positioned to provide diversified exposure to global investment grade corporate bonds with similar credit, duration, and maturity characteristics as those found in the Bloomberg Global Aggregate Corporate Index, while seeking to mitigate and minimise downgrade risk and transaction costs associated with traditional sample and replication approaches.

Insight North America LLC January 2023

BNY MELLON GLOBAL BOND FUND

Over the twelve-month period under review, the Fund's USD A share class returned -16.39%, net of fees, compared with a return of -17.31% for the JP Morgan Global Government Bond Index (Unhedged) TR, in US dollar terms. The Fund produced a negative return but outperformed its comparative benchmark.

Outperformance was driven by underweight duration positions in the US, eurozone, UK and Japan, countries whose respective central banks were hawkish throughout the period. Furthermore, the Fund had very limited UK Gilt exposure ahead of the political turmoil the economy

underwent in September. The manager increased the Fund's exposure to Gilts as yields spiked higher. Australia and New Zealand were the portfolio's significant overweights and detracted from performance as their yields tracked US Treasuries higher.

The Fund's holdings were biased towards longer-dated securities versus the benchmark, which proved helpful to performance as high inflation and hawkish central banks caused global yield curves to flatten. Emerging market sovereign bonds, notably government bonds from Mexico, Indonesia and Malaysia, proved resilient, experiencing less volatility than developed market government bonds. These contributed to overall returns.

Currency exposures detracted. Losses were made on short positions, including in the Korean won and a cross position between the Swedish krona and Polish zloty. However, a long Japanese yen position was helpful, especially in December.

Regarding portfolio activity, the manager initially reduced exposure in European government bonds by selling two-year German and 10-year French futures, respectively. The Fund moved up the yield curve by selling 10-year and buying 30-year maturities in both the EU and Spain. The short futures position in UK Gilts was maintained. Exposure to inflation-linked bonds was increased throughout the period given high real yields and softening inflation expectations. In local currency emerging markets, the manager purchased government bonds in Indonesia and Mexico, and newly issued hard currency Saudi Arabian sovereign debt.

The size of the long position in the US dollar was initially raised, while some emerging market currencies, such as the Korean won and the Chilean peso, were shorted. Late in the period, a small euro long position was introduced for the first time in many quarters, and the long US dollar position was switched to a short one.

The Fund's current positioning focuses on adapting government bond duration to exploit changing expectations regarding inflation and central bank rates. The manager expects more capital volatility this year because inflation, although declining, is likely to remain high unless there is a severe recession. If inflation does not fall back to target, central banks may push the peak in rates beyond what is expected by the market.

As central banks are likely to be near the end of their tightening cycle, the manager will look for opportunities to add duration. However, it is worth noting that, in January, investors will have to contend with a heavy supply of government bonds, which is likely to weigh on performance.

Newton Investment Management Limited** January 2023

GLOBAL FIXED INCOME cont'd

BNY MELLON GLOBAL CREDIT FUND

Over the twelve-months under review, the Fund's USD W (Acc.) share class returned -12.68%, net of fees, compared with -14.22% for the Bloomberg Barclays Global Aggregate Credit Index TR USD-Hedged and -14.87% for the Lipper Bond Global Corporates sector average, all in US dollar terms. The Fund generated a negative return but outperformed both its benchmark and the sector average.

Russia's invasion of Ukraine shocked global markets, exacerbating inflation concerns and slowing global economic growth. A combination of rising government bond yields and widening credit spreads created a perfect storm for credit investors throughout 2022.

During the first three months of the year, yield curve positioning, country selection and the Fund's emerging markets positioning detracted from performance, while interest rate positioning contributed due to underweight duration exposure as yields rose. Security selection was supportive, notably from gains in insurance and retail property companies. The Fund's lack of exposure to Russia-related credits was also beneficial.

In the second quarter, duration positioning detracted, and country selection also ultimately weighed on performance. Sector exposure initially helped but was a drag as the period progressed, while security selection shifted from having a positive effect to a neutral effect before ending the period as a detractor.

In the third quarter, the Fund outperformed the benchmark owing to superior performance across credit, rates and currency. Sector strategy was positive, as European property reversed some losses from earlier in the year. The Fund's emerging markets and mortgage-backed securities exposure detracted due to persistently high interest rate volatility.

In the final quarter of 2022, riskier assets rallied as softening economic data and lower-than-expected inflation led market participants to price in a shift in monetary policy which provided a tailwind for credit markets. In this environment, the Fund's rates positioning was the key driver of relative outperformance. The Fund's credit strategy and currency exposure detracted from performance.

In terms of activity, towards the end of the year, the manager increased the Fund's duration underweight after the European Central Bank's raised interest rates, before adding back duration just before year-end. In credit, the Fund reduced risk to be slightly underweight the benchmark during December. The manager also sold euro-denominated credit that had outperformed US issuers and reduced volatility via the sale of credit default swaps.

Looking forward, the manager envisages an environment of slowing global growth in the year ahead and believes headline inflation will fall. The Fund is positioned for interest

rates to peak in 2023. However, the manager expects the subsequent reduction in rates will be slower than market participants are currently estimating.

As 2022 has shown, unexpected turns of events can create economic and market turmoil. The manager is paying close attention to geopolitics including Chinese tensions with Taiwan and the ongoing conflict between Russia and Ukraine.

Insight Investment Management (Global) Limited January 2023

BNY MELLON GLOBAL DYNAMIC BOND FUND

Over the twelve-month review period, the Fund's USD A share class returned -6.50%, compared with a return of 3.48% for the SOFR 30-day Compounded +2%, both in US dollar terms. The Fund produced a negative return and underperformed its benchmark.

The Fund's holdings in the high yield bond segment produced the weakest returns over the year. Currency hedging and derivative instruments had a positive effect.

In high yield, the holdings in the iShares Asian High Yield Bond Fund and the BNY Mellon Global High Yield Bond Fund were among the main detractors, although certain individual positions, such as Chinese real estate holding KWG, added value. Weak performance also came from the Fund's developed market government bonds as global sovereign markets sold off—the exposure to short-dated US Treasuries detracted most notably. Holdings of long-dated US Treasuries and Australian bonds, as well as 10-year Danish bonds, also weighed on performance. However, a large portion of these losses in government bonds were offset by the use of short positions in government bond futures, which added value.

Losses from investment grade credit were relatively contained, thanks to a low weighting and shorter duration stance. Losses on emerging market exposure were also milder compared with the wider market. Net currency exposure added value. The Fund's long position in the US dollar and Chilean peso, and short position in the euro, worked well.

Regarding portfolio activity, the manager reverted to a more defensive duration stance early in the year as it became clear that central banks, in particular the US Federal Reserve, were set to raise interest rates quickly. Short positions in UK Gilts, five-year US Treasuries and German Bunds were established. Brazilian and South African bonds were tactically purchased owing to the expectation that they would benefit from the surge in commodity prices. Later in the year, long-dated US Treasuries and European government bonds, as well as US Treasury Inflation-Protected Securities, were added. In local currency emerging markets, purchases were made in Peruvian, Mexican and

GLOBAL FIXED INCOME cont'd

BNY MELLON GLOBAL DYNAMIC BOND FUND cont'd

Saudi Arabian bonds, and the Fund's exposure to Brazil was increased. The weighting in high yield credit was reduced as the outlook for economic growth and liquidity deteriorated.

The overall duration of the Fund was increased later in the year. This was done predominately by selling the holdings of put options on US Treasuries and adding duration in investment grade credit and emerging markets. Duration was lowered again in the final weeks of the period.

Regarding currency exposure, the manager increased the size of the long position in the US dollar, shorting currencies such as the Korean won and the Czech koruna. However, later in the year, a long euro position and a short US dollar position were introduced.

The Fund's current positioning focuses on adjusting government bond duration to exploit changing expectations regarding inflation and central bank rates. Decent yields have proved supportive, as they can help compensate for some capital volatility; this is expected in 2023, as inflation, although declining, will probably remain high (unless there is a severe recession). If inflation does not fall back to target, it is possible central banks will push the peak in rates beyond what is expected by the market.

Newton Investment Management Limited
January 2023

BNY MELLON GLOBAL HIGH YIELD BOND FUND

Over the twelve-month period under review, the Fund's USD C share class returned -12.20%, net of fees, against -10.56% for the ICE Bank of America Merrill Lynch Developed Markets High Yield Constrained TR Index (USD Hedged), in US dollar terms.

Coming into 2022, the high yield market was in good shape, benefiting from strong 2021 performance and market technical factors. Driven by a hawkish US Federal Reserve (Fed) and ongoing inflation concerns, high yield bonds had one of the most challenging years for performance since 2008, though the asset class fared relatively better than most fixed income assets. High yield spreads significantly widened from the beginning of the year. Performance was negative across the quality spectrum for the year, with the lower-rated segment being the largest detractor. Highly supportive fiscal and monetary policies, in the wake of the Covid reopening, have contributed towards strong corporate earnings in recent quarters, improving balance sheets and liquidity. Defaults for 2022 were approximately 1.5%. In large, corporate balance sheets remain in solid shape heading into slowing economic conditions, providing the majority of high yield corporates sufficient liquidity to meet operating and capital needs. Nonetheless, the manager expects defaults will pick up in 2023, closer to its longer-term average.

The Fund generated a negative return and underperformed its comparative benchmark. This was driven in part by weaker credit selection in the healthcare and finance sectors, across US and Europe, partially offset by robust sector selection within the pharmaceuticals and retail sectors. The Fund's small allocation to floating rate assets was also a driver of performance.

To start 2023, the Fund remains biased towards higher quality given the potential for elevated economic volatility. The manager thinks high yield spreads could see some modest decompression in the near term amid softer economic data and an ongoing restrictive monetary policy by the Fed. However, the manager also believes that spreads could compress in the back half of the year given Fed commentary and outlook.

In that context, the manager believes certain cyclical sectors will experience a more challenging operating environment, including chemicals, metals & mining and building materials. That said, the manager believes energy markets will continue to hold up well given supply constraints and the potential reopening of the Chinese economy following its revised domestic covid policy. In the manager's view, those sections sensitive to discretionary and advertising spending, such as retail, consumer products and broadcasting, could also see softer earnings. At the same time, the Fund remains comfortable taking capital risks across sectors that are reliant on more defensive end markets, including packaging for food & beverage, insurance and healthcare. The Fund remains cautious on sectors that will require consistent access to expensive capital markets to fund heavy capital expenditure spending, such as cable and wireline.

In terms of positioning, the manager has reduced the Fund's exposure to lower quality issuers, reduced cyclical exposure and is finding attractive opportunities across higher quality issuers. BB rated issuers account for the Fund's largest credit quality exposure while higher-rated single Bs remain well represented and CCC rated exposure is underweight. The Fund's duration is slightly longer than the overall benchmark, largely reflective of the BB rated exposure, which tends to be longer. Overall, the manager believes credit selection will be a critical driver of performance in 2023.

Alcentra NY, LLC
January 2023

BNY MELLON GLOBAL SHORT-DATED HIGH YIELD BOND FUND

Over the twelve-month period under review, the Fund's USD A (Acc.) share class returned -4.41%, net of fees, compared with a return of 1.17% for the SOFR (90-Day Compounded), in US dollar terms. The Fund generated a negative return and underperformed its comparative benchmark.

During the first half of the year, the Fund underperformed as

GLOBAL FIXED INCOME cont'd

BNY MELLON GLOBAL SHORT-DATED HIGH YIELD BOND FUND cont'd

government bonds sold off and credit spreads widened. Global high yield bonds experienced a particularly difficult period. Higher-quality bonds continued to outperform on a relative basis, with lower-quality bonds negatively affected by growth concerns and rising interest rates.

Moving into the third quarter, the Fund outperformed the wider global high yield market due to its shorter overall duration (roughly 1.7 years versus the market's 3.9 years) and solid stock selection. The relative outperformance persisted into the fourth quarter, helped again by its relatively shorter overall duration (roughly 2.12 years versus the market's 3.72 years) and final maturity (3.04 years versus the market's 5.12 years), as well as continued positive stock selection.

As for portfolio activity, earlier in the year, the manager focused on raising cash amid an uncertain market backdrop. The Fund maintained a significant balance given prevailing market uncertainty, which was exacerbated by deteriorating market liquidity. In the third quarter, the manager used part of the free cash to add attractive new opportunities, particularly green bonds. The Fund also sold six-month credit default swaps (CDS) from Casino and Jaguar, and reduced exposure to House of HR and TDC.

In the final quarter, the Fund took advantage of market weakness to add attractive new opportunities, while pruning oversized positions arising from significant outflows by liability-driven investors needing to satisfy collateral calls. However, in December, there were net inflows into the Fund, and the manager used half of the free cash amount to reinvest in names that offered particularly good value.

The Fund significantly reduced its credit default swap and loan exposure, ending the year at 0% and 1.9%, respectively. Meanwhile, the Fund maintained a preference for euro-denominated high yield bonds, with less exposure to sterling, the US dollar and emerging market high yield issuers. By the end of the period under review, the number of names in the Fund had decreased to 77 and the Fund's average credit rating rose to B+ from B and the average duration increased to 2.12 years from 1.74 years.

Looking forward, the manager expects US monetary policy tightening to end in 2023, leading to a rally for high yield and investment grade bonds. In particular, the manager believes European and US short-dated high yield bonds should deliver healthy returns during 2023 and non-cyclical sectors such as telecommunications and healthcare will outperform. At the same time, high rates, restricted refinancing needs and other available cash could result in subdued issuance, further supporting high yield market performance. However, amid a poor global economic outlook, the energy crisis in Europe and possible inflation surprises, the manager does not discount more volatility in the first half of 2023.

Insight Investment Management (Global) Limited
January 2023

BNY MELLON SUSTAINABLE GLOBAL DYNAMIC BOND FUND

Over the twelve-month period under review, the Euro W (Acc.) share class of the Fund returned -7.29%, net of fees, compared with a return of 2.08% for the 1-month EURIBOR +2%, in euro terms. The Fund produced a negative return and underperformed its comparative benchmark.

The Fund's weak relative returns were largely a result of high yield credit holdings and currency hedging. Returns from the Fund's holdings in government bonds, emerging market sovereign bonds and investment grade credit were also negative, though to a lesser degree, while derivative instruments added value.

In the high yield segment, the Fund's real estate stocks, such as Heimstaden Bostad and Samhallsbyggnadsbolaget, performed poorly, although there was some recovery in high yield performance in the final quarter of the year. Long-dated positions in developed market government bonds, notably from the US and Australia, and 10-year Denmark government bonds detracted from returns. In emerging market sovereign bonds, exposure to local currency Colombian government bonds proved negative. Investment grade credit also suffered from its high correlation with government bonds. In terms of currency exposure, the Fund's long position in the Chilean peso worked well. A long Norwegian krone position, and short positions in the South African rand, Czech koruna, Polish zloty and Korean won, also contributed to returns.

Regarding portfolio activity, high yield credit exposure was reduced. Sales in the first half of the year included European companies vulnerable to higher energy costs; various Additional Tier 1 bonds, such as UniCredit and Lloyds; and consumer cyclical businesses, such as Asda and Philips Domestic Appliances. Later in the year, sales included food retailers Iceland, Ocado and the bonds of IHS Netherlands as exposure to high yield was reduced further. Exposure to emerging market sovereign bonds was increased.

In the second half of the year under review, the manager gradually increased exposure to developed market government bonds. Long-dated US Treasuries and European government bonds, as well as US Treasury Inflation-Protected Securities, were added. The manager increased exposure in investment grade credit, participating in new deals that were offering attractive new issue premiums in businesses such as Dollar General, Hiscox and Orsted. Additional positions were taken in Saint-Gobain and AT&T. In local currency emerging markets, Peruvian and Mexican bonds were purchased. A switch was made from holding call options on US Treasuries to buying put options. The overall duration of the Fund was increased in the final quarter, although it was reduced again in the final weeks of the year.

GLOBAL FIXED INCOME cont'd

BNY MELLON SUSTAINABLE GLOBAL DYNAMIC BOND FUND cont'd

The Fund's current positioning focuses on adjusting government bond duration to exploit changing expectations for inflation and interest rates. The Fund's holdings often provide decent yields, which can help compensate for some capital volatility. The manager expects to experience such capital volatility in 2023 because inflation, although declining, will likely remain high, unless there is a severe recession. If inflation does not fall back to target, it is possible central banks will push the peak in rates beyond what is expected by the market.

REGIONAL & SPECIALIST FIXED INCOME

BNY MELLON EFFICIENT U.S. FALLEN ANGELS BETA FUND

During the twelve-month period under review, the Fund's USD W (Acc.) share class returned -14.10%, net of fees, against a return of -13.40% for the Bloomberg US High Yield Fallen Angel 3% Cap TR and -12.57% for the Lipper Bond Global High Yield USD Average, all in US dollar terms. Accordingly, the Fund generated a negative return, underperforming both its benchmark and the sector average.

The year was marked by ongoing concerns over record-high inflation, rising interest rates, the increasing threat of a recession, and geopolitical turmoil—in particular, Chinese supply chain issues and the Russia-Ukraine war. These negative factors weighed heavily on market sentiment, particularly during the first half of the year.

At a sector level, communications and cyclical stocks led declines. The Fund's interest rate positioning was similar to that of the benchmark. This positioning proved detrimental to both as global interest rates rose rapidly in response to the threat of inflation. In the US, five-year Treasury yields rose from 1.26% to 4.00% during the year on the back of four consecutive 75-basis-point interest rate increases by the Federal Reserve.

Energy and energy-related sectors delivered positive returns for the Fund as commodity prices soared, driven by constrained Russian oil and gas supplies. The insurance and capital goods sectors were also key positive performers. In terms of credit ratings, BB rated bonds strongly outperformed both B and CCC issues.

There were no significant changes made to the Fund during the period, with the reinvestment of coupon cash constituting the main activity.

Looking ahead, markets continue to face an uncertain environment. Inflation, though still high, has begun to moderate, and as such, the manager expects the pace of interest rate increases to slow in 2023. Further weakness in the high yield bond market should be limited after such a challenging year. Companies within the sector have reasonably low levels of debt and strong cash balances with which to service debt interest payments. Furthermore, much of the debt in issuance will not need to be refinanced in the near-term. In the manager's opinion, high yield bonds look attractive relative to illiquid private markets and volatile public equities due to their high liquidity and steady, contractual income stream.

January 2023**

BNY MELLON EMERGING MARKETS CORPORATE DEBT FUND

Over the twelve-month period under review, the Fund's USD A share class returned -15.87%, compared with a return of -12.26% for the JP Morgan Corporate EMBI Broad Diversified USD Index TR and -15.17% for the Lipper Bond Emerging Markets Global Corporates sector average, all in US dollar terms.

The Fund generated a negative return and underperformed both its benchmark and the sector average.

The year under review was challenging for market participants with the return of war to Europe, multi-decade inflation highs across much of the world, repeated and sustained central bank interest rate hikes, heightening recession concerns, and the US dollar at its strongest level in 20 years.

The Fund's high yield bond exposure was a significant drag on performance. At a regional level, high yield bonds in Latin America (most notably Brazil and Mexico) and Asia (China and Macao) were particularly weak. At a sector level, financials were a significant drag on returns. As inflation and interest rate expectations rose, bonds with a duration of 3-10 years typically underperformed those with a shorter duration of 0-3 years.

The Fund's currency exposure and government bond holdings supported returns during the performance period. Relative to the benchmark, the Fund's investment grade bonds outperformed, particularly its regional exposure in Asia, and Central and Eastern Europe. At a country level, the Fund's high yield and investment grade exposure to Russia also supported relative performance. The manager's portfolio hedging strategy was positive.

By credit rating, both high yield and investment grade bonds were similarly weak over the year under review. Within high yield, the negative contribution was largely due to BB and B-rated bonds. In investment grade bonds, the negative performance was primarily due to the positioning within BBB-rated instruments.

As for portfolio changes, the manager has closed the Fund's longstanding underweight in Asia, as the region should benefit from the China reopening. The Fund has also increased its overweight in Latin America, as the manager believes the region has attractive relative valuations. Africa and Central Eastern Europe remain small overweights, while the Middle East remains an underweight due to expensive valuations.

Looking forward, some of the biggest headwinds for emerging markets in 2022, such as China's strict zero Covid-19 policy and a strong US dollar, have turned into tailwinds

REGIONAL & SPECIALIST FIXED INCOME cont'd

BNY MELLON EMERGING MARKETS CORPORATE DEBT FUND cont'd

for emerging markets in early 2023. Moreover, inflation has turned definitively down in the US, which will bolster hopes that the Federal Reserve will reduce the pace of its interest rate rises.

For emerging market corporates, the strongest positive impact has been felt from the sooner-than-expected reopening of the Chinese economy and the more meaningful and concrete support measures for the Chinese property and technology sectors. While market sentiment has improved, the manager believes there is still a clear disconnect between valuations and the stronger economic picture. As a result, the manager's view is positive on the outlook for emerging market corporate bonds.

**Insight Investment Management (Global) Limited
January 2023**

BNY MELLON EMERGING MARKETS DEBT FUND

Over the twelve-month review period, the USD A share class of the Fund returned -17.54%, net of fees, versus -16.45% for the JPMorgan EMBI Global Index. The Fund generated a negative return and underperformed its comparative benchmark.

By country, the main detractors from the Fund's performance were overweight positions in Mexico and Ghana and an underweight in Turkey. An overweight position in Russia, and underweight positions in Belarus and Sri Lanka, proved more helpful. Other positives included duration and spread positioning.

At the beginning of the year, the manager reduced exposure to Russia and Ukraine while adding modestly to exposure in select countries, including Argentina and Panama. European risk was subsequently added via new issues in Bulgaria and Romania that appeared to be of good value. The manager sold the Fund's exposure to quasi-sovereigns in China (Sinopec and State Grid Corporation of China) and Chile (Codelco) following strong outperformance. Another Chinese corporate, Alibaba, was added. At the beginning of the fourth quarter, the Fund meaningfully added active risk, the majority of which came from investment grade spreads.

Late in the year, activity focused on risk reduction given the spread compression seen within the asset class. The Fund's sovereign investment grade risk was reduced. During strong rallies, the manager decided to take profit on positions that had been added to the portfolio during the past few months. Specifically, profits were taken on euro-denominated Estonia, euro-denominated Lithuania, Poland, Philippines, Mexico, Ivory Coast, euro-denominated Bulgaria, and Dominican Republic positions. The cash generated by these sales was used to increase the Fund's exposure to

corporates in the investment grade space, where it appeared good value could be found. Additionally, the manager sold Gazprom given the recovery in Russian asset prices from very distressed levels earlier in the year and ongoing risks regarding the war in Ukraine. Finally, a position in Egypt was sold to target an active underweight position given a significant rally in spreads and ongoing challenges illustrated by the widening spread between Egypt's official exchange rate and the parallel rate (which suggests pressures on its external accounts and portfolio outflows).

The Fund remains overweight emerging market debt primarily via high yield holdings given that exposure to investment grade was reduced in December. Long positions in select countries in Africa and Latin America have been funded with underweights in Asia and select areas in Central & Eastern Europe where valuation metrics look materially tighter. From a sector perspective, the Fund retains an overweight to quasi-sovereigns and corporates and is underweight sovereign duration. The manager seeks to target a flat duration position overall given potentially more reasonable estimates for the eventual peak in US interest rates and more balanced central bank rhetoric globally, especially as inflation looks likely to have peaked.

**Insight Investment Management (Global) Limited
January 2023**

BNY MELLON EMERGING MARKETS DEBT LOCAL CURRENCY FUND

Over the twelve-month period under review, the USD A share class of the Fund returned -9.56%, net of fees, against -11.69% for the JP Morgan GBI-EM Global Diversified TR Index, both in US dollar terms. The Fund produced a negative return but outperformed its benchmark.

The Fund's outperformance was due to both local rates and currency exposure. Currency positioning benefited from underweight exposure to the Egyptian pound and Indonesian rupiah, and overweight exposure to the Russian rouble and Korean won. This was partially offset by overweights in the Colombian peso and the Chilean peso. Local rates primarily benefited from an underweight position in Poland and an overweight position in Russia, partially offset by an overweight to Colombia and an underweight to Turkey.

Subsequent to the end of 2021, the Fund modestly reduced active risk. In currencies, the manager reduced long exposure to the Colombian peso and increased underweight exposure to the Peruvian sol and the Romanian leu. The Fund also added a relative value position that was long the South African rand relative to the Mexican peso due to both valuation and cyclical factors. Beginning in the third quarter, the Fund began increasing active rates with more substantial local rates positions in South Africa and Mexico. The Fund also unwound relative value trades that reduced a long

REGIONAL & SPECIALIST FIXED INCOME cont'd

BNY MELLON EMERGING MARKETS DEBT LOCAL CURRENCY FUND cont'd

Indian rupee position to flat, reduced the size of a Chinese renminbi short position by half, and added an overweight position in the Chilean peso. The manager also added Korean rates exposure. In Malaysia, duration was added at the long end of the curve following the country's general election.

By the end of the review period, the Fund held overweight positions in a number of countries. These included Brazil, due to high real yields and falling inflation; Mexico, on high ex-ante real yields and attractive spreads versus US Treasuries; Colombia, due to the possibility of moderating policy risks in the new year; in Hungary, given the potential catalyst of EU funds, which could provide financing support; and in South Africa, due to moderating inflation, positive real yields and a steep yield curve. The manager was biased towards adding local rates and currency risk in areas where better valuations presented themselves on the view that inflation is easing in select emerging market countries, Brazil among them. Additionally, the manager found certain emerging market countries, such as Brazil and Mexico, attractive. South Africa and Colombia held appeal as well. Going forward, the manager will seek to add rates further by covering select underweight positions (Malaysia being an example).

**Insight Investment Management (Global) Limited
January 2023**

BNY MELLON EMERGING MARKETS DEBT OPPORTUNISTIC FUND

Over the twelve-month period under review, the USD C share class of the Fund returned -13.48%, net of fees, versus -13.15% for the comparative benchmark, a composite comprising 50% JP Morgan Government Bond Index – Emerging Markets Global Diversified TR Index, 25% JP Morgan Emerging Markets Bond Index Global TR Index, 25% JP Morgan Corporate Emerging Markets Bond Index Diversified TR Index, both in US dollar terms. The Fund produced a negative return and underperformed its benchmark.

The negative return was driven by overweight exposure to Ukraine, underweight exposure to Turkey, and overweight positioning in Mexico. The Fund's hard currency positioning, as well as hard currency duration exposure, contributed positively. The primary currency contributors were an overweight position in the Russian rouble and underweights in the Turkish lira, Indonesian rupiah, New Taiwan dollar, and Romanian leu, though this was partially offset by losses from overweight positions in the Hungarian forint and the Chilean peso. The biggest positive contributors on a country basis were an overweight in Russia, an underweight in Pakistan and cash holdings.

The Fund modestly reduced active risk in the local rates space. In emerging market currencies, the manager reduced long exposure to the Colombian peso and increased underweight exposure to the Peruvian sol and Romanian leu. The Fund also added a relative value position that was long the South African rand relative to the Mexican peso due to both valuation and cyclical factors. In the third quarter, the Fund increased local rates positions in South Africa and Mexico. The Fund also unwound relative value trades that reduced a long position in the Indian rupee to flat, minimised the size of a Chinese renminbi short position by half, and added an overweight in the Chilean peso. The Fund also added Korean rates exposure. In Malaysia, duration was added at the long end of the curve. At year-end the fund held structural overweight positions in Brazil, Mexico, Colombia, Hungary and South Africa.

On the hard currency side, the manager reduced exposure to Russia and Ukraine at the beginning of the year, while adding modestly to countries including Argentina and Panama. New issues in Bulgaria and Romania were added. The manager sold the Fund's exposure to quasi-sovereigns in China (Sinopec and State Grid Corporation of China) and Chile (Codelco) following strong outperformance. Alibaba was added.

Late in the year, the Fund's sovereign investment grade risk was reduced. Profits were taken on euro-denominated Estonia, euro-denominated Lithuania, Poland, Philippines, Mexico, Ivory Coast, euro-denominated Bulgaria, and Dominican Republic positions. The cash generated by these sales was used to increase the Fund's exposure to corporates in the investment grade space, where it appeared good value could be found. Additionally, the manager sold Gazprom given the recovery in Russian asset prices from very distressed levels earlier in the year and ongoing risks regarding the war in Ukraine. Finally, a position in Egypt was sold.

The Fund remains overweight emerging market debt primarily through high yield. From a sector perspective, the Fund retains an overweight to quasi-sovereigns and corporates and is underweight sovereign duration overall.

**Insight Investment Management (Global) Limited
January 2023**

REGIONAL & SPECIALIST FIXED INCOME cont'd

BNY MELLON EMERGING MARKETS DEBT TOTAL RETURN FUND

Over the twelve-month period under review, the Fund's USD W (Acc.) share class returned -16.03%, compared with -13.93% for the comparative benchmark comprising 1/3 JP Morgan Government Bond Index – Emerging Markets Global Diversified TR Index, 1/3 JP Morgan Emerging Markets Bond Index Global Diversified TR Index, 1/3 JP Morgan Corporate Emerging Markets Bond Index Broad Diversified TR Index and -12.05% for the Lipper Global-Bond Emerging Markets Global LC sector average.

The Fund generated a negative return and underperformed both its benchmark and the sector average.

It was a challenging year for fixed income investors in the emerging markets. The war in Ukraine, soaring inflation, rising interest rates, a strong US dollar, slowing economic growth, and China's restrictive Covid-19 policies weighed on returns. Market volatility was elevated as investors struggled to adjust to materially different economic and geopolitical conditions.

At a country level, the main detractors from performance were the Fund's positions in Ukraine and China. Ukrainian assets were particularly volatile following Russia's invasion, and the Chinese economy suffered due to restrictive measures to prevent the spread of Covid-19. The Fund's corporate debt holdings also hindered returns.

After a difficult start, the Fund's local rates position began to perform better in the second half of the year. Overweight exposure to Russia proved profitable during this period. The Fund's currency exposure also benefited due to its overweight rouble exposure, which strengthened as the year progressed.

The Fund's manager began the year with a relatively positive view on high yield sovereign credit and emerging market local rates; the view towards developed market rates was more cautious. Towards the end of the year, the manager reduced names in the investment grade corporate bond space but remained overweight the asset class through high yield bond exposure. The Fund held a structurally overweight position in Brazil due to high real yields and falling inflation. The manager had a preference for 'quasi-sovereign' or corporate bonds in the likes of Morocco and Mexico. In currencies, the Fund retained key overweight positions in the Thai baht, South Korean won and South African rand.

Heading into 2023, the manager is more constructive on the outlook for emerging market debt. With global inflation starting to display signs of moderating, central banks could begin to slow the pace of interest rate rises, or even pause their tightening initiatives. This would likely create a more supportive environment for fixed income assets. Moreover,

China's economic reopening, following the exit from its 'zero-Covid' strategy, could boost global growth.

In addition to these macroeconomic tailwinds, the manager believes that valuations in sovereign high yield bonds are attractive relative to their investment grade counterparts. Therefore, strong returns for the asset class could lie ahead in 2023.

Insight Investment Management (Global) Limited January 2023

BNY MELLON EUROLAND BOND FUND

During the twelve-months under review, the Fund's Euro A share class returned -16.95%, compared with a return of -17.17% for the Bloomberg Barclays Euro Aggregate Bond Index. The Fund produced a negative return, net of fees, but outperformed its benchmark.

2022 was a challenging year for investors, as both equities and bonds struggled in an environment of rising interest rates and soaring inflation. Market volatility was heightened throughout the period.

Government and corporate bonds sold off in the first half of the year as bond yields rose due to higher interest rates. Investors sold higher-risk assets, which caused high yield bond markets to underperform on a relative basis. Market conditions remained volatile in the second half of the year as concerns about inflation increased. Bond markets staged a partial recover in October and November, but this was short-lived; yields rose sharply again in December.

Security selection was the main positive contributor to performance. Financials such as Allianz, Credit Suisse and Raiffeisen Bank were notable performers during the third quarter. Duration (a measure of interest rate sensitivity) was also a key driver of positive performance during the year. Much of this performance was concentrated in the third quarter, when the Fund was short five-year German Bunds, which proved profitable.

The Fund's overweight position in credit risk detracted from performance for the majority of the year as credit spreads widened. However, some of these losses were reversed during the final quarter, when credit conditions improved. Ultimately, the Fund's credit strategy was the main contributor to its relative outperformance.

In the first half of the year, the manager increased the Fund's short duration positioning and allocation to high yield corporate bonds. Emerging market exposure was also modestly increased. In the third quarter, the Fund maintained its short duration position, as well as its

REGIONAL & SPECIALIST FIXED INCOME cont'd

BNY MELLON EUROLAND BOND FUND cont'd

overweight exposure to credit risk. This included adding a new issue from Raiffeisen Bank. In the final quarter, the Fund closed out long positions in Belgian and German government bonds and opted to reduce some credit risk following a strong rally in European investment grade bonds. The Fund also maintained overweight exposure to banks and utilities, and underweight exposure to both the food & beverage subsector and consumer cyclicals.

Looking forward, the manager is tactically positive on credit markets due to attractive valuations. This is despite expectations that global growth will continue to slow in the year ahead. The manager has positioned the Fund in expectation that interest rates will peak in 2023, though acknowledges that subsequent rate cut may be slower than market participants seem to be pricing in. Following the events of 2022, the manager remains cautious about economic and market risks, including the ongoing war in Ukraine.

Insight Investment Management (Global) Limited January 2023

BNY MELLON EUROPEAN CREDIT FUND

During the twelve-months under review, the Fund's Euro A share class returned -14.56%, compared with a return of -14.17% for the Markit iBoxx Euro Corporates Index TR and -13.59% for the Lipper Global Bond EUR Corporates sector average, all in euro terms.

The Fund generated a negative return, lagging both its benchmark and the sector average.

The key driver of markets during 2022 was tightening monetary policy by central banks in response to rising inflation. Uncertainty increased as periodic bouts of market volatility undermined investor confidence.

Bond yields rose sharply during the first half of the period, with both government and corporate bonds responding negatively to concerns about inflation. High yield bond markets were particularly weak, as investors rotated out of relatively risky assets. Volatility persisted into the second half of the year as monetary policy continued to tighten. Bond markets staged a rally in October and November, though this reversed in December due to further interest rate hikes from developed market central banks.

Security selection was the main positive contributor during the period. In the first half of the year, energy names Gazprom and EDF, alongside Balder Group and Aroundtown, were notable drivers of performance. Security selection was also supportive in the third quarter, with Raiffeisen Bank providing a material positive impact in September.

The manager adopted a long credit risk position at the start of the period on the expectation that above-trend growth and solid credit fundamentals would result in a narrowing of credit spreads. This positioning benefited the Fund during July and throughout the fourth quarter. However, being overweight credit risk was ultimately a drag on overall annual performance, as credit spreads widened, particularly in the first half of the year. The Fund's currency positioning also detracted, particularly in July.

Regarding investment activity, the Fund was active, but selective, in the new issue and secondary markets across a range of sectors over the period. In the first half of the year, the Fund added several holdings, including Allianz, Bank of America, and Banco Sabadell. The manager also trimmed Medtronic, FedEx and Barclays. In the second half of the year, the manager slightly reduced the Fund's duration positioning but remained overweight credit risk and increased exposure to financials via the primary and secondary markets. At the close of the year, the Fund was overweight senior banks and utilities, and underweight autos and consumer cyclicals.

The Fund is positioned for a general environment of slowing global growth in the year ahead, but the manager is tactically positive on credit markets due to what appear to be attractive valuations. While headline inflation should fall, there is uncertainty over how far it will drop. The manager envisages a peak in interest rates in 2023, but believes any subsequent reduction in rates will be slower than what the market looks to be pricing in. As 2022 has shown, unexpected turns of events can create economic and market turmoil. As such, the manager will continue to monitor the situation in Ukraine, as well as tensions between China and Taiwan.

Insight Investment Management (Global) Limited January 2023

BNY MELLON U.S. MUNICIPAL INFRASTRUCTURE DEBT FUND

Over the twelve-month period under review, the Fund's USD C share class returned -15.99%, net of fees, compared with a return of -13.41% for its custom benchmark comprising a blended 50:50 US Taxable and US Tax Exempt Municipal bond universe. The Fund generated a negative return and underperformed its benchmark.

The year 2022 was a challenging period for investors, as global interest rates rose in response to soaring inflation. Fixed income assets, including US municipal bonds issued by state and local governments, were weak, with market participants forced to grapple with heightened market volatility and widening credit spreads. The new issuance of municipal bonds was low throughout the period.

REGIONAL & SPECIALIST FIXED INCOME cont'd

BNY MELLON U.S. MUNICIPAL INFRASTRUCTURE DEBT FUND cont'd

During the year, the Fund's duration and interest rate positioning detracted from performance as central banks increased interest rates to tackle inflation. The Fund's overweight to taxable municipal bonds helped maintain income generation but detracted from total relative returns due to the longer duration of these bonds. In addition, the Fund's duration positioning in municipals, particularly in intermediate maturities (3-10 years), weighed on relative performance.

Security selection was the main driver of positive relative performance for most of the year. The Fund's yield curve positioning in intermediate maturity tax-exempt municipals weighed on performance during the third quarter; however, it was beneficial in the final quarter of the year. Sector allocation acted as a performance tailwind in the first, second and fourth quarters, but was a headwind during the third quarter.

In terms of positioning, by the end of the year, the Fund's tax-exempt security exposure was around 27.1%. The rest of the Fund was invested in taxable municipal, 'not for profit' corporate debt and cash. Risk was chiefly concentrated in rates and curve positioning, and overweight exposure to taxable instruments.

The Fund continued to favour revenue bonds and by year-end held close to 80.5% compared with the benchmark's 68.6%. The Fund's subsector overweights included hospitals, transportation and airports. The manager believes that these sectors will continue to benefit from strong domestic activity in the US, as well-positioned issuers had strong liquidity pre-pandemic.

By the end of the year, the top-five state exposures represented around 50% of the Fund, comprising bond issuers within California, New York, Florida, Texas and Illinois. The Fund had a slightly long duration position versus the benchmark. Meanwhile, the Fund's average portfolio credit quality was A+ compared to the benchmark's weighted average credit rating of AA-. The Fund's foreign currency hedging costs have moved higher, as the US Federal Reserve's tightening caused the interest rate differential between the US dollar and other currencies to widen.

Looking forward, the manager believes that taxable municipal bonds are likely to remain attractive for international investors in the year ahead, as spreads compress over time. The excellent credit quality of the asset class means that municipal bonds are well placed to withstand the pressures of a slowing economy.

Insight North America LLC
January 2023

RESPONSIBLE HORIZONS EURO CORPORATE BOND FUND

Over the twelve-month period under review, the Fund's Euro W (Acc.) share class returned -13.54%, net of fees, compared with -13.65% for the Bloomberg Barclays Euro Aggregate Corporates Index TR and -13.59% for the Lipper Global Bond EUR Corporates sector average, all in Euro terms. The Fund generated a negative return but outperformed its benchmark and the sector average.

Fixed Income markets were historically weak in 2022, as global bonds fell into a bear market for the first time in 70 years. The path of inflation was the key focus for market participants, with major central banks raising interest rates in response to rising prices. Consequently, government bond yields and corporate credit spreads experienced volatility.

Security selection was the main driver of relative outperformance. Some of the best performing names included the long positions in telecom Verizon and insurer Fidelidade, while new issues from utility names including Western Power, Amprion and Vier Gas, also performed well. In the first half of the year, an overweight position in financials, as well as an underweight position in tobacco, contributed positively. Short duration and yield curve positioning also boosted performance relative to the benchmark as bond yields rose in the third quarter. The Fund's overweight position in credit risk contributed to relative performance in the fourth quarter when credit spreads tightened.

In the first half of the year, an overweight position in telecommunications and an underweight position in automobiles were detrimental to relative performance. This sector weakness persisted into the third quarter, particularly in July, when the Fund's overweight exposure to utilities, subordinated insurance and its underweight positioning in food and beverages generated negative returns. Although security selection was the main positive contributor towards returns over the course of the year, it detracted from performance during the fourth quarter, particularly in November due to positioning in Credit Suisse and Fidelidade.

In the first half of the year under review, the manager participated in several new issues, including Virgin Money, Euronext, Barclays, SBB, Eni and Coca-Cola, to name a few examples. The manager also bought green bonds from utility Enxsis and Sabadell, Bank of Ireland and UniCredit in the financials sector, and sustainability bonds from FedEx (with targets in vehicle electrification, sustainable fuels, and natural carbon sequestration). In the third quarter, the Fund sold bonds deemed expensive to add positions from the primary and secondary market, including issues from SSE (UK utility) and RBI (Austrian bank). Towards the end of the year, the Fund added several new issues in the noncyclical and financial sectors as market sentiment improved.

REGIONAL & SPECIALIST FIXED INCOME cont'd

RESPONSIBLE HORIZONS EURO CORPORATE BOND FUND cont'd

At the end of December, 25.4% of the Fund was invested in positive impact bonds (compared with 17.8% for the benchmark). More generally, the Fund's weighted average environmental, social and corporate governance (ESG) score is 1.8 compared with the benchmark's 1.9. The lower the score, within a 1-5 range, the better the ESG performance. Furthermore, the Fund's carbon intensity is 53.3% of the index's score (carbon intensity measures how much carbon dioxide is generated by issuers relative to revenue).

Insight Investment Management (Global) Limited January 2023

RESPONSIBLE HORIZONS EURO IMPACT BOND FUND

Since the Fund's inception on 10 January 2022, the Euro W (Acc.) share class returned -13.79%, net of fees, compared with a return of -14.40% for the Bloomberg Euro Green Bond Index: Corporate. The Fund generated a negative return but outperformed its benchmark.

2022 was a historically weak year for fixed income markets; global bonds fell into a bear market for the first time in 70 years. The path of inflation was the key focus for market participants, with major central banks raising interest rates in response to rising consumer prices. Consequently, government bond yields and corporate credit spreads experienced extraordinary levels of volatility in the year under review. While the majority of the year saw spreads continuously widen, there was a meaningful reversal in the fourth quarter on the back of easing energy prices and hopes that the pace of interest rate rises might ease.

The Fund's overweight positions in utilities and healthcare contributed positively, as investors placed a premium on the defensive qualities of these sectors. The Fund's exposure to the telecommunications sector similarly boosted performance, with investors favouring the resilient characteristics of this industry in such an uncertain economic environment. The Fund also held a low relative weighting in property, which proved prudent as the sector suffered from rising interest rates and idiosyncratic reports about governance concerns.

The Fund's credit risk positioning was the largest detractor from performance. Overweight exposure proved costly, as credit spreads widened in response to soaring inflation and the growing risk of recession.

Banks and utilities were the main issuers of 'green bonds' (bonds issued to raise money for climate and environmental projects) during the past year. The strong availability of high-quality 'impact' opportunities resulted in the Fund establishing significant exposure to both sectors. Italian utility company Enel was the largest portfolio holding by the end of the year. The Fund also built positions in major banks,

including HSBC, Credit Agricole, Commerzbank and Credit Suisse. Property was the third largest sector in the portfolio, though the supply of property green bonds has significantly reduced. This has made it increasingly challenging to find attractive opportunities in the space.

At the end of December, 93.1% of the Fund was invested in positive impact bonds and positive impact issuers. To achieve a broad impact, the Fund invests in various type of instruments: as a result of this, 76.9% of the Fund was invested in green bonds, 7.9% of the Fund in social bonds and finally 1.8% of the Fund was invested in sustainability bonds (which are also use-of-proceeds bonds, with both environmental and social projects). The Fund's total allocation to impact bonds therefore added up to 86.6%. On top of this the Fund also targets investment in positive impact issuers, which are companies with a business activity which is significantly (above 50% of revenues) aligned towards positive impact. The Fund's allocation to positive impact issuers was 6.5%.

The manager remains positive about the outlook for impact bonds, despite last year being the first in which we saw a decline in the overall supply of such assets. This was largely driven by the broader reduction in overall corporate bond issuances, rather than a lack of willingness from companies to issue—or appetite from investors to buy—greener bonds. The manager continues to see new sectors and issuers participating in the market. This has been evident in the automotive sector, to support electrification, and from packaging companies, which are servicing the growth of the circular economy. In the manager's view, the ever-growing demand from investors, and the accommodative regulatory environment, should continue to be supportive of the market going forward.

Insight Investment Management (Global) Limited January 2023

All data sourced from Lipper as at 31 December 2022 Total Return, no initial charge, but includes annual charges, income reinvested gross of tax. The impact of the initial charge can be material on the performance of your investment. Performance figures including the initial charge are available on request. Past performance is not a guide to future performance. Performance history is given in share class currency.

BNY MELLON GLOBAL FUNDS, PLC

NOTES TO THE FINANCIAL STATEMENTS

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The significant accounting policies and estimation techniques applied in the preparation of these financial statements are set out below:

STATEMENT OF COMPLIANCE

The financial statements for the financial year ended 31 December 2022 have been prepared in accordance with Financial Reporting Standard (“FRS”) 102: “The Financial Reporting Standard applicable in the United Kingdom and the Republic of Ireland” (“FRS 102”) and Irish statute comprising the Companies Act 2014, as amended, the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations, 2011 (as amended) (the “UCITS Regulations”) and the Central Bank (Supervision and Enforcement) Act 2013 (Section 48(1)) (Undertakings for Collective Investment in Transferable Securities) Regulations 2019 (the “Central Bank UCITS Regulations”).

BASIS OF PREPARATION

The financial statements have been prepared on a going concern basis for the Company under the historical cost convention as modified by the revaluation of financial assets and liabilities held at fair value through the profit or loss.

The format and certain wordings of the financial statements has been adapted from those contained in the Companies Act 2014, as amended, so that, in the opinion of the Directors, they more appropriately reflect the nature of the Company’s business as an investment fund.

The Company has availed of the exemption available to open-ended investment funds under Section 7 “Statement of Cash Flows” of FRS 102 not to prepare a cash flow statement on the basis that substantially all of the Company’s investments are highly liquid and carried at fair value, and the Company provides a statement of changes in net assets attributable to redeemable participating shareholders.

CRITICAL ACCOUNTING ESTIMATES AND JUDGEMENTS

The preparation of financial statements requires the use of certain critical accounting estimates. It also requires the Directors to exercise its judgement in the process of applying the Company’s accounting policies. Management makes estimates and assumptions concerning the future. The estimates and assumptions that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities are discussed below within “Financial assets and liabilities at fair value through profit or loss – Fair value estimation”. The Company based its assumptions and estimates on parameters available when the financial statements were prepared. However, existing circumstances and assumptions about future developments may change due to market changes or circumstances arising beyond the control of the Funds. Such changes are reflected in the assumptions when they occur and are recognised prospectively.

FOREIGN CURRENCY TRANSLATION – FUNCTIONAL AND PRESENTATION CURRENCY

Items included in the Company’s financial statements are measured using the currency of the primary economic environment in which each Fund operates (the “functional currency”). The functional currency of each Fund has been evaluated by the Board of Directors based on the currency that most faithfully represents the economic effects of the underlying transactions, events, investors’ base and conditions. The financial statements of the Company are presented in US dollar, which is the Company’s presentational currency.

The functional and presentation currency of the Funds are US dollar, Euro, Sterling or Japanese yen as noted in the Statement of Financial Position.

Foreign currency assets and liabilities, including net assets attributable to redeemable participating shareholders are translated into the functional currency using the closing rate applicable at the financial year end date. Foreign currency income and expenses in the Statement of Comprehensive Income are translated into the functional currency at the exchange rates prevailing at the dates of the transactions. Proceeds from redeemable participating shares issued and the cost of redeemable participating shares redeemed are also translated into the functional currency at the exchange rates prevailing at the dates of the transactions. Foreign exchange gains and losses arising from transactions and translations are presented in the Statement of Comprehensive Income within “net gains/losses on financial assets/liabilities at fair value through profit or loss”.

For Company aggregation purposes, all assets and liabilities together with income and expenses for all classes of shares are translated into US dollar using the closing rate for assets and liabilities and the average rate for income and expenses including subscriptions and redemptions, as this is the currency of the primary economic environment in which the Company operates. A currency adjustment arises from the re-translation of the opening net assets at the financial year end exchange rates, as disclosed in the Statement of Changes in Net Assets Attributable to Redeemable Participating Shareholders. This method of allocation has no effect on the value of net assets allocated to the individual Funds.

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES cont'd.

FINANCIAL ASSETS AND LIABILITIES AT FAIR VALUE THROUGH PROFIT OR LOSS – CLASSIFICATION

This category has two sub-categories: financial assets and liabilities held for trading, and those designated at fair value through profit or loss at inception.

A financial asset or liability is classified as held for trading if it is acquired or incurred principally for the purpose of selling or repurchasing in the near term or if on initial recognition is part of a portfolio of identifiable financial investments that are managed together and for which there is evidence of a recent actual pattern of short-term profit taking. Derivatives are also categorised as held for trading.

Financial assets and liabilities designated at fair value through profit or loss at inception are financial instruments that are not classified as held for trading but are managed, and their performance is evaluated on a fair value basis in accordance with the investment strategy of the Funds as documented in the prospectus.

FINANCIAL ASSETS AND LIABILITIES AT FAIR VALUE THROUGH PROFIT OR LOSS – RECOGNITION, DERECOGNITION AND MEASUREMENT

Regular purchases and sales of investments are recognised on the trade date – the date on which the Company commits to purchase or sell the investment. Financial assets and liabilities at fair value through profit or loss are initially recognised at fair value. Transaction costs are expensed as incurred in the Statement of Comprehensive Income.

Financial assets and liabilities are derecognised when the rights to receive cash flows from or pay cash flows for the investments have expired or the Company has transferred substantially all risks and rewards of ownership.

Subsequent to initial recognition, all financial assets and liabilities at fair value through profit or loss are measured at fair value. Gains and losses arising from changes in the fair value of the “financial assets or financial liabilities at fair value through profit or loss” category are presented in the Statement of Comprehensive Income within “net gains/(losses) on financial assets/liabilities at fair value through profit or loss” in the financial year in which they arise using the average cost method.

For hedge share class level forward foreign currency contracts, the realised and unrealised gains or losses are allocated solely to the relevant share classes. The unrealised gains or losses on hedging activities are reflected in the “financial assets or financial liabilities at fair value through profit or loss” category in the Statement of Financial Position.

FINANCIAL ASSETS AND LIABILITIES AT FAIR VALUE THROUGH PROFIT OR LOSS – FAIR VALUE ESTIMATION

The fair value of financial assets and liabilities traded in active markets (such as publicly traded derivatives and trading securities) are based on quoted market prices at the financial year end date. In accordance with FRS 102, the Company has applied the recognition and measurement provisions of International Accounting Standards No. 39 “Financial Instruments: Recognition and Measurement” as adopted for use in the European Union. Accordingly, the quoted market price used for financial assets held is the mid-market price. When the Company holds derivatives with offsetting market risks, it uses mid-market prices as a basis for establishing fair values for the offsetting risk positions and applies this mid-market price to the net open position, as appropriate.

If a significant movement in fair value occurs subsequent to the valuation point of the Funds on the financial year end date, valuation techniques will be applied to determine the fair value. A significant event is any event that occurs after the last market price for a security, close of market or close of the foreign exchange, but before the Funds’ valuation time that materially affects the integrity of the closing prices for any security, instrument, currency or securities affected by that event so that they cannot be considered readily available market quotations.

The fair value of financial assets and liabilities that are not traded in an active market (for example over-the-counter derivatives) is determined by using valuation techniques. The Company uses a variety of methods and makes assumptions that are based on market conditions existing at each reporting date. Valuation techniques used include the use of comparable recent arm’s length transactions, reference to other instruments that are substantially the same, discounted cash flow analysis, option pricing models and other valuation techniques commonly used by market participants making the maximum use of market inputs and relying as little as possible on entity-specific inputs.

The carrying value less impairment provision of other receivables and payables are assumed to approximate their fair values.

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES cont'd.

FINANCIAL ASSETS AND LIABILITIES AT FAIR VALUE THROUGH PROFIT OR LOSS – FAIR VALUE ESTIMATION

cont'd.

The main valuation techniques of the Company are as follows:

- (a) Financial assets and liabilities listed and regularly traded on a recognised exchange and for which market quotations are readily available or traded on over-the-counter markets shall be valued at the mid-market price accordingly on the principal exchange in the market for such investment.
- (b) If the financial assets and liabilities are listed on several recognised exchanges, the mid-market price on the recognised exchange, which, in the opinion of the Directors in consultation with the relevant Investment Manager, constitutes the principal market for such assets, will be used.
- (c) If for specific financial assets or liabilities the mid-market price referred to in (a) or (b) above is not available or does not, in the opinion of the Directors in consultation with the relevant Investment Manager, reflect a fair or appropriate value, the value shall be calculated by alternative methods with care and in good faith by the Directors, as appropriate, approved for such purpose by The Bank of New York Mellon SA/NV, Dublin Branch (the "Depository"), in consultation with the relevant Investment Manager with a view to establishing the probable realisation value for such assets.
- (d) In the event that any financial assets or liabilities are not listed or dealt on any recognised exchange, such assets shall be valued by the Directors with care and in good faith and in consultation with the relevant Investment Manager at the probable realisation value. Such probable realisation value may be determined by using a quotation from a broker.
- (e) Cash and other liquid assets are valued at their face value with interest accrued, where applicable.
- (f) Units or shares in collective investment schemes (other than those valued pursuant to (a) or (b) above), are valued at the latest available net asset value, as a best estimate of fair value, of the relevant collective investment scheme.
- (g) Derivative instruments dealt on a market are fair valued at the settlement price for such instruments on such market. Where such derivative instruments are not dealt on a market, their value shall be the daily quotation from independent pricing service or market makers.
- (h) Forward foreign currency contracts are fair valued by an independent price source by reference to the price at which a new forward contract of the same size and maturity could be undertaken.
- (i) Initial margin deposits are made upon entering into futures contracts and are generally made in cash or cash equivalents. Futures contracts are fair valued based upon their quoted daily settlement prices. Changes in the value of open futures contracts are recognised as unrealised gains or losses on futures contracts until the contracts are terminated, at which time the realised gains and losses are recognised. Unrealised gains or losses on futures contracts are shown in the Schedule of Investments. The variation margin receivable or payable at the reporting date is reported as an asset or liability, as applicable, in the Statement of Financial Position.
- (j) The premium on purchased put options exercised is subtracted from the proceeds of the sale of the underlying security or foreign currency in determining the realised gain or loss. The premium on purchased call options exercised is added to the cost of the securities or foreign currencies purchased. Premiums paid from the purchase of options, which expire unexercised are treated as realised losses. The premium on written call options exercised is added to the proceeds from the sale of the underlying security or foreign currency in determining the realised gain or loss. The premium on written put options exercised is subtracted from the cost of the securities or foreign currencies purchased. Premiums received from written options, which expire unexercised are treated as realised gains.
- (k) Interest rate, credit default and total return swap contracts are fair valued daily based upon quotations from independent pricing service or market makers and the change in the value if any is recorded as unrealised gains or losses. Payments received or made as a result of the contract termination are recognised net of any upfront payment as realised gains or losses. Income on over-the-counter derivatives accrues to the Funds and is not subject to any returns sharing arrangements with BNY Mellon Fund Management (Luxembourg) S.A (the "Manager") or any other parties.
- (l) Commercial paper and time deposits are valued at amortised cost, as a best estimate of fair value. The Company may invest in financial instruments that are not traded in an active market, whereby fair value may be determined by applying valuation techniques, such as discounted cash flow analysis and other valuation techniques used by market participants.
- (m) Exchange traded funds are fair valued based upon quotations of the net asset value per share, as a best estimate of fair value, from independent pricing sources.

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES cont'd.

FINANCIAL ASSETS AND LIABILITIES AT FAIR VALUE THROUGH PROFIT OR LOSS – FAIR VALUE ESTIMATION

cont'd.

- (n) Certain Funds may enter into “TBA” (To Be Announced) purchase commitments to purchase securities for a fixed unit price at a future date beyond customary settlement time. Although the unit price has been established, the principal value has not been finalised. The Funds hold and maintain until settlement date, cash or high grade debt obligations in an amount sufficient to meet the purchase price, or the Funds may enter into offsetting contracts for the forward sale of other securities they own. Income on the securities will not be earned until settlement date. TBA purchase commitments may be considered securities in themselves and involve a risk of loss if the value of the security to be purchased declines prior to settlement date, which is in addition to the risk of decline in the value of the Funds’ other assets. Unsettled TBA purchase commitments are valued at the current market value of the underlying securities. Although the Funds may enter into TBA purchase commitments with the intention of acquiring securities for their portfolios or for delivery pursuant to option contracts that they have entered into, the Funds may dispose of a commitment prior to settlement if the Investment Manager deems it the appropriate action.
- (o) Equity swaps are priced in accordance with the pricing basis for the underlying equity positions. Finance charges on equity swaps are accrued daily, reset on a monthly basis and subject to settlement on disposal of equity swaps. Income on equity swaps accrues to the Funds and is not subject to any returns sharing arrangements with the Manager or any other parties.
- (p) Loans are fair valued based on valuations provided by the pricing vendor Markit. Fees earned or paid and the receipt of payments of principal are recorded as a component of “net gains/(losses) on financial assets/liabilities at fair value through profit or loss” in the Statement of Comprehensive Income. Where Markit is unable to provide a value for a loan, the loan is fair valued based on a quotation obtained from a loan house. Unsettled loans are fair valued based on the agreed purchase price until a valuation from pricing vendor becomes available.
- (q) Certain Funds may use Participatory Notes (“P-Notes”) that are either listed or traded on eligible markets. P-Notes provide the Funds with the opportunity for economic exposure to specific equities in restricted or emerging markets, i.e. India, Sri Lanka, Vietnam, Bangladesh, China and Brazil, where owning local equity or equity related securities might be less efficient than the use of P-Notes, leading to a reduction in costs. P-Notes are valued by reference to the mid-market price of the underlying security.

LOANS

Certain Funds of the Company may invest in direct debt instruments which are interests in amounts owed to lenders or lending syndicates by corporate, governmental, or other borrowers. A Fund’s investments in loans may be in the form of participations in loans or assignments of all or a portion of loans from third parties. A loan is often administered by a bank or other financial institution (the “lender”) that acts as agent for all holders. The agent administers the terms of the loan, as specified in the loan agreement. A Fund may invest in multiple series or tranches of a loan, which may have varying terms and carry different associated risks. A Fund generally has no right to enforce compliance with the terms of the loan agreement with the borrower. As a result, a Fund may be subject to the credit risk of both the borrower and the lender that is selling the loan agreement.

When a Fund purchases assignments from lenders, it acquires direct rights against the borrower of the loan. When investing in a loan, a Fund has the right to receive payments of principal, interest and any fees to which it is entitled only from the lender selling the loan agreement and only upon receipt of payments by the lender from the borrower.

RECEIVABLES

Receivables include cash and cash equivalents, income receivable, receivable for investments sold, expense cap receivable from the manager, margins on derivatives contracts, subscriptions receivable and other receivables. These amounts are recognised initially at fair value and subsequently measured at amortised cost.

FINANCIAL LIABILITIES AT AMORTISED COST

Financial liabilities at amortised cost include bank overdraft, payable for investments purchased, redemptions payable, expenses payable, performance fees payable, margins on derivatives contracts, cash collateral payable to broker, income payable on swaps, finance charges payable on swaps, tax payable and other payables. These amounts are recognised initially at fair value and subsequently measured at amortised cost.

OFFSETTING FINANCIAL INSTRUMENTS

Financial assets and liabilities are offset and the net amount reported in the Statement of Financial Position when there is a legally enforceable right to offset the recognised amounts and there is an intention to settle on a net basis or realise the asset and settle the liability simultaneously.

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES cont'd.

CROSS INVESTMENT

As at 31 December 2022, BNY Mellon Absolute Return Bond Fund, BNY Mellon Euroland Bond Fund and BNY Mellon European Credit Fund invest in other Funds of the Company (31 December 2021: BNY Mellon Absolute Return Bond Fund, BNY Mellon Euroland Bond Fund and BNY Mellon European Credit Fund). These cross investments have been eliminated in the financial statements of the Company. Where a Fund invests in another Fund or Funds of the Company, these cross investments have been deducted from the total net asset value when calculating the management fees payable. The realised gains and losses, including movements in unrealised gains and losses, on the cross investments have been eliminated in the Total Company amounts disclosed in the Statement of Comprehensive Income.

CASH AND CASH EQUIVALENTS AND BANK OVERDRAFTS

Cash and cash equivalents are valued at face value, with interest accrued where applicable at relevant valuation point on the relevant business day. Cash equivalents include deposits held at call with banks and other short-term investments in an active market with original maturities of three months or less. Bank overdrafts are shown separately in the Statement of Financial Position. Unrealised gains and losses on spot currency contracts are incorporated within the balances for cash and cash equivalents and bank overdraft, respectively, effective for 31 December 2022; there was no restatement in respect of the treatment for unrealised gains and losses on spot currency contracts for the prior year of 31 December 2021, due to their immateriality.

COLLATERAL

Cash collateral provided by the Funds is identified in the Statement of Financial Position as “margins on derivatives contracts” and is not included as a component of cash and cash equivalents. Cash collateral received by the Funds is identified in the Statement of Financial Position as “cash collateral received from broker”. The obligation to return the cash collateral is identified in the Statement of Financial Position as “cash collateral payable to broker”. Cash collateral received is restricted and does not form part of the Funds’ cash and cash equivalents. For collateral other than cash, if the party to whom the collateral is provided has the right by contract or custom to sell or re-pledge the collateral, the Funds classify that asset in its Statement of Financial Position separately from other assets and identify the asset as pledged collateral. Where the party to whom the collateral is provided does not have the right to sell or re-pledge, a disclosure of the collateral provided is made in the Schedule of Investments, as indicated by a “*” tick mark.

TRANSACTION COSTS

Transaction costs are costs incurred to acquire financial assets or liabilities at fair value through profit or loss. They include fees and commissions paid to agents, advisers, brokers and dealers. In respect of equities and financial derivative instruments, the transaction costs, when incurred, are immediately recognised in the Statement of Comprehensive Income as an expense and are included in the “net gains/(losses) on financial assets/liabilities at fair value through profit or loss”. In respect of all other securities, the bid ask spread is embedded in the purchase and sale price of the securities and cannot be separately verified or disclosed.

DIVIDEND INCOME

Dividend income from financial assets at fair value through profit or loss is recognised in the Statement of Comprehensive Income within “dividend income” when the right of the Funds to receive payments is established. Dividend income is shown gross of any non-recoverable withholding taxes.

DIVIDEND EXPENSE

Interest on short equity swaps is recognised in the Statement of Comprehensive Income as “Dividend expense”, which may be subject to change, dependant on periodic resetting and/or final disposal of underlying swap instruments.

INTEREST INCOME

Interest income on interest bearing financial instruments is shown as a component of “net gains/(losses) on financial assets/liabilities at fair value through profit or loss”. Bank interest income is accounted for on a cash receipts basis.

TAXATION

Under current law and practice, there is no income, gains or other taxes payable by the Funds. The Funds currently incur withholding taxes imposed by certain countries on investment income and capital gains. Withholding taxes are disclosed separately in the Statement of Comprehensive Income and net of any tax credits.

Certain Funds accrue for capital gains tax on net realised and unrealised gains on investments. The capital gains tax is recorded in accordance with the tax regulation of each relevant country and rates on Irish investors. The capital gains tax expense and the amounts payable at the financial year end are reflected in the “withholding taxes on dividends and other investment income” and “tax payable” figures in the Statement of Comprehensive Income and the Statement of Financial Position, respectively.

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES cont'd.

EXPENSES

Expenses are accounted for on an accruals basis. Any costs associated with the termination of a Fund are paid for by the Manager.

SECURITIES LENDING

The Company has entered into a securities lending agreement (as amended, assigned, novated and assumed) with The Bank of New York Mellon, London Branch and the Depositary. The Company can lend securities with a value of up to 100% of any one line of stock, to borrowers approved by The Bank of New York Mellon. The Company receives securities, financial instruments or other assets as collateral against the loaned securities. The Company does accept cash as collateral but does not engage in cash collateral reinvestment. Collateral held (and pending) will not be less than 102% of the value of the securities on loan. Securities lending income is accounted for on a cash receipts basis. Details of the securities lending position at the financial year end are contained in Note 14 to the financial statements.

DISTRIBUTIONS TO REDEEMABLE PARTICIPATING SHAREHOLDERS

Distributions to redeemable participating shareholders are recognised as “finance costs” in the Statement of Comprehensive Income.

REDEEMABLE PARTICIPATING SHARES

The Company issues multiple classes of redeemable participating shares within each Fund which are redeemable at the holder's option and do not have identical rights. Such shares are classified as financial liabilities.

Redeemable participating shares can be put back to the Fund at any time for cash equal to a proportionate share of the Fund's net asset value attributable to the share class. The redeemable participating shares are carried at the redemption amount that is payable at the financial year end date if the holder exercises the right to put the share back to the Fund.

Redeemable participating shares are issued and redeemed at the holder's option at prices based on the Fund's net asset value per share at the time of issue or redemption. The Fund's net asset value per share is calculated by dividing the net assets attributable to the holders of each class of redeemable participating shares with the total number of outstanding redeemable participating shares for each respective class in accordance with the provisions of the prospectus in determining the net asset value per share for subscriptions and redemptions.

DILUTION ADJUSTMENT

To mitigate the effects of dilution, the Directors may, at their discretion, make a dilution adjustment to the net asset value per share. The Directors will retain the discretion in relation to the circumstances in which to make such a dilution adjustment.

The decision to make a dilution adjustment will depend on the volume of subscriptions or redemptions of shares in the Fund. The Directors may in their discretion make a dilution adjustment if, in their opinion, the existing shareholders, in the case of subscriptions, or remaining shareholders, in the case of redemptions, might otherwise be adversely affected. In particular, the dilution adjustment may be made in the following circumstances:

- where a Fund is in continual decline (i.e. is experiencing a net outflow of redemptions);
- if the Fund is experiencing large levels of net subscriptions or net redemptions relevant to its size; and
- in any other circumstances where the Directors believe it will be in the interests of shareholders to make a dilution adjustment.

The dilution adjustment will involve adding to the net asset value per share when the Fund is in a net subscription position, and deducting from the net asset value per share when the Fund is in a net redemption position, such figure as the Directors consider represents an appropriate figure to meet transaction costs, including but not restricted to market spreads, brokerage fees and taxes, to preserve the value of the underlying assets of the relevant Fund and in any other circumstances where the Directors believe it will be in the interests of the shareholders. The resultant amount will be the price rounded to such number of decimal places, as the Directors deem appropriate.

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES cont'd.

DILUTION ADJUSTMENT cont'd.

Where a dilution adjustment is made, it will increase the price at which shares shall be issued when there are net subscriptions and decrease the price at which shares shall be redeemed when there are net redemptions. The price at which each class of share shall be issued or redeemed (as appropriate) will be calculated separately but any dilution adjustment will in percentage terms affect the price of each class in an identical manner. Such dilution adjustment will not exceed 2% of the Fund's net asset value under normal market conditions; however, the Directors may temporarily increase the above mentioned maximum dilution adjustment if this is deemed necessary under exceptional market conditions (e.g. the market conditions resulting from the impact of the COVID-19 pandemic, other market crises or a market crash) and in the best interests of investors. As dilution is directly related to the inflows and outflows from a Fund, it is not possible to accurately predict whether dilution will occur at any future point in time. Consequently, it is also not possible to accurately predict how frequently the dilution adjustment will be applied.

2. SHARE CAPITAL

AUTHORISED SHARES

The initial authorised share capital of the Company is EUR 38,092 divided into 38,092 subscriber shares of EUR 1.00 each and 25,000,000,000 at no par value initially designated as unclassified shares. The unclassified shares are available for issue as participating shares.

SUBSCRIBER SHARES

The 38,092 subscriber shares at EUR 1.00 each were all issued as fully paid and are held by the Manager. The subscriber shares do not entitle the holders to any dividend and on a winding up, entitle the holders to receive the amount paid up thereon but not otherwise to participate in the assets of the Company. The subscriber shares do not form part of the net asset value of the Company and are thus disclosed in the financial statements by way of this note only. In the opinion of the Directors, this disclosure reflects the nature of the Company's investment business.

REDEEMABLE PARTICIPATING SHARES

Redeemable participating shares carry the right to a proportionate share in the assets of the Funds and the holder of the share is entitled to one vote each on a poll. Shares are redeemed by shareholders at prices based on the value of net assets of the relevant class.

The activity on redeemable participating shares for the financial year ended 31 December 2022 is as follows:

Fund	Share Class	Currency	Shares in issue at beginning of financial year	Shares issued during the financial year	Shares redeemed during the financial year	Shares in issue at end of financial year

** Effective 3 May 2022, BNY Mellon Euroland Bond Fund Euro S Share Class was renamed BNY Mellon Euroland Bond Fund Euro Z Share Class.

3. MANAGEMENT AND PERFORMANCE FEES

MANAGEMENT FEES

The Manager is entitled to receive out of the assets of a Fund an annual management fee in respect of each class, accruing daily and payable monthly in arrears at an agreed annual rate as set out in the relevant supplement of the prospectus. The table below outlines the range of annual management fee rates for each share class:

Share Class	Rate	Share Class	Rate
Class A	0.40% - 2.00%	Class N	0.90%
Class B	0.75% - 1.50%	Class P	1.10%
Class C	0.20% - 1.00%	Class R	1.00% - 1.50%
Class D	1.00%	Class S	0.40% - 1.00%
Class E	0.08% - 0.55%	Class T	0.50% - 1.00%
Class F	0.35%	Class U	0.75% - 0.85%
Class G	0.20% - 1.00%	Class V	0.18%
Class H	0.40% - 2.00%	Class W	0.15% - 0.75%
Class I	0.45% - 1.00%	Class X	None
Class J	1.25% - 1.50%	Class Y	None
Class K	0.30% - 1.40%	Class Z	0.25% - 0.65%
Class L	0.16%		

Management fees accrued to the Manager and the amounts due at the financial year end are included in the “Management Fee” and “Expenses Payable” figures in the Statement of Comprehensive Income and the Statement of Financial Position, respectively.

PERFORMANCE FEES

In addition to the annual management fee, the Manager is entitled to an annual performance fee (the “Performance Fee”) in respect of certain classes of the following Funds, as detailed in the relevant supplement of the prospectus. The table below outlines the performance fee rates and benchmarks of the respective share class:

Fund	Benchmark	Rate
BNY Mellon Absolute Return Bond Fund	3 month EURIBOR / SOFR (90-day compounded) / SONIA (90-day compounded) / SARON (90-day compounded) / TONAR (90-day compounded)	Class D, R, S and T – 10.00%
BNY Mellon Absolute Return Equity Fund	1 month EURIBOR / SOFR (90-day compounded) / SONIA (90-day compounded) / SARON (90-day compounded)	Class D, R, S, T and U – 15.00%
BNY Mellon Absolute Return Global Convertible Fund	1 month EURIBOR / SOFR (90-day compounded) / SONIA (90-day compounded) / SARON (90-day compounded) / TONAR (90-day compounded)	Class D, F, R, S, T and U – 15.00%
BNY Mellon Dynamic U.S. Equity Fund[^]	S&P 500 Net Total Return Index in USD terms	Class D, F, S, T and U – 10.00%
BNY Mellon Global Leaders Fund[^]	MSCI World Index (with net dividends reinvested) in Euro/USD terms	Class U – 10.00%
BNY Mellon Long-Term Global Equity Fund	MSCI World Daily (with net dividends reinvested) in Euro/USD terms	Class S – 15.00%

[^] This Fund did not have issued share classes entitled to a performance fee, in the current or prior financial years.

Performance fees accrued to the Manager and the amounts due at the financial year end are included in the “Performance Fee” and “Performance Fees Payable” figures in the Statement of Comprehensive Income and the Statement of Financial Position, respectively.

3. MANAGEMENT AND PERFORMANCE FEES cont'd.

PERFORMANCE FEES (continued)

The table below outlines the performance fee charge, as per the Statement of Comprehensive Income for the financial years ended 31 December 2022 and 31 December 2021, broken down for the in scope share classes on the Funds:

4. ADMINISTRATION FEES

The Manager pays to BNY Mellon Fund Services (Ireland) Designated Activity Company (the “Administrator”) out of the assets of each Fund an annual fee which shall accrue daily and be payable monthly in arrears as detailed in the prospectus. The annual fee accrued to the Administrator is attributable to all share classes and represents a deduction from the net asset value of the Fund and, accordingly, each class. Fees accrued to the Administrator and the amounts due at the financial year end are included in the “Operating Expenses” and “Expenses Payable” figures in the Statement of Comprehensive Income and the Statement of Financial Position, respectively.

5. DEPOSITARY FEES

The Company pays to the Depositary out of the assets of each Fund an annual fee which shall accrue daily and be payable monthly in arrears as detailed in the prospectus. The annual fee accrued to the Depositary is attributable to all share classes and represents a deduction from the net asset value of the Fund and, accordingly, each class. Fees accrued to the Depositary and the amounts due at the financial year end are included in the “Depositary Fee” and “Expenses Payable” figures in the Statement of Comprehensive Income and the Statement of Financial Position, respectively.

6. EXPENSE CAP

From time to time, for certain Funds, an expense cap is introduced, whereby expenses exceeding an agreed level of a relevant Fund’s net asset value are borne by the Manager or its affiliate. The expense cap is then applied to the relevant Fund until such time as the Board agrees to amend the relevant expense cap. Any amendment to an expense cap resulting in an increase in expenses will be communicated to impacted shareholders. At the date of these financial statements, the following expenses caps are in place:

Fund	Agreed Total Expense Ratio ("TER") Limit
BNY Mellon Absolute Return Global Convertible Fund	TER limit of Annual Management Charge ("AMC") plus 15 basis points
BNY Mellon Asian Income Fund	TER limit of AMC plus 9 basis points
BNY Mellon Blockchain Innovation Fund	TER limit of AMC plus 13 basis points
BNY Mellon Dynamic Factor Premia V10 Fund (capped from launch date of 18 November 2021)	TER limit of AMC plus 10 basis points ⁽¹⁾
BNY Mellon Dynamic Total Return Fund (capped until closure date of 26 February 2021)	TER limit of AMC plus 22 basis points ⁽²⁾
BNY Mellon Dynamic U.S. Equity Fund	TER limit of AMC plus 10 basis points
BNY Mellon Efficient Global High Yield Beta Fund	TER limit of AMC plus 9.5 basis points ⁽³⁾

BNY Mellon U.S. Municipal Infrastructure Debt Fund	TER limit of AMC plus 15 basis points
Responsible Horizons Euro Corporate Bond Fund (capped from launch date of 27 March 2021)	TER limit of AMC plus 9 basis points ⁽¹²⁾
Responsible Horizons Euro Impact Bond Fund* (capped from launch date of 10 January 2022)	TER limit of AMC plus 9 basis points ⁽¹³⁾

⁽¹⁾ With exception for EUR X (Acc) (Hedged), Sterling X (Acc) and USD X (Acc) share classes subject to TER limit of AMC plus 6.3 basis points.

⁽²⁾ With exception for USD X (Acc) share class subject to TER limit of AMC plus 17 basis points.

⁽³⁾ With exception for USD X (Acc) share class subject to TER limit of AMC plus 5.8 basis points.

⁽⁴⁾ In respect of Sterling L (Acc) (Hedged) share class, a change occurred from TER limit of AMC plus 9.5 basis points to TER limit of no AMC plus 8 basis points, effective 1 October 2021; this resulted in a Management Fee Waiver for Sterling L (Acc) (Hedged) in the amount of USD 15,024 for the year ended 31 December 2022 (USD 4,147 for the period 1 October 2021 to 31 December 2021).

⁽⁵⁾ With exception for USD X (Acc), USD X (Inc), Sterling X (Acc) (Hedged) and Sterling X (Inc) (Hedged) share classes subject to TER limit of AMC plus 5.8 basis points; and EUR N (Acc) (Hedged), USD N (Acc) and USD N (Inc) (M) share classes subject to TER limit of AMC only.

⁽⁶⁾ With exception for USD L (Acc), USD L (Inc), EUR L (Acc) (Hedged), EUR L (Inc) (Hedged), Sterling L (Acc) (Hedged), Sterling L (Inc) (Hedged), Sterling X (Acc) (Hedged), Sterling X (Inc) (Hedged), USD X (Acc) and USD X (Inc) share classes subject to TER limit of AMC plus 5.8 basis points.

⁽⁷⁾ With exception for USD X (Acc) share class subject to TER limit of AMC plus 13 basis points.

⁽⁸⁾ CAD X (Acc) (Hedged) share class subject to TER limit of AMC plus 10 basis points and USD X (Acc) share class subject to TER limit of AMC plus 7 basis points.

⁽⁹⁾ Applicable to Sterling Y (Acc) (Hedged) and USD Y (Acc) share classes.

⁽¹⁰⁾ Applicable to CAD X (Acc) (Hedged) share class.

⁽¹¹⁾ With exception of CHF E (Acc) Hedged and EUR E (Acc) share classes subject to TER limit of AMC plus 5 basis points; and EUR A (Acc), EUR A (Inc), EUR C (Acc), EUR G (Acc), EUR W (Acc) and EUR X (Acc) share classes subject to TER limit of AMC plus 12.5 basis points.

⁽¹²⁾ With exception for EUR X (Acc) share class subject to TER limit of AMC plus 6 basis points.

⁽¹³⁾ With exception for EUR X (Acc), Sterling X (Acc) (Hedged) and USD X (Acc) (Hedged) share classes subject to TER limit of AMC plus 5.5 basis points.

* Please refer to Note 19 of the financial statements.

** Please refer to Note 20 of the financial statements.

The total cost in excess above the cap charged to the Company during the financial year ended 31 December 2022 was USD 1,827,533 (31 December 2021: USD 1,595,729).

7. OPERATING EXPENSES

The operating expenses in the Statement of Comprehensive Income comprise of the following:

Expense	31 December 2022 USD	31 December 2021 USD
Administration fee	10,394,895	12,290,441
Audit fee	705,374	835,924
Directors' fee	96,936	108,786
Other expenses	3,326,878	2,862,284
Total operating expenses	14,524,083	16,097,435

7. OPERATING EXPENSES cont'd.

Fees and expenses charged for the services of the statutory auditors, Ernst & Young, in respect of the financial year are as follows:

	31 December 2022	31 December 2021
	USD	USD
Statutory audit of financial statements (Ireland)	516,780	586,172
Other non-audit services - Investor Tax Reporting (United Kingdom)	92,775	160,690
Other non-audit services - Investor Tax Reporting (Austria)	95,819	89,062
Total	705,374	835,924

8. TRANSACTION COSTS

Transaction costs are costs incurred to acquire financial assets or liabilities at fair value through profit or loss and include the bid ask spread, fees and commissions paid to agents, advisers, brokers and dealers.

Transaction costs incurred for the purchases and sales of equities and financial derivative instruments are included in the "net gains/(losses) on financial assets/liabilities at fair value through profit or loss" in the Statement of Comprehensive Income and are detailed in the table below. In respect of all other securities, the bid ask spread is embedded in the purchase and sale price of the securities and cannot be separately verified or disclosed.

9. CASH AND CASH EQUIVALENTS

Cash held by the Company is deposited with The Bank of New York Mellon SA/NV, Dublin Branch and held by counterparties (Bank of America Merrill Lynch, Barclays Bank PLC, BNP Paribas, Canadian Imperial Bank of Commerce, Citigroup Global Markets Limited, Credit Suisse AG, Goldman Sachs, HSBC Bank plc, JPMorgan Chase Bank, Lloyds Bank plc, Morgan Stanley, Royal Bank of Canada, Royal Bank of Scotland, State Street Bank, Toronto Dominion Bank and UBS AG) in respect of collateral and margin requirements. Cash balances include cash invested into short-term investment vehicles daily.

Cash account arrangements have been put in place in respect of the Funds as a consequence of the requirements relating to the subscription and redemption collection accounts pursuant to the Central Bank of Ireland (Supervision and Enforcement) Act 2013 (Section 48(i)) Investor Money Regulations 2015 for Fund Service Providers (“Investor Money Regulations”).

These cash accounts, held with the Global Sub-Custodian for collection of subscriptions and payment of redemptions and distributions for the Funds, are deemed assets of the Funds. The balances on these cash accounts as at 31 December 2022 and 31 December 2021 are deemed immaterial in respect of the relevant Fund to which they are due, with exception for EUR 23,296 (31 December 2021: EUR 21,942) on BNY Mellon Pan European Fund (closed 9 March 2017) and USD 33,925 (31 December 2021: USD 36,082) on BNY Mellon S&P 500® Index Tracker (closed on 15 January 2021).

10. TAXATION

Under current law and practice, the Company qualifies as an investment undertaking as defined in Section 739B of the Tax Consolidation Acts, 1997, as amended. On that basis, it is not chargeable to Irish tax on its income and gains.

However, Irish tax may arise on the happening of a “chargeable event”. A chargeable event includes any distribution payments to shareholders or any encashment, redemption, cancellation or transfer of shares and the holding of shares at the end of each eight year period beginning with the acquisition of the shares.

10. TAXATION cont'd.

No Irish tax will arise on the Company in respect of chargeable events in respect of:

- (a) a shareholder who is neither Irish resident nor ordinarily resident in Ireland for tax purposes at the time of the chargeable event, provided appropriate valid declarations in accordance with the provisions of the Taxes Consolidation Act, 1997, as amended, are held by the Company; or the Company has been authorised by the Irish Revenue to make gross payments in the absence of appropriate declarations; and
- (b) certain exempted Irish resident investors who have provided the Company with the necessary signed statutory declarations.

Distributions, interest and capital gains (if any) received on investments made by the Company may be subject to withholding taxes imposed by the country from which the investment income/gains are received and such taxes may not be recoverable by the Company or its shareholders.

Certain Funds accrue for Brazilian and Indian capital gains tax on net realised and unrealised gains on investments. As at 31 December 2022, a capital gains tax receivable of USD 8,101 for BNY Mellon Asian Opportunities Fund* (31 December 2021: capital gains tax payable of USD 311,766), capital gains tax payable of USD 804,930 for BNY Mellon Brazil Equity Fund (31 December 2021: USD 1,041,327), capital gains tax payable of USD Nil for BNY Mellon Global Emerging Markets Opportunities Fund* (31 December 2021: USD 185,048) and capital gains tax payable of USD 4 for BNY Mellon Sustainable Global Emerging Markets Fund* (31 December 2021: USD Nil) have been recorded in the Statement of Financial Position. For the financial year ended, a capital gains tax provision credit release of USD 319,867 for BNY Mellon Asian Opportunities Fund* (31 December 2021: USD 149,689), capital gains tax expense of USD 332,193 for BNY Mellon Brazil Equity Fund (31 December 2021: USD 2,418,087) and capital gains tax provision credit release of USD 185,048 for BNY Mellon Global Emerging Markets Opportunities Fund* (31 December 2021: USD 111,396) have been recorded in the Statement of Comprehensive Income under "Withholding taxes on dividends and other investment income".

* Please refer to Note 19 of the financial statements.

During the financial year, companies related to the Depositary and the Investment Managers were selected by the Investment Managers to execute investment transactions and foreign exchange transactions and to accept deposits on behalf of the Investment Managers. The Bank of New York Mellon, New York and The Bank of New York Mellon, London were counterparties to forward foreign currency contracts open at the financial year end as disclosed in appendices to the Schedule of Investments. The counterparties were selected by the Investment Managers and the terms of such transactions were negotiated by the Investment Managers with such companies.

The Manager owns 38,092 (31 December 2021: 38,092) of the Company's subscriber shares as disclosed in Note 2 of the financial statements. There was no ultimate controlling party of the Company during the financial years ended 31 December 2022 and 31 December 2021.

12. SOFT COMMISSION AND DIRECTED BROKERAGE ARRANGEMENTS

During the financial year, ARX Investimentos Ltda (the "Investment Manager") have entered into soft commission arrangements (also referred to as soft dollar arrangements) with brokers in respect of which certain goods and services used to support the investment process were received. The Investment Manager do not make direct payment for these services but either remunerate brokers through commissions paid on transactions or arrange for executing counterparties to pay some or all of their allocated research commission away to other brokers or non-brokering research providers. The goods and services utilised for the Company include economic and political analysis, industry, sector or company specific, investment related research and broker provide active order management. The Investment Manager consider these arrangements to be of benefit to its clients and the brokerage rates are not in excess of customary institutional full service brokerage rates.

13. EXCHANGE RATES

14. EFFICIENT PORTFOLIO MANAGEMENT

The Company and each Fund may invest in Financial Derivative Instruments ("FDIs") for investment purposes where specified in the relevant supplement to the prospectus. In addition, each Fund may utilise techniques and instruments for efficient portfolio management purposes or to protect against foreign exchange rate risks, subject to the conditions and within the limits laid down by the Central Bank.

Such techniques and instruments include, but are not limited to, futures, options, swaps, warrants, P-Notes, stock lending arrangements, repurchase/reverse repurchase agreements, forward foreign currency contracts and when issued and/or delayed delivery securities.

Efficient portfolio management transactions relating to the assets of a Fund may be entered into with one of the following aims: a reduction of risk, a reduction of cost with no increase or a minimal increase in risk or generation of additional capital or income with no, or an acceptably low level of risk (relative to the expected return). The Company currently invests in futures, options, swaps, forward foreign currency contracts and P-Notes, as evidenced in the relevant Schedule of Investments. Details of all open transactions at the financial year end are disclosed in the Schedule of Investments.

The Company has entered into a securities lending agreement (as amended, assigned, novated and assumed) with The Bank of New York Mellon, London Branch and the Depositary. The securities lending income is currently split between the Company and The Bank of New York Mellon, London Branch in the proportion 81%:19%.

14. EFFICIENT PORTFOLIO MANAGEMENT cont'd.

Securities lending transactions and the related collateral are settled and cleared in accordance with the tri-party and bilateral agreements.

The Company earned revenue from securities lending during the financial year ended 31 December 2022, as detailed in the table below:

16. RISK MANAGEMENT OBJECTIVES AND POLICIES

STRATEGY IN USING FINANCIAL INSTRUMENTS

The Company's investment activities expose it to the various types of risk, which are associated with the financial instruments and markets in which it invests: market risk (including market price risk, interest rate risk and currency risk), credit risk and liquidity risk. The Company has in place risk management programmes that seek to limit the potential adverse effects of these risks on the Funds' financial performances.

The assets of each Fund will be invested separately in accordance with the investment objectives and policies of the relevant Fund, which are set out in the relevant supplements to the prospectus. Where a Fund maintains in its name reference to a particular currency, country, region, economic sector or type of security, at least three quarters of the assets of that Fund will comprise investments corresponding to the relevant currency, country, region, economic sector or type of security (as appropriate).

The Funds may use FDI for efficient portfolio management purposes or to protect against foreign exchange risks. Some Funds have the facility to use FDI for investment purposes according to the Central Bank UCITS Regulations. In their Risk Management Process ("RMP") it explains whether each Fund uses the commitment approach or Value at Risk ("VaR") to calculate its global exposure. The commitment approach measures the leverage effect produced by the use of derivatives and is calculated by converting all derivative positions, whether used as part of the Fund's general investment policy, for purposes of risk reduction or for the purpose of efficient portfolio management, based on the market values of the underlying assets or contracts. VaR for a pre-defined time horizon measures the threshold loss in value of a portfolio of financial instruments that may be exceeded for a given probability (either Absolute⁽¹⁾ or Relative⁽²⁾). The quality of the VaR model forecasts is demonstrated by back-testing. As a complement to VaR, stress testing is used to evaluate the potential impact on portfolio values of extreme, although plausible, events or movements in a set of financial variables.

For a more detailed discussion, the RMP for each of the Funds is available on request.

⁽¹⁾ This is defined as the VaR of the Fund capped as a percentage of NAV.

⁽²⁾ This is defined as the VaR of the Fund divided by the VaR of a benchmark or reference portfolio.

16. RISK MANAGEMENT OBJECTIVES AND POLICIES cont'd.

FINANCIAL RISK MANAGEMENT PROCESS

In order to achieve its investment objectives, the Company buys, sells and holds financial assets and liabilities. As a consequence, the Company is exposed to market price risk, interest rate risk, currency risk, credit risk and liquidity risk arising from the financial instruments it holds. The Company's overall risk management programme focuses on the unpredictability of financial markets and seeks to minimise potential adverse effects on the Company's financial performance. The Company uses FDI to moderate certain risk exposures.

The risk management policies employed by the Company to manage these risks are discussed below.

INVESTMENT RISK

Activities of each Fund expose it to a variety of financial risks: market risk (including market price risk, interest rate risk and currency risk), credit risk and liquidity risk.

MARKET RISK

Market risk is the risk that the fair value of a financial instrument will fluctuate because of changes in market prices. Market risk comprises three types of risk: market price risk, interest rate risk and currency risk.

MARKET PRICE RISK

Market price risk is the risk that the fair value of a financial instrument will fluctuate because of changes in market prices (other than those arising from interest rate risk and currency risk), whether those changes are caused by factors specific to individual financial instruments or its issuer, or other factors affecting similar financial instruments traded in the market.

Many of the Funds trade in financial instruments, taking positions in traded securities in the equity and equity derivative markets. The investments of the Funds are subject to market fluctuations and there can be no assurances that investments will appreciate in value, therefore presenting a risk of loss of capital.

The Investment Managers manage market price risk through building diversified investment portfolios across a range of industry and/or geographic sectors as is appropriate for the Funds and in accordance with the Central Bank UCITS Regulations and the investment objectives of the Funds. An analysis of exposures to market price risk is provided in the Schedule of Investments for each Fund. The market positions of the Funds are monitored on a daily basis by the Investment Managers, reviewed on a monthly basis by the Investment Management Oversight Committee and on a quarterly basis by the Board of Directors.

The Company's market risk strategy is driven by the Company's investment risk and return objectives. The Board of Directors has instructed the Investment Managers to manage each of the risks in accordance with an established risk management system.

The following table demonstrates by way of example the likely increase in net asset value as a result of a 5% upwards movement in the Funds' related market index (a 5% decrease would have similar negative results). Please note the table does not include the bond Funds as their main exposure is to interest rate risk, as detailed below. Detail of market sensitivity for these Funds is provided in the subsequent commentary. In the interests of providing consistent comparisons across the Funds, the table assumes a movement of 5%. It should be noted future market conditions could vary significantly and the table is meant for illustrative purposes only.

As at 31 December 2022 and 31 December 2021, for the Funds listed in the table overleaf, should market value have increased or decreased by 5% with all other variables remaining constant, the increase or decrease in net assets attributable to redeemable participating shareholders for the financial year is shown.

^ As the Fund is in existence for less than three years, a statistically significant beta is not available. Hence, for market price risk sensitivity disclosure, a notional beta of 1 is applied in the effective calculation for these Funds.

* Please refer to Note 19 of the financial statements.

** Please refer to Note 20 of the financial statements.

For the bond Funds, the likelihood of a decrease in net asset value as a consequence of a downward movement in market prices is defined as overleaf.

16. RISK MANAGEMENT OBJECTIVES AND POLICIES cont'd.

MARKET PRICE RISK cont'd.

As at 31 December 2022 and 31 December 2021, for bond Funds utilising the Investment Managers' VaR risk model (VaR is based on probability), one would not expect the Fund to lose more than the following percentage as listed in the table below (Regulatory limit) in any one week or day, i.e. 1 week in a hundred weeks or 1 day in a hundred days. The table below also shows the VaR of each Fund as at 31 December 2022 and 31 December 2021 calculated at the 99th percentile confidence level over the holding period listed below.

Fund	Confidence Level	VaR Type	Holding Period 2022	Holding Period 2021	Regulatory Limit 2022	Regulatory Limit 2021	VaR 2022	VaR 2021

VaR is the risk measurement methodology used to assess the Funds' leverage and market risk volatility. When the VaR is calculated as a percentage of the net asset value of the Funds (absolute or relative VaR), it may not be greater than the Regulatory limits, as detailed in the prospectus. VaR is calculated on a daily basis using a one-tailed 99% confidence level and pre-determined holding period on either an absolute (where the figure is compared to the net asset value of the Fund) or relative basis (where VaR is compared to the benchmark or reference portfolio). The historical observation period will not be less than one year unless a shorter period is justified.

Some limitations of VaR analysis are:

- the models' methodologies are based on historical data and cannot take account of the fact that future market price movements, correlations between markets and levels of market liquidity in conditions of market stress may bear no relation to historical patterns;
- the market price risk information is a relative estimate of risk rather than a precise and accurate number; and
- the market price information represents a hypothetical outcome and is not intended to be predictive.

Leverage is calculated as the sum of the notional of the derivatives used. (This may be supplemented with leverage calculated on the basis of a commitment approach. The creation of leveraged exposure to an index via FDI, or the inclusion of a leverage feature in an index, must also be taken into account in meeting the prospectus disclosure requirements).

INTEREST RATE RISK

Interest rate risk is defined as the risk that the fair value of a financial instrument will fluctuate because of changes in market interest rates. This risk arises on financial instruments whose fair value is affected by changes in interest rates.

The majority of the Company's financial assets and liabilities i.e. those Funds holding substantially equity or equity derivative instruments are non-interest bearing, as a result, these assets are not subject to significant amounts of risk due to fluctuations in the prevailing levels of market interest rates. Any excess cash and cash equivalents are invested at short-term market interest rates.

16. RISK MANAGEMENT OBJECTIVES AND POLICIES cont'd.

INTEREST RATE RISK cont'd.

The table below summarises the Company's exposure to interest rate risk as at 31 December 2022. It includes the Company's assets and liabilities at fair value, categorised by the earlier of contractual repricing or maturity dates:

BNY Mellon Absolute Return Bond Fund	Less than 1 year EUR	1-6 years EUR	Over 6 years EUR	Non interest bearing EUR	Total 2022 EUR
Assets

For those Funds holding primarily interest bearing securities and as such exposed to the risk of fluctuations in the prevailing levels of market interest rates, the Investment Managers monitor the Funds' exposure to interest fluctuations on a daily basis. Whilst primarily an investment decision, the Investment Managers employ proprietary systems and processes to best position the Funds to benefit from or limit the risk of any fluctuations in the prevailing market levels of market interest rates.

16. RISK MANAGEMENT OBJECTIVES AND POLICIES cont'd.

INTEREST RATE RISK cont'd.

The Investment Managers will endeavour to acquire interest bearing securities in liquid markets. However, not all securities invested by the Funds will be listed or rated and consequently liquidity may be low. Moreover the accumulation and disposal of holdings in some securities may be time consuming and need to be conducted at unfavourable prices. The Funds may also encounter difficulties in disposing of assets at their fair price due to adverse market conditions leading to limited liquidity. The financial markets of emerging market countries in general, are less liquid than those of the more developed nations. Purchases and sales of investments may take longer than would otherwise be expected on developed stock markets and transactions may need to be conducted at unfavourable prices.

The table below demonstrates the impacts of 75 basis points ("bps") (31 December 2021: 25bps) increase in the market interest rates in the key markets the listed Funds were invested.

As at 31 December 2022, should interest rates have increased by 75 bps (31 December 2021: 25 bps) with all other variables remaining constant, the instantaneous shift in the Funds' total return is listed below; a 75 bps decrease (31 December 2021: 25bps) decrease would have similar but opposite results in the Funds' total return).

Fund	Functional Currency	Funds Total Return (%) – Instantaneous Shift 2022	Funds Total Return (%) – Instantaneous Shift 2021
BNY Mellon Efficient Global High Yield Beta Fund	USD	2.730	0.928
BNY Mellon Efficient Global IG Corporate Beta Fund	USD	4.598	1.588

Responsible Horizons Euro Corporate Bond Fund	EUR	3.203	1.148
Responsible Horizons Euro Impact Bond Fund*	EUR	3.293	N/A

* Please refer to Note 19 of the financial statements.

It should be noted that the future market conditions could vary significantly and the table is meant for illustrative purposes only.

For those Funds which use VaR, the interest rate risk sensitivity analysis has been incorporated into the calculation of market price risk.

CURRENCY RISK

Currency risk is the risk that a fair value of a financial instrument will fluctuate because of changes in foreign exchange rates. The risk arises on financial instruments that are denominated in a currency other than the functional currency in which they are measured.

The Investment Managers monitor the Company's currency position on a daily basis and may act to manage the Company's currency exposure through the use of FDI such as forward foreign currency contracts or options. The Investment Managers of hedged non-base share classes may also use derivative instruments such as forward foreign currency contracts or options as a key component of their operating strategy. Currency risk does not arise from financial instruments denominated in the functional currency.

16. RISK MANAGEMENT OBJECTIVES AND POLICIES cont'd.

CURRENCY RISK cont'd.

The following tables set out the Company's material exposures to foreign currency risk as at 31 December 2022:

16. RISK MANAGEMENT OBJECTIVES AND POLICIES cont'd.

CURRENCY RISK cont'd.

The following table demonstrates the impact on net assets attributable to redeemable participating shareholders of a movement in local currencies against the Funds' functional currency by way of illustration. In the interests of providing consistent comparisons across the Funds, the table assumes a 5% upward movement in the value of the local currencies (a negative 5% would have similar negative results).

As at 31 December 2022 and 31 December 2021, had the exchange rate between the local currencies held by the Fund and its functional currency increased or decreased by 5% with all other variables held constant, the increase or decrease, respectively, in net assets attributable to redeemable participating shareholders is listed in the table below.

Fund	Functional currency	Increase/(decrease) in net asset value 2022	Increase/(decrease) in net asset value 2021
BNY Mellon Asian Income Fund	USD	856,906	676,302

** Please refer to Note 20 of the financial statements.

BNY Mellon Efficient U.S. Fallen Angels Beta Fund had no foreign currency risk exposure as at 31 December 2022 and as at 31 December 2021.

For those Funds which use VaR, the currency risk sensitivity analysis has been incorporated into the calculation of market price risk.

CREDIT RISK

Credit risk is the risk that one party to a financial instrument will cause a financial loss for the other party by failing to discharge an obligation. This includes counterparty risk and issuer risk. Financial assets, which potentially expose the Company to credit risk, consist principally of interest bearing securities such as bonds, financial derivative instruments and investments in cash balances and deposits with and receivable from brokers.

16. RISK MANAGEMENT OBJECTIVES AND POLICIES cont'd.

CREDIT RISK cont'd.

The extent of the Company's exposure to credit risk in respect of these financial assets approximates their carrying values as recorded in the Statement of Financial Position.

The Investment Managers manage issuer risk through building diversified portfolios with a limited concentration of exposure (10%) to any one issuer in accordance with the Central Bank UCITS Regulations and the investment objectives of the Funds. Additionally, if required the Investment Managers will limit ownership of debt instruments to those instruments carrying a credit rating equal to or in excess of that provided for in the individual investment objectives of the Funds.

Substantially all of the assets of the Company are held by the Depositary. Bankruptcy or insolvency of the Depositary may cause the Company's rights with respect to securities and other positions held by the Depositary to be delayed or limited.

The Company only transacts with depositaries that are regulated entities subject to prudential supervision, or with high credit ratings assigned by international credit-rating agencies. The Directors monitor the credit quality of the Depositary, The Bank of New York Mellon SA/NV, Dublin Branch, on a quarterly basis in order to mitigate risk. Its long-term senior debt and long-term deposit rating by Standard & Poor's is AA- (31 December 2021: AA) as at the end of the financial year.

The Company's securities and other positions are segregated from the assets of either the Depositary or its agents. Thus in the event of insolvency or bankruptcy of the Depositary, the Company's securities and other positions are segregated from those of the Depositary or its agents. The Company will, however, be exposed to the credit risk of the Depositary, or any custodian used by the Depositary, in relation to the Company's cash held by the Depositary and the subscription and redemption cash collection accounts held by the Global Sub-Custodian. In the event of insolvency or bankruptcy of the Depositary, the Company will be treated as a general creditor of the Depositary in relation to cash holdings of the Company.

Counterparty/issuer risk is monitored in the following manner:

- Each Investment Manager maintains an Approved Broker list which is subject to ongoing monitoring. The trading system only permits trading with approved brokers. New brokers are added, subject to a formal review process that includes a review of the broker's creditworthiness and financial strength.
- Measurement and monitoring of counterparty or issuer trade exposure is conducted daily and consists of reviewing all outstanding positions held.

The permanent risk function of the Company oversees this process as well as performing independent checks.

The long-term senior debt and long-term deposit rating by Standard & Poor's of the counterparties whom the Funds transacted with as at 31 December 2022 are listed in the table below (rating for 31 December 2021 is the same except where stated):

Counterparty	Rating	Counterparty	Rating
Bank of America Merrill Lynch	A-	J.P. Morgan AG	A+
Bank of Montreal	A+	Lloyds Bank Plc	A+

16. RISK MANAGEMENT OBJECTIVES AND POLICIES cont'd.

CREDIT RISK cont'd.

For Funds using the cash sweep management, cash balances are automatically swept into the short-term investment vehicle daily. The cash investment auto-sweep is part of the daily cash management procedure. All money market funds available through the cash sweep management are triple-A rated by Standard & Poor's and Moody's and maintain a stable net asset value. US dollar, Euro and Sterling prime and treasury funds are available for investments, in addition to a number of funds in additional currencies, depending on the domicile of the investor and the tax implications.

The table below details the cash sweep balances as at 31 December 2022 and 31 December 2021:

Fund	Base Currency	31 December 2022	31 December 2021

All transactions in listed securities are settled or paid upon delivery using approved brokers. The risk of broker default is considered minimal as delivery of securities sold is only made once the broker has received payment. Payment is made on a purchase once the securities have been received by the broker.

Credit default swaps provide a measure of protection against defaults of debt issuers. The use of credit default swaps does not assure their use will be effective or will have the desired result. The credit events are specified in the contract and are intended to identify the occurrence of a significant deterioration in the creditworthiness of the reference asset. As a seller of protection on credit default swaps, the Funds will generally receive from the buyer of protection a fixed rate of income throughout the term of the swap provided that there is no credit event. As the seller, the Funds would effectively add leverage to their portfolios because, in addition to their total net assets, the Funds would be subject to investment exposure on the notional amounts of the swaps.

The maximum potential amount of future payments (undiscounted) that a Fund as a seller of protection could be required to make under a credit default swap equals the notional amount of the agreement. These potential amounts would be partially offset by any recovery values of the respective referenced obligations, upfront payments received upon entering into the agreement, or net amounts received from the settlement of buy protection credit default swap entered into by the Funds for the same referenced entity or entities.

16. RISK MANAGEMENT OBJECTIVES AND POLICIES cont'd.

CREDIT RISK cont'd.

The maximum exposure for the Funds as a seller of protection is detailed below:

Fund	Base Currency	31 December 2022 Maximum Exposure	31 December 2021 Maximum Exposure

Where possible the Company restricts its exposure to credit losses on the trading derivative instruments it holds by entering into master netting arrangements which is a bilateral agreement between the Funds and the counterparties (approved brokers) with whom the Funds undertake a significant volume of over-the-counter derivative transactions (including total return swaps). Derivatives are held with counterparties on an unsegregated basis. Master netting arrangements do not result in an offset of balance sheet assets and liabilities, as transactions are usually settled on a gross basis. However, the credit risk associated with favourable contracts is reduced by a master netting arrangement to the extent that if an event of default occurs, all amounts with the counterparty are terminated and settled on a net basis. The Company's overall exposure to credit risk on derivative instruments subject to a master netting arrangement can change substantially within a short period, as it is affected by each transaction subject to the arrangement.

Certain over-the-counter derivatives are cleared through central clearing houses. Under this arrangement, over-the-counter trades entered with counterparties are given up to clearing houses, which after acceptance effectively replace the counterparty for the risk aspects of the trade.

The Company employs a risk management process which will enable it to measure, monitor and manage the risks attached to financial derivative positions and details of this process have been provided to the Central Bank.

For the purpose of providing margin or collateral in respect of transactions in financial derivative instruments, the Funds of the Company may transfer, mortgage, charge or encumber any assets or cash forming part of the Funds. The Funds may also be exposed to a credit risk in relation to the counterparties with whom they transact or place margin or collateral in respect of transactions in financial derivative instruments and may bear the risk of counterparty default.

The Funds may receive cash and eligible non-cash collateral in relation to derivative trading to reduce counterparty exposure. Cash collateral received by each Fund is shown as an asset in the Statement of Financial Position, which is offset by a corresponding liability.

As at 31 December 2022, non-cash collateral received in respect of financial derivative transactions was as follows:

Fund	Counterparty	Currency	Fair Value
BNY Mellon Global Credit Fund	Citigroup Global Markets Limited	USD	18,262

As at 31 December 2021, non-cash collateral received in respect of financial derivative transactions was as follows:

Fund	Counterparty	Currency	Fair Value
BNY Mellon Euroland Bond Fund	Goldman Sachs International	EUR	318,743
BNY Mellon Global Credit Fund	Citigroup Global Markets Limited	USD	19,526

Those Funds entering into securities lending arrangements are also exposed to counterparty risk. To minimise such risk, collateral is held, exceeding in value the amount of securities on loan. Details of these are provided in Note 14 of the financial statements.

16. RISK MANAGEMENT OBJECTIVES AND POLICIES cont'd.

CREDIT RISK cont'd.

A number of Funds have investments in leveraged loans which are held on an unsegregated basis with the agent banks. These loans are not held with the Depositary and accordingly the Funds are subject to the credit risk of the borrower. The Funds are also subject to the credit risk of the agent banks.

LIQUIDITY RISK

Liquidity risk is the risk that the Company may not be able to generate sufficient cash resources to settle its obligations in full as they fall due or can only do so on terms that are materially disadvantageous.

The Company is exposed to the daily settlement of margin calls on derivatives and to daily cash redemptions of redeemable participating shares. Each Fund therefore invests the majority of its assets in investments that are traded in an active market and can be readily disposed of; it invests only a limited proportion of its assets in investments not actively traded on a listed exchange. Listed securities of each Fund are considered readily realisable, as they are listed on a regulated stock exchange.

The Investment Managers utilise derivative instruments and debt securities, if appropriate, such as exchange traded index future contracts to allow exposure to markets whilst maintaining sufficient liquidity.

Where any Fund acquires securities on the over-the-counter markets, there is no guarantee that the Fund will be able to realise the fair value of such securities due to their tendency to have limited liquidity and comparatively high price volatility.

The Company has the ability to borrow in the short term to ensure settlement. An overdraft facility is in place and has been utilised for settlement liquidity purposes. The Depositary shall be entitled to use available cash in the Fund's account and to liquidate securities in the account as is necessary to meet the Fund's obligations in connection with the provision of an overdraft facility to the Fund and/or unpaid amounts.

The Company's financial assets and liabilities are held for trading and are acquired principally for the purpose of selling in the short term. As these securities are not expected to be held to maturity or termination, the current market value represents the estimated cash flow that may be required to dispose of the securities. Future cash flows of the Funds and realised liabilities may differ from current liabilities based on changes in market conditions.

All financial liabilities are realisable within three months except those noted in the tables within this note.

Swaps and other derivative instruments shall be subject to disclosure in the below tables based on their contractual maturity settlements dates, which may be "Greater than 1 year", however given swaps and other derivative instruments are held for trading purposes, the respective Investment Managers may elect on an earlier settlement, dependent on market conditions.

16. RISK MANAGEMENT OBJECTIVES AND POLICIES cont'd.

LIQUIDITY RISK cont'd.

The table below summarises the financial liabilities for the Funds with derivative exposures and other liabilities, into relevant maturity groupings based on the remaining period as at 31 December 2022 to the contractual maturity date. The tables have been prepared based on the undiscounted gross cash outflows relating to its financial liabilities:

Fund	Less than 1 month	1-3 months	3 months to 1 year	Greater than 1 year	Total 31 December 2022

** Please refer to Note 20 of the financial statements.

Redeemable shares are redeemed on demand at the holders' option. However, the Directors do not envisage that the contractual maturity will be representative of the actual cash outflows, as holders of these instruments typically retain them for the medium to long term.

In order to manage the Company's overall liquidity and to facilitate an orderly disposition of securities, the Directors are able to refuse to repurchase any shares in excess of one tenth of the shares in issue in a Fund on any one valuation day by way of the provisions in the prospectus.

The number of investors that held more than 10% of the net assets at trading valuation of the Fund at the end of the financial year are as follows:

NUMBER OF SHAREHOLDERS

The Company did not have less than 10 redeemable participating shareholders at the end of the current financial year and prior financial year.

16. RISK MANAGEMENT OBJECTIVES AND POLICIES cont'd.

CAPITAL RISK MANAGEMENT

The capital of the Funds is represented by the net assets at the end of the financial year. The amount of net assets can change significantly on a daily basis as the Funds are subject to daily subscriptions and redemptions at the discretion of shareholders. The Funds' objective when managing capital is to safeguard the Funds' ability to continue as a going concern in order to provide returns for shareholders and benefits for other stakeholders and to maintain a strong capital base to support the development of the investment activities of the Funds.

In order to maintain or adjust the capital structure, it is part of the Company's policy to perform the following:

- The level of daily subscriptions and redemptions relative to the assets it expects to be able to liquidate is monitored and the amount of distributions payable to redeemable participating shareholders is adjusted accordingly.
- Redeemable participating shares are issued and redeemed in accordance with the prospectus and supplements of the Funds, which include the ability to restrict redemptions and requirement for certain minimum holdings and subscriptions.

FAIR VALUE ESTIMATION

The Company has classified fair value measurements using a fair value hierarchy that reflects the significance of the inputs used in making the measurements. The fair value hierarchy has the following levels:

Level 1: Quoted prices (unadjusted) in active markets for identical assets or liabilities.

Level 2: Inputs other than quoted prices included within level 1 that are observable for the asset or liability, either directly (that is, as prices) or indirectly (that is, derived from prices).

Level 3: Inputs for the asset or liability that are not based on observable market data (that is, unobservable inputs).

Instruments whose values are based on quoted market prices in active markets, and therefore classified within level 1, include active listed equities, exchange traded funds and derivatives, highly liquid government bonds (G7 countries), certificate of deposit and other quoted securities. The Company does not adjust the quoted price for these instruments.

Financial instruments that trade in markets that are not considered to be active but are valued based on quoted market prices, dealer quotations or alternative pricing sources supported by observable inputs are classified within level 2. These include investment-grade government (non-G7 countries) and corporate bonds, over-the-counter derivatives, collective investment schemes, money market instruments, P-Notes and certain listed equities. As level 2 investments include positions that are not traded in active markets and/or are subject to transfer restrictions, valuations may be adjusted to reflect illiquidity and/or non-transferability, which are generally based on available market information.

Investments classified within level 3 have significant unobservable inputs, as they trade infrequently. Level 3 instruments include leveraged loans and corporate debt securities which are priced at costs or fair valued using single broken quote. Unobservable inputs shall be used to measure fair value to the extent that relevant observable inputs are not available, thereby allowing for situations in which there is little, if any, market activity for the asset or liability at the measurement date. However, the fair value measurement objective remains the same, i.e. an exit price from the perspective of a market participant that holds the asset or owes the liability. Therefore, unobservable inputs shall reflect the assumptions that market participants would use when pricing the asset or liability, including assumptions about risk. The sensitivity of unobservable inputs used in the fair valuation of these level 3 securities is not readily determinable.

The following table provides an analysis of financial instruments that are measured at fair value as at 31 December 2022:

Transfers are deemed to occur at the beginning of the financial year.

The transfer from Level 2 to Level 3 relates to bond positions whose issuers experienced reductions in trading activity and was inactive (i.e. stale) as at the financial year end. These securities are priced at cost or fair valued using single broker quote and resulted in the reclassification to Level 3.

The transfers out of Level 3 are related to securities that were priced at cost and subsequently were subject to active trading and normal vendor pricing.

17. COMMITMENTS AND CONTINGENCIES

There are no commitments or contingencies as at 31 December 2022 or 31 December 2021.

18. SEGREGATED LIABILITY

The Company avails of the segregated liability provisions of Section 1405 (1) of the Companies Act 2014. As such, under Irish Law the Company generally will not be liable as a whole to third parties and there generally will not be the potential for cross liability between the Funds.

19. SIGNIFICANT EVENTS

Responsible Horizons Euro Impact Bond Fund was launched on 10 January 2022.

19. SIGNIFICANT EVENTS cont'd.

The consequences of Russia's invasion of Ukraine in February 2022 were significant area of focus for the Manager and Investment Managers over the financial year and continues to be so. Exposures to Russia and Ukraine and any liquidity and valuation related issues for all associated holdings have been closely monitored and all applicable sanctions have been followed. For more information on the impact to the Sub-Funds, please refer to the Investment Managers' Reports on pages 11 to 46 of the Report & Accounts.

On 7 November 2022, BNY Mellon Long-Term Global Equity Fund was modified to allow for SFDR reclassification from Article 6 to Article 8.

19. SIGNIFICANT EVENTS cont'd.

On 7 November 2022, an addendum was added to the Prospectus to reflect amendments to the Memorandum & Articles of Association regarding untraced shareholders, unclaimed assets and de minimis assets. This update also included the sale of Alcentra and the appointment of Caylie Stallard and Mark Flaherty as Directors of the Company.

On 30 November 2022, the Prospectus was updated to reflect SFDR Level 2 amendments to the main body, relevant supplements and addition of SFDR annexes for SFDR Articles 8 and 9 Sub-Funds.

Other than as disclosed above, there were no other significant events affecting the Company during the financial year.

** Please refer to Note 20 of the financial statements.

20. SUBSEQUENT EVENTS

APPENDIX 1

UCITS V REMUNERATION POLICY (unaudited)

In accordance with the UCITS V Directive, the Irish implementing Regulations and the ESMA UCITS Remuneration Guidelines (the “UCITS Remuneration Code”), the Company is required to disclose details of the remuneration paid by the Manager to its staff for the financial year.

In line with the requirements of Directive 2009/65/EC, as amended by Directive 2014/91/EU (the “UCITS Directive”), the Manager is subject to the rules on remuneration set out in Article 14(b) of the UCITS Directive. These rules require managers of UCITS to have remuneration policies, procedures and practices that:

- are consistent with and promote sound and effective risk management;
- do not encourage excessive risk-taking inconsistent with the risk profiles or governing documentation of the UCITS; and
- do not impair compliance with the Manager’s duty to act in the best interests of the UCITS.

The Manager applies its remuneration policy and practices in a manner that is proportionate to its size and that of the UCITS it manages, its internal organisation and the nature, scope and complexity of its activities. The Manager also applies this principle of proportionality to the appointment of any third-party that makes investment decisions on behalf of the UCITS under a formal delegation arrangement and which may affect the risk profile of the relevant sub-funds.

In broad terms, the Manager’s business model is designed such that it does not promote excessive risk-taking. In accordance with the requirements under the UCITS Directive, the Manager takes appropriate steps to identify individuals providing services to the Manager whose professional activities may have a material impact on the risk profile of the Manager and the UCITS that it manages, known as “Identified Staff”, including:

- statutory directors;
- senior management and others within the same remuneration bracket of senior management;
- the heads of the control functions; and
- other risk takers including all staff members whose professional activities – either individually or collectively, as members of a group – can have a material influence on the risk profiles of the Manager or of a UCITS it manages.

The executive directors do not receive any compensation directly from the Manager. The independent non-executive directors receive remuneration for their services from the Manager which comprises a fixed fee and no variable compensation component.

The operations and activities of the Manager and the UCITS for which it acts as manager are largely performed by employees of other companies within the BNY Mellon Group and the compensation of these individuals is determined by senior management of the relevant business line in accordance with the BNY Mellon policies, principles and practices at global and regional level. In such cases where services arrangements or formal delegation of portfolio management are in place, the Manager seeks to ensure that remuneration arrangements in respect of Identified Staff are considered to be equally effective as those to which the Manager is directly subject, including the principles of proportionality. Furthermore, the risk framework operated by the Manager in respect of delegated portfolio management arrangements is designed to ensure that individuals performing activities within such third-parties do not have capacity to have a material impact on the risk profile of the UCITS.

The BNY Mellon compensation philosophy and principles are based on offering an overall remuneration that supports its core values of: Client Focus, Integrity, Teamwork and Excellence. Performance is rewarded both at the individual and corporate level and determined on the basis of financial and non-financial factors. This is intended to align the interests of employees and shareholders and/or clients by incentivising actions that contribute to superior financial performance and long-term value and by ensuring that incentive compensation arrangements do not encourage employees to take unnecessary and excessive risks. BNY Mellon’s overall compensation structure is balanced between short-term and long-term incentives and a combination of cash and equity compensation. This is intended to discourage employees from taking excessive risks that may adversely affect the long-term performance of companies within the BNY Mellon Group and impact a substantial proportion of their own compensation.

BNY Mellon operates remuneration committees at a global, regional and enterprise level with responsibilities relating to the oversight of employee compensation and benefit policies and programmes. The Manager does not operate an individual remuneration committee.

Remuneration for identified staff in respect of the year ended 31 December 2022:

	USD
Total remuneration for the financial year (excludes VAT)	345,501
Of which fixed remuneration	202,485
Of which variable remuneration	143,016

APPENDIX 2

SECURITIES FINANCING TRANSACTIONS REGULATION DISCLOSURES (“SFTR”) (unaudited)

SECURITIES LENDING TRANSACTIONS

The Company has entered into a securities lending agreement (as amended, assigned, novated and assumed) with The Bank of New York Mellon, London Branch (the “Agent Lender”) effective 27 November 2015.

The following table details the aggregate value of securities on loan by Fund as a proportion of total lendable assets and each Fund’s net asset value as at 31 December 2022:

Fund	Currency	Aggregate value of securities on loan	% of Total lendable assets	% of Net asset value

* Please refer to Note 19 of the financial statements.

** Please refer to Note 20 of the financial statements.

The collaterals are held in the name of the Agent Lender to the order of its clients; the actual segregation to underlying client level is done with the Agent Lender’s books and records. The collaterals are held on account at the tri-party agent, who acts as a settlement and collection service for securities and collateral between the lender and the borrower. The tri-party agents used are Euroclear, Global Collateral Management – The Bank of New York Mellon Institutional Bank and JPMorgan Chase Bank, N.A. (where JPMorgan are the borrower). For bilateral transactions, the collaterals are held on account at the Agent Lender.

SECURITIES LENDING TRANSACTIONS cont’d.

The following tables provide an analysis of the amounts held at each collateral agent as non-cash collateral received in respect of securities lending transactions as at 31 December 2022:

ANNEX IV

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name: BNY Mellon Blockchain Innovation Fund
Legal entity identifier: 213800550EJYI8WPBT81

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective? *[tick and fill in as relevant, the percentage figure represents sustainable investments]*

<input checked="" type="radio"/> <input type="radio"/> Yes	<input type="radio"/> <input checked="" type="radio"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: ___% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It made sustainable investments with a social objective: ___%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 73.4% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective <input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met? *[list the*

environmental and/or social characteristics promoted by the financial product. For the financial products referred to in Article 6, first paragraph, of Regulation (EU) 2020/852, in respect of sustainable investments with environmental objectives, list the environmental objectives set out in Article 9 of that Regulation to which the sustainable investment underlying the financial product contributed. For financial products that made sustainable investments with social objectives, list the social objectives]

The environmental and/or social characteristics promoted by the Sub-Fund were met to the following extent during the reference period 30 September 2022 to 31 December 2022 (the “Reference Period”).

The environmental and/or social characteristics promoted were:

- Investment in companies that align with the Investment Manager’s proprietary carbon red line
- Avoid investment in companies that have material unresolvable issues relating to human rights, labour, the environment, and corruption
- Investment in companies proactively seeking to manage social and environmental factors well
- Investment in companies that benefit from increased efficiency and transparency of business operations, with implications for resource use and environmental footprints of companies e.g., companies that provide, financial services to the underbanked, improved personal property and digital security, and increased access to and efficiency of digital services worldwide, among others.

All of the above characteristics were met by the Sub-Fund during the reference period.

No reference benchmark was designated for the purpose of attaining the environmental or social characteristics promoted by the Sub-Fund.

The SFDR Sustainable Investments underlying this Sub- Fund did not contribute to the environmental objectives set out in Article 9 of the EU Taxonomy Regulation.

The SFDR Sustainable Investments underlying this Sub- Fund contributed to the following environmental objectives not aligned with the EU Taxonomy:

- Sustainable trade
- Reducing carbon emissions
- Reducing waste
- Supporting the production and consumption of renewable energies through providing traceability
- Sustainable sourcing

The SFDR Sustainable Investments underlying this Sub- Fund contributed to the following social objectives:

- Access to improved digital security, and increased access to and efficiency of digital services
 - Access to finance
 - Cybersecurity
 - Data privacy

● *How did the sustainability indicators perform?*

The following sustainability indicators are used to measure how the environmental or social characteristics promoted by the Sub-Fund are attained:

1) No more than 5% of Net Asset Value in companies that:

- Are in heavy emitting sectors as defined by the International Energy Agency (IEA); and
- Have a business incompatible with a scenario in which global temperatures rise more than 2 degrees above pre-industrial levels; and
- Do not have an adequate strategy to address emissions / climate change, or a credible transition plan.

In addition, where third party data is not available to assess these criteria or indicates that specific companies meet these criteria, the Investment Manager retains discretion to determine alignment with this sustainability indicator solely on the basis of its qualitative review process.

2) 0% of Net Asset Value in investee companies that have been involved in violations of the UNGC principles.

3) A weighted average ESG risk rating of 'medium' or better at the portfolio level. Such rating to be determined using third party data.

4) Innovation in supply chain as indicated through qualitative case studies.

5) Access to improved digital security, and increased access to and efficiency of digital services worldwide as indicated through qualitative case studies.

The sustainability indicators performed as follows:

Indicator #	How did the indicator perform in the reference period?
Sustainability Indicator #1	0%

Sustainability Indicator #2	0%
Sustainability Indicator #3	Low
Sustainability Indicator #4	Qualitative case studies for the top 5 holdings in the fund (by weight) included below
Sustainability Indicator #5	Qualitative case studies for the top 5 holdings in the fund (by weight) included below

#	Holding	Weight in Sub-Fund (%) as of 31 st Dec 2022	Sustainability Indicator	Sustainable Thematic Justification
1	SAP SE	5.16	Innovation in supply chain as indicated through qualitative case studies.	SAP is developing enterprise blockchain-based solutions to promote supply chain efficiency/sustainability and provide tracking, measurement and reduction of carbon footprint/emissions.
2	Universal Music Group N.V.	5.03	Access to improved digital security, and increased access to and efficiency of digital services worldwide as indicated through qualitative case studies.	UMG's products and services are considered socially sustainable as research indicates that music exerts a powerful positive influence on human beings. It can boost memory, build task endurance, lighten mood, reduce anxiety and depression, stave off fatigue, improve response to pain, and help people work out more effectively. The use of non-fungible tokens (NFTs) contributes to this theme by providing greater access to these benefits and reducing waste by offering digital rather than physical collectibles. UMG's direct-to-consumer NFT opportunity has the potential to generate 5% - 15% of revenue in 5 years time from blockchain/metaverse related monetization (concerts, merchandise, music, etc).

3	Block, Inc. Class A	4.19	Access to improved digital security, and increased access to and efficiency of digital services worldwide as indicated through qualitative case studies.	Block is seeking to broaden access and lower the cost of financial service using blockchain technology. Their TBD segment is working on decentralizing finance, starting with creating a secure digital wallet and increasing the speed, functionality and availability of payments for free using the Bitcoin Lightning network. The Lightning Network is an energy efficient layer-2 scaling solution that enables instant and cost effective transactions for BTC. TBD intends to offer additional defi services beyond payments to improve access to finance for underbanked populations.
4	LVMH Moet Hennessy Louis Vuitton SE	4.17	Innovation in supply chain as indicated through qualitative case studies.	LVMH developed the AURA blockchain platform with Prada and Cartier to responsibly and ethically source and trace raw materials across their supply chain.
5	WisdomTree, Inc.	3.80	Access to improved digital security, and increased access to and efficiency of digital services worldwide as indicated through qualitative case studies.	Wisdomtree is tokenizing funds with the intent to provide greater liquidity and lower costs for investors. Wisdomtree owns 20% of Securrency, which has built technology to ensure digital transactions on public blockchains are compliant from a regulatory perspective (AML/KYC) which addresses the compliance issues associated with digital assets. WisdomTree, Inc. is also a UNPRI signatory.

The data coverage for sustainability indicators #1 and #2 was 91.88% of the Sub-Fund. The data coverage for sustainability indicator #3 was 95% of the Sub-Fund.

No derivatives (FDI) were used to meet the environmental or social characteristics.

- **...and compared to previous periods?** *[include for financial products where at least one previous periodic report was provided]*

No comparison for previous periods is available at the date of this periodic report.

- **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?** *[include for financial products that made sustainable investments, where not included in the reply to the above question, describe the objectives. Describe how the sustainable investments contributed to the sustainable investment objective. For the financial products referred to in Article 6, first paragraph, of Regulation (EU) 2020/852, list the environmental objectives set out in Article 9 of that Regulation to which the sustainable investment underlying the financial product contributed]*

The social objectives of the SFDR Sustainable Investments the Sub-Fund partially made are included above.

The SFDR Sustainable Investments contributed to the above social objectives in the following ways:

- Broadening access and lowering the cost of financial services using blockchain technology
- Increasing the speed and security of payments at a lower cost
- Using blockchain to improve the speed and security of insurance underwriting
- Addressing key risks in digital asset markets – regulatory compliance and security. Securely managing private keys for digital asset platforms in a scalable manner thus contributing to data privacy.

The SFDR Sustainable Investments underlying this Sub- Fund did not contribute to environmental objectives set out in Article 9 of the EU Taxonomy Regulation.

The SFDR Sustainable Investments underlying this Sub-Fund contributed to environmental objectives not aligned with Article 9 of the EU Taxonomy Regulation.

The SFDR Sustainable Investments contributed to environmental objectives not aligned with the EU Taxonomy in the following ways:

- Implementing blockchain solutions that improve supply chain efficiency, traceability, and sustainability
- Provision of traceability for renewable power production & consumption
- Provision of distributed solar power systems utilizing blockchain technology, with solutions contributing to smarter, more efficient, more secure, and reliable energy production, usage and storage.
- Developing enterprise blockchain based solutions to promote supply chains efficiency/sustainability and provide tracking, measurement and reduction of carbon footprint/emissions

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective? [include where the financial product includes sustainable investments]

The Investment Manager determined that SFDR Sustainable Investments in the Sub-Fund did no significant harm to any environmental or social objectives by assessing each SFDR Sustainable Investment's involvement in areas deemed to be harmful from an environmental or social perspective. Issuers that had involvement in activities deemed to be harmful from an environmental or social perspective were excluded from investment. Involvement in such activities was monitored on an ongoing basis.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

— — — *How were the indicators for adverse impacts on sustainability factors taken into account?*

The Investment Manager reviewed the indicators for adverse impacts on sustainability factors for all SFDR Sustainable Investments where data was available. The Investment Manager reviewed PAIs for investee issuers using data from a designated third party data provider. If a given PAI or PAIs for an issuer appeared to exceed expectations based on the data obtained from the designated third-party data provider, further qualitative review was undertaken with respect to those issuer(s) and that product in order to determine whether such data indicated the evidence of significant harm. Where there were data gaps and the PAI was considered material for a company's sector, the Investment Manager's internal qualitative assessment was used to assess the PAIs.

The Sub-Fund took into account the following PAIs from:

- Table 1 of Annex I of the Commission Delegated Regulation:
 1. GHG emissions: Scope 1, 2 and 3
 2. Carbon footprint: Scope 1, 2 and 3
 3. GHG intensity of investee companies: Scope 1, 2 and 3
 4. Exposure to companies active in the fossil fuel sector
 5. Share of non-renewable energy consumption and production
 6. Energy consumption intensity per high impact climate sector: NACE A, B, C, D, E, F, G, H and L
 7. Activities negatively affecting biodiversity-sensitive areas
 8. Emissions to water
 9. Hazardous waste and radioactive waste ratio
 10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
 11. Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises
 12. Unadjusted gender pay gap
 13. Board gender diversity
 14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons, and biological weapons).

- Table 2 of Annex I of the Commission Delegated Regulation: 4. Investments in companies without carbon emission reduction initiatives

Table 3 of Annex I of the Commission Delegated Regulation: 9. Lack of a human rights policy. 17. Number of convictions and amount of fines for violation of anti-corruption and anti-bribery laws.

- — — *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

The OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, including the principles and rights set out in the eight fundamental conventions identified in the Declaration of the International Labour Organisation on Fundamental Principles and Rights at Work and the International Bill of Human Rights (the “Responsible Business Practices”) collectively cover a very broad range of areas of responsible business, encompassing everything from labour rights to consumer protection to support for internationally recognised human rights within a company’s or issuer’s sphere of influence.

SFDR Sustainable Investments were considered aligned with the Responsible Business Practices as each company invested in passed screens provided by third parties which either directly cover one or more of the Responsible Business Practices or are considered appropriate proxies for one or more of the Responsible Business Practices. Each company invested in also passed the Investment Manager’s own qualitative review process which takes into account the Responsible Business Practices. In addition, where the companies invested in do not pass the relevant screens provided by third parties, the Investment Manager retains discretion to establish alignment with the Responsible Business Practices solely on the basis of its qualitative review process.

How did this financial product consider principal adverse impacts on sustainability factors? *[include section if the financial product considered principal adverse impacts on sustainability factors]*

The Investment Manager reviewed principal adverse impacts at the product level on a frequent basis during the reference period, notwithstanding certain data coverage and data quality issues as further described below. The Investment Manager reviewed PAIs for investee issuers using data from a designated third party data provider. If a given PAI or PAIs for an issuer or product appeared to exceed expectations based on the data obtained from the designated third-party data provider, further qualitative review was undertaken with respect to those issuer(s) and that product in order to determine whether such data indicated the evidence of significant harm. In cases where, in the view of the Investment Manager, unresolvable significant harm was identified following further qualitative review, further action would be taken up to and including divestment. Over the course of the reference period no unresolvable significant harm was identified for investments in the Sub-Fund. Where there were data gaps and the PAI was considered material for a company’s sector, the Investment Manager’s internal qualitative assessment was used to assess the PAIs.

PAIs were categorised based on their characteristics (including their materiality and the Investment Manager's ability to estimate them), and such categories were used for the purpose of determining the actions and outcome when assessing the PAIs.

The Investment Manager was dependent upon information and data from third party data providers in order to be able to consider principal adverse impacts on sustainability factors. The availability and quality of such data impacted the extent to which each such PAI could be considered. In particular, the lack or incomplete reporting of metrics by some issuers meant that there was limited data on some adverse indicators. As such for some of the mandatory PAIs, data coverage was low. The Investment Manager's analysis of adverse indicators relied on this third-party information and data, and where such information was not available or was incomplete, the Investment Manager's analysis of adverse indicators was necessarily limited. As the data availability improves over time, it is expected that PAIs can be applied to a greater portion of the Investment Manager's investable universe. This will allow for enhanced insight into the adverse impacts caused by issuers.

What were the top investments of this financial product?

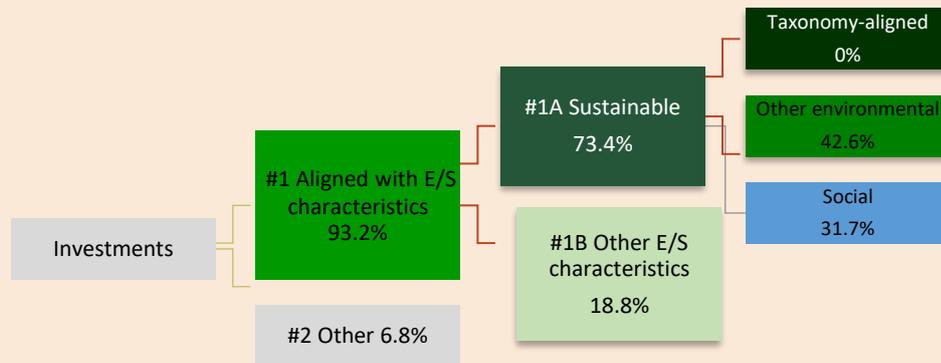

#	Largest Investments	Sector	% Assets	Country
1	SAP SE EUR NPV	Information Technology - Software & Services	5.14	Germany
2	UNIVERSAL MUSIC GR EUR 10	Communication Services - Media & Entertainment	5.02	Netherlands

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: **30th September 2022 – 31st December 2022**

What was the proportion of sustainability-related investments?

[Include only relevant boxes, remove irrelevant ones for the financial product]

Reference period: 30th September 2022 – 31st December 2022

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

[include the note below where the financial product made sustainable investments]

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● **What was the asset allocation?**

The asset allocation diagram illustrates the asset allocation of this Sub-Fund. 93.2% of Net Asset Value was used to meet the environmental or social characteristics promoted by the Sub-Fund in accordance with the binding elements of the investment strategy. The Sub-Fund invested 73.4% of Net Asset Value in SFDR Sustainable Investments of which 41.7% had an environmental objective not aligned with the EU Taxonomy and 31.7% had a social objective. 0% of the Net Asset Value of the Sub-Fund was invested in sustainable investments with an environmental objective aligned with the EU Taxonomy.

#1 Aligned with E/S characteristics: 93.2% of Net Asset Value

#1A Sustainable: 73.4% of Net Asset Value

- Taxonomy-aligned: 0% of Net Asset Value
- Environmental: 41.7% of Net Asset Value
- Social: 31.7% of Net Asset Value

#1B Other E/S characteristics: 18.8% of Net Asset Value

#2 Other: 6.8% of Net Asset Value

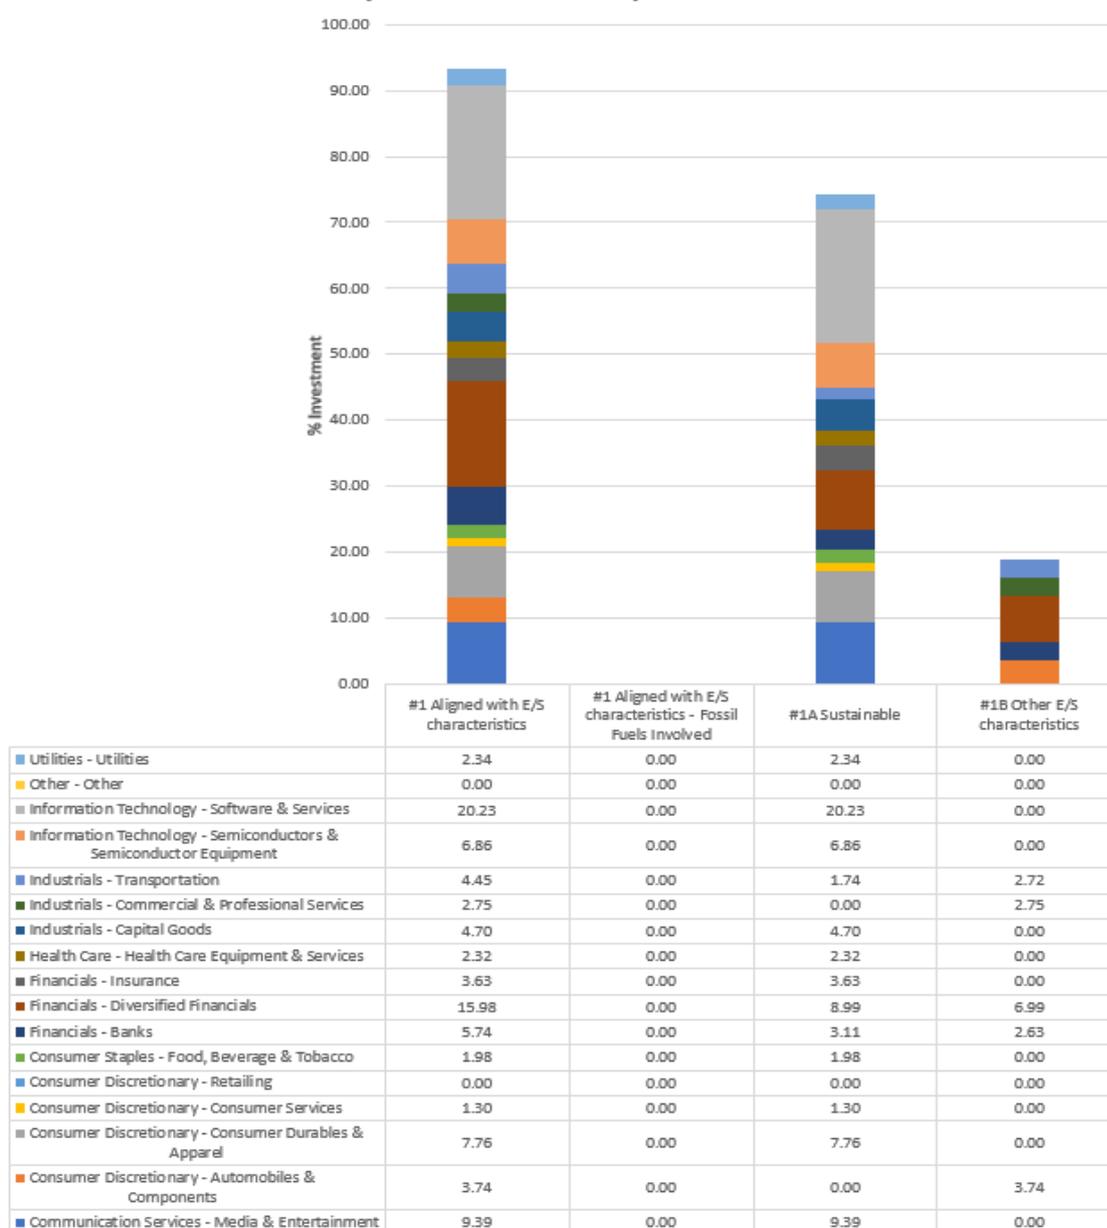

● **In which economic sectors were the investments made?**

Asset allocation describes the share of investments in specific assets.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective. **Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Asset Allocation by Sector and Sub-Sector per Sustainable Classification

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy? *[include section for the financial products referred to in Article 6 , first paragraph, of Regulation (EU) 2020/852 and include information in accordance with Article 51 of this Regulation]*

[include note for the financial products referred to in Article 6, first paragraph, of Regulation (EU) 2020/852

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

SFDR Sustainable Investments with environmental objectives were not aligned with the EU Taxonomy.

The assessment of whether these investments complied with the EU Criteria for Environmentally Sustainable Economic Activities was not subject to an assurance provided by one or more auditors or a review by one or more third parties.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?**

Yes: *[specify below, and details in the graphs of the box]*

In fossil gas In nuclear energy

No

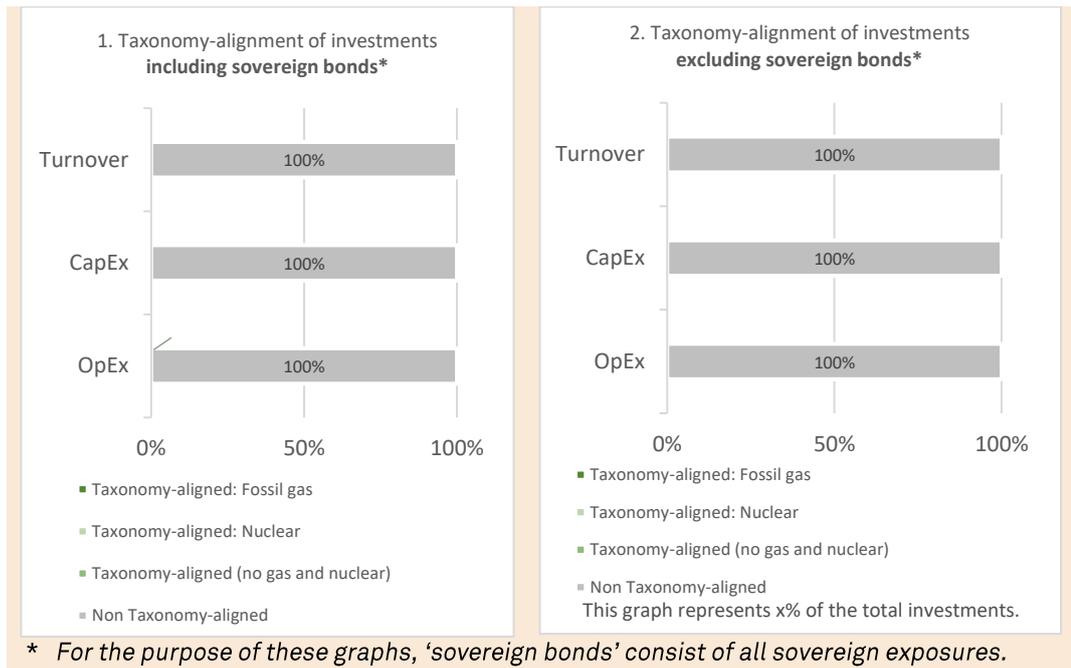

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

[Include information on Taxonomy aligned fossil gas and nuclear energy and the explanatory text in the left hand margin on the previous page only if the financial product invested in fossil gas and/or nuclear energy Taxonomy-aligned economic activities during the reference period]

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

[include note for the financial products referred to in Article 6, first paragraph, of Regulation (EU) 2020/852 that invest in environmental economic activities that are not environmentally sustainable economic activities]

 are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

- **What was the share of investments made in transitional and enabling activities?** *[include a breakdown of the proportions of investments during the reference period]*

0.00%

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?** *[include where at least one previous periodic report was provided]*

No comparison for previous periods is available at the date of this periodic report.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

[include section only for the financial products referred to in Article 6, first subparagraph, of Regulation (EU) 2020/852 where the financial product included sustainable investments with an environmental objective that invested in economic activities that are not environmentally sustainable economic activities, and explain why the financial product invested in economic activities that were not Taxonomy-aligned]

The Sub-Fund invested 42.6% of NAV in SFDR Sustainable Investments with an environmental objective not aligned with the EU Taxonomy.

The Sub-Fund invested in SFDR Sustainable Investments with an environmental objective in economic activities that are not Taxonomy-aligned because evidence of taxonomy alignment is dependent on the availability of accurate, detailed and complete data on the investee

companies to which the Sub-Fund has exposure. At this time, such information is not necessarily readily available from public disclosures by investee companies. While data availability is improving and is expected to improve over time, the data currently available is limited and varies between investee companies.

What was the share of socially sustainable investments? *[include only where the financial product included sustainable investments with a social objective]*

While the Sub-Fund does not commit to investing a minimum percentage of its Net Asset Value in socially sustainable investments, the Sub-Fund invested 31.7% of its Net Asset Value in SFDR Sustainable Investments with a social objective.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The Sub-Fund invested 6.82% of Net Asset Value in category #2 (other) which comprised of:

- 1) 4.87% in cash held for liquidity purposes only. These instruments were not subject to environmental or social safeguards as the Investment Manager does not view environmental or social considerations as relevant for these instruments.
- 2) 1.95% in one company which, following engagement with the company, the Investment Manager concluded no longer aligned with the Investment Manager’s ESG and sustainability criteria. The holding was subsequently sold. The company was considered to meet the Investment Manager’s minimum environmental and social safeguards until the decision was made to sell the holding.

What actions have been taken to meet the environmental and/or social characteristics during the reference period? *[list the actions taken within in the period covered by the periodic report to meet the environmental or social characteristics promoted by the financial product, including shareholder engagement as referred to in Article 3g of Directive 2007/36/EC and any other engagement relating to the environmental or social characteristics promoted by the financial product]*

In order to meet environmental and social characteristics promoted by the Sub-Fund, the Investment Manager took the following actions:

- Invested at least 10% in SFDR Sustainable Investments
- Excluded issuers that produce tobacco products
- Excluded issuers that derive more than 10% of turnover from the sale of tobacco
- Excluded issuers that generate revenues from the production of controversial weapons
- Excluded issuers in breach of the Principles of the UN Global Compact (which includes principles relating to human rights, labour, environment and anti-corruption)
- Invested at least 90% of the Net Asset Value of the Sub-Fund net of the Sub-Fund's exposure to cash and liquid near cash assets, money market funds, and currency related FDI and FDI used for hedging purposes (the "Non-ESG Assets") in companies that meet the Investment Manager's ESG and sustainability criteria at time of purchase and on an ongoing basis. As further detailed above, the Investment Manager divested from a position in one company as the Investment Manager determined that the company no longer met the Investment Manager's ESG and sustainability criteria.
- Invested at least 80% of the Net Asset Value of the Sub-Fund in digital assets companies. Digital asset companies are companies likely to benefit from the emerging or ongoing revenue and/or cost savings opportunities offered by blockchain technology (synonymously known as distributed ledger technology) or companies which enable blockchain technology. Blockchain technology, can be most simply defined as an integrated software and hardware that enables companies to independently maintain and exchange digitalised transactional data in a standardised format.

Engagement is not a part of the environmental or social investment strategy of the Sub-Fund. However, engagement is an integral part of the Investment Manager's approach to investing as they believe that constructive dialogue with management teams not only affords real insight into how a company operates, it is an opportunity to advocate for positive change.

How did this financial product perform compared to the reference benchmark? *[include section where an index has been designated as a reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the financial product and indicate where the methodology used for the calculation of the designated index can be found]*

A reference benchmark has not been designated for the purpose of attaining the environmental and/or social characteristics promoted by the Sub-Fund.

- **How does the reference benchmark differ from a broad market index?**

Not applicable

- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

Not applicable

- **How did this financial product perform compared with the reference benchmark?**

Not applicable

- **How did this financial product perform compared with the broad market index?**

Not applicable

[include note for financial products where an index has been designated as a reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the financial product]

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

ANNEX IV

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: BNY Mellon Efficient U.S. Fallen Angels Beta Fund

Legal entity identifier: 213800YL6BXGT6FIQ433

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

It made sustainable investments with an environmental objective: ___%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made sustainable investments with a social objective: ___%

No

It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but did not make any sustainable investments

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Sub-Fund were met to the following extent during the reference period 1 January 2022 to 31 December 2022 (the "Reference Period").

- The Sub-Fund promoted a *minimum environmental and/or social standard* that sought to mitigate or avoid practices that the Investment Manager deemed environmentally and/or socially detrimental. Exclusion criteria – as

set out in the Sub-Fund's supplement - were used to achieve this minimum standard. For example, as referenced in the pre-contractual disclosure, issuers that derived a certain percentage of revenue as (determined by the Investment Manager) from thermal coal extraction, tar sands and controversial weapons production were excluded.

- Issuers were also excluded where, in the opinion of the Investment Manager, such issuers were deemed to have violated the minimum standards of business practices represented in widely accepted global conventions.

The Sub-Fund did not invest in SFDR Sustainable Investments.

● *How did the sustainability indicators perform?*

The following sustainability indicator was used to measure how the environmental and/or social characteristics promoted by the Sub-Fund were attained:

- **Exclusion Policy:** An assessment of whether the Sub-Fund had successfully and consistently executed its exclusion policy, to not invest in securities issued by corporate entities that met any of the below:
 - Derived more than 30% of their revenues from tar sands or thermal coal
 - Were deemed by the Investment Manager to have a negative rating relative to key environmental criterion, as per third party data
 - Produce controversial weapons; or
 - Fell below a pre-set environmental score, as per third party data, where that environmental score was deemed relevant by the Investment Manager, or fell below a pre-set score, as per third party data, on key issues relating to climate change themes;
 - Were deemed by the Investment Manager to be involved in severe environmental, social or governance controversies including significant violations of UN Global Compact Principles.

The sustainability indicator performed as follows:

- The Exclusion policy was met because the Sub-Fund did not invest in securities issued by corporate entities that:
 - Derived more than 30% of their revenues from tar sands or thermal coal
 - Were deemed by the Investment Manager to have a negative rating relative to key environmental criterion, as per third party data
 - Produced controversial weapons; or
 - Fell below a pre-set environmental score, as per third party data, where that environmental score was deemed relevant by the Investment Manager, or fell below a pre-set score, as per third party data, on key issues relating to climate change themes;
 - Were deemed by the Investment Manager to be involved in severe environmental, social or governance controversies including significant violations of UN Global Compact Principles.

As at the 31 December the Sub-Fund's investments were 99%* aligned with the environmental and social criteria promoted. The remaining 1% was held in cash and derivatives for hedging purposes and therefore not aligned with environmental and social criteria promoted.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

*This percentage figure is provided as at 31 December 2022 only and does not necessarily reflect the position as at other points during the Reference Period.

● ***...and compared to previous periods?***

No comparison for previous periods is available at the date of this periodic report.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

Not applicable. The Sub-Fund did not make – in accordance with the SFDR pre-contractual disclosure - any investments during the Reference Period which were considered by the Investment Manager to qualify as sustainable investments pursuant to SFDR.

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

Not applicable

— ***How were the indicators for adverse impacts on sustainability factors taken into account?***

Not applicable.

— ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

Not applicable.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did this financial product consider principal adverse impacts on sustainability factors?

The Sub-Fund did not consider principal adverse impacts on sustainability factors during the Reference Period.

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is:
01 January 2022 to
31 December 2022

What were the top investments of this financial product?

#	Largest Investments	Sector	% Assets	Country

15	Rolls-Roy 3.625% 10/14/25	Capital Goods	1.22	United Kingdom

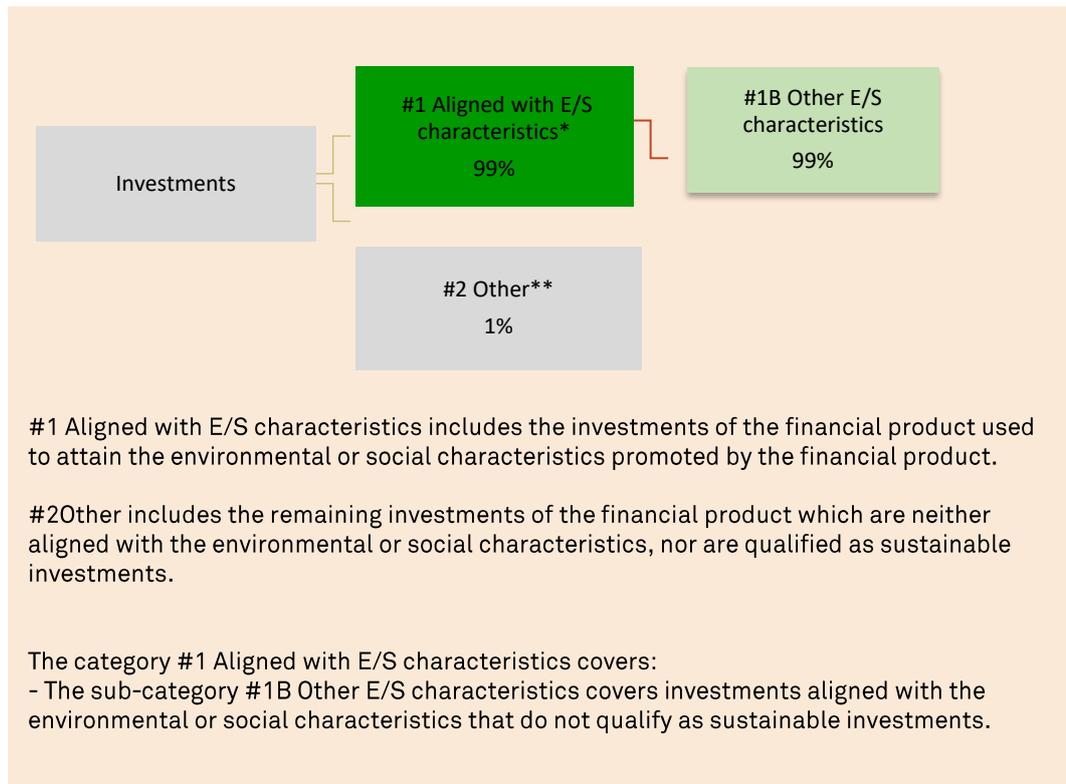

What was the proportion of sustainability-related investments?

What was the asset allocation?

The Sub-Fund promoted environmental or social characteristics during the Reference Period using an exclusionary approach. The figure in #1 and in #1B below represents the proportion of the portfolio that has excluded certain types of investments as detailed in the binding elements of the investment strategy outlined in the supplement and therefore such proportion of the portfolio was aligned with the environmental or social characteristics promoted by the Sub-Fund through the absence of those investments.

The percentages in this section as outlined in the diagram below are provided as at 31 December 2022 and do not necessarily reflect the position as at other points during the Reference Period (which may be materially higher or lower).

Asset allocation
describes the
share of
investments in
specific assets.

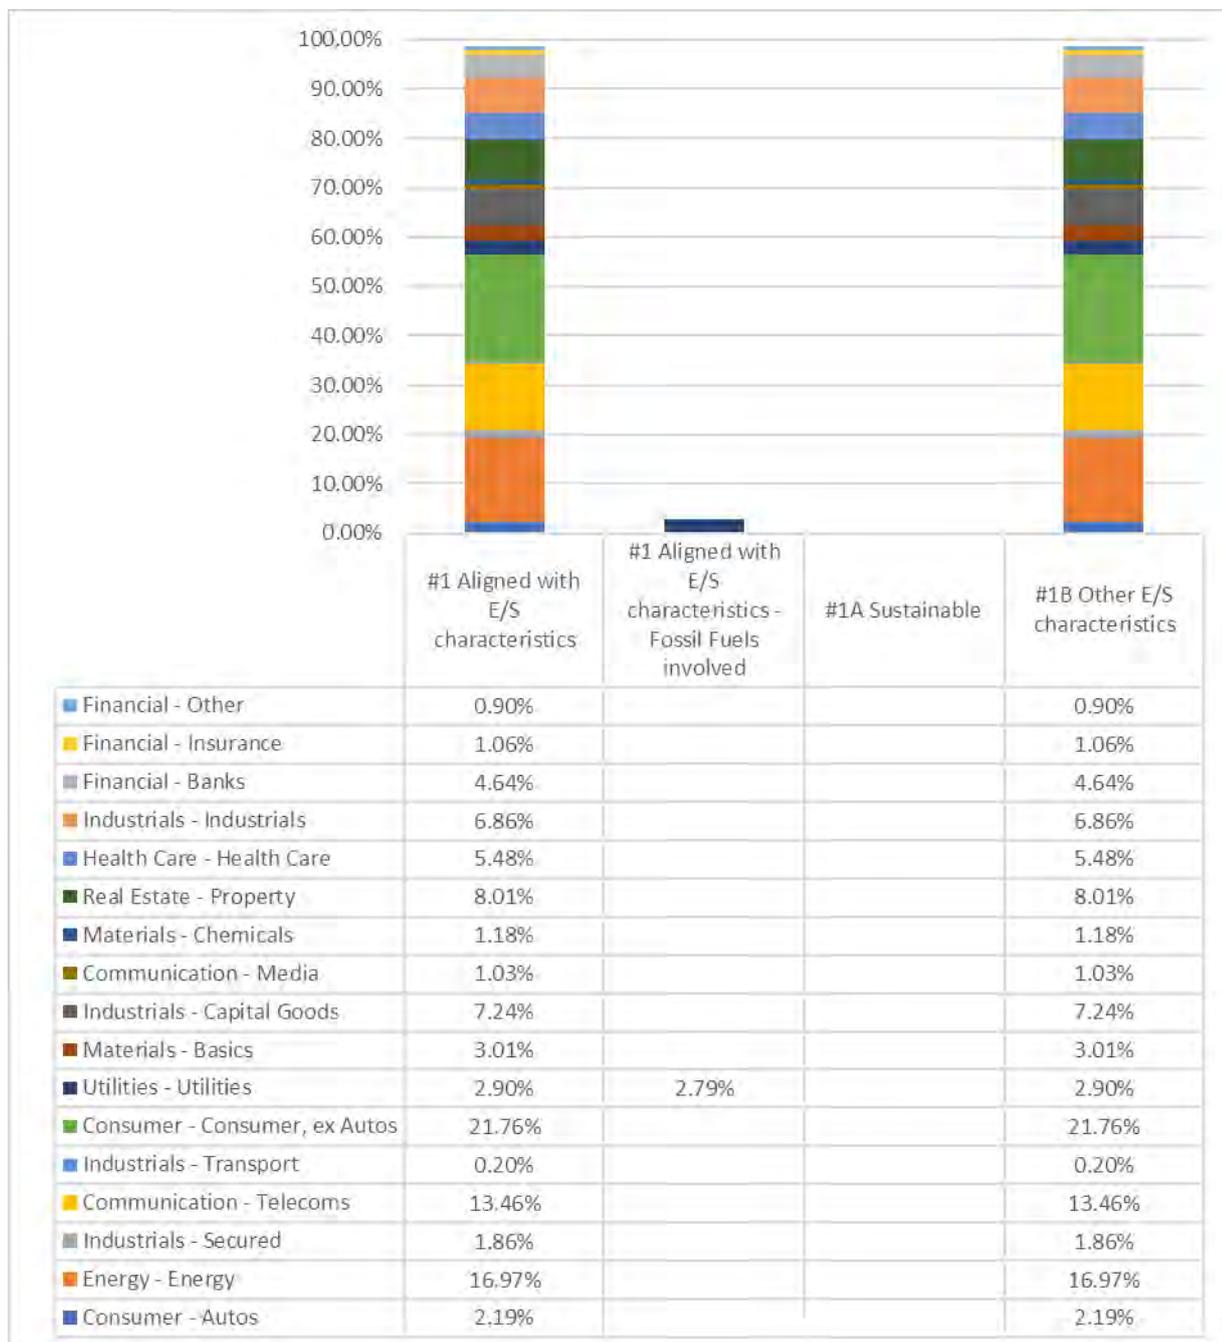

* The Investment Manager was dependent upon information and data from third party data providers in order to be able to consider alignment with some of the E/S characteristics.

** #2 Other contains investments that do not align with E/S characteristics promoted by the fund i.e., cash and derivatives (FDI) for hedging. For further detail please see the question below “**What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?”**”.

● ***In which economic sectors were the investments made***

As at 31 December 2022, the Sub-Fund had mostly been exposed to the Consumer and the Energy sectors, as well as the Telecoms and the Property sectors, as illustrated below.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules. **Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective. Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The above figures are provided as at 31 December 2022 only and do not necessarily reflect the position as at other points during the Reference Period.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not applicable.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?**

Yes:

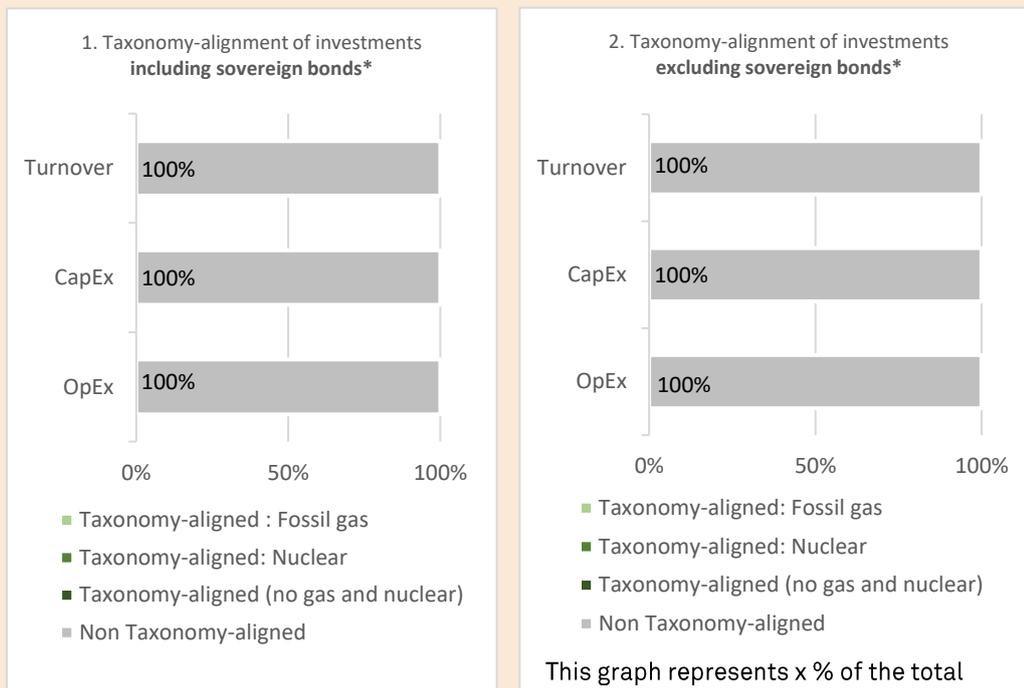

In fossil gas In nuclear energy

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy related economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while*

the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

● **What was the share of investments made in transitional and enabling activities?**

Not applicable.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

No comparison for previous periods is available as at the date of this periodic report.

What was the share of sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

Not applicable.

What was the share of socially sustainable investments?

Not applicable.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

Investments included under "#2 Other" were:

- Liquid and near-cash assets including cash held or used for ancillary liquidity purposes
- Derivatives (FDI) that were specifically used for hedging purposes.

No minimum environment or social safeguards were considered for these investments.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The actions taken to meet the environmental and/or social characteristics during the reference period are:

- The Investment Manager employed exclusion criteria as outlined in the Sub-Fund's supplement.
- The Investment Manager ensured the exclusion criteria was met by excluding certain issuers as outlined in the supplement (and above). This was monitored by coding the binding elements (exclusions) into trading systems.
- The Investment Manager also employed the following internal control mechanisms to monitor adherence to the coded binding elements of the Sub-Fund during the Reference Period:
 - Pre-trade warnings appeared in the trade system prior to trading to inform portfolio managers of a prohibition or limit.
 - Post-trade warnings were also reviewed by the monitoring team and escalated as appropriate.
 - Oversight of internal exclusions lists used to ensure certain binding elements were met, was provided by the Ratings and Exclusions Group (“REG”), a governance group within the Investment Manager.

How did this financial product perform compared to the reference benchmark?

Not applicable.

- ***How does the reference benchmark differ from a broad market index?***

Not applicable.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- ***How did this financial product perform compared with the reference benchmark?***

Not applicable.

- ***How did this financial product perform compared with the broad market index?***

Not applicable.

ANNEX V

Periodic disclosure for the financial products referred to in Article 9, paragraphs 1 to 4a, of Regulation (EU) 2019/2088 and Article 5, first paragraph, of Regulation (EU) 2020/852

Product name: [BNY Mellon Future Earth Fund](#)
 Legal entity identifier: [213800QE71BVU06AGO26](#)

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainable investment objective

Did this financial product have a sustainable investment objective? *[tick and fill in as relevant, the percentage figure represents the sustainable investments]*

<input checked="" type="radio"/> <input type="radio"/> Yes	<input type="radio"/> <input checked="" type="radio"/> No
<p><input checked="" type="checkbox"/> It made sustainable investments with an environmental objective: 98.4%</p> <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <p><input type="checkbox"/> It made sustainable investments with a social objective</p>	<p><input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments</p> <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective <p><input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments</p>

To what extent was the sustainable investment objective of this financial product met? *[list the sustainable investment objective of this financial product, and describe how the sustainable investments contributed to the sustainable investment objective. For the financial products referred to in Article 5, first paragraph, of Regulation (EU) 2020/852, in respect of sustainable investments with environmental objectives, indicate to which environmental objectives set out in Article 9 of Regulation (EU) 2020/852 to the investment underlying the financial product contributed to. For the financial products referred to in*

Sustainability indicators measure how the sustainable objectives of this financial product are attained.

Article 9(3) of Regulation (EU) 2019/2088, indicate how the objective of a reduction in carbon emissions was aligned with the Paris Agreement]

The sustainable investment objective of the Sub-Fund was met to the following extent during the reference period 31 May 2022 to 31 December 2022 (the “Reference Period”).

The Sub-Fund aims to achieve long-term capital growth and has a sustainable investment objective. Specifically, the Sub-Fund aims to contribute to an environmental objective by investing in securities of companies located worldwide which provide products, services and solutions that reduce environmental and natural resource pressures on our Earth.

The SFDR Sustainable Investments underlying this Sub-Fund contributed to the sustainable investment objective by investing in companies that align to the Investment Manager’s proprietary Future Earth framework that demonstrate positive impacts on the earth and environment.

The SFDR Sustainable Investments underlying this Sub- Fund did not contribute to the environmental objectives set out in Article 9 of the EU Taxonomy Regulation.

The SFDR Sustainable Investments underlying this Sub-Fund contributed to environmental objectives not aligned with Article 9 of the EU Taxonomy Regulation.

The SFDR Sustainable Investments underlying this Sub-Fund contributed to the following environmental objectives not aligned with the EU Taxonomy:

- Electrification
- Net Zero
- Resource use optimisation contributing to lower environmental footprint and carbon intensity
- Waste reduction, reuse, and recycling
- Generation of renewable energy or production of key parts of services for use in the renewable energy sector
- Reducing pollutants or emissions through nature based solutions
- Water treatment and protection

The SFDR Sustainable Investments underlying this Sub-Fund did not contribute to social objectives.

● ***How did the sustainability indicators perform?***

The following sustainability indicators are used to measure how the sustainable investment objective of the Sub-Fund was attained:

Sustainability Indicator #1: No more than 5% of Net Asset Value in companies that:

- Are in heavy emitting sectors as defined by the International Energy Agency (IEA); and
- Have a business incompatible with a scenario in which global temperatures rise more than 2 degrees above pre-industrial levels; and
- Do not have an adequate strategy to address emissions / climate change, or a credible transition plan.

In addition, where third party data is not available to assess these criteria or indicates that specific companies meet these criteria, the Investment Manager retains discretion to determine alignment with this sustainability indicator solely on the basis of its qualitative review process.

Sustainability Indicator #2: 0% of Net Asset Value in investee companies that have been involved in violations of the UNGC principles.

Sustainability Indicator #3: A weighted average ESG risk rating of 'medium' or better at the portfolio level. Such rating to be determined using third party data.

Sustainability Indicator #4: All investments to align to the Investment Manager's proprietary Future Earth framework that demonstrate positive impacts on the earth and environment, as further evidenced through qualitative case studies.

The sustainability indicators performed as follows:

Indicator #	How did the indicator perform in the reference period?
Sustainability Indicator #1	0%
Sustainability Indicator #2	0%
Sustainability Indicator #3	Medium
Sustainability Indicator #4	100% of investments (excluding those held for liquidity and hedging purposes) aligned to the Investment Manager's proprietary Future Earth

framework and demonstrated positive impacts on the earth and environment, as evidenced through qualitative case studies appended to this document.

The data coverage for sustainability indicators #1 and #2 was 98.4% of the Sub-Fund's investments net of instruments used for liquidity and hedging purposes.

The data coverage for sustainability indicator #3 was 96% of the Sub-Fund's investments by weight, net of instruments used for liquidity and hedging purposes.

The data coverage for sustainability indicator #4 was 100% of the Sub-Fund's investments net of instruments used for liquidity and hedging purposes.

No derivatives (FDI) were used to attain the sustainable investment objective of the Sub-Fund.

- **...and compared to previous periods?** *[include for financial products where at least one previous periodic report was provided]*

No comparison for previous periods is available at the date of this periodic report.

- **How did the sustainable investments not cause significant harm to any sustainable investment objective?**

The Investment Manager determined that SFDR Sustainable Investments in the Sub-Fund did no significant harm to any environmental or social objectives by assessing each SFDR Sustainable Investment's involvement in areas deemed to be harmful from an environmental or social perspective. Issuers that had involvement in activities deemed to be harmful from an environmental or social perspective were excluded from investment. Involvement in such activities was monitored on an ongoing basis.

- **How were the indicators for adverse impacts on sustainability factors taken into account?**

The Investment Manager reviewed the indicators for adverse impacts on sustainability factors for all SFDR Sustainable Investments where data was available. The Investment Manager reviewed PAIs for investee issuers using data from a designated third party data provider. If a given PAI or PAIs

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

for an issuer appeared to exceed expectations based on the data obtained from the designated third-party data provider, further qualitative review was undertaken with respect to those issuer(s) and that product in order to determine whether such data indicated the evidence of significant harm. Where there were data gaps and the PAI was considered material for a company's sector, the Investment Manager's internal qualitative assessment was used to assess the PAIs.

The Sub-Fund took into account the following PAIs from:

- Table 1 of Annex I of the Commission Delegated Regulation:
 1. GHG emissions: Scope 1, 2 and 3
 2. Carbon footprint: Scope 1, 2 and 3
 3. GHG intensity of investee companies: Scope 1, 2 and 3
 4. Exposure to companies active in the fossil fuel sector
 5. Share of non-renewable energy consumption and production
 6. Energy consumption intensity per high impact climate sector: NACE A, B, C, D, E, F, G, H and L
 7. Activities negatively affecting biodiversity-sensitive areas
 8. Emissions to water
 9. Hazardous waste and radioactive waste ratio
 10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
 11. Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises
 12. Unadjusted gender pay gap
 13. Board gender diversity
 14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons, and biological weapons).
- Table 2 of Annex I of the Commission Delegated Regulation: 4. Investments in companies without carbon emission reduction initiatives

- Table 3 of Annex I of the Commission Delegated Regulation: 9. Lack of a human rights policy. 17. Number of convictions and amount of fines for violation of anti-corruption and anti-bribery laws.

— — — *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

The OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, including the principles and rights set out in the eight fundamental conventions identified in the Declaration of the International Labour Organisation on Fundamental Principles and Rights at Work and the International Bill of Human Rights (the “Responsible Business Practices”) collectively cover a very broad range of areas of responsible business, encompassing everything from labour rights to consumer protection to support for internationally recognised human rights within a company’s or issuer’s sphere of influence.

SFDR Sustainable Investments were considered aligned with the Responsible Business Practices as each company invested in passed screens provided by third parties which either directly cover one or more of the Responsible Business Practices or are considered appropriate proxies for one or more of the Responsible Business Practices. Each company invested in also passed the Investment Manager’s own qualitative review process which takes into account the Responsible Business Practices. In addition, where the companies invested in do not pass the relevant screens provided by third parties, the Investment Manager retains discretion to establish alignment with the Responsible Business Practices solely on the basis of its qualitative review process.

How did this financial product consider principal adverse impacts on sustainability factors? *[include section if the financial product considered principal adverse impacts on sustainability factors]*

The Investment Manager reviewed principal adverse impacts at the product level on a frequent basis during the reference period, notwithstanding certain data coverage and data quality issues as further described below. The Investment Manager reviewed PAIs for investee issuers using data from a designated third party data provider. If a given PAI or PAIs for an issuer or product appeared to exceed expectations based on the data obtained from the designated third-party data provider, further qualitative review was undertaken with respect to those issuer(s) and that product in order to determine whether such data indicated the evidence of significant harm. In cases where, in the view of the Investment Manager, unresolvable significant harm was identified following further qualitative review, further action would be taken up to and including divestment.

Over the course of the reference period no unresolvable significant harm was identified for investments in the Sub-Fund. Where there were data gaps and the PAI was considered material for a company's sector, the Investment Manager's internal qualitative assessment was used to assess the PAIs.

PAIs were categorised based on their characteristics (including their materiality and the Investment Manager's ability to estimate them), and such categories were used for the purpose of determining the actions and outcome when assessing the PAIs.

The Investment Manager was dependent upon information and data from third party data providers in order to be able to consider principal adverse impacts on sustainability factors. The availability and quality of such data impacted the extent to which each such PAI could be considered. In particular, the lack or incomplete reporting of metrics by some issuers meant that there was limited data on some adverse indicators. As such for some of the mandatory PAIs, data coverage was low. The Investment Manager's analysis of adverse indicators relied on this third-party information and data, and where such information was not available or was incomplete, the Investment Manager's analysis of adverse indicators was necessarily limited. As the data availability improves over time, it is expected that PAIs can be applied to a greater portion of the Investment Manager's investable universe. This will allow for enhanced insight into the adverse impacts caused by issuers.

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: **31st May 2022 – 31st December 2022**

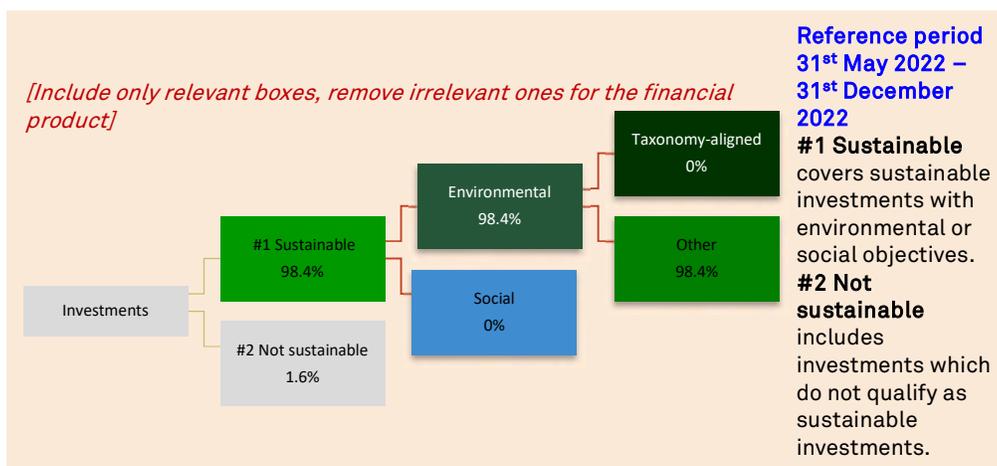

#	Largest Investments	Sector	% Assets	Country
1	NEXTERA ENERGY I USD 0.01	Utilities - Utilities	6.53	USA
2	HUBBELL INC USD 0.01	Industrials - Capital Goods	5.33	USA

15	ORSTED A/S DKK 10	Utilities - Utilities	2.63	Denmark

What was the proportion of sustainability-related investments?

● What was the asset allocation?

The asset allocation diagram illustrates the asset allocation of this Sub-Fund. 98.4% of the Net Asset Value was invested in SFDR Sustainable Investments with an environmental objective. 98.4% of Net Asset Value was invested in SFDR Sustainable Investments with an environmental objective not aligned with the EU Taxonomy. 0% of the Net Asset Value of the Sub-Fund was invested in sustainable investments with an environmental objective aligned with the EU Taxonomy.

#1 Sustainable: 98.4% of Net Asset Value

- Other environmental: 98.4% of Net Asset Value

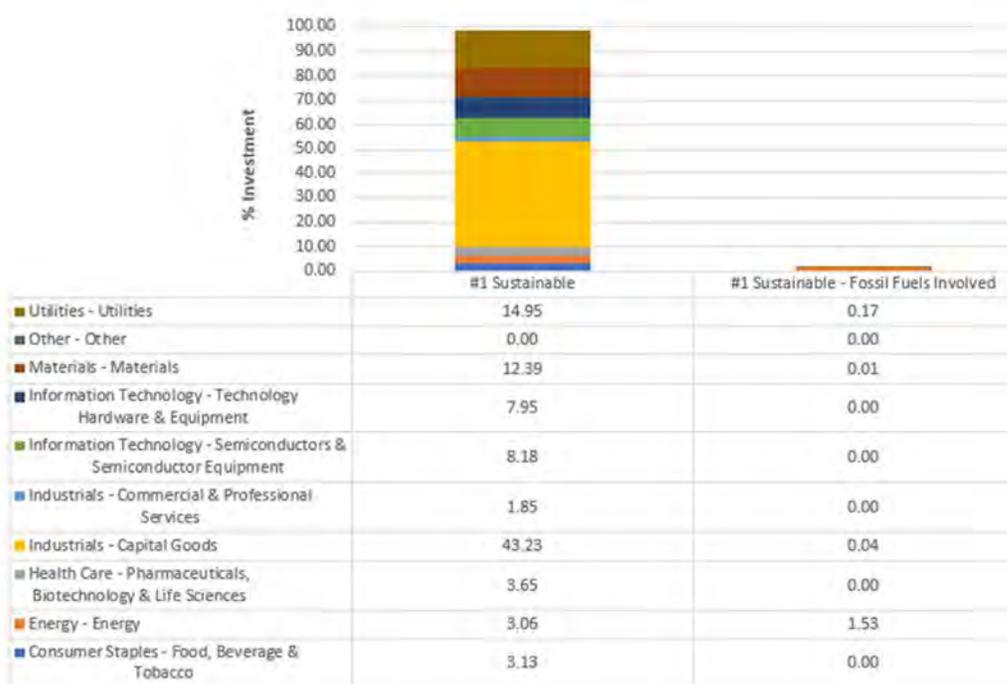

Asset allocation describes the share of investments in specific assets.

- Social: 0% of Net Asset Value

#2 Not Sustainable: 1.6% of Net Asset Value

- **In which economic sectors were the investments made?** *[include information referred to in Article Article 61(c) of this Regulation]*

Asset Allocation by Sector and Sub-Sector per Sustainable Classification

- To  **what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?** *[include section for the financial products referred to in Article 5, first paragraph, of Regulation (EU) 2020/852 and include information in accordance with Article 62 of this Regulation]*

SFDR Sustainable Investments with environmental objectives were not aligned with the EU Taxonomy.

The assessment of whether these investments complied with the EU Criteria for Environmentally Sustainable Economic Activities was not subject to an assurance provided by one or more auditors or a review by one or more third parties.

[include note for the financial products referred to in Article 5, first paragraph,

[include note for the financial products referred to in Article 5, first paragraph, of Regulation (EU) 2020/852 that invest in environmental economic activities that are not environmentally sustainable economic activities]

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under the EU Taxonomy.

yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

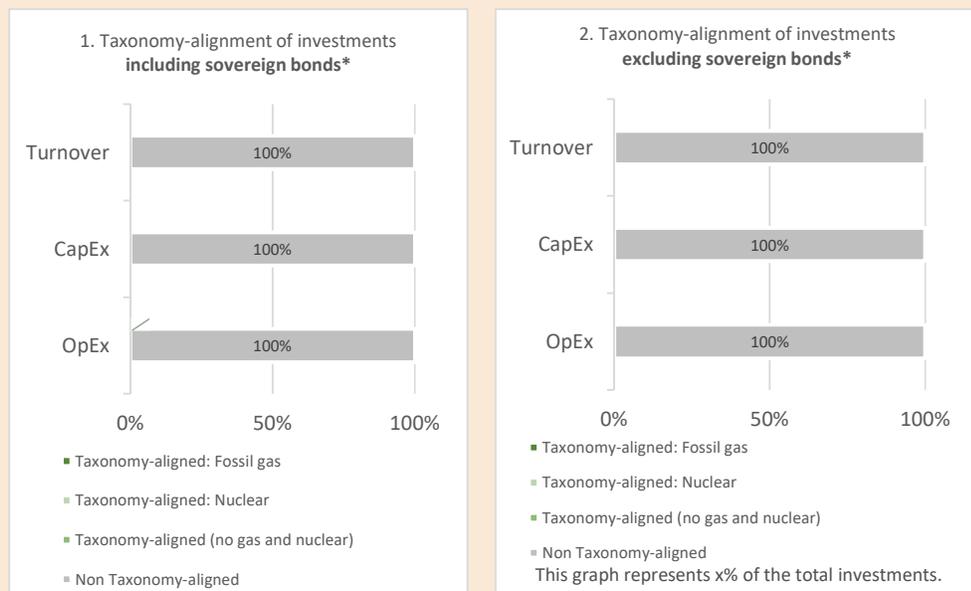

Yes: [specify below, and details in the graphs of the box]

In fossil gas In nuclear energy

No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

[Include information on Taxonomy aligned fossil gas and nuclear energy and the explanatory text in the left hand margin on the previous page only if the financial product invested in fossil gas and/or nuclear energy Taxonomy-aligned economic activities during the reference period]

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities? [include a breakdown of the proportions of investments during the reference period]

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

0.00%

- **How did the percentage of investments aligned with the EU Taxonomy compare with previous reference periods?** *[include where at least one previous periodic report was provided]*

No comparison for previous periods is available at the date of this periodic report.

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy? *[include only for the financial products referred to in Article 5, first paragraph, of Regulation (EU) 2020/852 where the financial product included investments with an environmental objective that invested in economic activities that are not environmentally sustainable economic activities and explain why the financial product invested in economic activities that were not taxonomy-aligned]*

The Sub-Fund invested 98.4% of NAV in SFDR Sustainable Investments with an environmental objective that were not aligned with the EU Taxonomy.

The Sub-Fund invested in SFDR Sustainable Investments with an environmental objective in economic activities that are not Taxonomy-aligned because evidence of taxonomy alignment is dependent on the availability of accurate, detailed and complete data on the investee companies to which the Sub-Fund has exposure. At this time, such information is not necessarily readily available from public disclosures by investee companies. While data availability is improving and is expected to improve over time, the data currently available is limited and varies between investee companies.

What was the share of socially sustainable investments? *[include only where the financial product includes sustainable investments with a social objective]*

N/A

What investments were included under “not sustainable”, what was their purpose and were there any minimum environmental or social safeguards?

The Sub-Fund invested 1.6% of Net Asset Value in category #2 (Not Sustainable) which comprised of instruments held for liquidity purposes only, including cash and cash equivalents. These instruments were held to ensure the Sub-Fund had sufficient liquidity. These instruments were not subject to environmental or social

safeguards as the Investment Manager does not view environmental or social considerations as relevant for these instruments.

What actions have been taken to attain the sustainable investment objective during the reference period? *[list the actions taken within the period covered by the periodic report to attain the sustainable investment objective of the financial product, including shareholder engagement as referred to in Article 3g of Directive 2007/36/EC and any other engagement relating to the sustainable investment objective]*

In order to attain the sustainable investment objective, the Investment Manager took the following actions:

- Invested at least 75% of its Net Asset Value in SFDR Sustainable Investments
- Excluded issuers that produce tobacco products
- Excluded issuers that derive more than 10% of turnover from the sale of tobacco
- Excluded issuers that generate revenues from the production of controversial weapons
- Excluded issuers in breach of the Principles of the UN Global Compact (which includes principles relating to human rights, labour, environment and anti-corruption)
- Invested at least 90% of the Net Asset Value of the Sub-Fund net of the Sub-Fund's exposure to cash and liquid near cash assets, money market funds, and currency related FDI and FDI used for hedging purposes (the "Non-ESG Assets")) in companies that meet the Investment Manager's ESG and sustainability criteria at time of purchase and on an ongoing basis.
- Invested at least 75% of its Net Asset Value in companies that contribute to the environmental objective of reducing environmental and natural resource pressures on our Earth.

Engagement is not a part of the environmental investment strategy of the Sub-Fund. However, engagement is an integral part of the Investment Manager's approach to investing as they believe that constructive dialogue with management teams not only affords real insight into how a company operates, it is an opportunity to advocate for positive change.

How did this financial product perform compared to the reference sustainable benchmark? *[include section only for the financial products referred to in Article 9(1) of Regulation (EU) 2019/2088 and indicate where the methodology used for the calculation of the designated index can be found]*

A reference benchmark has not been designated for the purpose of attaining the sustainable investment objective of the Sub-Fund.

[include note for the financial products referred to in Article 9(1) of Regulation (EU) 2019/2088]

Qualitative Case Studies – Demonstration of Alignment to the Investment Manager’s Proprietary Future Earth Framework for the Top 5 Holdings (by weight) in the fund as of 31st December 2022

The following information demonstrates the contribution to environmental objectives made by the top five holdings by weight in the Sub-Fund as of the end of the reference period (31st December 2022), by way of alignment to the Investment Manager’s proprietary Future Earth framework. The intention of this information is to illustrate the approach taken by the Investment Manager for all investments in the Sub-Fund (excluding instruments used for liquidity and hedging purposes). All investments in the Sub-Fund are aligned to environmental objectives through alignment to the Investment Manager’s proprietary framework.

#	Holding	Weight in Sub-Fund as of 31-Dec-2022 (%)	Summary	Demonstration of alignment to the sustainable investment objective
1	NEXTERA ENERGY INC	6.18%	NextEra Energy, Inc. provides sustainable energy generation and distribution services. The company generates electricity through wind, solar, and natural gas. Through its subsidiaries, NextEra Energy also operates multiple commercial nuclear power units.	NextEra is a world class developer of renewable energy. It is a diversified clean energy company with a business strategy that emphasizes the development and operation of long-term contracted assets with a focus on renewable projects.
2	HUBBELL INC	5.69%	Hubbell Incorporated manufactures electrical and electronic products for commercial, industrial, utility, and telecommunications markets. The company's products include plugs, receptacles, connectors, lighting fixtures, high voltage test and measurement equipment, and voice and data signal processing components. Hubbell operates in the United States and overseas.	Hubbell is a global manufacturer of electrical equipment and therefore a facilitator of electrification across power, industrial, commercial and residential sectors. The business operates in two main segments: electrical solutions which provides products such as wiring, connectors and lighting products. Secondly the utility solutions segment provides products associated with electrical power transmission and supply.

#	Holding	Weight in Sub-Fund as of 31-Dec-2022 (%)	Summary	Demonstration of alignment to the sustainable investment objective
3	INGERSOLL RAND INC	4.84%	Ingersoll Rand Inc. manufactures flow control equipment. The Company offers vacuum systems, bottle blowers, pumps, and air and gas compressors. Ingersoll-Rand serves customers worldwide.	Ingersoll Rand is the leading player in the market for industrial pumps and compressors. This is a key piece of machinery used across a wide range of industries. Driving efficiencies in this area is an important component of helping industrials achieve net zero commitments.
4	TRANE TECHNOLOGIES PLC	4.61%	Trane Technologies Public Limited Company manufactures industrial equipment. The company offers central heaters, air conditioners, electric vehicles, air cleaners, and fluid handling products. Trane Technologies serves customers worldwide.	Trane is a leading provider of HVAC (Heating, Ventilation and Air Conditioning) globally, with the US market dominating its business. The company has a strong sustainability agenda, with its product development and innovation aligned with reducing the carbon footprint of cooling/heating buildings. ~35-40% of a building's electricity cost and carbon footprint is from the HVAC system and operating buildings account for ~30% of GHG emissions which suggests that upgrading commercial HVAC equipment has the potential to address 10-12% of total GHG emissions while building owners with a compelling 2-3 yr payback
5	DEERE	4.14%	Deere & Company manufactures and distributes a range of agricultural, construction, forestry, and commercial and consumer equipment. The company supplies replacement parts for its own products and for those of other manufacturers. Deere also provides product and parts financing services. Deere and Company extends its services and products worldwide.	Agricultural machinery is largest component of earnings, where Deere's leadership in digital/precision agriculture is a key driver of the company's competitive advantage. Precision agriculture is key to producing more food with fewer inputs (crop chemicals, fertilisers, etc.) and lowering the heavy environmental/carbon footprint of agriculture.

ANNEX IV

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name: BNY Mellon Long-Term Global Equity Fund
Legal entity identifier: 213800ESHZR9UGUCT211

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective? *[tick and fill in as relevant, the percentage figure represents sustainable investments]*

Yes

No

It made sustainable investments with an environmental objective: ___%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made sustainable investments with a social objective: ___%

It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 13% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met? *[list the environmental and/or social characteristics promoted by the financial product. For the financial products referred to in Article 6, first paragraph, of Regulation (EU) 2020/852, in respect of sustainable investments with environmental objectives, list the environmental objectives set out in Article 9 of that Regulation to which the sustainable investment underlying the financial product contributed. For financial products that made sustainable investments with social objectives, list the social objectives]*

The Sub-Fund converted to Article 8 on the 7 November 2022; therefore the 'reference period' for this periodic report is from 7 November 2022 to 31 December 2022. Please note due to unanticipated operational reasons, that are not expected to reoccur, there is a slight mismatch between the dates the data points were taken and the reference period. The first data point was as at 31 October 2022 (to allow for analysis prior to the date the Sub-Fund complied with Article 8 requirements) and the second as at 16 January 2023.

During the reference period, this Sub-Fund promoted good Environmental, Social & Governance (ESG) practices or characteristics through deliberately avoiding investment in companies with below threshold ESG credentials [as defined by the Investment Manager]. In general, the Sub-Fund's portfolio was comprised of companies that embrace high standards of ESG practice or were attractive due to their progression in environmental & social practice and exhibit good governance.

Environmental and social credentials considered included the themes detailed below:

Environmental

- Greenhouse gas emissions
- Biodiversity and natural resources
- Climate and transition risks
- Pollution and waste management

Social

- Business ethics, bribery and corruption
- Data privacy and security
- Labour practices and human rights safeguards
- Diversity, equality and inclusion

A reference benchmark was not designated for the purpose of attaining the environmental or social characteristics promoted by the Sub-Fund.

The SFDR Sustainable Investments underlying this Sub-Fund did not contribute to the environmental objectives set out in Article 9 of the EU Taxonomy Regulation.

The Sub-Fund's SFDR Sustainable Investments with a social objective were aligned with the UN Sustainable Development Goal 3 – 'Good Health and Well-Being'. The Sub-Fund's SFDR Sustainable Investment with an environmental objective was aligned with the UN Sustainable Development Goal 12 – 'Responsible Consumption and Production'.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● *How did the sustainability indicators perform?*

The Sub-Fund used 14 data points relating to the themes detailed below as sustainability indicators to measure how the environmental or social characteristics promoted by the Sub-Fund were attained.

Environmental:

- Greenhouse gas emissions:
 1. *Carbon intensity scope 1 & 2*
- Biodiversity and natural resources:
 2. *Company has operations located in biodiversity-sensitive areas and is involved in controversies with severe impact on the environment*
 3. *Operational sites owned, leased, managed in, or adjacent to, protected areas and areas of high biodiversity value outside protected areas*
- Climate and transition risks:
 4. *Active fossil fuel sector exposure*
- Pollution and waste management:
 5. *Environment controversy score*

Social:

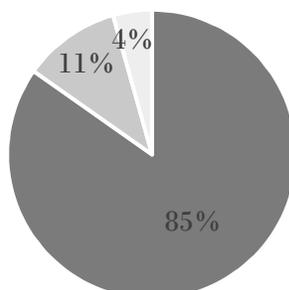

- Business ethics, bribery and corruption
 6. *Controversial weapons*
 7. *Total number of convictions for violations of anti-corruption and anti-bribery laws*
- Data privacy and security
 8. *Customers - Privacy & data security score*
 9. *Data security breaches controversies*
- Labour practices and human rights safeguards
 10. *Labour compliance - Broad*
 11. *Human rights compliance*
 12. *Human rights - Impact on local communities score*
 13. *Customers - Product quality & safety score*
- Diversity, equality and inclusion
 14. *Discrimination and diversity controversies*

Each of the Sub-Fund's equity investments was measured against the 14 sustainability indicators listed above prior to the Sub-Fund converting to SFDR Article 8, or prior to purchase if after that date, and at the end of the reference period. Data was compared to internally set thresholds, some were absolute values and others were sector averages. If a threshold was met, then a flag was generated which required analysis, comment and conclusion from the 'Stock Champion' (a member of the Investment Manager's Research team responsible for the research in the equity company), and where relevant, further review from the Additional Objectives Portfolios Group, an internal governance forum.

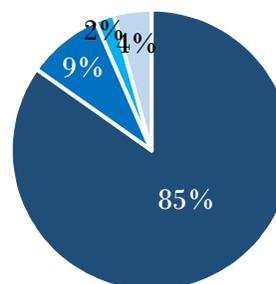

The analysis was reviewed by the Additional Objectives Portfolios Group. Given the relatively short reference period for the Sub-Fund's first SFDR periodic report, meaningful information on progression against those indicators is limited. However, the following points are of note:

- o Greater than 80% of the Sub-Fund's investments have no flags relating to environmental sustainability indicators. The proportion of investments with 0, 1 or 2 flags was stable over the two time points. This was also the case for flags relating to social sustainability indicators. The pie charts below illustrate the percentage of companies with flags relating to either social or environmental sustainability indicators at the end of the reference period.

% of Companies with Environmental Flags

% of Companies with Social Flags

■ No Flags ■ 1 Flag ■ 2 Flags ■ No Flags ■ 1 Flag ■ 2 Flags ■ 3 Flags

- o 3 new flags were raised, 2 of which related to one equity company, between the two time points. For each investment, the Stock Champion analysed the information which was reviewed by the Additional Objectives Group and closed out.

1. Company A

- *Why were 2 flags raised under the Social theme 'labour practices and human rights'?* The US international fashion and apparel brand retailer has faced criticism for several years relating to allegations of sourcing from suppliers in China accused of employing ethnic minorities through labour-transfer programmes. Although there are no new developments relating to the company specifically, the third-party data provider revised their methodology for the classification of allegations relating to exploitation of minority groups in June 2022, and have subsequently upgraded the severity of controversies connected to human rights issues relating to Uighur forced labour programmes, resulting in the company being subsequently added to the MSCI 'UNGC' watch list during the reference period.
- *Stock Champion analysis:* The company publicly voiced concerns about reports that Uighurs were being forced to pick cotton in Xinjiang, and stated that they did not source products from the region. It is reasonable to conclude that the company has taken a number of meaningful remedial actions, and that it is taking appropriate steps within its sphere of influence to "uphold the elimination of all forms of forced and compulsory labour", the relevant UN Global Compact principle (4). The issue is being closely monitored.

2. Company B – a new purchase during the reference period

- *Why was a flag raised under the Environmental theme 'climate and transition risks'?* The US consumer staples company is the global leader

in membership-only warehouse clubs. It is a retailer of petrol and diesel at its clubs and has no exposure to upstream exploration.

- *Stock Champion analysis*: Fuel retail typically accounts for high-single digit to teens proportion of the company's sales. The primary purpose of the fuel business is to attract members to store. Electric vehicle (EV) charging stations can therefore be added to future club openings, as has been done to some new clubs in California, for the same purpose. As such the Investment Manager does not think rapid transition risk translates to material risk for the company over the long-term EV transition timeframe.
- 4 flags which were raised at the first point of assessment were not raised latterly.

No holdings were sold during the reference period as a result of analysis against the sustainability indicators detailed above.

No derivatives (FDI) were used to meet the environmental or social characteristics.

- ***...and compared to previous periods?*** *[include for financial products where at least one previous periodic report was provided]*

No comparison for previous periods is available at the date of this periodic report.

- ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?*** *[include for financial products that made sustainable investments, where not included in the reply to the above question, describe the objectives. Describe how the sustainable investments contributed to the sustainable investment objective. For the financial products referred to in Article 6, first paragraph, of Regulation (EU) 2020/852, list the environmental objectives set out in Article 9 of that Regulation to which the sustainable investment underlying the financial product contributed]*

The social objective to which the SFDR Sustainable Investments contributed was the UN Sustainable Development Goal 3 – ‘Good Health and Well-Being’. The environmental objective to which the SFDR Sustainable Investments contributed was UN Sustainable Development Goal 12 – ‘Responsible Consumption and Production’.

A SFDR Sustainable Investment contributed to this objective by having a minimum of 30% revenue aligned with UN Sustainable Development Goals. The Sub-Fund’s five SFDR Sustainable Investments contributed to that objective as follows:

SFDR Sustainable Investments with a social objective

- Novo Nordisk: global pharmaceuticals company largely focused on diabetes and obesity: 89% of revenue aligned with UN Sustainable Development Goal 3 ‘Good Health and Well-Being’.
- Edwards Lifesciences: market leader in the treatment of aortic stenosis, a serious heart condition that affects millions of people worldwide: 84% of revenues aligned with UN Sustainable Development Goal 3 ‘Good Health and Well-Being’.

- CSL: one of the largest companies in the global blood plasma products industry whose treatments address rare, mostly chronic conditions such as immune and blood clotting disorders: 58% of revenue aligned with UN Sustainable Development Goal 3 'Good Health and Well-Being'.
- Roche: global pharmaceuticals and diagnostics business with a world leading oncology franchise: 47% of revenue aligned with UN Sustainable Development Goal 3 'Good Health and Well-Being'.

SFDR Sustainable Investment with an environmental objective

- Dassault Systemes: the world's leading producer of 3D Product Lifecycle Management software: 35% of revenue aligned with UN Sustainable Development Goal 12 – 'Responsible Consumption and Production'.

The SFDR Sustainable Investments underlying this Sub-Fund did not contribute to the environmental objectives set out in Article 9 of the EU Taxonomy Regulation.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective? [include where the financial product includes sustainable investments]

How were the indicators for adverse impacts on sustainability factors taken into account?

The Sub-Fund's SFDR Sustainable Investments that met the minimum revenue threshold, as previously described, were then screened against a number of principal adverse impacts (PAIs) indicators for 'do no significant harm' (DNSH). The mandatory indicators in Table 1 of Annex 1 and any relevant indicators (on a sector by sector basis) from Tables 2 and 3 of that Annex were taken into account as follows during the reference period, 7 November 2022 to 31 December 2022:

- Indicators in Table 1 of Annex 1:
 1. Greenhouse gas emissions: Scope 1, 2 and 3
 3. Greenhouse gas intensity of investee companies: Scope 1, 2 and 3
 4. Exposure to companies active in the fossil fuel sector
 5. Share of non-renewable energy consumption and production
 6. Energy consumption intensity per high impact climate sector
 7. Activities negatively affecting biodiversity-sensitive areas
 8. Emissions to water
 9. Hazardous waste and radioactive waste ratio
 10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
 11. Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises
 12. Unadjusted gender pay gap
 13. Board gender diversity

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons, and biological weapons)

The Sub-Fund considered all of the mandatory indicators included in Table 1 of Annex 1 with the exception of PAI 2, carbon footprint. For the DNSH assessment, the PAIs are required to be considered at a stock level. PAI 1 was converted to an intensity measure rather than an absolute number for this analysis. This was because the original PAI was designed for portfolio level consideration rather than use at the company level but the analysis for DNSH must be at the company level. PAI 2 is not considered separately as, having converted PAI 1 to an intensity measure, it would simply repeat the same information covered in PAIs 1 and 3.

- Indicators in Table 2 of Annex 1:
 4. Investments in companies without carbon emission reduction initiatives
 8. Exposure to areas of high water stress
- Indicators in Table 3 of Annex 1:
 4. Lack of a supplier code of conduct
 6. Insufficient whistle-blower protection
 7. Incidents of discrimination
 9. Lack of a human rights policy
 14. Number of identified cases of severe human rights issues and incidents
 15. Lack of anti-corruption and anti-bribery policies

Each indicator was either considered versus a sector median or absolute threshold for all companies that met the percentage revenue threshold to qualify as a sustainable investment.

For quantitative indicators, a flag was raised if the designated threshold for sector median was surpassed. In such instances, further analysis was undertaken to deem whether the investment did no significant harm and therefore was in fact a sustainable investment under SFDR. Across the 5 securities which qualified as SFDR Sustainable Investments, there were 19 occasions where such a flag was raised and the majority of those related to data gaps.

- 1 new flag was raised between the two time points relating to a US healthcare company for PAI 3. The stock's data point remained unchanged during the period however, the sector median value declined resulting in a flag being raised.
- 1 flag which was raised at the first point in time was not raised latterly.

If the data was not available from the third-party data provider, generally the first step was to contact the investee company. If the company did not report that data point, then proxy or alternative contextual information was used.

For other indicators, a flag was raised for a below threshold response. In such instances, further analysis was undertaken to deem whether the investment did no significant harm and therefore was in fact a SFDR Sustainable Investment. Across the 5 securities which qualified as SFDR Sustainable Investments, there were 10 occasions where such a flag was raised of which half were due to data gaps. No new flags were raised between the two time points and no flags were withdrawn.

If the data was not available from the third-party data provider, generally the first step was to contact the investee company. If the company did not report that data point, then proxy or alternative contextual information was used.

In all cases where flags were raised, following further analysis it was concluded that there was no significant harm to any environmental or social sustainable investment objective and therefore the companies qualified as SFDR Sustainable Investments.

— — — *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

The OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, including the principles and rights set out in the eight fundamental conventions identified in the Declaration of the International Labour Organisation on Fundamental Principles and Rights at Work and the International Bill of Human Rights (the “Responsible Business Practices”) collectively cover a very broad range of areas of responsible business, encompassing everything from labour rights to consumer protection to support for internationally recognised human rights within a company’s or issuer’s sphere of influence.

SFDR Sustainable Investments were considered aligned with the Responsible Business Practices as no flags were raised in relation to the specific Human Rights, Labour, overall controversy, and tax compliance screens which either directly cover one or more of the Responsible Business Practices or are considered an appropriate proxy for one or more of the Responsible Business Practices.

[Include a statement for the financial products referred to in Article 6, first paragraph, of Regulation (EU) 2020/852]

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors? *[include section if the financial product considered principal adverse impacts on sustainability factors]*

In accordance with Article 7 of SFDR, the adverse impacts of investment decisions on sustainability factors were considered in line with the PAI regime for this Sub-

Fund from the perspective of the harm that investment positions might do externally to sustainability factors. The Sub-Fund considered 7 of the mandatory indicators included in Table 1 of Annex 1 at a portfolio level. Those were:

- PAI 2 Carbon footprint
- PAI 3 Greenhouse gas intensity of investee companies
- PAI 4 Exposure to companies active in the fossil fuel sector
- PAI 7 Activities negatively affecting biodiversity-sensitive areas
- PAI 10 Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
- PAI 13 Board gender diversity
- PAI 14 Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons, and biological weapons)

Thresholds were set against each indicator at an aggregate portfolio level. The approach to 'consider the PAIs' has been to set what the Investment Manager considers are reasonable thresholds, above which it could be considered that the Sub-Fund has 'material adverse impact' against any of the criteria listed above. The Sub-Fund was reviewed against these thresholds internally, at two points in time. None of these thresholds were exceeded.

The following table details the measurement threshold and portfolio value at both points in time. It can be concluded that none of these thresholds were breached (note: for gender diversity, a portfolio value lower than the measurement threshold would be a possible breach).

Adverse sustainability indicator	Metric	Measurement Threshold - End point	Portfolio Value - End point	Measurement Threshold - Start point	Portfolio Value - Start point
2	Carbon Footprint per MEUR	Benchmark* Value - 438	154	Benchmark* Value - 465	151
3	GHG intensity of investee companies	Benchmark* Value - 999	577	Benchmark* Value - 1007	593
4	Active Fossil Fuel Exposure	10%	6%	10%	6%
7	Activities negatively affecting biodiversity-sensitive areas	10%	0%	10%	0%
10	UNGC Violation	0%	0%	0%	0%
13	Board Gender Diversity	30%	32%	30%	32%
14	Exposure to controversial weapons	0%	0	0%	0

*Benchmark used is the same as the benchmark against which the Sub-Fund's performance is measured, MSCI World NR Index .

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: **7 November 2022 to 31 December 2022**

Largest investments	Sector	% Assets	Country
Novo Nordisk	Health care - Pharmaceuticals Biotechnology & Life Sciences	4.22	Denmark
Microsoft Corporation	Information technology - Software & Services	3.55	USA
Mastercard	Information technology - Software & Services	3.18	USA
Linde	Materials - Materials	3.13	USA
Automatic Data Processing	Information technology - Software & Services	2.81	USA
Keyence	Information technology - Technology Hardware & Equipment	2.81	Japan
AIA Group	Financials - Insurance	2.79	Hong Kong
Amphenol	Information technology - Technology Hardware & Equipment	2.78	USA
LVMH	Consumer discretionary - Consumer Durables & Apparel	2.69	France
Compass Group	Consumer discretionary - Consumer Services	2.59	UK
Texas Instruments	Information technology - Semiconductors & Semiconductor Equipment	2.56	USA
Taiwan Semiconductor - ADR	Information technology - Semiconductors & Semiconductor Equipment	2.51	Taiwan
Alimentation Couche-Tard	Consumer staples - Food & Staples Retailing	2.49	Canada
Intuitive Surgical	Health care - Health Care Equipment & Services	2.46	USA
TJX Companies	Consumer discretionary - Retailing	2.41	USA

What was the proportion of sustainability-related investments?

● *What was the asset allocation?*

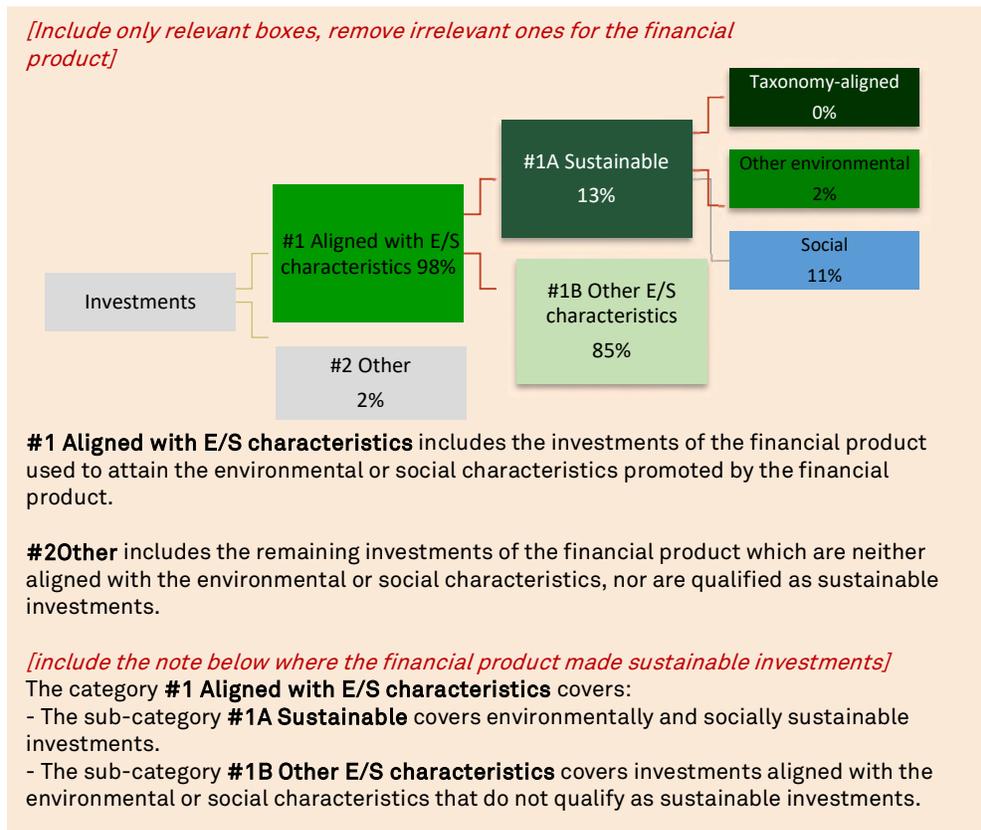

As at 31 December 2022, the asset allocation of the Sub-Fund was as shown in the diagram. This differs from the asset allocation diagram in the pre-contractual disclosure (Annex II) as this was intended to illustrate the planned asset allocation of the Sub-Fund and reflected the minimum investments referred to elsewhere in that annex.

As at 31 December 2022, 98% of the Net Asset Value of this Sub-Fund was invested in Equity and Equity-Related Securities that met the Investment Manager's "ESG Criteria" at the time of purchase and on an ongoing basis. The remainder of the Sub-Fund was invested in cash which, for the avoidance of doubt, is not required to meet the ESG Criteria.

The Sub-Fund met its commitment to investing a minimum of 5% of Net Asset Value in SFDR Sustainable Investments which contribute to an environmental or social objective. As at 31 December 2022, 13% of the Sub-Fund's Net Asset Value was invested in SFDR Sustainable Investments.

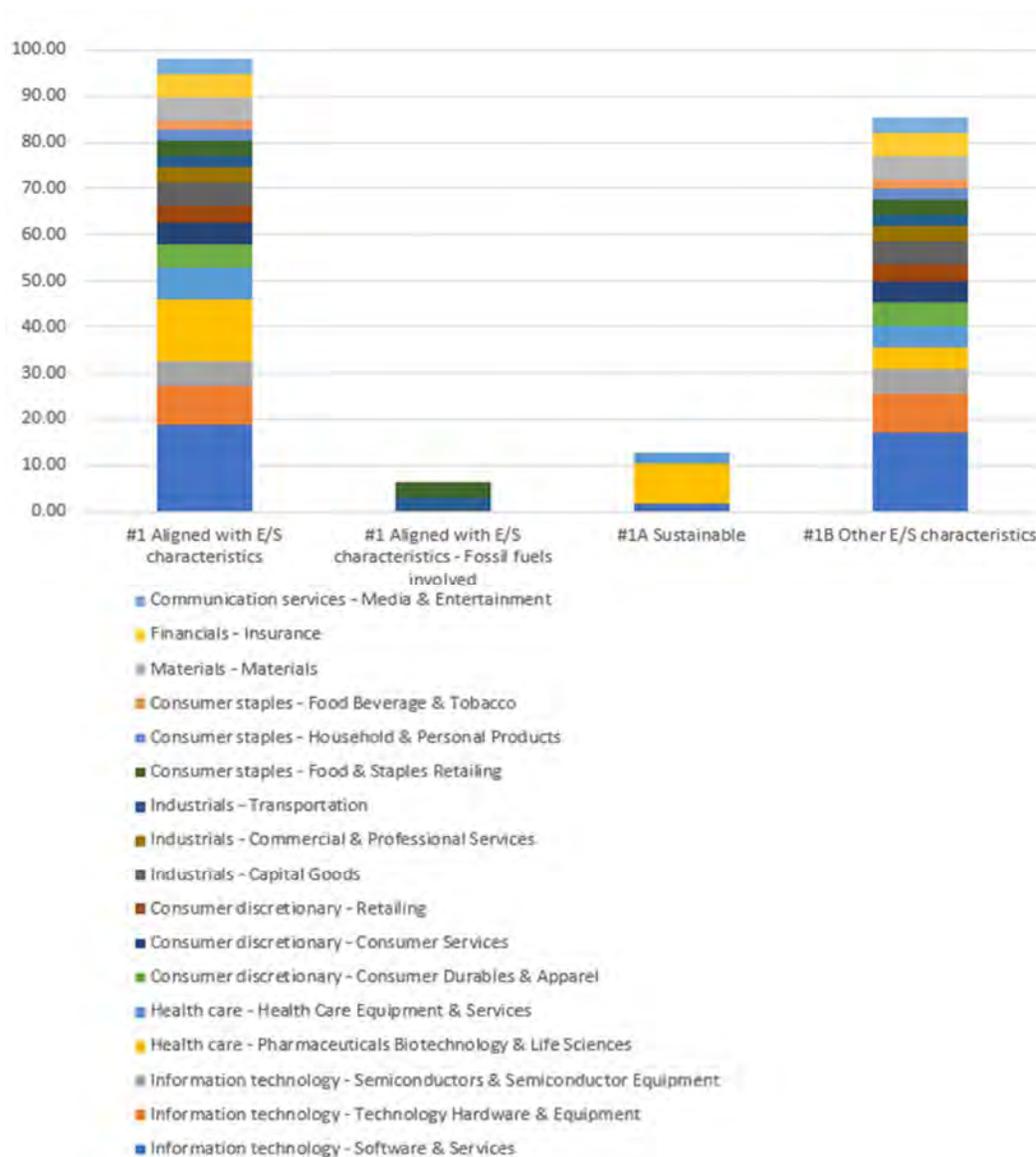

The asset allocation between environmental and social objectives is not fixed and as such, the Sub-Fund does not commit to invest a minimum percentage of Net Asset Value in SFDR Sustainable Investments which have specifically contributed to either an environmental objective or social objective. As at 31 December 2022, 2% of the Sub-Fund's Net Asset Value was in SFDR Sustainable Investments with an environmental objective that were not aligned with the EU Taxonomy and 11% of the Sub-Fund's Net Asset Value was in SFDR Sustainable Investments with a social objective.

Asset allocation describes the share of investments in specific assets.

● ***In which economic sectors were the investments made? [include information referred to in Article 54 of this Regulation]***

As at 31 December 2022, the Sub-Fund's investments were in the following economic sectors:

Sectors	#1 Aligned with E/S characteristics	#1 Aligned with E/S characteristics - Fossil fuels involved	#1A Sustainable	#1B Other E/S characteristics
Information technology - Software & Services	18.71		1.67	17.04
Information technology - Technology Hardware & Equipment	8.57			8.57
Information technology - Semiconductors & Semiconductor Equipment	5.07			5.07
Health care - Pharmaceuticals Biotechnology & Life Sciences	13.64		8.75	4.89
Health care - Health Care Equipment & Services	6.79		2.30	4.50
Consumer discretionary - Consumer Durables & Apparel	5.05			5.05
Consumer discretionary - Consumer Services	4.86			4.86
Consumer discretionary - Retailing	3.54			3.54
Industrials - Capital Goods	5.02	0.53		5.02
Industrials - Commercial & Professional Services	3.33			3.33
Industrials - Transportation	2.40	2.40		2.40
Consumer staples - Food & Staples Retailing	3.46	3.46		3.46
Consumer staples - Household & Personal Products	2.15			2.15
Consumer staples - Food Beverage & Tobacco	2.02			2.02
Materials - Materials	5.21			5.21
Financials - Insurance	4.77			4.77
Communication services - Media & Entertainment	3.54			3.54
	98.14	6.39	12.72	85.42

[include note only for the financial products referred to in Article 6, first paragraph, of Regulation (EU) 2020/852]

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective. **Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy? *[include section for the financial products referred to in Article 6, first paragraph, of Regulation (EU) 2020/852 and include information in accordance with Article 51 of this Regulation]*

The SFDR Sustainable Investments with an environmental objective were not aligned with the EU Taxonomy. The assessment of whether these investments complied with the EU Criteria for Environmentally Sustainable Economic Activities was not subject to an assurance provided by one or more auditors or a review by one or more third parties.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?**

Yes: *[specify below, and details in the graphs of the box]*

In fossil gas In nuclear energy

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

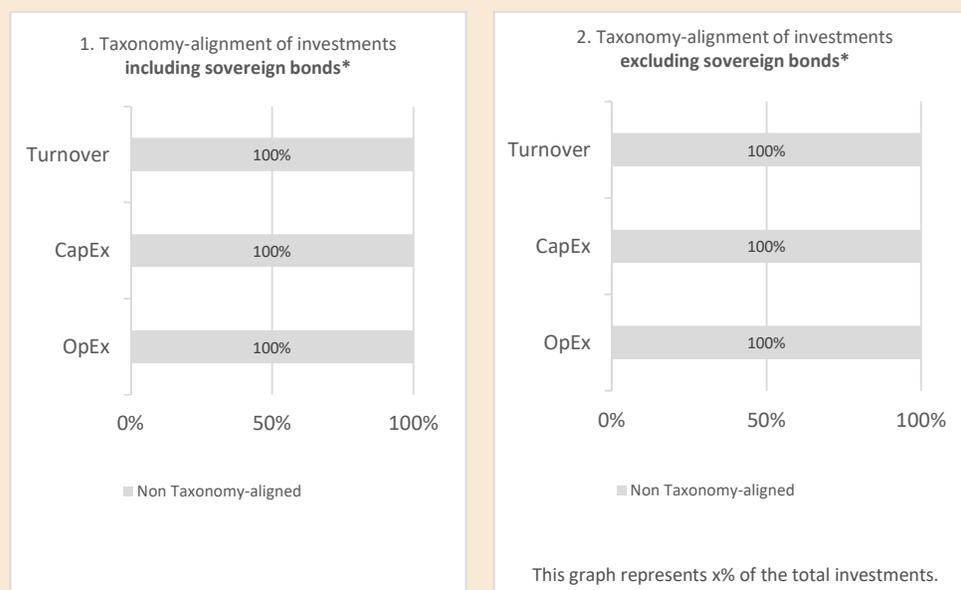

[include note for the financial products referred to in Article 6, first paragraph, of Regulation (EU) 2020/852

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

[Include information on Taxonomy aligned fossil gas and nuclear energy and the explanatory text in the left hand margin on the previous page only if the financial product invested in fossil gas and/or nuclear energy Taxonomy-aligned economic activities during the reference period]

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

[include note for the financial products referred to in Article 6, first paragraph, of Regulation (EU) 2020/852 that invest in environmental economic activities that are not environmentally sustainable economic activities]

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

- **What was the share of investments made in transitional and enabling activities?** *[include a breakdown of the proportions of investments during the reference period]*

0%.

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?** *[include where at least one previous periodic report was provided]*

No comparison for previous periods is available at the date of this periodic report.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy? *[include section only for the financial products referred to in Article 6, first subparagraph, of Regulation (EU) 2020/852 where the financial product included sustainable investments with an environmental objective that invested in economic activities that are not environmentally sustainable economic activities, and explain why the financial product invested in economic activities that were not Taxonomy-aligned]*

100% of the SFDR Sustainable Investments with an environmental objective were not aligned with the EU Taxonomy. The Sub-Fund invested in SFDR Sustainable Investments with an environmental objective in economic activities that were not EU Taxonomy-aligned because evidence of EU Taxonomy alignment is dependent on the availability of accurate, detailed and complete data on the investee companies to which the Sub-Fund has exposure. As at the date of this annex, such information is not necessarily readily available from public disclosures by investee companies. While data availability is improving and is expected to improve over time, the data currently available is limited and varies between investee companies.

What was the share of socially sustainable investments? *[include only where the financial product included sustainable investments with a social objective]*

While the Sub-Fund does not have a commitment to investing a minimum percentage of Net Asset Value in socially sustainable investments, as at 31 December 2022 the Sub-Fund invested 11% of Net Asset Value in SFDR Sustainable Investments with a social objective.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

As at the 31 December 2022, the Sub-Fund held 2% of Net Asset Value in cash held as ancillary liquidity. There are no minimum environmental or social safeguards associated with these investments.

What actions have been taken to meet the environmental and/or social characteristics during the reference period? *[list the actions taken within in the period covered by the periodic report to meet the environmental or social characteristics promoted by the financial product, including shareholder engagement as referred to in Article 3g of Directive 2007/36/EC and any other engagement relating to the environmental or social characteristics promoted by the financial product]*

In summary, the actions taken to meet the environmental and/or social characteristics during the reference period were:

- Adherence to the Investment Manager’s investment process in terms of stock selection and portfolio construction.
- Each potential investment idea was subject to a broad assessment incorporating relevant and material issues using a consistent framework – a materiality-based assessment of integrity, sustainability and governance factors.
- Environmental, Social and Governance data points and controversies screening were sourced from a third-party data provider.
- Review of sustainable investment assessment, performance of sustainability indicators and portfolio level assessment against relevant PAIs by an internal governance forum, the Additional Objectives Portfolios Group.

- The environmental and social characteristics promoted by the Sub-Fund were monitored daily via the exclusions list detailed in the binding elements of the Sub-Fund's investment strategy.
- Due diligence carried out on the underlying assets of the Sub-Fund spanned the processes from generation of a potential investment idea to portfolio construction. The Additional Objectives Portfolios Group assessed potential investment ideas for suitability for inclusion in the Sub-Fund. The Investment Executive provided oversight in terms of portfolio construction at the time of the Sub-Fund converting to Article 8, and for any subsequent purchase of a new investment.

During the reference period, the Additional Objective Portfolios Group recommended that a potential investment idea, a large American healthcare company, should not be included in the Sub-Fund's portfolio. This was supported by the Investment Executive. The recommendation to exclude the investment was because of ongoing uncertainty and concerns relating to the 'Sound Management Structures' considerations.

How did this financial product perform compared to the reference benchmark? *[include section where an index has been designated as a reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the financial product and indicate where the methodology used for the calculation of the designated index can be found]*

[include note for financial products where an index has been designated as a reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the financial product]

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- **How does the reference benchmark differ from a broad market index?**

ANNEX IV

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name: BNY Mellon Mobility Innovation Fund **Legal entity identifier:** 2138000BBVFZ8TN6N134

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective? *[tick and fill in as relevant, the percentage figure represents sustainable investments]*

<input checked="" type="radio"/> <input type="radio"/> <input type="checkbox"/> Yes	<input checked="" type="radio"/> <input type="radio"/> <input checked="" type="checkbox"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: ___% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy 	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 80% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective
<input type="checkbox"/> It made sustainable investments with a social objective: ___%	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met? *[list the environmental and/or social characteristics promoted by the financial product. For the financial products referred to in Article 6, first paragraph, of Regulation (EU) 2020/852, in respect of sustainable investments with environmental objectives, list the environmental objectives set out in Article 9 of that Regulation to which the sustainable investment underlying the financial product contributed. For financial products that made sustainable investments with social objectives, list the social objectives]*

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The environmental and/or social characteristics promoted by the Sub-Fund were met to the following extent during the reference period 20 July 2022 to 31 December 2022 (the “Reference Period”).

The environmental and/or social characteristics promoted were:

- Investment in companies that align with the Investment Manager’s proprietary carbon red line
- Avoid investment in companies that have material unresolvable issues relating to human rights, labour, the environment, and corruption
- Investment in companies proactively seeking to manage social and environmental factors well
- - Improved environmental outcomes and other societal benefits, potentially provided by companies that are focused on innovation in transportation and related technologies.

All of the above characteristics were met by the Sub-Fund during the reference period.

No reference benchmark was designated for the purpose of attaining the environmental or social characteristics promoted by the Sub-Fund.

The SFDR Sustainable Investments underlying this Sub- Fund did not contribute to the environmental objectives set out in Article 9 of the EU Taxonomy Regulation.

The SFDR Sustainable Investments underlying this Sub- Fund contributed to the following environmental objectives not aligned with the EU Taxonomy:

- Contribution to the transition to a net zero world
- Electrification

The SFDR Sustainable Investments underlying this Sub- Fund contributed to the following social objectives:

- Improved digital infrastructure and connectivity that can have implications for transportation and its systems
- Improved infrastructure and products contributing to safer driving
- Contribution to social objectives as a result of investee companies’ internal business practices and successful management of competing interests of key stakeholder groups.

● *How did the sustainability indicators perform?*

The following sustainability indicators are used to measure how the environmental or social characteristics promoted by the Sub-Fund are attained:

Sustainability Indicator #1 - No more than 5% of Net Asset Value in companies that:

- Are in heavy emitting sectors as defined by the International Energy Agency (IEA); and
- Have a business incompatible with a scenario in which global temperatures rise more than 2 degrees above pre-industrial levels; and
- Do not have an adequate strategy to address emissions / climate change, or a credible transition plan.

In addition, where third party data is not available to assess these criteria or indicates that specific companies meet these criteria, the Investment Manager retains discretion to determine alignment with this sustainability indicator solely on the basis of its qualitative review process.

Sustainability Indicator #2 - 0% of Net Asset Value in investee companies that have been involved in violations of the UNGC principles.

Sustainability Indicator #3 - A weighted average ESG risk rating of 'medium' or better at the portfolio level. Such rating to be determined using third party data.

Sustainability Indicator #4 - All companies invested in by the Sub-Fund to align to the Investment Manager's proprietary CASE framework. This framework identifies which of the following theme(s) a company aligns to:

- Connectivity, which covers sub-themes including cloud storage, and high-speed data towers
- Autonomous Vehicles, which covers sub-themes including advanced driver assistance systems, and next generation auto parts
- Sharing, which covers sub-themes including ride hailing technology
- Electrification, which covers sub-themes including EV infrastructure, smart grid, and battery technology

The sustainability indicators performed as follows:

Indicator #	How did the indicator perform in the reference period?
Sustainability Indicator #1	0%
Sustainability Indicator #2	0%
Sustainability Indicator #3	Medium
Sustainability Indicator #4	100% of investments (excluding those held for liquidity and hedging purposes)

Excluding instruments held for liquidity and hedging purposes, the data coverage for the sustainability indicators was as follows:

Sustainability indicators #1 and #2 - 96.75% of the Sub-Fund.

Sustainability indicator #3 - 91% of the Sub-Fund.

Sustainability indicator #4 - 100% of the Sub-Fund.

No derivatives (FDI) were used to meet the environmental or social characteristics.

- **...and compared to previous periods?** *[include for financial products where at least one previous periodic report was provided]*

No comparison for previous periods is available at the date of this periodic report.

- **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?** *[include for financial products that made sustainable investments, where not included in the reply to the above question, describe the objectives. Describe how the sustainable investments contributed to the sustainable investment objective. For the financial products referred to in Article 6, first paragraph, of Regulation (EU) 2020/852, list the environmental objectives set out in Article 9 of that Regulation to which the sustainable investment underlying the financial product contributed]*

The social objectives of the SFDR Sustainable Investments the Sub-Fund partially made are included above.

The SFDR Sustainable Investments contributed to the above social objectives in the following ways:

- Production of components used in systems that contribute to or enable enhanced vehicle safety
- Creation of products that enable a better and wider connected digital world.

The SFDR Sustainable Investments underlying this Sub- Fund did not contribute to environmental objectives set out in Article 9 of the EU Taxonomy Regulation.

The SFDR Sustainable Investments underlying this Sub-Fund contributed to environmental objectives not aligned with Article 9 of the EU Taxonomy Regulation.

The SFDR Sustainable Investments underlying this Sub-Fund contributed to the following environmental objectives not aligned with the EU Taxonomy:

- Contribution to the transition to a net zero world
- Electrification

The SFDR Sustainable Investments contributed to environmental objectives not aligned with the EU Taxonomy in the following ways:

- Electrification, or the enabling of, batteries and transport, contributing to reduced emissions

Contributing to the transition towards a net zero world through efficiency, green technology, and reduced car usage

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective? [include where the financial product includes sustainable investments]

The Investment Manager determined that SFDR Sustainable Investments in the Sub-Fund did no significant harm to any environmental or social objectives by assessing each SFDR Sustainable Investment's involvement in areas deemed to be harmful from an environmental or social perspective. Issuers that had involvement in activities deemed to be harmful from an environmental or social perspective were excluded from investment. Involvement in such activities was monitored on an ongoing basis.

— — — *How were the indicators for adverse impacts on sustainability factors taken into account?*

The Investment Manager reviewed the indicators for adverse impacts on sustainability factors for all SFDR Sustainable Investments where data was available. The Investment Manager reviewed PAIs for investee issuers using data from a designated third party data provider. If a given PAI or PAIs for an issuer appeared to exceed expectations based on the data obtained from the designated third-party data provider, further qualitative review was undertaken with respect to those issuer(s) and that product in order to determine whether such data indicated the evidence of significant harm. Where there were data gaps and the PAI was considered material for a company's sector, the Investment Manager's internal qualitative assessment was used to assess the PAIs.

The Sub-Fund took into account the following PAIs from:

- Table 1 of Annex I of the Commission Delegated Regulation:
 1. GHG emissions: Scope 1, 2 and 3
 2. Carbon footprint: Scope 1, 2 and 3
 3. GHG intensity of investee companies: Scope 1, 2 and 3
 4. Exposure to companies active in the fossil fuel sector
 5. Share of non-renewable energy consumption and production
 6. Energy consumption intensity per high impact climate sector: NACE A, B, C, D, E, F, G, H and L
 7. Activities negatively affecting biodiversity-sensitive areas
 8. Emissions to water
 9. Hazardous waste and radioactive waste ratio
 10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
 11. Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises
 12. Unadjusted gender pay gap

13. Board gender diversity
 14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons, and biological weapons).
- Table 2 of Annex I of the Commission Delegated Regulation: 4. Investments in companies without carbon emission reduction initiatives
 - Table 3 of Annex I of the Commission Delegated Regulation: 9. Lack of a human rights policy. 17. Number of convictions and amount of fines for violation of anti-corruption and anti-bribery laws.

— — — *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

The OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, including the principles and rights set out in the eight fundamental conventions identified in the Declaration of the International Labour Organisation on Fundamental Principles and Rights at Work and the International Bill of Human Rights (the “Responsible Business Practices”) collectively cover a very broad range of areas of responsible business, encompassing everything from labour rights to consumer protection to support for internationally recognised human rights within a company’s or issuer’s sphere of influence.

SFDR Sustainable Investments were considered aligned with the Responsible Business Practices as each company invested in passed screens provided by third parties which either directly cover one or more of the Responsible Business Practices or are considered appropriate proxies for one or more of the Responsible Business Practices. Each company invested in also passed the Investment Manager’s own qualitative review process which takes into account the Responsible Business Practices. In addition, where the companies invested in do not pass the relevant screens provided by third parties, the Investment Manager retains discretion to establish alignment with the Responsible Business Practices solely on the basis of its qualitative review process.

How did this financial product consider principal adverse impacts on sustainability factors? *[include section if the financial product considered principal adverse impacts on sustainability factors]*

The Investment Manager reviewed principal adverse impacts at the product level on a frequent basis during the reference period, notwithstanding certain

data coverage and data quality issues as further described below. The Investment Manager reviewed PAIs for investee issuers using data from a designated third party data provider. If a given PAI or PAIs for an issuer or product appeared to exceed expectations based on the data obtained from the designated third-party data provider, further qualitative review was undertaken with respect to those issuer(s) and that product in order to determine whether such data indicated the evidence of significant harm. In cases where, in the view of the Investment Manager, unresolvable significant harm was identified following further qualitative review, further action would be taken up to and including divestment. Over the course of the reference period no unresolvable significant harm was identified for investments in the Sub-Fund. Where there were data gaps and the PAI was considered material for a company's sector, the Investment Manager's internal qualitative assessment was used to assess the PAIs.

PAIs were categorised based on their characteristics (including their materiality and the Investment Manager's ability to estimate them), and such categories were used for the purpose of determining the actions and outcome when assessing the PAIs.

The Investment Manager was dependent upon information and data from third party data providers in order to be able to consider principal adverse impacts on sustainability factors. The availability and quality of such data impacted the extent to which each such PAI could be considered. In particular, the lack or incomplete reporting of metrics by some issuers meant that there was limited data on some adverse indicators. As such for some of the mandatory PAIs, data coverage was low. The Investment Manager's analysis of adverse indicators relied on this third-party information and data, and where such information was not available or was incomplete, the Investment Manager's analysis of adverse indicators was necessarily limited. As the data availability improves over time, it is expected that PAIs can be applied to a greater portion of the Investment Manager's investable universe. This will allow for enhanced insight into the adverse impacts caused by issuers.

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: **20th July 2022 – 31st December 2022**

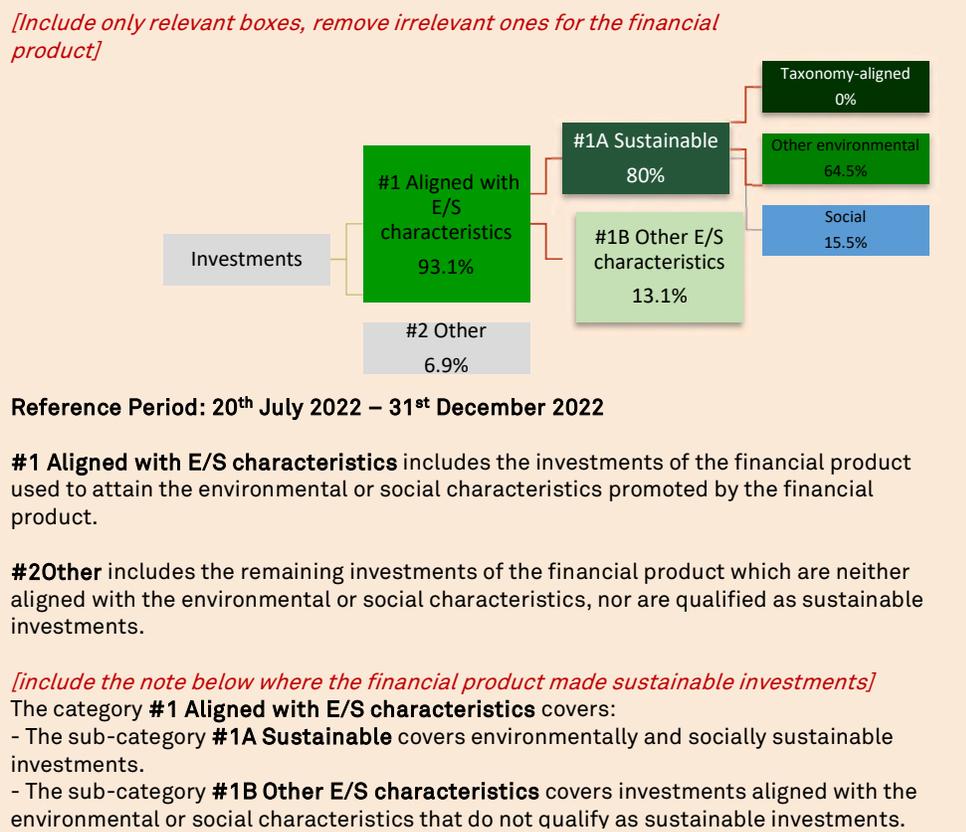

#	Largest Investments	Sector	% Assets	Country
1	HUBBELL INC USD 0.01	Industrials - Capital Goods	3.78	USA
2	ANSYS INC USD 0.01	Information Technology - Software & Services	3.64	USA

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

The asset allocation diagram illustrates the asset allocation of this Sub-Fund. 93.1% of Net Asset Value was used to meet the environmental or social characteristics promoted by the Sub-Fund in accordance with the binding elements of the investment strategy. The Sub-Fund invested 80% of Net Asset Value in SFDR Sustainable Investments of which 64.5% had an environmental objective not aligned with the EU Taxonomy and 15.5% had a social objective. 0% of the Net Asset Value of the Sub-Fund was invested in sustainable investments with an environmental objective aligned with the EU Taxonomy.

#1 Aligned with E/S characteristics: 93.1% of Net Asset Value

#1A Sustainable: 80% of Net Asset Value

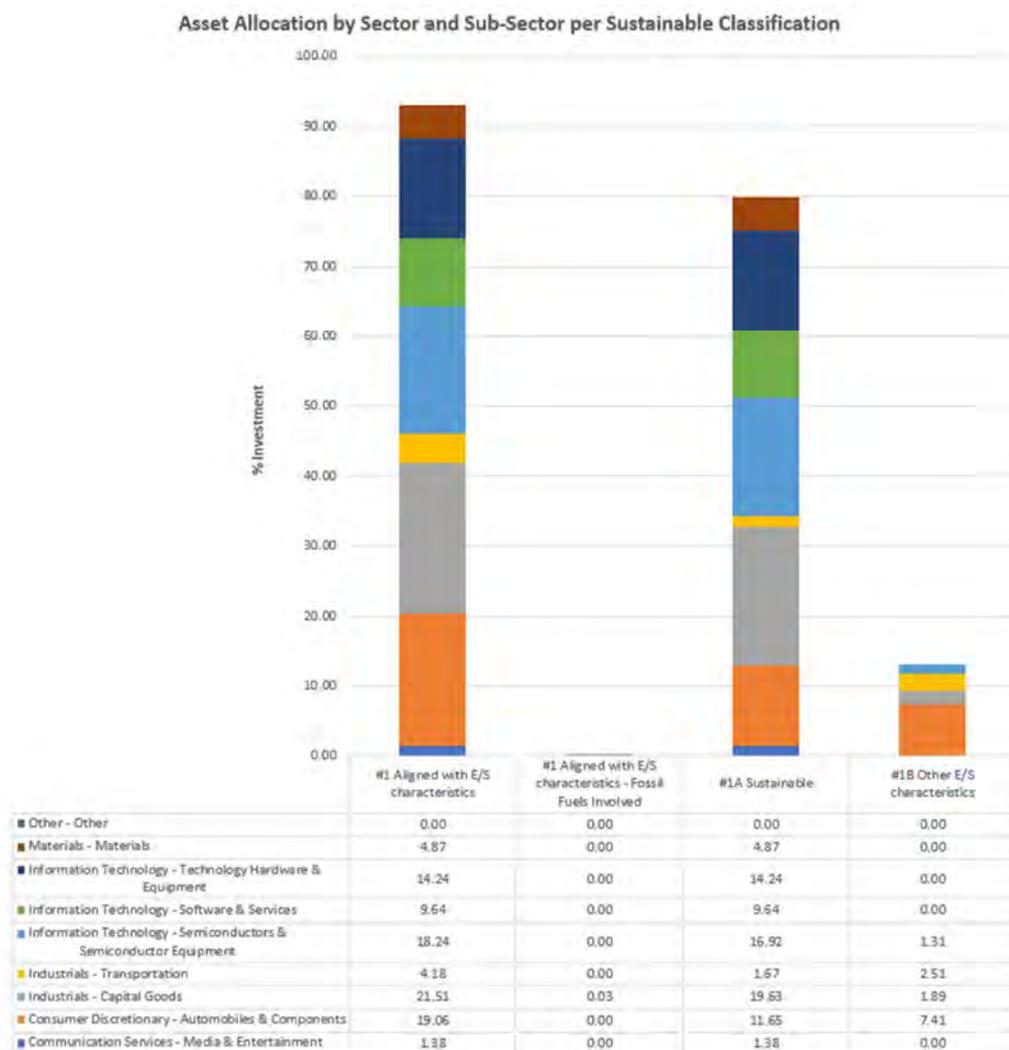

- Taxonomy-aligned: 0% of Net Asset Value
- Environmental: 64.5% of Net Asset Value

- Social: 15.5% of Net Asset Value

#1B Other E/S characteristics: 13.1% of Net Asset Value

#2 Other: 6.9% of Net Asset Value

● **In which economic sectors were the investments made?**

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy? *[include section for the financial products referred to in Article 6, first paragraph, of Regulation (EU) 2020/852 and include information in accordance with Article 51 of this Regulation]*

SFDR Sustainable Investments with environmental objectives were not aligned with the EU Taxonomy.

The assessment of whether these investments complied with the EU Criteria for Environmentally Sustainable Economic Activities was not subject to an assurance provided by one or more auditors or a review by one or more third parties.

● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

Yes: *[specify below, and details in the graphs of the box]*

In fossil gas In nuclear energy

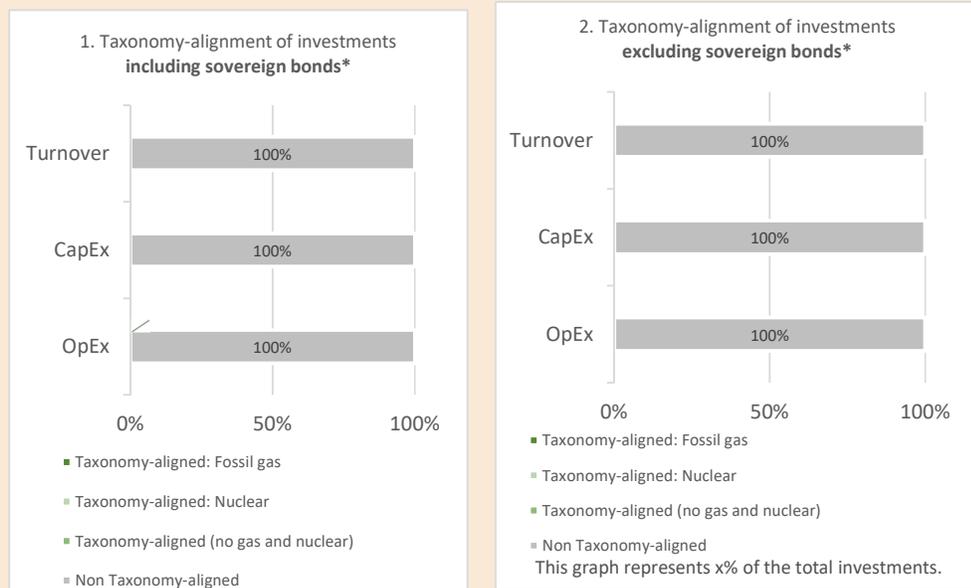

No

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective. **Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

[Include information on Taxonomy aligned fossil gas and nuclear energy and the explanatory text in the left hand margin on the previous page only if the financial product invested in fossil gas and/or nuclear energy Taxonomy-aligned economic activities during the reference period]

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

[include note for the financial products referred to in Article 6, first paragraph, of Regulation (EU) 2020/852

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

[include note for the financial products referred to in Article 6, first paragraph, of Regulation (EU) 2020/852 that invest in environmental economic activities that are not environmentally sustainable economic activities]

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

- **What was the share of investments made in transitional and enabling activities?** *[include a breakdown of the proportions of investments during the reference period]*

0.00%

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?** *[include where at least one previous periodic report was provided]*

No comparison for previous periods is available at the date of this periodic report.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

[include section only for the financial products referred to in Article 6, first subparagraph, of Regulation (EU) 2020/852 where the financial product included sustainable investments with an environmental objective that invested in economic activities that are not environmentally sustainable economic activities, and explain why the financial product invested in economic activities that were not Taxonomy-aligned]

The Sub-Fund invested 64.5% of NAV in SFDR Sustainable Investments with an environmental objective not aligned with the EU Taxonomy.

The Sub-Fund invested in SFDR Sustainable Investments with an environmental objective in economic activities that are not Taxonomy-aligned because evidence of taxonomy alignment is dependent on the availability of accurate, detailed and complete data on the investee companies to which the Sub-Fund has exposure. At this time, such information is not necessarily readily available from public disclosures by investee companies. While data availability is improving and is expected to improve over time, the data currently available is limited and varies between investee companies.

What was the share of socially sustainable investments? *[include only where the financial product included sustainable investments with a social objective]*

While the Sub-Fund does not commit to investing a minimum percentage of its Net Asset Value in socially sustainable investments, the Sub-Fund invested 15.5% of its Net Asset Value in SFDR Sustainable Investments with a social objective.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The Sub-Fund invested 6.9% of Net Asset Value in category #2 (other) which comprised of:

- 1) 3.26% in cash held for liquidity purposes only. These instruments were not subject to environmental or social safeguards as the Investment Manager does not view environmental or social considerations as relevant for these instruments.
- 2) 3.64% in an agricultural machinery company which as at the end of the reference period was in the process of being reviewed by the Investment Manager to confirm its alignment with the Investment Manager's ESG and sustainability criteria.

What actions have been taken to meet the environmental and/or social characteristics during the reference period? *[list the actions*

taken within in the period covered by the periodic report to meet the environmental or social characteristics promoted by the financial product, including shareholder engagement as referred to in Article 3g of Directive 2007/36/EC and any other engagement relating to the environmental or social characteristics promoted by the financial product]

In order to meet the environmental and social characteristics, the Investment Manager took the following actions:

- Invested at least 20% of its Net Asset Value in SFDR Sustainable Investments
- Excluded issuers that produce tobacco products
- Excluded issuers that derive more than 10% of turnover from the sale of tobacco
- Excluded issuers that generate revenues from the production of controversial weapons
- Excluded issuers in breach of the Principles of the UN Global Compact (which includes principles relating to human rights, labour, environment and anti-corruption)
- Invested at least 90% of the Net Asset Value of the Sub-Fund net of the Sub-Fund's exposure to cash and liquid near cash assets, money market funds, and currency related FDI and FDI used for hedging purposes (the "Non-ESG Assets")) in companies that meet the Investment Manager's ESG and sustainability criteria at time of purchase and on an ongoing basis.
-

- Invested at least 80% of the Net Asset Value of the Sub-Fund in Mobility Innovation Companies. Mobility Innovation Companies include automobile manufacturers, component suppliers and automobile technology providers that focus on innovation in transportation relating to use, control and power such as enhanced infrastructure and data processing capabilities, clean energy production, the safety implications of advanced driver-assistance systems, and the companies which make use of or enable such mobility innovations.

Engagement is not a part of the environmental or social investment strategy of the Sub-Fund. However, engagement is an integral part of the Investment Manager’s approach to investing as they believe that constructive dialogue with management teams not only affords real insight into how a company operates, it is an opportunity to advocate for positive change.

How did this financial product perform compared to the reference benchmark? *[include section where an index has been designated as a reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the financial product and indicate where the methodology used for the calculation of the designated index can be found]*

[include note for financial products where an index has been designated as a reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the financial product]

A reference benchmark has not been designated for the purpose of attaining the environmental and/or social characteristics promoted by the Sub-Fund.

- **How does the reference benchmark differ from a broad market index?**

Not applicable

- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

Not applicable

- **How did this financial product perform compared with the reference benchmark?**

Not applicable

- **How did this financial product perform compared with the broad market index?**

Not applicable

[include note for financial products where an index has been designated as a reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the financial product]

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

ANNEX V

Periodic disclosure for the financial products referred to in Article 9, paragraphs 1 to 4a, of Regulation (EU) 2019/2088 and Article 5, first paragraph, of Regulation (EU) 2020/852

Product name: [BNY Mellon Smart Cures Fund](#)
 Legal entity identifier: [213800D07SNROTOSKR14](#)

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainable investment objective

Did this financial product have a sustainable investment objective? *[tick and fill in as relevant, the percentage figure represents the sustainable investments]*

●● <input checked="" type="checkbox"/> Yes	●● <input type="checkbox"/> No
<p><input type="checkbox"/> It made sustainable investments with an environmental objective:</p> <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <p><input checked="" type="checkbox"/> It made sustainable investments with a social objective: 98.7%</p>	<p><input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments</p> <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective <p><input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments</p>

To what extent was the sustainable investment objective of this financial product met? *[list the sustainable investment objective of this financial product, and describe how the sustainable investments contributed to the sustainable investment objective. For the financial products referred to in Article 5, first paragraph, of Regulation (EU) 2020/852, in respect of sustainable investments with environmental objectives, indicate to which environmental objectives set out in Article 9 of Regulation (EU) 2020/852 to the investment underlying the financial product contributed to. For the financial products referred to in Article 9(3) of Regulation (EU) 2019/2088, indicate how the objective of a reduction in carbon emissions was aligned with the Paris Agreement]*

Sustainability indicators measure how the sustainable objectives of this financial product are attained.

The sustainable investment objective of the Sub-Fund was met to the following extent during the reference period 31 May 2022 to 31 December 2022 (the “Reference Period”).

The Sub-Fund aims to achieve long-term capital growth and has a sustainable investment objective. Specifically, the Sub-Fund aims to contribute to a social objective by investing in securities of companies located worldwide that improve the adequacy and efficiency of health systems through innovation in biotechnology and healthcare.

The SFDR Sustainable Investments underlying this Sub-Fund did not contribute to the environmental objectives set out in Article 9 of the EU Taxonomy Regulation.

The SFDR Sustainable Investments underlying this Sub-Fund contributed to the sustainable investment objective by investing in companies that improve the adequacy and efficiency of health systems thereby enabling long-term high quality healthcare, as demonstrated by meeting certain thresholds with regards to the percentage of their operating expenditure (OpEx) spent on researching and developing new products and/or services; or in certain instances, the percentage of OpEx spent on capital expenditure (CapEx).

Specifically, the SFDR Sustainable Investments contribute to the following social objectives:

- Accelerated development of precision drugs, biologics and vaccines that treat rare and serious diseases
- Early detection of diseases
- Improved quality of life and productivity
- Expand access to healthcare
- Reduced administrative and financial burden

● ***How did the sustainability indicators perform?***

The following sustainability indicators are used to measure how the sustainable investment objective of the Sub-Fund was attained:

Sustainability indicator #1: All investee companies to meet certain thresholds with regards to the percentage of their operating expenditure (OpEx) (i.e., the day-to-day expenses that a company incurs to keep its business running) spent on researching and developing new products and/or services; or in certain instances, the percentage of OpEx spent on capital expenditure (CapEx) (i.e., the expenses a company incurs to create future benefit by investing in long-term fixed assets).

Specifically:

- Clinical Pioneers: to have spent at least 30% of the OpEx on researching and developing new products and/or services over the previous 12 months, as reviewed on a periodic basis
- Supporting Cast: either to have spent at least 15% of OpEx on researching & developing new products and/or services over the previous 12 months, as reviewed on a periodic basis; or
- Supporting Cast companies that do not report research & development as an expense: to have spent at least 5% of OpEx on CapEx, over the previous 12 months, as reviewed on a periodic basis

Sustainability Indicator #2: No more than 5% of Net Asset Value in companies that:

- Are in heavy emitting sectors as defined by the International Energy Agency (IEA); and
- Have a business incompatible with a scenario in which global temperatures rise more than 2 degrees above pre-industrial levels; and
- Do not have an adequate strategy to address emissions / climate change, or a credible transition plan.

In addition, where third party data is not available to assess these criteria or indicates that specific companies meet these criteria, the Investment Manager retains discretion to determine alignment with this sustainability indicator solely on the basis of its qualitative review process.

Sustainability Indicator #3: 0% of Net Asset Value in investee companies that have been involved in violations of the UNGC principles.

Sustainability Indicator #4: A weighted average ESG risk rating of 'medium' or better at the portfolio level. Such rating to be determined using third party data.

The sustainability indicators performed as follows:

Indicator # How did the indicator perform in the reference period?

97% of investee companies (based on number of companies held in the Sub-Fund as of 31st December 2022) met certain thresholds with regards to the percentage of their OpEx spent on researching and developing new products and/or services; or in certain instances, the percentage of OpEx spent on CapEx.

Specifically:

	Category of companies	Threshold	% of companies held in the Sub-Fund as of 31 st Dec 2022 that met this threshold
Sustainability Indicator #1	Clinical Pioneers	Spent at least 30% of the OpEx on researching and developing new products and/or services over the previous 12 months	70%
	Supporting Cast	Spent at least 15% of OpEx on researching & developing new products and/or services over the previous 12 months	20%
	Supporting Cast companies that do not report research	Spent at least 5% of OpEx on CapEx, over the previous 12 months	7%

& development as an expense		
TOTAL		97%

One company, which comprised 3% of the Sub-Fund (by number of companies) did not meet its threshold requirement and was subsequently sold by the Investment Manager.

Sustainability Indicator #2	0%
-----------------------------	----

Sustainability Indicator #3	0%
-----------------------------	----

Sustainability Indicator #4	Medium
-----------------------------	--------

The data coverage for sustainability indicators #1, #2, and #3 was 100% of the Sub-Fund’s investments net of instruments used for liquidity and hedging purposes.

The data coverage for sustainability indicator #4 was 99% of the Sub-Fund’s investments net of instruments used for liquidity and hedging purposes.

No derivatives (FDI) were used to meet the sustainable investment objective of the Sub-Fund.

- **...and compared to previous periods?** *[include for financial products where at least one previous periodic report was provided]*

No comparison for previous periods is available at the date of this periodic report.

How did the sustainable investments not cause significant harm to any sustainable investment objective?

The Investment Manager determined that SFDR Sustainable Investments in the Sub-Fund did no significant harm to any environmental or social objectives by assessing each SFDR Sustainable Investment's involvement in areas deemed to be harmful from an environmental or social perspective. Issuers that had involvement in activities deemed to be harmful from an environmental or social perspective were excluded from investment. Involvement in such activities was monitored on an ongoing basis.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How were the indicators for adverse impacts on sustainability factors taken into account?

The Investment Manager reviewed the indicators for adverse impacts on sustainability factors for all SFDR Sustainable Investments where data was available. The Investment Manager reviewed PAIs for investee issuers using data from a designated third party data provider. If a given PAI or PAIs for an issuer appeared to exceed expectations based on the data obtained from the designated third-party data provider, further qualitative review was undertaken with respect to those issuer(s) and that product in order to determine whether such data indicated the evidence of significant harm. Where there were data gaps and the PAI was considered material for a company's sector, the Investment Manager's internal qualitative assessment was used to assess the PAIs.

The Sub-Fund took into account the following PAIs from:

- Table 1 of Annex I of the Commission Delegated Regulation:
 1. GHG emissions: Scope 1, 2 and 3
 2. Carbon footprint: Scope 1, 2 and 3
 3. GHG intensity of investee companies: Scope 1, 2 and 3
 4. Exposure to companies active in the fossil fuel sector
 5. Share of non-renewable energy consumption and production
 6. Energy consumption intensity per high impact climate sector: NACE A, B, C, D, E, F, G, H and L
 7. Activities negatively affecting biodiversity-sensitive areas
 8. Emissions to water

9. Hazardous waste and radioactive waste ratio
 10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
 11. Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises
 12. Unadjusted gender pay gap
 13. Board gender diversity
 14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons, and biological weapons).
- Table 2 of Annex I of the Commission Delegated Regulation: 4. Investments in companies without carbon emission reduction initiatives
 - Table 3 of Annex I of the Commission Delegated Regulation: 9. Lack of a human rights policy. 17. Number of convictions and amount of fines for violation of anti-corruption and anti-bribery laws

— — — *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

The OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, including the principles and rights set out in the eight fundamental conventions identified in the Declaration of the International Labour Organisation on Fundamental Principles and Rights at Work and the International Bill of Human Rights (the “Responsible Business Practices”) collectively cover a very broad range of areas of responsible business, encompassing everything from labour rights to consumer protection to support for internationally recognised human rights within a company’s or issuer’s sphere of influence.

SFDR Sustainable Investments were considered aligned with the Responsible Business Practices as each company invested in passed screens provided by third parties which either directly cover one or more of the Responsible Business Practices or are considered appropriate proxies for one or more of the Responsible Business Practices. Each company invested in also passed the Investment Manager’s own qualitative review process which takes into account the Responsible Business Practices. In addition, where the companies invested in do not pass the relevant screens provided by third parties, the Investment Manager retains discretion to establish alignment with the Responsible Business Practices solely on the basis of its qualitative review process.

How did this financial product consider principal adverse impacts on sustainability factors? *[include section if the financial product considered principal adverse impacts on sustainability factors]*

The Investment Manager reviewed principal adverse impacts at the product level on a frequent basis during the reference period, notwithstanding certain data coverage and data quality issues as further described below. The Investment Manager reviewed PAIs for investee issuers using data from a designated third party data provider. If a given PAI or PAIs for an issuer or product appeared to exceed expectations based on the data obtained from the designated third-party data provider, further qualitative review was undertaken with respect to those issuer(s) and that product in order to determine whether such data indicated the evidence of significant harm. In cases where, in the view of the Investment Manager, unresolvable significant harm was identified following further qualitative review, further action would be taken up to and including divestment. Over the course of the reference period no unresolvable significant harm was identified for investments in the Sub-Fund. Where there were data gaps and the PAI was considered material for a company's sector, the Investment Manager's internal qualitative assessment was used to assess the PAIs.

PAIs were categorised based on their characteristics (including their materiality and the Investment Manager's ability to estimate them), and such categories were used for the purpose of determining the actions and outcome when assessing the PAIs.

The Investment Manager was dependent upon information and data from third party data providers in order to be able to consider principal adverse impacts on sustainability factors. The availability and quality of such data impacted the extent to which each such PAI could be considered. In particular, the lack or incomplete reporting of metrics by some issuers meant that there was limited data on some adverse indicators. As such for some of the mandatory PAIs, data coverage was low. The Investment Manager's analysis of adverse indicators relied on this third-party information and data, and where such information was not available or was incomplete, the Investment Manager's analysis of adverse indicators was necessarily limited. As the data availability improves over time, it is expected that PAIs can be applied to a greater portion of the Investment Manager's investable universe. This will allow for enhanced insight into the adverse impacts caused by issuers.

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: **31st May 2022 – 31st December 2022**

What was the proportion of sustainability-related investments?

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

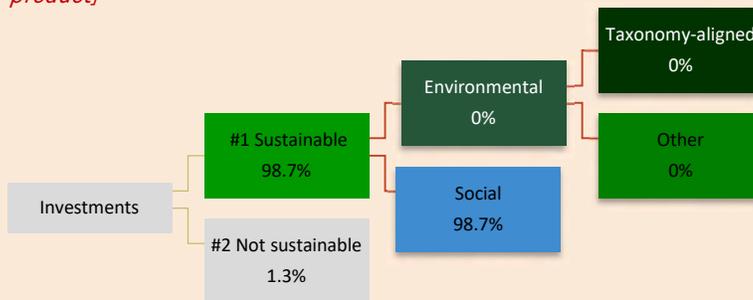

[include note for the financial products referred to in Article 5, first paragraph, of Regulation (EU) 2020/852.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

[Include only relevant boxes, remove irrelevant ones for the financial product]

Reference period
31st May 2022 –
31st December
2022

#1 Sustainable covers sustainable investments with environmental or social objectives.
#2 Not sustainable includes investments which do not qualify as sustainable investments.

The asset allocation diagram illustrates the asset allocation of this Sub-Fund. 98.7% of the Net Asset Value was invested in SFDR Sustainable Investments with a social objective. 0% of Net Asset Value was invested in SFDR Sustainable Investments with an environmental objective not aligned with the EU Taxonomy. 0% of the Net Asset Value of the Sub-Fund was invested in sustainable investments with an environmental objective aligned with the EU Taxonomy.

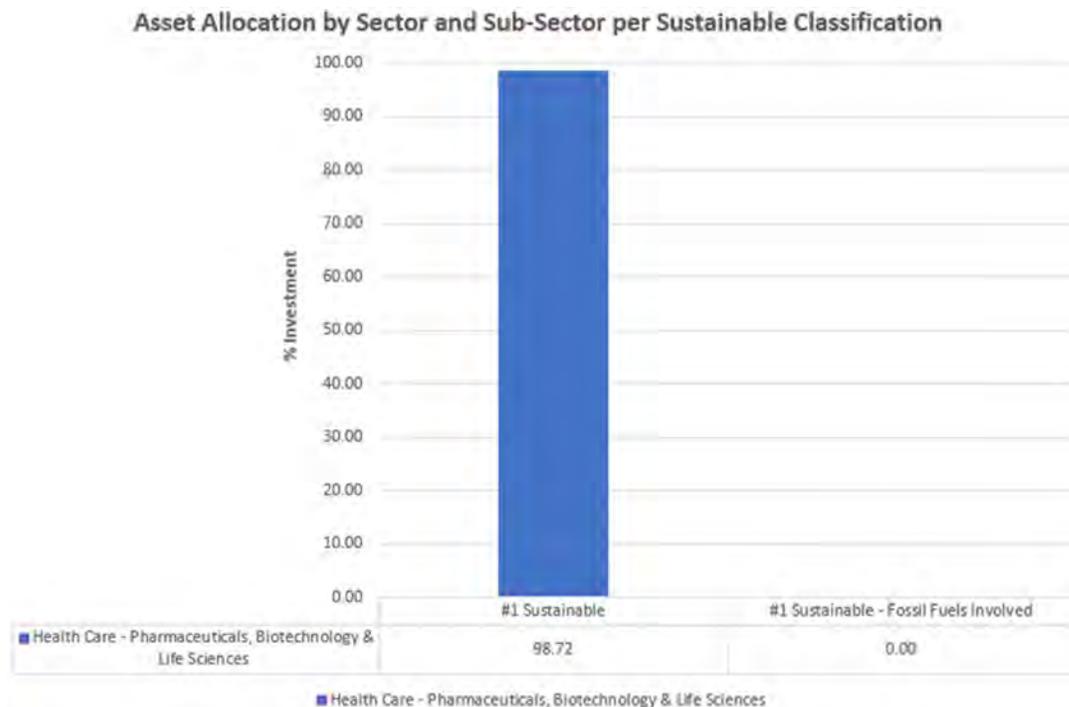

#1 Sustainable: 98.7% of Net Asset Value

- Other environmental: 0% of Net Asset Value

- Social: 98.7% of Net Asset Value

#2 Not Sustainable: 1.3% of Net Asset Value

In which economic sectors were the investments made? *[include information referred to in Article Article 61(c) of this Regulation]*

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy? *[include section for the financial products referred to in Article 5, first paragraph, of Regulation (EU) 2020/852 and include information in accordance with Article 62 of this Regulation]*

N/A

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?**

Yes: *[specify below, and details in the graphs of the box]*

In fossil gas In nuclear energy

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

[include note only for the financial products referred to in Article 5, first paragraph, of Regulation (EU) 2020/852

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

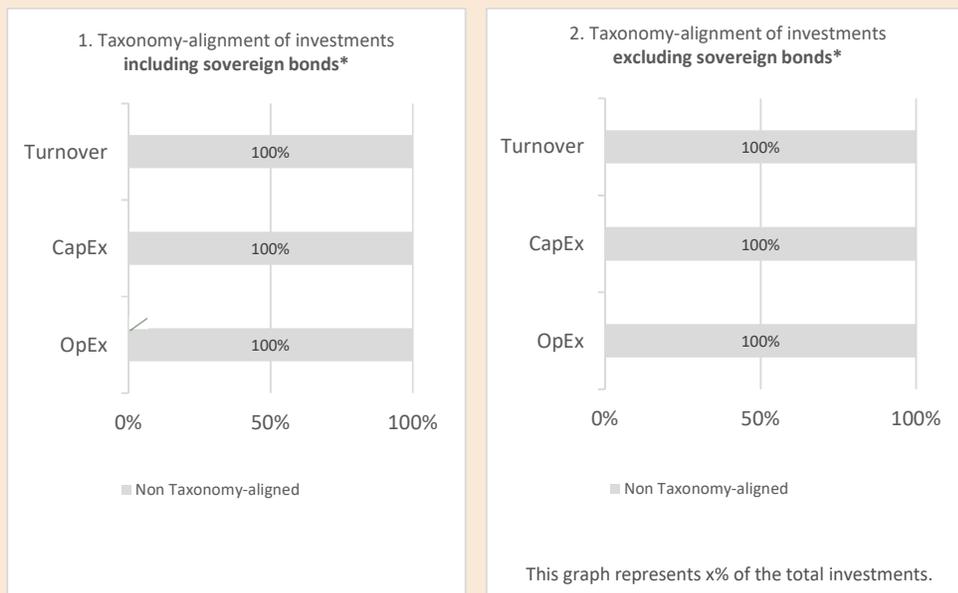

[include note for the financial products referred to in Article 5, first paragraph, of Regulation (EU) 2020/852 that invest in environmental economic activities that are not environmentally sustainable economic activities]

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under the EU Taxonomy.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

[Include information on Taxonomy aligned fossil gas and nuclear energy and the explanatory text in the left hand margin on the previous page only if the financial product invested in fossil gas and/or nuclear energy Taxonomy-aligned economic activities during the reference period]

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

- **What was the share of investments made in transitional and enabling activities?** *[include a breakdown of the proportions of investments during the reference period]*

0.00%

- **How did the percentage of investments aligned with the EU Taxonomy compare with previous reference periods?** *[include where at least one previous periodic report was provided]*

No comparison for previous periods is available at the date of this periodic report.

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy? *[include only for the financial products referred to in Article 5, first paragraph, of Regulation (EU) 2020/852 where the financial product included investments with an environmental objective that invested in economic activities that are not environmentally sustainable economic activities and explain why the financial product invested in economic activities that were not taxonomy-aligned]*

[include only for the financial products referred to in Article 5, first paragraph, of Regulation (EU) 2020/852 where the financial product included investments with an environmental objective that invested in economic activities that are not environmentally sustainable economic activities and explain why the financial product invested in economic activities that were not taxonomy-aligned]

N/A

What was the share of socially sustainable investments? *[include only where the financial product includes sustainable investments with a social objective]*

The Sub-Fund invested 98.7% of its Net Asset Value in SFDR Sustainable Investments with a social objective.

What investments were included under “not sustainable”, what was their purpose and were there any minimum environmental or social safeguards?

The Sub-Fund invested 1.3% of Net Asset Value in category #2 (Not Sustainable) which comprised of instruments held for liquidity purposes only, including cash and cash equivalents. These instruments were held to ensure the Sub-Fund had sufficient liquidity. These instruments were not subject to environmental or social safeguards as the Investment Manager does not view environmental or social considerations as relevant for these instruments.

What actions have been taken to attain the sustainable investment objective during the reference period? *[list the actions taken within the period covered by the periodic report to attain the sustainable investment objective of the financial product, including shareholder engagement as referred to in Article 3g of Directive 2007/36/EC and any other engagement relating to the sustainable investment objective]*

In order to attain the sustainable investment objective, the Investment Manager took the following actions:

- Invested at least 80% of its Net Asset Value in SFDR Sustainable Investments
- Excluded issuers that produce tobacco products
- Excluded issuers that derive more than 10% of turnover from the sale of tobacco
- Excluded issuers that generate revenues from the production of controversial weapons

- Excluded issuers in breach of the Principles of the UN Global Compact (which includes principles relating to human rights, labour, environment and anti-corruption)
- Invested at least 90% of the Net Asset Value of the Sub-Fund net of the Sub-Fund's exposure to cash and liquid near cash assets, money market funds, and currency related FDI and FDI used for hedging purposes (the "Non-ESG Assets")) in companies that meet the Investment Manager's ESG and sustainability criteria at time of purchase and on an ongoing basis.
- Invested at least 80% of its Net Asset Value in companies that contribute to social objectives by improving the adequacy and efficiency of health systems through innovation in biotechnology and healthcare ("Smart Cures Innovation Companies")

Engagement is not a part of the r social investment strategy of the Sub-Fund. However, engagement is an integral part of the Investment Manager's approach to investing as they believe that constructive dialogue with management teams not only affords real insight into how a company operates, it is an opportunity to advocate for positive change.

How did this financial product perform compared to the reference sustainable benchmark? *[include section only for the financial products referred to in Article 9(1) of Regulation (EU) 2019/2088 and indicate where the methodology used for the calculation of the designated index can be found]*

[include section only for the financial products referred to in Article 9(1) of Regulation (EU) 2019/2088]

A reference benchmark has not been designated for the purpose of attaining the sustainable investment objective of the Sub-Fund.

- **How did the reference benchmark differ from a broad market index?**

Not applicable

- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the sustainable investment objective?**

Not applicable

- **How did this financial product perform compared with the reference benchmark?**

Not applicable

- **How did this financial product perform compared with the broad market index?'**

Not applicable

[include note for the financial products referred to in Article 9(1) of Regulation (EU) 2019/2088]

Reference benchmarks are indexes to measure whether the financial product attains the sustainable objective

ANNEX IV

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name: BNY Mellon Sustainable Global Dynamic Bond Fund
Legal entity identifier: 2138003QS1W6U007GI98

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective? *[tick and fill in as relevant, the percentage figure represents sustainable investments]*

Yes

It made **sustainable investments with an environmental objective:** ___%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** ___%

No

It promoted **Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of **24.7%** of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met? *[list the environmental and/or social characteristics promoted by the financial product. For the financial products referred to in Article 6, first paragraph, of Regulation (EU) 2020/852, in respect of sustainable investments with environmental objectives, list the environmental objectives set out in Article 9 of that Regulation to which the sustainable investment underlying the financial product contributed. For financial products that made sustainable investments with social objectives, list the social objectives]*

The environmental and/or social characteristics promoted by the Sub-Fund were met to the following extent during the reference period 1 January 2022 to 31 December 2022 (the “Reference Period”).

The environmental and/or social characteristics promoted were:

- Investment in companies that align with the Investment Manager’s proprietary carbon red line
- Avoid investment in companies that have material unresolvable issues relating to human rights, labour, the environment, and corruption
- Investment in companies proactively seeking to manage social and environmental factors well
- Investment in sovereign issuers proactively seeking to manage social and environmental factors well

Characteristics relating to investing in companies that align with the Investment Manager’s proprietary carbon red line; investing in companies proactively seeking to manage social and environmental factors well; and investing in sovereign issuers proactively seeking to manage social and environmental factors well, were met by the Sub-Fund during the reference period.

The SFDR Sustainable Investments underlying this Sub- Fund did not contribute to the environmental objectives set out in Article 9 of the EU Taxonomy Regulation.

The SFDR Sustainable Investments underlying this Sub- Fund contributed to the following environmental objectives not aligned with the EU Taxonomy:

- Contributing to the transition to a net zero world
- Circular economy and recycling

The SFDR Sustainable Investments underlying this Sub- Fund contributed to the following social objectives:

- Access to financial products and services
- Connectivity and digital access
- Financial protection
- Access to housing
-

● ***How did the sustainability indicators perform?***

The following sustainability indicators are used to measure how the environmental or social characteristics promoted by the Sub-Fund are attained:

Sustainability Indicator #1 - No more than 5% of Net Asset Value in companies that:

- Are in heavy emitting sectors as defined by the International Energy Agency (IEA); and
- Have a business incompatible with a scenario in which global temperatures rise more than 2 degrees above pre-industrial levels; and
- Do not have an adequate strategy to address emissions / climate change, or a credible transition plan.

In addition, where third party data is not available to assess these criteria or indicates that specific companies meet these criteria, the Investment Manager retains discretion to determine alignment with this sustainability indicator solely on the basis of its qualitative review process.

Sustainability Indicator #2 - 0% of Net Asset Value in investee companies that have been involved in violations of the UNGC principles.

Sustainability Indicator #3 - A weighted average ESG risk rating of 'medium' or better at the portfolio level. Such rating to be determined using third party data.

Sustainability Indicator #4 - All investments in sovereign issuers to have either strong current positioning, and/or are demonstrating progress in respect of the management of environmental, social and governance factors, as determined by the Investment Manager's proprietary sovereign sustainable framework.

The sustainability indicators performed as follows:

Indicator #	How did the indicator perform in the reference period?
Sustainability Indicator #1	0%
	0.41%
Sustainability Indicator #2	The Sub-Fund held a position in an automobile company which, after purchase, was deemed to violate the principles of the UNGC by the

Investment Manager's third party data provider.
The position was subsequently sold.

Sustainability Indicator #3	Low
Sustainability Indicator #4	100%

The data coverage for sustainability indicators #1 and #2 was 100% of the Sub-Fund's corporate investments (excluding sovereign issuers, FDI, cash and cash equivalents).

The data coverage for sustainability indicator #3 was 45% of the Sub-Fund's investments.

The data coverage for sustainability indicator #4 was 100% of sovereign issuers held by the Sub-Fund.

No derivatives (FDI) were used to meet the environmental or social characteristics.

- **...and compared to previous periods?** *[include for financial products where at least one previous periodic report was provided]*

No comparison for previous periods is available at the date of this periodic report.

- **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?** *[include for financial products that made sustainable investments, where not included in the reply to the above question, describe the objectives. Describe how the sustainable investments contributed to the sustainable investment objective. For the financial products referred to in Article 6, first paragraph, of Regulation (EU) 2020/852, list the environmental objectives set out in Article 9 of that Regulation to which the sustainable investment underlying the financial product contributed]*

The social objectives of the SFDR Sustainable Investments the Sub-Fund partially made are included above.

The SFDR Sustainable Investments contributed to the above social objectives in the following ways:

- Facilitating access to financial products that contribute to financial safety and wellbeing

- Provision of social housing to underserved sections of society
- Provision of technology solutions to the life sciences industry that enable and accelerate clinical development of medical treatments for rare diseases
- Promotion of digital infrastructure in emerging markets

The SFDR Sustainable Investments underlying this Sub-Fund did not contribute to environmental objectives set out in Article 9 of the EU Taxonomy Regulation.

The SFDR Sustainable Investments underlying this Sub-Fund contributed to environmental objectives not aligned with Article 9 of the EU Taxonomy Regulation.

The SFDR Sustainable Investments underlying this Sub-Fund contributed to the following environmental objectives not aligned with Article 9 of the EU Taxonomy Regulation:

- Contributing to the transition to a net zero world
- Circular economy and recycling

The sustainable investments contributed to these environmental objectives in the following ways:

- Promoting green finance instruments (green mortgages) and leveraging instruments like green bonds to onward finance low-carbon assets.
- Improving water quality and controlling levels of wastage.
- Establishment of policies, programmes and targets to reduce emissions and control waste within own operations
- Setting net zero targets to reducing financed emissions by reducing exposures to fossil fuel financing
- Provision of packaging solutions that provide a more easily recyclable alternative to plastics, and target for 100% recyclability in all products.
- Reduction in GHG emissions and implementation of a climate-change strategy to capitalise on opportunities in low-carbon transportation

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective? [include where the financial product includes sustainable investments]

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The Investment Manager determined that SFDR Sustainable Investments in the Sub-Fund did no significant harm to any environmental or social objectives by assessing each SFDR Sustainable Investment's involvement in areas deemed to be harmful from an environmental or social perspective. Issuers that had involvement in activities deemed to be harmful from an environmental or social perspective were excluded from investment. Involvement in such activities was monitored on an ongoing basis.

— — — *How were the indicators for adverse impacts on sustainability factors taken into account?*

The Investment Manager reviewed the indicators for adverse impacts on sustainability factors for all SFDR Sustainable Investments where data was available. The Investment Manager reviewed PAIs for investee issuers using data from a designated third party data provider. If a given PAI or PAIs for an issuer appeared to exceed expectations based on the data obtained from the designated third-party data provider, further qualitative review was undertaken with respect to those issuer(s) and that product in order to determine whether such data indicated the evidence of significant harm. Where there were data gaps and the PAI was considered material for a company's sector, the Investment Manager's internal qualitative assessment was used to assess the PAIs.

The Sub-Fund took into account the following PAIs from:

- Table 1 of Annex I of the Commission Delegated Regulation:
 1. GHG emissions: Scope 1, 2 and 3
 2. Carbon footprint: Scope 1, 2 and 3
 3. GHG intensity of investee companies: Scope 1, 2 and 3
 4. Exposure to companies active in the fossil fuel sector
 5. Share of non-renewable energy consumption and production
 6. Energy consumption intensity per high impact climate sector: NACE A, B, C, D, E, F, G, H and L
 7. Activities negatively affecting biodiversity-sensitive areas
 8. Emissions to water

9. Hazardous waste and radioactive waste ratio
10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
11. Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises
12. Unadjusted gender pay gap
13. Board gender diversity
14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons, and biological weapons).
 - Table 2 of Annex I of the Commission Delegated Regulation: 4. Investments in companies without carbon emission reduction initiatives
 - Table 3 of Annex I of the Commission Delegated Regulation: 9. Lack of a human rights policy. 17. Number of convictions and amount of fines for violation of anti-corruption and anti-bribery laws. 19. Freedom of expression score. 23. Political stability score. 24. Rule of law score.

— — — *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

The OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, including the principles and rights set out in the eight fundamental conventions identified in the Declaration of the International Labour Organisation on Fundamental Principles and Rights at Work and the International Bill of Human Rights (the “Responsible Business Practices”) collectively cover a very broad range of areas of responsible business, encompassing everything from labour rights to consumer protection to support for internationally recognised human rights within a company’s or issuer’s sphere of influence.

SFDR Sustainable Investments were considered aligned with the Responsible Business Practices as each company invested in passed screens provided by third parties which either directly cover one or more of the Responsible Business Practices or are considered appropriate proxies

for one or more of the Responsible Business Practices. Each company invested in also passed the Investment Manager's own qualitative review process which takes into account the Responsible Business Practices. In addition, where the companies invested in do not pass the relevant screens provided by third parties, the Investment Manager retains discretion to establish alignment with the Responsible Business Practices solely on the basis of its qualitative review process.

[Include a statement for the financial products referred to in Article 6, first paragraph, of Regulation (EU) 2020/852]

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors? *[include section if the financial product considered principal adverse impacts on sustainability factors]*

The Investment Manager reviewed principal adverse impacts at the product level on a frequent basis during the reference period, notwithstanding certain data coverage and data quality issues as further described below. The Investment Manager reviewed PAIs for investee issuers using data from a designated third party data provider. If a given PAI or PAIs for an issuer or product appeared to exceed expectations based on the data obtained from the designated third-party data provider, further qualitative review was undertaken with respect to those issuer(s) and that product in order to determine whether such data indicated the evidence of significant harm. Where there were data gaps and the PAI was considered material for a company's sector, the Investment Manager's internal qualitative assessment was used to assess the PAIs.

PAIs were categorised based on their characteristics (including their materiality and the Investment Manager's ability to estimate them), and such categories were used for the purpose of determining the actions and outcome when assessing the PAIs. For instance, data indicated that an investee company was in violation of the principles of the UN Global Compact (PAI #10), which resulted in divestment of that issuer.

The Investment Manager was dependent upon information and data from third party data providers in order to be able to consider principal adverse impacts on sustainability factors. The availability and quality of such data impacted the extent to which each such PAI could be considered. In particular, the lack or incomplete reporting of metrics by some issuers meant that there was limited data on some adverse indicators. As such for some of the mandatory PAIs, data coverage was low. The Investment Manager's analysis of adverse indicators relied on this third-party information and data, and where such information was not available or was incomplete, the Investment Manager's analysis of adverse indicators was necessarily limited. As the data availability improves over time, it is expected that PAIs can be applied to a greater portion of the Investment Manager's investable universe. This will allow for enhanced insight into the adverse impacts caused by issuers.

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: **1st January 2022 – 31st December 2022**

What was the proportion of sustainability-related investments?

● What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

The asset allocation diagram illustrates the asset allocation of this Sub-Fund. 86.3% of Net Asset Value was used to meet the environmental or social characteristics promoted by the Sub-Fund in accordance with the binding elements of the investment strategy. The Sub-Fund invested 24.7% of Net Asset Value in SFDR Sustainable Investments of which 14.6% had an environmental objective not aligned with the EU Taxonomy and 10.1% had a social objective. 0% of the Net Asset Value of the Sub-Fund was invested in sustainable investments with an environmental objective aligned with the EU Taxonomy.

#1 Aligned with E/S characteristics: 86.3% of Net Asset Value

#1A Sustainable: 24.7% of Net Asset Value

- Taxonomy-aligned: 0% of Net Asset Value
- Environmental: 14.6% of Net Asset Value
- Social: 10.1% of Net Asset Value

#1B Other E/S characteristics: 61.6% of Net Asset Value

#2 Other: 13.7% of Net Asset Value

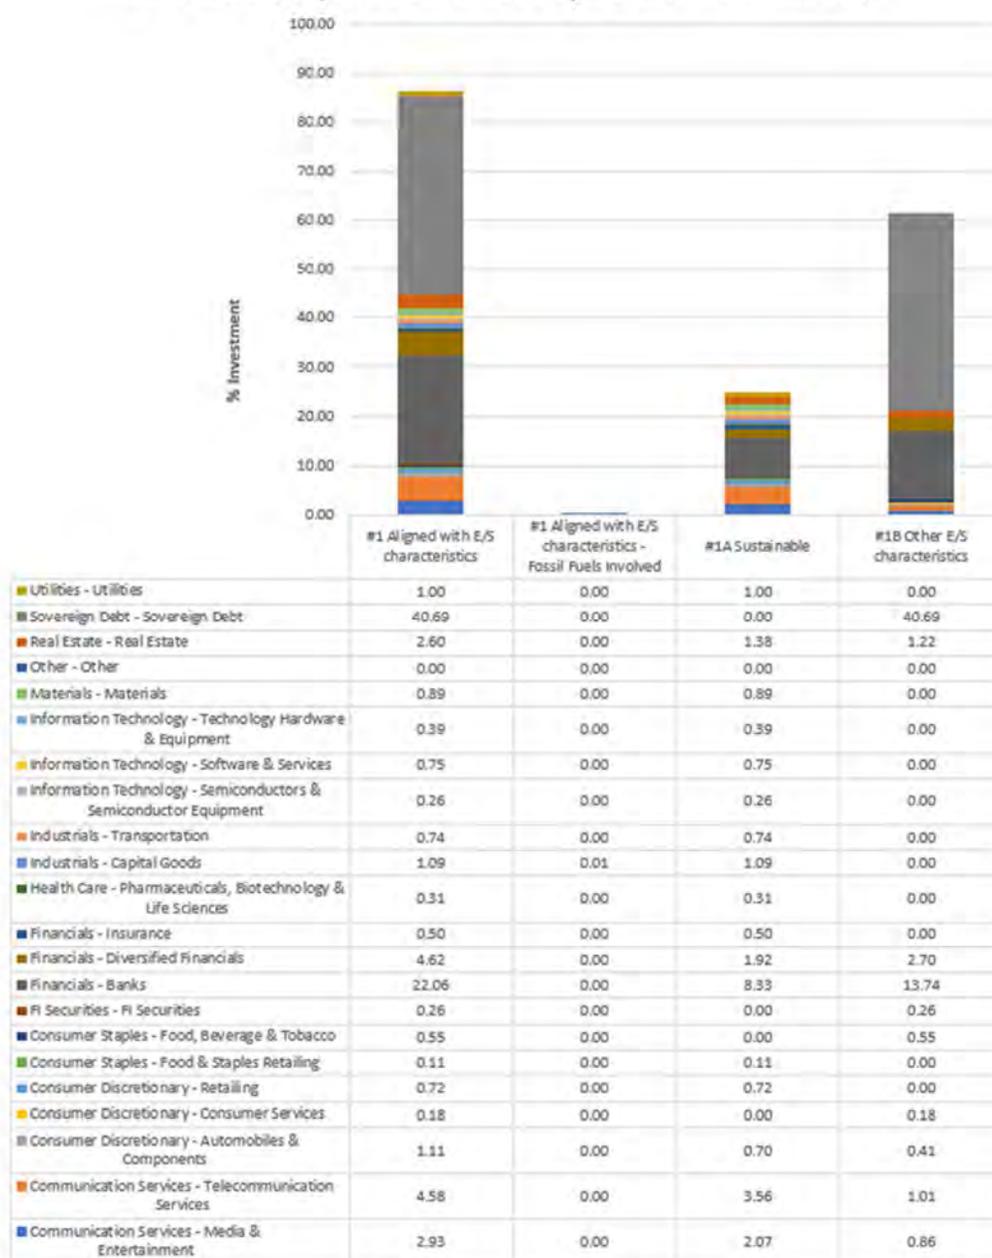

In which economic sectors were the investments made? *[include information referred to in Article 54 of this Regulation]*

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

Asset Allocation by Sector and Sub-Sector per Sustainable Classification

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy? *[include section for the financial products referred to in Article 6 , first paragraph, of Regulation (EU) 2020/852 and include information in accordance with Article 51 of this Regulation]*

SFDR Sustainable Investments with environmental objectives were not aligned with the EU Taxonomy.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

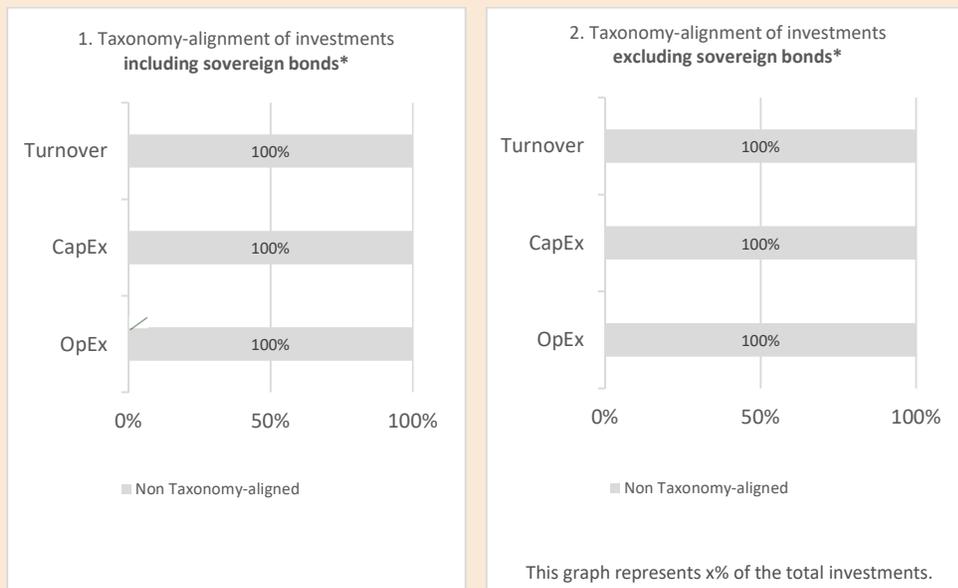

The assessment of whether these investments complied with the EU Criteria for Environmentally Sustainable Economic Activities was not subject to an assurance provided by one or more auditors or a review by one or more third parties.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

- Yes: *[specify below, and details in the graphs of the box]*
 - In fossil gas
 - In nuclear energy
- No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

[Include information on Taxonomy aligned fossil gas and nuclear energy and the explanatory text in the left hand margin on the previous page only if the financial product invested in fossil gas and/or nuclear energy Taxonomy-aligned economic activities during the reference period]

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

- **What was the share of investments made in transitional and enabling activities?** *[include a breakdown of the proportions of investments during the reference period]*

0.00%

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?** *[include where at least one previous periodic report was provided]*

No comparison for previous periods is available at the date of this periodic report.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

[include section only for the financial products referred to in Article 6, first subparagraph, of Regulation (EU) 2020/852 where the financial product included sustainable investments with an environmental objective that invested in economic activities that are not environmentally sustainable economic activities, and explain why the financial product invested in economic activities that were not Taxonomy-aligned]

The Sub-Fund invested 14.6% of NAV in SFDR Sustainable Investments with an environmental objective not aligned with the EU Taxonomy.

The Sub-Fund invested in SFDR Sustainable Investments with an environmental objective in economic activities that are not Taxonomy-aligned because evidence of taxonomy alignment is dependent on the availability of accurate, detailed and complete data on the investee companies to which the Sub-Fund has exposure. At this time, such information is not necessarily readily available from public disclosures by investee companies. While data availability is improving and is expected to improve over time, the data currently available is limited and varies between investee companies.

[include note for the financial products referred to in Article 6, first paragraph, of Regulation (EU) 2020/852 that invest in environmental economic activities that are not environmentally sustainable economic activities]

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

[include only where the financial product included sustainable investments with a social objective]

While the Sub-Fund does not commit to investing a minimum percentage of its Net Asset Value in socially sustainable investments, the Sub-Fund invested 10.1% of its Net Asset Value in SFDR Sustainable Investments with a social objective.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The Sub-Fund invested 13.7% of Net Asset Value in category #2 (other) which comprised of FDI, liquidity and hedging instruments only, including cash, cash equivalents, currency positions, currency related FDI and FDI

used for hedging purposes. These instruments were held to either (a) ensure the Sub-Fund had sufficient liquidity; and/or (b) hedge against potential currency movements. These instruments were not subject to environmental or social safeguards as the Investment Manager does not view environmental or social considerations as relevant for these instruments.

What actions have been taken to meet the environmental and/or social characteristics during the reference period? *[list the actions*

taken within in the period covered by the periodic report to meet the environmental or social characteristics promoted by the financial product, including shareholder engagement as referred to in Article 3g of Directive 2007/36/EC and any other engagement relating to the environmental or social characteristics promoted by the financial product]

In order to meet the environmental and social characteristics, the Investment Manager took the following actions:

- Invested at least 10% of the Sub-Fund's Net Asset Value in SFDR Sustainable Investments
-
- Excluded issuers that produce tobacco products
- Excluded issuers that derive more than 10% of turnover from the sale of tobacco
- Excluded issuers that generate revenues from the production of controversial weapons
- Excluded issuers in breach of the Principles of the UN Global Compact (which includes principles relating to human rights, labour, environment and anti-corruption). One issuer held in the Sub-Fund with a 0.41% weight was identified as newly violating the principles of the UN Global Compact by the Investment Manager's third party data provider. As such, the Investment Manager took the action of subsequently divesting from the issuer as it no longer aligned with the Investment Manager's ESG and sustainability criteria
- Invested at least 90% of the Net Asset Value of the Sub-Fund net of the Sub-Fund's exposure to cash and liquid near cash assets, money market funds, and currency related FDI and FDI used for hedging purposes (the "Non-ESG Assets")) in companies that meet the Investment Manager's ESG and sustainability criteria at time of purchase and on an ongoing basis.

Engagement is not a part of the environmental or social investment strategy of the Sub-Fund. However, engagement is an integral part of the Investment Manager’s approach to investing as they believe that constructive dialogue with management teams not only affords real insight into how a company operates, it is an opportunity to advocate for positive change.

How did this financial product perform compared to the reference benchmark? *[include section where an index has been designated as a reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the financial product and indicate where the methodology used for the calculation of the designated index can be found]*

[include section where an index has been designated as a reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the financial product and indicate where the methodology used for the calculation of the designated index can be found]

[include note for financial products where an index has been designated as a reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the financial product]

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

A reference benchmark has not been designated for the purpose of attaining the environmental and/or social characteristics promoted by the Sub-Fund.

- **How does the reference benchmark differ from a broad market index?**

Not applicable

- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

Not applicable

- **How did this financial product perform compared with the reference benchmark?**

ANNEX V

Periodic disclosure for the financial products referred to in Article 9, paragraphs 1 to 4a, of Regulation (EU) 2019/2088 and Article 5, first paragraph, of Regulation (EU) 2020/852

Product name: BNY Mellon Sustainable Global Emerging Markets Fund

Legal entity identifier: 213800C4HLF07W5C5209

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainable investment objective

Did this financial product have a sustainable investment objective? *[tick and fill in as relevant, the percentage figure represents the sustainable investments]*

<input checked="" type="radio"/> <input type="radio"/> <input type="checkbox"/> Yes	<input type="radio"/> <input checked="" type="radio"/> <input type="checkbox"/> No
<input checked="" type="checkbox"/> It made sustainable investments with an environmental objective: 47.2% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy 	<input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective
<input checked="" type="checkbox"/> It made sustainable investments with a social objective: 49.3%	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent was the sustainable investment objective of this financial product met?

[list the sustainable investment objective of this financial product, and describe how the sustainable investments contributed to the sustainable investment objective. For the financial products referred to in Article 5, first paragraph, of Regulation (EU) 2020/852, in respect of sustainable investments with environmental objectives, indicate to which environmental objectives set out in Article 9 of Regulation (EU) 2020/852 to the investment underlying the

financial product contributed to. For the financial products referred to in Article 9(3) of Regulation (EU) 2019/2088, indicate how the objective of a reduction in carbon emissions was aligned with the Paris Agreement]

The sustainable investment objective of the Sub-Fund was met to the following extent during the reference period 23 September 2022 to 31 December 2022 (the “Reference Period”).

Sustainability indicators measure how the sustainable objectives of this financial product are attained.

The Sub-Fund aims to achieve long-term capital growth and has a sustainable investment objective. Specifically, the Sub-Fund aims to contribute to social and environmental objectives by investing in securities of emerging market companies that demonstrate attractive investment attributes and support sustainable development. With the exception of instruments held for liquidity and hedging purposes, the Sub-Fund invested exclusively in SFDR Sustainable Investments over the course of the reference period. The SFDR Sustainable Investments contributed to the sustainable investment objective by supporting sustainable development through contributing to the UN Sustainable Development Goals (UN SDGs).

The SFDR Sustainable Investments underlying this Sub-Fund did not contribute to the environmental objectives set out in Article 9 of the EU Taxonomy Regulation.

The SFDR Sustainable Investments underlying this Sub-Fund contributed to environmental objectives not aligned with Article 9 of the EU Taxonomy Regulation.

The SFDR Sustainable Investments underlying this Sub-Fund contributed to the following environmental objectives not aligned with the EU Taxonomy:

- SDG #7: Affordable and Clean Energy
- SDG #9: Industry, Innovation and Infrastructure
- SDG #11: Sustainable Cities and Communities
- SDG #13: Climate Action

The SFDR Sustainable Investments underlying this Sub-Fund contributed to the following social objectives:

- SDG #2: Zero Hunger
- SDG #3: Good Health & Wellbeing
- SDG #4: Quality Education
- SDG #5: Gender Equality
- SDG #6: Clean Water and Sanitation

- SDG #7: Affordable and Clean Energy
- SDG #8: Decent Work and Economic Growth
- SDG #9: Industry, Innovation and Infrastructure
- SDG #10: Reduced Inequality
- SDG #11: Sustainable Cities and Communities
- SDG #12: Responsible Consumption and Production

● ***How did the sustainability indicators perform?***

The following sustainability indicators are used to measure how the sustainable investment objective of the Sub-Fund was attained:

Sustainability Indicator #1: No more than 5% of Net Asset Value in companies that:

- Are in heavy emitting sectors as defined by the International Energy Agency (IEA); and
- Have a business incompatible with a scenario in which global temperatures rise more than 2 degrees above pre-industrial levels; and
- Do not have an adequate strategy to address emissions / climate change, or a credible transition plan.

In addition, where third party data is not available to assess these criteria or indicates that specific companies meet these criteria, the Investment Manager retains discretion to determine alignment with this sustainability indicator solely on the basis of its qualitative review process.

Sustainability Indicator #2: 0% of Net Asset Value in investee companies that have been involved in violations of the UNGC principles.

Sustainability Indicator #3: A weighted average ESG risk rating of 'medium' or better at the portfolio level. Such rating to be determined using third party data.

Sustainability Indicator #4: All investments to demonstrate alignment to one or more of the UN SDGs, as further evidenced through qualitative case studies.

The sustainability indicators performed as follows:

Indicator #	How did the indicator perform in the reference period?
Sustainability Indicator #1	0%

Sustainability Indicator #2	0%
Sustainability Indicator #3	Medium
Sustainability Indicator #4	100% of companies aligned to one or more of the UN SDGs as indicated through a sample of qualitative case studies for the top 5 holdings as of the end of the reference period, appended to this document.

The data coverage for sustainability indicators #1 and #2 was 96.25% of the Sub-Fund's investments net of instruments used for FDI, liquidity and hedging purposes.

The data coverage for sustainability indicator #3 was 97% of the Sub-Fund's investments net of instruments used for FDI, liquidity and hedging purposes.

The data coverage for sustainability indicator #4 was 100% of the Sub-Fund's investments net of instruments used for FDI, liquidity and hedging purposes.

No derivatives (FDI) were used to attain the sustainable investment objective of the Sub-Fund.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

...and compared to previous periods? *[include for financial products where at least one previous periodic report was provided]*

No comparison for previous periods is available at the date of this periodic report.

How did the sustainable investments not cause significant harm to any sustainable investment objective?

The Investment Manager determined that SFDR Sustainable Investments in the Sub-Fund did no significant harm to any environmental or social objectives by assessing each SFDR Sustainable Investment's involvement in areas deemed to be harmful from an environmental or social perspective. Issuers that had involvement in activities deemed to be harmful from an environmental or social perspective were excluded from

investment. Involvement in such activities was monitored on an ongoing basis.

How were the indicators for adverse impacts on sustainability factors taken into account?

The Investment Manager reviewed the indicators for adverse impacts on sustainability factors for all SFDR Sustainable Investments where data was available. The Investment Manager reviewed PAIs for investee issuers using data from a designated third party data provider. If a given PAI or PAIs for an issuer appeared to exceed expectations based on the data obtained from the designated third-party data provider, further qualitative review was undertaken with respect to those issuer(s) and that product in order to determine whether such data indicated the evidence of significant harm. Data availability and coverage was in many case limited for the Sub-Fund given its focus on emerging markets: where there were data gaps and the PAI was considered material for a company's sector, the Investment Manager's internal qualitative assessment was used to assess the PAIs.

The Sub-Fund took into account the following PAIs from:

- Table 1 of Annex I of the Commission Delegated Regulation:
 1. GHG emissions: Scope 1, 2 and 3
 2. Carbon footprint: Scope 1, 2 and 3
 3. GHG intensity of investee companies: Scope 1, 2 and 3
 4. Exposure to companies active in the fossil fuel sector
 5. Share of non-renewable energy consumption and production
 6. Energy consumption intensity per high impact climate sector: NACE A, B, C, D, E, F, G, H and L
 7. Activities negatively affecting biodiversity-sensitive areas
 8. Emissions to water
 9. Hazardous waste and radioactive waste ratio
 10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises

11. Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises
 12. Unadjusted gender pay gap
 13. Board gender diversity
 14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons, and biological weapons).
- Table 2 of Annex I of the Commission Delegated Regulation: 4. Investments in companies without carbon emission reduction initiatives
 - Table 3 of Annex I of the Commission Delegated Regulation: 9. Lack of a human rights policy. 17. Number of convictions and amount of fines for violation of anti-corruption and anti-bribery laws.

— Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, including the principles and rights set out in the eight fundamental conventions identified in the Declaration of the International Labour Organisation on Fundamental Principles and Rights at Work and the International Bill of Human Rights (the “Responsible Business Practices”) collectively cover a very broad range of areas of responsible business, encompassing everything from labour rights to consumer protection to support for internationally recognised human rights within a company’s or issuer’s sphere of influence.

SFDR Sustainable Investments were considered aligned with the Responsible Business Practices as each company invested in passed screens provided by third parties which either directly cover one or more of the Responsible Business Practices or are considered appropriate proxies for one or more of the Responsible Business Practices. Each company invested in also passed the Investment Manager’s own qualitative review process which takes into account the Responsible Business Practices. In addition, where the companies invested in do not pass the relevant screens provided by third parties, the Investment Manager retains discretion to establish alignment with the Responsible Business Practices solely on the basis of its qualitative review process.

How did this financial product consider principal adverse impacts on sustainability factors? *[include section if the financial product considered principal adverse impacts on sustainability factors]*

The Investment Manager reviewed principal adverse impacts at the product level on a frequent basis during the reference period, notwithstanding certain data coverage and data quality issues as further described below. The Investment Manager reviewed PAIs for investee issuers using data from a designated third party data provider. If a given PAI or PAIs for an issuer or product appeared to exceed expectations based on the data obtained from the designated third-party data provider, further qualitative review was undertaken with respect to those issuer(s) and that product in order to determine whether such data indicated the evidence of significant harm. In cases where, in the view of the Investment Manager, unresolvable significant harm was identified following further qualitative review, further action would be taken up to and including divestment. Over the course of the reference period no unresolvable significant harm was identified for investments in the Sub-Fund. Where there were data gaps and the PAI was considered material for a company's sector, the Investment Manager's internal qualitative assessment was used to assess the PAIs.

PAIs were categorised based on their characteristics (including their materiality and the Investment Manager's ability to estimate them), and such categories were used for the purpose of determining the actions and outcome when assessing the PAIs.

The Investment Manager was dependent upon information and data from third party data providers in order to be able to consider principal adverse impacts on sustainability factors. The availability and quality of such data impacted the extent to which each such PAI could be considered. In particular, the lack or incomplete reporting of metrics by some issuers meant that there was limited data on some adverse indicators. As such for some of the mandatory PAIs, data coverage was low. The Investment Manager's analysis of adverse indicators relied on this third-party information and data, and where such information was not available or was incomplete, the Investment Manager's analysis of adverse indicators was necessarily limited. As the data availability improves over time, it is expected that PAIs can be applied to a greater portion of the Investment Manager's investable universe. This will allow for enhanced insight into the adverse impacts caused by issuers.

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: **23rd September 2022 – 31st December 2022**

#	Largest Investments	Sector	% Assets	Country

Asset allocation describes the share of investments in specific assets.

What was the proportion of sustainability-related investments?

● **What was the asset allocation?**

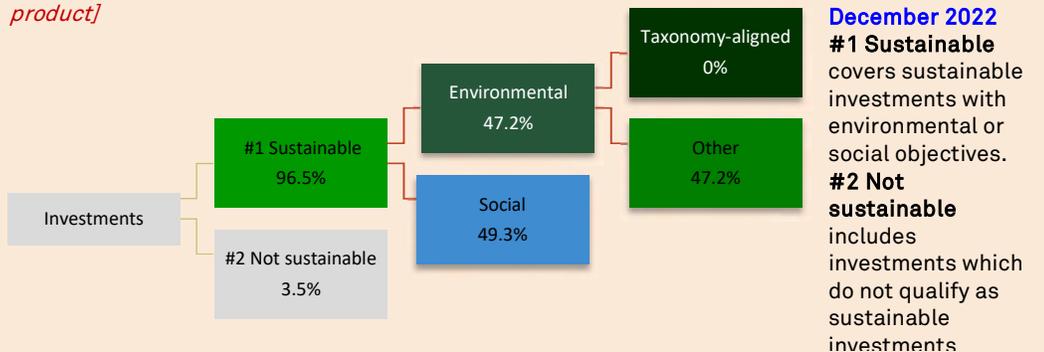

[include note for the financial products referred to in Article 5, first paragraph, of Regulation (EU) 2020/852.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

[Include only relevant boxes, remove irrelevant ones for the financial product]

Reference period
23rd September
2022 – 31st
December 2022

#1 Sustainable covers sustainable investments with environmental or social objectives.
#2 Not sustainable includes investments which do not qualify as sustainable investments

The asset allocation diagram illustrates the asset allocation of this Sub-Fund. 96.5% of the Net Asset Value was invested in SFDR Sustainable Investments. Whilst the asset allocation between environmental and social objectives is not fixed and as such the Sub-Fund does not commit to invest a minimum percentage of Net Asset Value in SFDR Sustainable Investments which have specifically an environmental objective or specifically a social objective, 47.2% of Net Asset Value was invested in SFDR Sustainable Investments with an environmental objective not aligned with the EU Taxonomy, and 49.3% of Net Asset Value was invested in SFDR Sustainable Investments with a social objective. 0% of the Net Asset Value of the Sub-Fund was invested in SFDR Sustainable Investments with an environmental objective aligned with the EU Taxonomy.

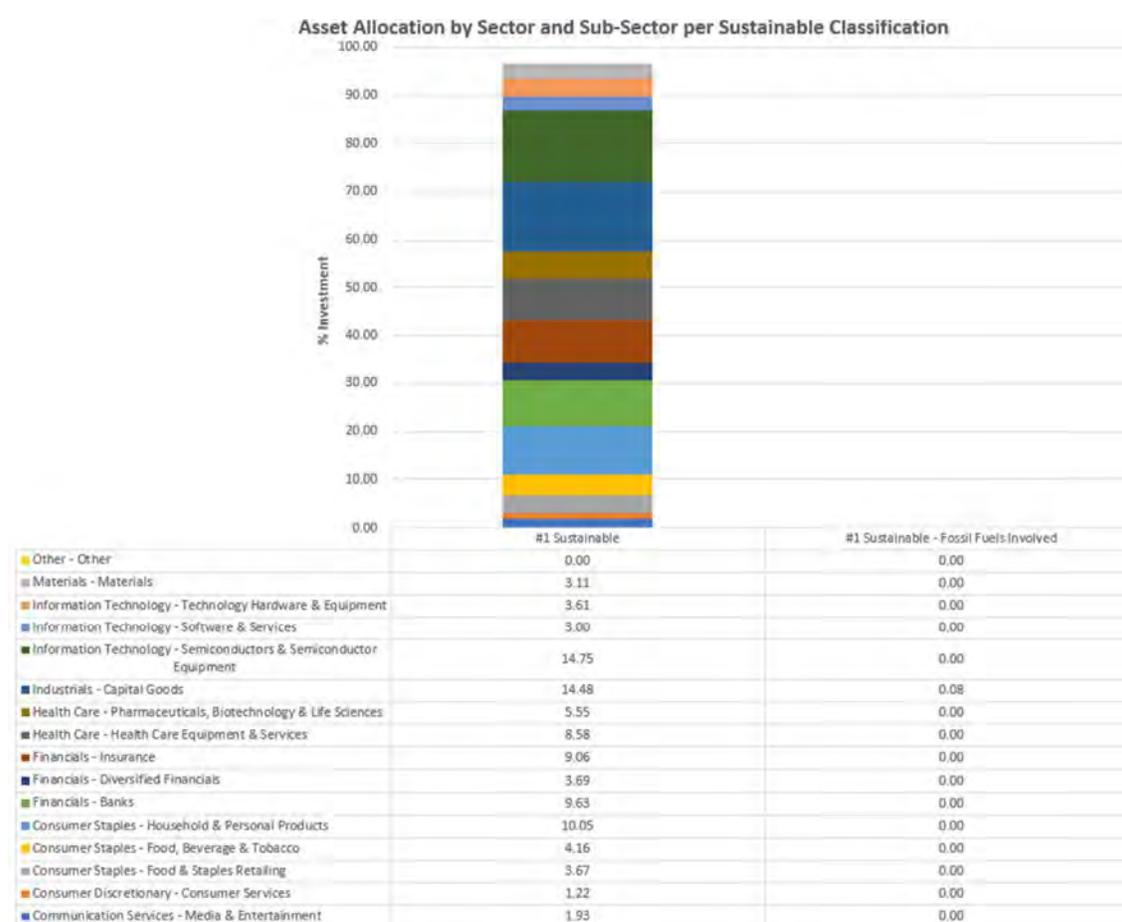

#1 Sustainable: 96.5% of Net Asset Value

- Other environmental: 47.2% of Net Asset Value

- Social: 49.3% of Net Asset Value

#2 Not Sustainable: 3.5% of Net Asset Value

- **In which economic sectors were the investments made?** *[include information referred to in Article Article 61(c) of this Regulation]*

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy? *[include section for the financial products referred to in Article 5, first paragraph, of Regulation (EU) 2020/852 and include information in accordance with Article 62 of this Regulation]*

SFDR Sustainable Investments with environmental objectives were not aligned with the EU Taxonomy.

[include note only for the financial products referred to in Article 5, first paragraph, of Regulation (EU) 2020/852

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The assessment of whether these investments complied with the EU Criteria for Environmentally Sustainable Economic Activities was not subject to an assurance provided by one or more auditors or a review by one or more third parties.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?**

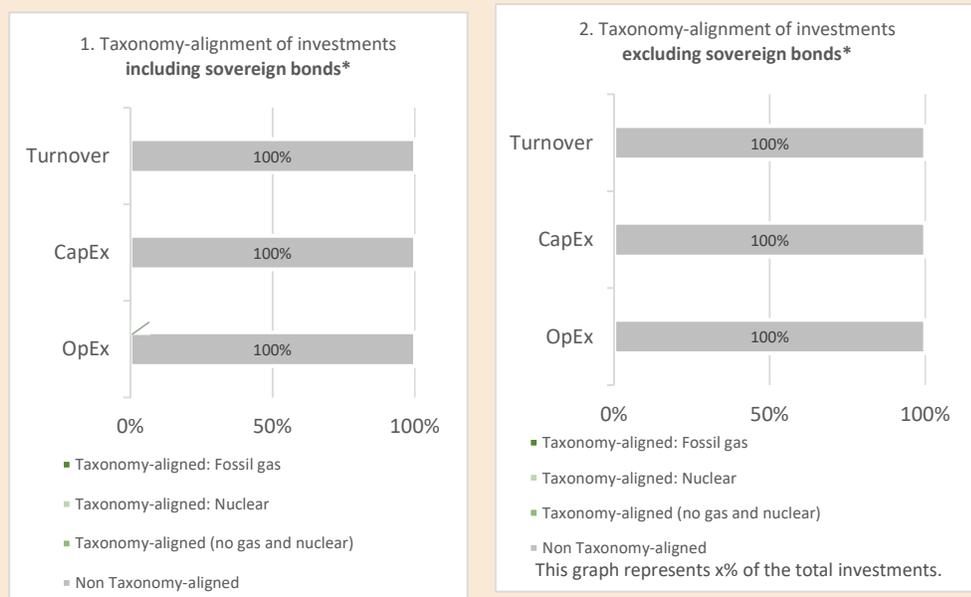

Yes: *[specify below, and details in the graphs of the box]*

In fossil gas In nuclear energy

No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

[Include information on Taxonomy aligned fossil gas and nuclear energy and the explanatory text in the left hand margin on the previous page only if the financial product invested in fossil gas and/or nuclear energy Taxonomy-aligned economic activities during the reference period]

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

- **What was the share of investments made in transitional and enabling activities?** *[include a breakdown of the proportions of investments during the reference period]*

0.00%

- **How did the percentage of investments aligned with the EU Taxonomy compare with previous reference periods?** *[include where at least one previous periodic report was provided]*

No comparison for previous periods is available at the date of this periodic report.

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy? *[include only for the financial products referred to in Article 5, first paragraph, of Regulation (EU) 2020/852 where the financial product included investments with an environmental objective that invested in economic activities that are not environmentally sustainable economic activities and explain why the financial product invested in economic activities that were not taxonomy-aligned]*

[include only for the financial products referred to in Article 5, first paragraph, of Regulation (EU) 2020/852 where the financial product included investments with an environmental objective that invested in economic activities that are not environmentally sustainable economic activities and explain why the financial product invested in economic activities that were not taxonomy-aligned]

The Sub-Fund invested 47.2% of NAV in SFDR Sustainable Investments with an environmental objective that were not aligned with the EU Taxonomy.

The Sub-Fund invested in SFDR Sustainable Investments with an environmental objective in economic activities that are not Taxonomy-aligned because evidence of taxonomy alignment is dependent on the availability of accurate, detailed and complete data on the investee companies to which the Sub-Fund has exposure. At this time, such information is not necessarily readily available from public disclosures by investee companies. While data availability is improving and is expected to improve over time, the data currently available is limited and varies between investee companies.

[include note for the financial products referred to in Article 5, first paragraph, of Regulation (EU) 2020/852 that invest in environmental economic activities that are not environmentally sustainable economic activities]

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What was the share of socially sustainable investments? *[include only where the financial product includes sustainable investments with a social objective]*

While the Sub-Fund does not commit to investing a minimum percentage of its Net Asset Value in socially sustainable investments, the Sub-Fund invested 49.3% of its Net Asset Value in SFDR Sustainable Investments with a social objective.

What investments were included under “not sustainable”, what was their purpose and were there any minimum environmental or social safeguards?

The Sub-Fund invested 3.5% of Net Asset Value in category #2 (Not Sustainable) which comprised of FDI, liquidity and hedging instruments only, including cash, cash equivalents, and currency positions. These instruments were held to either (a) ensure the Sub-Fund had sufficient liquidity; and/or (b) hedge against potential currency movements. These instruments were not subject to environmental or social safeguards as the Investment Manager does not view environmental or social considerations as relevant for these instruments.

What actions have been taken to attain the sustainable investment objective during the reference period? *[list the actions taken within the period covered by the periodic report to attain the sustainable investment objective of the financial product, including shareholder engagement as referred to in Article 3g of Directive 2007/36/EC and any other engagement relating to the sustainable investment objective]*

In order to attain the sustainable investment objective, the Investment Manager took the following actions:

- Invested at least 75% of its Net Asset Value in SFDR Sustainable Investments
- Excluded issuers that produce tobacco products
- Excluded issuers that derive more than 10% of turnover from the sale of tobacco
- Excluded issuers that generate revenues from the production of controversial weapons
- Excluded issuers in breach of the Principles of the UN Global Compact (which includes principles relating to human rights, labour, environment and anti-corruption)
- Invested at least 90% of the Net Asset Value of the Sub-Fund net of the Sub-Fund's exposure to cash and liquid near cash assets, money market funds, currency related FDI and FDI used for hedging purposes (the “Non-ESG Assets”) in companies that meet the Investment Manager's ESG and sustainability criteria at time of purchase and on an ongoing basis.
- Invested at least 75% of its Net Asset Value in companies in emerging market countries that contribute to social or environmental objectives by supporting sustainable development, through contributing to one or more of the UN Sustainable Development Goals (the “SDGs”). Examples of the SDGs include

[include note for the financial products referred to in Article 9(1) of Regulation (EU) 2019/2088]

Reference benchmarks are indexes to measure whether the financial product attains the sustainable objective.

climate action, affordable and clean energy, sustainable cities and communities, good health and wellbeing, quality education, and zero hunger.

Engagement is not a part of the environmental or social investment strategy of the Sub-Fund. However, engagement is an integral part of the Investment Manager's approach to investing as they believe that constructive dialogue with management teams not only affords real insight into how a company operates, it is an opportunity to advocate for positive change.

How did this financial product perform compared to the reference sustainable benchmark?

[include section only for the financial products referred to in Article 9(1) of Regulation (EU) 2019/2088 and indicate where the methodology used for the calculation of the designated index can be found]

A reference benchmark has not been designated for the purpose of attaining the sustainable investment objective of the Sub-Fund.

Qualitative Case Studies – Demonstration of Alignment to the UN Sustainable Development Goals for the Top 5 Holdings (by weight) in the fund as of 31st December 2022

The following information demonstrates the contribution to environmental and/or social objectives, by way of alignment to one or more of the UN Sustainable Development Goals (UN SDGs), made by the top five holdings by weight in the Sub-Fund as of the end of the reference period (31st December 2022). The intention of this information is to illustrate the approach taken by the Investment Manager for all investments in the Sub-Fund (excluding instruments used for liquidity and hedging purposes). All investments in the Sub-Fund are aligned to one or more of the UN SDGs.

#	Holding	Weight as of 31-Dec-2022 (%)	Alignment to SDG #	SDG Description	How was this company aligned to the SDG?
1	Taiwan Semiconductor Manufacturer TWD10	5.46	9	Build resilient infrastructure, promote inclusive and sustainable industrialization and foster innovation	TSMC was the first to realise automated manufacturing. The Company has applied AI to the big data and machine learning platform for wafer fabrication to create an intelligent manufacturing environment featuring self-diagnosis and self-feedback capabilities. In response to the increasingly diversified and growing need for high-quality chips, TSMC initiated a comprehensive digital transformation. Digitised fabs are launched to transform the manufacturing process. With automated data collection, system assistance and AI judgment, process efficiency per batch is increased by 30% to 40%. In accelerating intelligent manufacturing, TSMC has also built an AI quality control system for wafer fabs to ensure production quality, facilitate benchmarking among different fabs, and strengthen technology transfer capacity.
			7	Ensure access to affordable, reliable, sustainable and modern energy for all	TSMC are the leading provider of high-performance, energy-saving semiconductor technologies that enable customers to deliver energy-efficient products. Calculations using the Industry, Science, and Technology International Strategy Centre's model revealed that, in 2020, TSMC helped the world conserve 4kWh of energy for each 1kWh spent in production. Their semiconductors are realised in applications of new technologies and support global, inclusive growth of smart manufacturing, smart energy and smart building. TSMC are one of only two companies in the world that have the capability to produce 3nm wafers. The relevance of this is that 3nm wafers take up 0.64x the area of the next best 5nm wafers, they have 11% superior processing speed per wafer and reduce energy consumption (for the same processing power) for the customer by 30%. This means that even though the production process is energy-and-water-intensive, the outcome of the product has a positive impact on its customers' product.

#	Holding	Weight as of 31-Dec-2022 (%)	Alignment to SDG #	SDG Description	How was this company aligned to the SDG?
			12	Ensure sustainable consumption and production patterns	A core mission of TSMC is to purchase raw materials responsibly by making suppliers to make advancements in the following aspects: technology, quality, delivery, environmental protection, human rights, safety and health. All tier 1 suppliers have signed the TSMC Supplier Code of Conduct and they ensure a cumulative total of 145 local raw materials suppliers receive support on process enhancement and quality improvement. They also look to reduce waste production among local suppliers by 35% by 2030 as compared to 2014.
			4	Ensure inclusive and equitable quality education and promote lifelong learning opportunities for all	TSMC has established research centres in collaboration with top-ranked universities in Taiwan and dedicated research funds to encourage university professors to conduct ground-breaking semiconductor research projects. As the research centres strive to develop leading-edge technologies in semiconductor devices, material science, manufacturing process, and IC design. TSMC also works with universities in Taiwan and overseas to promote joint development projects covering a range of technologies areas. Their annual research funding exceed NT\$338 million, and over 157 US patent applications were filed.
2	AIA Group Ltd NPV	4.29	3	Ensure healthy lives and promote well-being for all at all ages	AIA looks to incentivise members to understand the benefits of a healthy lifestyle and reward them for improving their health. AIA focus on preventative screenings and continuously innovating to ensure customers receive the right care at the right time. AIA Vitality is a science-backed wellness program that engages with participants to encourage them to make measurable improvements in their health. 24% of members who started with an unhealthy BMI range have moved to a healthy range and 73% of members who started with an unhealthy glucose range have moved to a healthy range (as deemed subjectively by the company) AIA has generated US\$ 2.5 billion cumulative Vitality-integrated product value of new business over 2018-2022. AIA aim to engage a billion people to lives Healthier, Longer, Better Lives by 2030, as part of their AIA One Billion initiative (hitting 258 million by 2022).

#	Holding	Weight as of 31-Dec-2022 (%)	Alignme nt to SDG #	SDG Description	How was this company aligned to the SDG?
			8	Promote sustained, inclusive and sustainable economic growth, full and productive employment and decent work for all	AIA is a major provider of group insurance, supporting businesses and protecting their employees across the region. More than half of the Asian labour force works for SME and therefore SMEs contribute significantly to the development of local economies. In 2020, AIA issued more than 80,000 SME policies covering more than 2.3 million employees in 2020. AIA offered free Covid-19 cover for SME employees in select markets, while in others enabling digital services such as teleconsultations services for doctor appointments.
			11	Make cities and human settlements inclusive, safe, resilient and sustainable	AIA has been active in providing funding for many infrastructure projects in the region. Out of the total fixed income and equity investments (roughly US\$247.3 billion), approximately US\$32 billion is invested in infrastructure-related sectors
3	Shenzhen Inovance Tech Co Ltd 'A' CNY1	3.75	11	Make cities and human settlements inclusive, safe, resilient and sustainable	Shenzhen Inovance initially started out producing low-voltage inverters in 2004 and expanded its product range including industrial automation (IA) products, industrial robots across various sectors (OEMs and end-users) electric vehicles (EVs) and rail transit business. They provide customised servo systems to its customers spread across lithium battery manufacturers, cell phone factories, semi-conductor producers and industrial robots. Inovance also provides SaaS/PaaS solutions for its customers to monitor the operation status of their products and has already made notable inroads with elevator, air-compressor and textile customers. Specifically for EVs, they offer inverters and microgrid solutions for the photovoltaics industry; and also supplies a full range of electronic and mechanical epowertrain components including EV inverters and motors, DC-DC converters and e-axels for EVs and ICEs. Shenzhen Inovance have over 12,000 industrial robots in 2021, split between Scarra and 6-Joint and will look to reach 15,000 by the end of 2022.

#	Holding	Weight as of 31-Dec-2022 (%)	Alignme nt to SDG #	SDG Description	How was this company aligned to the SDG?
			9	Build resilient infrastructure, promote inclusive and sustainable industrialization and foster innovation	Inovance invests 10% of revenues in R&D and employs 800 engineers focused on three areas: core technologies, product development and industrial applications. They use a uniquely rigorous engineering process that incorporates advanced design modelling, performance analysis and quality assurance techniques. Inovance's product portfolio covers the range of core components for industrial robots, as well as a variety of integrated solutions.
4	Bank Rakyat Indonesia IDR50	3.25	8	Promote sustained, inclusive and sustainable economic growth, full and productive employment and decent work for all	BRI continues to foster financial inclusion that enables the public to obtain banking services access through its BRILink Agent, totalling 504,233 agents operating in more than 54,000 villages, or more than 70% of total villages in Indonesia. BRILink transaction volume reached 728million transactions with Rp843 trillion transaction value in 2020. As of 2022 Bank Rakyat lends to 14.4 million micro borrowers, of which 10.9 million are borrowing through the government-backed KUR scheme. Via this KUR scheme borrowers can get access to credit at a APR of just 6%, which is an extremely low for informal borrowers, especially in an emerging market country prone to higher government bond yields. Total micro loan balances in 2022 was Rp 449.6 trillion, of which Rp 251.5 trillion sits with the KUR scheme. Bank Rakyat's scale and breadth of infrastructure make it a key solution provision in driving financial inclusion within Indonesia.
			4	Ensure inclusive and equitable quality education and promote lifelong learning	The Micro Business forms the support for government programs in promoting financial literacy, financial inclusion or the economic empowerment of communities in the Disadvantaged, Frontier and Outermost regions. To increase financial literacy and inclusion, BRI Micro Business has marketed its Basic Service Account (BSA) products, namely Tabunganku and SimPel (student saving).

#	Holding	Weight as of 31-Dec-2022 (%)	Alignme nt to SDG #	SDG Description	How was this company aligned to the SDG?
				opportunities for all	
			9	Build resilient infrastructure, promote inclusive and sustainable industrialization and foster innovation	Through Small & Medium financing, BRI participated in supporting government programs, especially in increasing the number of entrepreneurs and increasing the access of small, retail, and medium entrepreneurs to additional venture capital needs, reducing poverty, increasing jobs, and reducing unemployment. In 2020, Rp36.483bn infrastructure financing included several sub-sectors that support sustainable growth. As of 2020, BRI successfully disbursed KUR lending of Rp138.5tr to more than 6 million MSMEs- a 57% growth as compared to 2019.
5	WEG SA Com Stk NPV	3.00	7	Ensure access to affordable, reliable, sustainable and modern energy for all	WEG continuously looks to develop its line of electric motors and frequency inverters for electric drive. WEG's electric drive solutions contribute to lighter and more efficient vehicles, combining efficiency and quality for different applications. Given that WEG is one of the largest global manufacturers of electric machines and automation technologies for the industry and energy systems, they are ready for the electric mobility market with the launch of their EV charging stations. For WEG, technological innovation mainly refers to the development of new technologies, products and materials, aiming at reducing costs, increasing efficiencies, improving quality and reducing raw materials used in products. In 2020, WEG supplied 10 WEMOB charging stations providing a capacity of up to 22kW. WEG is also one of the main suppliers of products and solutions for solar power plants in the country. WEG supplied complete turn-key conventional substations for a solar power plant in Mexico, helping export 100MW of energy by supplying a 34.5kV-to-230kV electrical substation and a 230kV transmission line. WEG also manufactures wind turbines- since 2013, around 650MW in wind turbines have been installed and are looking to expand into international markets such as India. WEG offers turbines, generators, panels and transformers for medium and small power plants.

#	Holding	Weight as of 31-Dec-2022 (%)	Alignme nt to SDG #	SDG Description	How was this company aligned to the SDG?
			9	Build resilient infrastructure, promote inclusive and sustainable industrialization and foster innovation	The majority of motors sold globally are still low efficiency motors (IE1 or IE2 account for over 70% of the motors sold in the world). The majority of WEG sales come from far more energy efficient products, over 50% of their revenue comes from products launched in the last 3 years, which will be IE3 plus. Following a mixed model of innovation (open and closed), WEG's RD&I (Research, Development and Innovation) made a substantial contribution to the development of new technologies and their growth in 2020. They have over 108 research/test laboratories in the world. In 2020, WEG created an online registration platform, in a continuous flow system, for startups interested in solving problems related to their demands- more than 340 startups signed up for their initiatives aimed at open innovation on topics such as monitoring, AI, digitization and technological materials.
			12	Ensure sustainable consumption and production patterns	WEG look to work on processes that reduce environmental impacts, basing the activities on preventative measures to protect the environment- such as the conservation of natural resources and management of emissions and waste generation- on investments in technologies and on constant process improvement by establishing objectives and targets. WEG have a Quality and Productivity Program (WQPP) which includes an Environmental Program (EP) that looks to optimise the use of raw materials and inputs, develop processes and products that are less harmful to the environment and optimise waste and effluent management in manufacturing processes. WEG use Kaizen implementation programs to enhance environmental gains and consequently has seen water consumption/NOI, consumption of electric energy/NOI and solid waste generation/NOI all steadily fall since 2018.
			4	Ensure inclusive and equitable quality education and promote lifelong learning opportunities for all	Since 2010, WEG has provided employees in Jaragua do Sul region with the opportunity to raise their educational level, free of charge, through the Youth and Adult program (YAE), which is aimed at young people and adults who were unable to complete their high school. The program is carried out in a partnership with SESI (Social Service for Industry). By 2020, 555 employees graduated from this program. WEG also has an apprenticeship program whereby 16-18 year olds have access to a range of courses such as electromechanical assembly, electronics and chemistry. Annually, 150 professionals graduate with more than 4,000 young people having studied there since creation and 48% of those young people remaining working at the company until today.

ANNEX IV

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: [BNY Mellon Sustainable Global Real Return Fund](#)
 Legal entity identifier: [213800MU54AM2UKX6758](#)

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective? *[tick and fill in as relevant, the percentage figure represents sustainable investments]*

<input checked="" type="radio"/> <input type="radio"/> <input type="checkbox"/> Yes	<input type="radio"/> <input type="radio"/> <input checked="" type="checkbox"/> No
<p><input type="checkbox"/> It made sustainable investments with an environmental objective: ___%</p> <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <p><input type="checkbox"/> It made sustainable investments with a social objective: ___%</p>	<p><input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 52.3% of sustainable investments</p> <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective <p><input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments</p>

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met? *[list the environmental and/or social characteristics promoted by the financial product. For the financial products referred to in Article 6, first paragraph, of Regulation (EU) 2020/852, in respect of sustainable investments with environmental objectives, list the environmental objectives set out in Article 9 of that Regulation to which the sustainable investment underlying the financial*

product contributed. For financial products that made sustainable investments with social objectives, list the social objectives]

The environmental and/or social characteristics promoted by the Sub-Fund were met to the following extent during the reference period 1 January 2022 to 31 December 2022 (the “Reference Period”).

The environmental and/or social characteristics promoted were:

- Investment in companies that align with the Investment Manager’s proprietary carbon red line
- Avoid investment in companies that have material unresolvable issues relating to human rights, labour, the environment, and corruption
- Investment in companies proactively seeking to manage social and environmental factors well
- Investment in sovereign issuers proactively seeking to manage social and environmental factors well

All of the above characteristics were met by the Sub-Fund during the reference period.

No reference benchmark was designated for the purpose of attaining the environmental or social characteristics promoted by the Sub-Fund.

The SFDR Sustainable Investments underlying this Sub- Fund did not contribute to the environmental objectives set out in Article 9 of the EU Taxonomy Regulation.

The SFDR Sustainable Investments underlying this Sub- Fund contributed to the following environmental objectives not aligned with the EU Taxonomy:

- Contributing to the transition to a net zero world
- Circular economy and recycling
- Electrification

The SFDR Sustainable Investments underlying this Sub- Fund contributed to the following social objectives:

- Access to financial products and services
- Health & wellbeing
- Drug development
- Infrastructure
- Access to digital infrastructure

- Societal protection
- Access to housing
- Education & training

● ***How did the sustainability indicators perform?***

The following sustainability indicators are used to measure how the environmental or social characteristics promoted by the Sub-Fund are attained:

Sustainability Indicator #1 - No more than 5% of Net Asset Value in companies that:

- Are in heavy emitting sectors as defined by the International Energy Agency (IEA); and
- Have a business incompatible with a scenario in which global temperatures rise more than 2 degrees above pre-industrial levels; and
- Do not have an adequate strategy to address emissions / climate change, or a credible transition plan.

In addition, where third party data is not available to assess these criteria or indicates that specific companies meet these criteria, the Investment Manager retains discretion to determine alignment with this sustainability indicator solely on the basis of its qualitative review process.

Sustainability Indicator #2 - 0% of Net Asset Value in investee companies that have been involved in violations of the UNGC principles.

Sustainability Indicator #3 - A weighted average ESG risk rating of 'medium' or better at the portfolio level. Such rating to be determined using third party data.

Sustainability Indicator #4 - All investments in sovereign issuers to have either strong current positioning, and/or are demonstrating progress in respect of the management of environmental, social and governance factors, as determined by the Investment Manager's proprietary sovereign sustainable framework.

The sustainability indicators performed as follows:

Indicator #	How did the indicator perform in the reference period?
Sustainability Indicator #1	0%

Sustainability Indicator #2	0%
Sustainability Indicator #3	Medium
Sustainability Indicator #4	100% of investments (excluding those held for liquidity and hedging purposes)

The data coverage for sustainability indicators #1 and #2 was 96.75% of the Sub-Fund's investments (excluding FDI, cash and cash equivalents).

The data coverage for sustainability indicator #3 was 91% of the Sub-Fund Investments (excluding FDI, cash and cash equivalents).

The data coverage for sustainability indicator #4 was 100% of sovereign issuers held by the Sub-Fund.

No FDI were used to meet the environmental or social characteristics.

- **...and compared to previous periods?** *[include for financial products where at least one previous periodic report was provided]*

No comparison for previous periods is available at the date of this periodic report.

- **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?** *[include for financial products that made sustainable investments, where not included in the reply to the above question, describe the objectives. Describe how the sustainable investments contributed to the sustainable investment objective. For the financial products referred to in Article 6, first paragraph, of Regulation (EU) 2020/852, list the environmental objectives set out in Article 9 of that Regulation to which the sustainable investment underlying the financial product contributed]*

The social objectives of the SFDR Sustainable Investments the Sub-Fund partially made are included above.

The SFDR Sustainable Investments underlying this Sub-Fund did not contribute to environmental objectives set out in Article 9 of the EU Taxonomy Regulation.

The SFDR Sustainable Investments contributed to the above social objectives in the following ways:

- Facilitating access and knowledge of financial products and services to the non-banked market in a developing country

- Provision of social infrastructure which supports societal needs including healthcare, education and affordable housing.
- Provision of digital infrastructure
- Financing the discovery, development and/or marketing of pioneering drugs
- Provision of health care products and services
- Provision of access to affordable housing

The SFDR Sustainable Investments underlying this Sub-Fund contributed to environmental objectives not aligned with Article 9 of the EU Taxonomy Regulation.

The SFDR Sustainable Investments underlying this Sub-Fund contributed to environmental objectives not aligned with Article 9 of the EU Taxonomy Regulation.

The SFDR Sustainable Investments underlying this Sub-Fund contributed to the following environmental objectives not aligned with Article 9 of the EU Taxonomy Regulation:

- Contributing to the transition to a net zero world
- Circular economy and recycling
- Electrification

The sustainable investments contributed to these environmental objectives in the following ways:

- Provision of key parts for the generation of renewable energy
- Provision of grid automation solutions, access and connectivity to continued electricity supply and business efficiency by creating systems that enable efficiency in power distribution and access and those that will enable transition to low carbon
 - Offering renewable and circular economy solutions in the form of biofuels
 - Production of EV batteries, energy storage systems, and other products that enable the transition to a lower carbon economy
 - Development and manufacture of markets machines used to recycle beverage containers, supporting resource efficiency and productivity through recycling, food sorting and waste management services
 - Manufacture and distribution of uninterruptible power supplies (UPSs), photovoltaic products, and electronic materials, contributing to clean energy penetration and enabling energy saving and carbon reduction for users.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective? [include where the financial product includes sustainable investments]

The Investment Manager determined that SFDR Sustainable Investments in the Sub-Fund did no significant harm to any environmental or social objectives by assessing each SFDR Sustainable Investment's involvement in areas deemed to be harmful from an environmental or social perspective. Issuers that had involvement in activities deemed to be harmful from an environmental or social perspective were excluded from investment. Involvement in such activities was monitored on an ongoing basis.

How were the indicators for adverse impacts on sustainability factors taken into account?

The Investment Manager reviewed the indicators for adverse impacts on sustainability factors for all SFDR Sustainable Investments where data was available. The Investment Manager reviewed PAIs for investee issuers using data from a designated third party data provider. If a given PAI or PAIs for an issuer appeared to exceed expectations based on the data obtained from the designated third-party data provider, further qualitative review was undertaken with respect to those issuer(s) and that product in order to determine whether such data indicated the evidence of significant harm. Where there were data gaps and the PAI was considered material for a company's sector, the Investment Manager's internal qualitative assessment was used to assess the PAIs.

The Sub-Fund took into account the following PAIs from:

- Table 1 of Annex I of the Commission Delegated Regulation:
 1. GHG emissions: Scope 1, 2 and 3
 2. Carbon footprint: Scope 1, 2 and 3
 3. GHG intensity of investee companies: Scope 1, 2 and 3
 4. Exposure to companies active in the fossil fuel sector
 5. Share of non-renewable energy consumption and production
 6. Energy consumption intensity per high impact climate sector: NACE A, B, C, D, E, F, G, H and L
 7. Activities negatively affecting biodiversity-sensitive areas
 8. Emissions to water
 9. Hazardous waste and radioactive waste ratio

10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
 11. Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises
 12. Unadjusted gender pay gap
 13. Board gender diversity
 14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons, and biological weapons).
- Table 2 of Annex I of the Commission Delegated Regulation: 4. Investments in companies without carbon emission reduction initiatives
 - Table 3 of Annex I of the Commission Delegated Regulation: 9. Lack of a human rights policy. 17. Number of convictions and amount of fines for violation of anti-corruption and anti-bribery laws. 19. Freedom of expression score. 23. Political stability score. 24. Rule of law score.

— — — *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

The OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, including the principles and rights set out in the eight fundamental conventions identified in the Declaration of the International Labour Organisation on Fundamental Principles and Rights at Work and the International Bill of Human Rights (the “Responsible Business Practices”) collectively cover a very broad range of areas of responsible business, encompassing everything from labour rights to consumer protection to support for internationally recognised human rights within a company’s or issuer’s sphere of influence.

SFDR Sustainable Investments were considered aligned with the Responsible Business Practices as each company invested in passed screens provided by third parties which either directly cover one or more of the Responsible Business Practices or are considered appropriate proxies for one or more of the Responsible Business Practices. Each company invested in also passed the Investment Manager’s own qualitative review process which takes into account the Responsible Business Practices. In addition, where the companies invested in do not pass the relevant screens provided by third parties, the Investment Manager retains discretion to establish alignment with the Responsible Business Practices solely on the basis of its qualitative review process.

[Include a statement for the financial products referred to in Article 6, first paragraph, of Regulation (EU) 2020/852]

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors? *[include section if the financial product considered principal adverse impacts on sustainability factors]*

The Investment Manager reviewed principal adverse impacts at the product level on a frequent basis during the reference period, notwithstanding certain data coverage and data quality issues as further described below. The Investment Manager reviewed PAIs for investee issuers using data from a designated third party data provider. If a given PAI or PAIs for an issuer or product appeared to exceed expectations based on the data obtained from the designated third-party data provider, further qualitative review was undertaken with respect to those issuer(s) and that product in order to determine whether such data indicated the evidence of significant harm. In cases where, in the view of the Investment Manager, unresolvable significant harm was identified following further qualitative review, further action would be taken up to and including divestment. Over the course of the reference period no unresolvable significant harm was identified for investments in the Sub-Fund. Where there were data gaps and the PAI was considered material for a company’s sector, the Investment Manager’s internal qualitative assessment was used to assess the PAIs.

PAIs were categorised based on their characteristics (including their materiality and the Investment Manager’s ability to estimate them), and such categories were used for the purpose of determining the actions and outcome when assessing the PAIs.

The Investment Manager was dependent upon information and data from third party data providers in order to be able to consider principal adverse impacts on sustainability factors. The availability and quality of such data impacted the extent to which each such PAI could be considered. In particular, the lack or incomplete reporting of metrics by some issuers meant that there was limited data on some adverse indicators. As such for some of the mandatory PAIs, data coverage was low. The Investment Manager’s analysis of adverse indicators relied on this third-party information and data, and where such

information was not available or was incomplete, the Investment Manager's analysis of adverse indicators was necessarily limited. As the data availability improves over time, it is expected that PAIs can be applied to a greater portion of the Investment Manager's investable universe. This will allow for enhanced insight into the adverse impacts caused by issuers.

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: **1st January 2022 – 31st December 2022**

What was the proportion of sustainability-related investments?

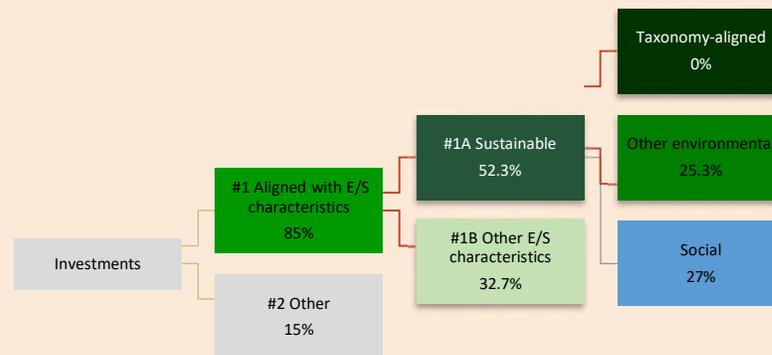

● What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

[Include only relevant boxes, remove irrelevant ones for the financial product]

Reference period 1st January 2022 – 31st December 2022

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

[include the note below where the financial product made sustainable investments]

The category **#1 Aligned with E/S characteristics** covers:

The asset allocation diagram illustrates the asset allocation of this Sub-Fund. 85% of Net Asset Value was used to meet the environmental or social characteristics promoted by the Sub-Fund in accordance with the binding elements of the investment strategy. The Sub-Fund invested 52.3% of Net Asset Value in SFDR

Sustainable Investments of which 25.3% had an environmental objective not aligned with the EU Taxonomy and 27% had a social objective. 0% of the Net Asset Value of the Sub-Fund was invested in sustainable investments with an environmental objective aligned with the EU Taxonomy.

#1 Aligned with E/S characteristics: 85% of Net Asset Value

#1A Sustainable: 52.3% of Net Asset Value

- Taxonomy-aligned: 0% of Net Asset Value
- Environmental: 25.3% of Net Asset Value
- Social: 27% of Net Asset Value

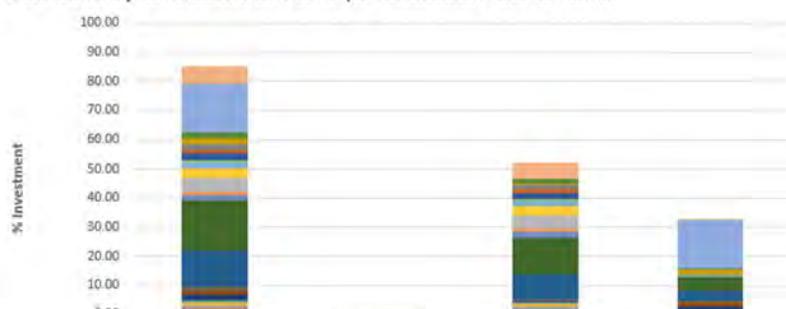

#1B Other E/S characteristics: 32% of Net Asset Value

#2 Other: 15% of Net Asset Value

In which economic sectors were the investments made? *[include information referred to in Article 54 of this Regulation]*

Asset Allocation by Sector and Sub-Sector per Sustainable Classification

[include note for the financial products referred to in Article 6, first paragraph, of Regulation (EU) 2020/852

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy? *[include section for the financial products referred to in Article 6 , first paragraph, of Regulation (EU) 2020/852 and include information in accordance with Article 51 of this Regulation]*

SFDR Sustainable Investments with environmental objectives were not aligned with the EU Taxonomy.

[include note for the financial products referred to in Article 6, first paragraph, of Regulation (EU) 2020/852 that invest in environmental economic activities that are not environmentally sustainable economic activities]

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

The assessment of whether these investments complied with the EU Criteria for Environmentally Sustainable Economic Activities was not subject to an assurance provided by one or more auditors or a review by one or more third parties.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?**

Yes: *[specify below, and details in the graphs of the box]*

In fossil gas In nuclear energy

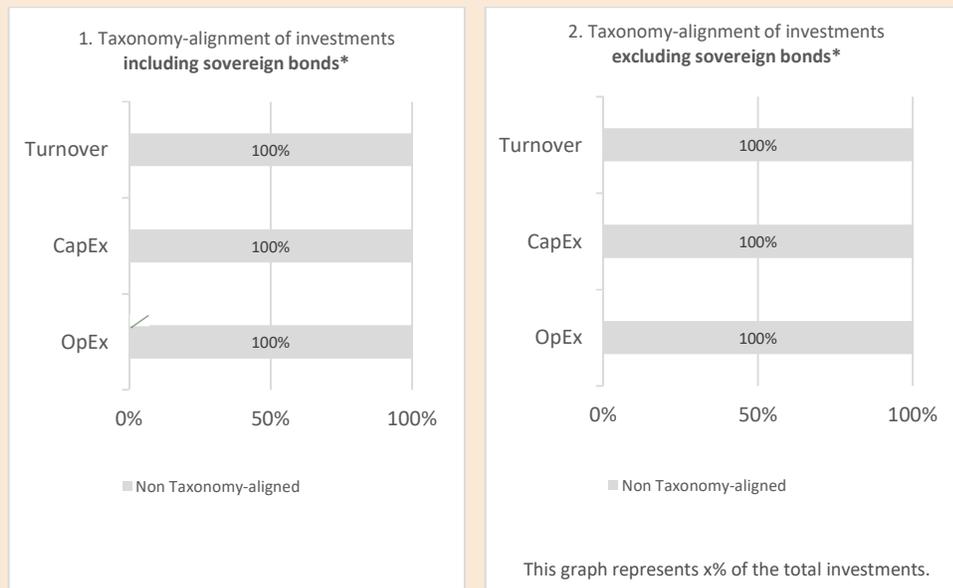

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules. **Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective. **Transitional activities** are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

[Include information on Taxonomy aligned fossil gas and nuclear energy and the explanatory text in the left hand margin on the previous page only if the financial product invested in fossil gas and/or nuclear energy Taxonomy-aligned economic activities during the reference period]

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

- **What was the share of investments made in transitional and enabling activities?** *[include a breakdown of the proportions of investments during the reference period]*

0.00%

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?** *[include where at least one previous periodic report was provided]*

No comparison for previous periods is available at the date of this periodic report.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

[include section only for the financial products referred to in Article 6, first subparagraph, of Regulation (EU) 2020/852 where the financial product included sustainable investments with an environmental objective that invested in economic activities that are not environmentally sustainable economic activities, and explain why the financial product invested in economic activities that were not Taxonomy-aligned]

The Sub-Fund invested 25.3% of NAV in SFDR Sustainable Investments with an environmental objective not aligned with the EU Taxonomy.

The Sub-Fund invested in SFDR Sustainable Investments with an environmental objective in economic activities that are not Taxonomy-aligned because evidence of taxonomy alignment is dependent on the availability of accurate, detailed and complete data on the investee companies to which the Sub-Fund has exposure. At this time, such information is not necessarily readily available from public disclosures by investee companies. While data availability is improving and is expected to improve over time, the data currently available is limited and varies between investee companies.

What was the share of socially sustainable investments? *[include only where the financial product included sustainable investments with a social objective]*

While the Sub-Fund does not commit to investing a minimum percentage of its Net Asset Value in socially sustainable investments, the Sub-Fund invested 27% of its Net Asset Value in SFDR Sustainable Investments with a social objective.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The Sub-Fund invested 15% of Net Asset Value in category #2 (other) which comprised of FDI, liquidity and hedging instruments only, including cash, cash equivalents, currency positions, currency related FDI and FDI used for hedging purposes. These instruments were held to either (a) ensure the Sub-Fund had sufficient liquidity; and/or (b) hedge against potential currency movements. These instruments were not subject to environmental or social safeguards as the Investment Manager does not view environmental or social considerations as relevant for these instruments.

What actions have been taken to meet the environmental and/or social characteristics during the reference period? *[list the actions taken within in the period covered by the periodic report to meet the environmental or social characteristics promoted by the financial product, including shareholder engagement as referred to in Article 3g of Directive 2007/36/EC and any other engagement relating to the environmental or social characteristics promoted by the financial product]*

[list the actions taken within in the period covered by the periodic report to meet the environmental or social characteristics promoted by the financial product, including shareholder engagement as referred to in Article 3g of Directive 2007/36/EC and any other engagement relating to the environmental or social characteristics promoted by the financial product]

In order to meet the environmental and social characteristics, the Investment Manager took the following actions:

- invested 20% in SFDR Sustainable Investments
- excluded issuers that produce tobacco products
- excluded issuers that derive more than 10% of turnover from the sale of tobacco
- excluded issuers that generate revenues from the production of controversial weapons
- excluded issuers in breach of the Principles of the UN Global Compact (which includes principles relating to human rights, labour, environment and anti-corruption)
- invested at least 90% of the Net Asset Value of the Sub-Fund net of the Sub-Fund's exposure to cash and liquid near cash assets, money market funds, and currency related FDI and FDI used for hedging purposes (the "Non-ESG Assets") in companies that meet the Investment Manager's ESG and sustainability criteria at time of purchase and on an ongoing basis.

[include note for financial products where an index has been designated as a reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the financial product]

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Engagement is not a part of the environmental or social investment strategy of the Sub-Fund. However, engagement is an integral part of the Investment Manager's approach to investing as they believe that constructive dialogue with management teams not only affords real insight into how a company operates, it is an opportunity to advocate for positive change.

How did this financial product perform compared to the reference benchmark? *[include section where an index has been designated as a reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the financial product and indicate where the methodology used for the calculation of the designated index can be found]*

[include section where an index has been designated as a reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the financial product and indicate where the methodology used for the calculation of the designated index can be found]

A reference benchmark has not been designated for the purpose of attaining the environmental and/or social characteristics promoted by the Sub-Fund.

- *How does the reference benchmark differ from a broad market index?*
Not applicable
- *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?*
Not applicable
- *How did this financial product perform compared with the reference benchmark?*
Not applicable
- *How did this financial product perform compared with the broad market index?*
Not applicable

ANNEX IV

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Responsible Horizons Euro Corporate Bond Fund

Legal entity identifier: 2138009IC4PGITKRBI83

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?	
●● <input type="checkbox"/> Yes	●● <input checked="" type="checkbox"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: ____% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy 	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 31% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective
<input type="checkbox"/> It made sustainable investments with a social objective: ____%	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Sub-Fund were met to the following extent during the reference period 1 January 2022 to 31 December 2022 (the "Reference Period"):

- The Sub-Fund promoted a *minimum environmental and/or social standard* that sought to mitigate or avoid practices that the Investment Manager deemed environmentally and/or socially detrimental. Exclusion criteria – as set out in the Sub-Fund's then applicable supplement - were used to achieve this minimum standard. For example, as referenced in the pre-contractual disclosure, issuers that derived a certain percentage of revenue as (determined by the Investment Manager) from tobacco, defence, gambling, coal extraction and controversial weapons production were excluded. Issuers were also excluded where, in the opinion of the Investment Manager, such issuers were deemed to have violated the minimum standards of business practices represented in widely accepted global conventions;
- The Sub-Fund focused on *higher scoring* issuers in terms of their ESG profile by not investing in any securities with the lowest ESG rating (being a score of 5), as determined by the Investment Manager. By way of illustration, as at the Sub-Fund's year-end date of 31 December 2022, 83% of the portfolio's Net Asset Value in aggregate was invested in issuers with a rating of 1 and 2. The remainder was invested in issuers with an ESG rating of 3 or 4, or in assets which did not have an ESG rating (being any liquid and near-cash assets, including cash, and derivatives (FDI) that were specifically used for hedging purposes). Please see the next question for information on the Sub-Fund's asset-weighted overall ESG rating measured as against the Bloomberg Barclays Euro Aggregate Corporate Total Return Index; and
- The Sub-Fund focused on issuers that the Investment Manager considered in its sole discretion to have *lower carbon intensity*. Please see the next question for details on the Sub-Fund's asset weighted average carbon intensity measured as against the Bloomberg Barclays Euro Aggregate Corporate Total Return Index.

Additionally, the Sub-Fund made investments in Use of Proceeds Impact Bonds and Impact Issuers, which were considered by the Investment Manager to qualify as SFDR Sustainable Investments (as determined by the Investment Manager) ("**SFDR Sustainable Investments**"*) and which in the opinion of the Investment Manager, contributed positively to the attainment of the UN Sustainable Development Goals ("**UN SDGs**"). The Sub-Fund had 31% of its Net Asset Value in aggregate as at 31 December 2022 invested in Use of Proceeds Impact Bonds and Impact Issuers, each of which are considered to qualify as SFDR Sustainable Investments.

The SFDR Sustainable Investments underlying this Sub-Fund did not contribute to the environmental objectives set out in Article 9 of the EU Taxonomy Regulation.

The Investment Manager considers that the Sub-Fund's SFDR Sustainable Investments contributed to varying extents to one or more of the following UN SDGs (which, for the purposes of this section, are also considered by the Investment Manager to equate to environmental objectives) :

- Affordable and clean energy
- Industry innovation and infrastructure
- Sustainable cities and communities
- Responsible consumption and production
- Climate action
- Life below water

- Life on land.

The Investment Manager considers that the Sub-Fund's SFDR Sustainable Investments contributed to varying extents to one or more of the following UN SDGs (which, for the purposes of this section, are also considered by the Investment Manager to equate to social objectives) :

- No Poverty
- Zero Hunger
- Good health & wellbeing
- Quality Education
- Gender Equality
- Clean water and sanitation
- Decent work and economic growth
- Reduced inequalities.

A reference benchmark was not designated for the purpose of attaining the environmental or social characteristics promoted by the Sub-Fund.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● *How did the sustainability indicators perform?*

The following sustainability indicators were used to measure how the environmental or social characteristics promoted by the Sub-Fund were attained:

- 1) The Sub-Fund successfully and consistently invested a minimum of 10% of its Net Asset Value during the Reference Period in Use of Proceeds Impact Bonds and Impact Issuers, each of which were considered to be "**SFDR Sustainable Investments**" (as determined by the Investment Manager). By way of illustration, as at the Sub-Fund's year end of 31 December 2022, 31% of the Sub-Fund's Net Asset Value in aggregate was invested in such Use of Proceeds Impact Bonds and Impact Issuers. This percentage figure is provided as at 31 December 2022 only and the percentage so invested has varied during the Reference Period (while remaining above the minimum at all times during the Reference Period).
 - 2) The Impact Issuers and Use of Proceeds Impact Bonds invested in by the Sub-Fund successfully and consistently met the following thresholds as assessed by the Investment Manager:
 - (a) each such Impact Issuer in which the Sub-Fund was invested demonstrated that at least 20% of their revenue streams were aligned to help realise one or more of the 17 UN Sustainable Development Goals ("UN SDGs");
 - (b) in the case of each such Use of Proceeds Impact Bonds in which the Sub-Fund was invested, the proceeds raised were aimed to be exclusively applied to finance or re-finance in part or in full projects that demonstrated a clear alignment to helping realise one or more of the 17 UN SDGs.
- **ESG Rating:** The Sub-Fund's asset-weighted overall ESG rating, as determined by the Investment Manager, has not been weaker than the asset-weighted overall ESG rating of the Bloomberg Barclays Euro Aggregate Corporate Total Return Index (the "**Benchmark**") at any point during the Reference Period. By way of illustration, as at the Sub-Fund's year end set

out above, the Sub-Fund's asset-weighted overall ESG rating was 1.8 against the benchmark score of 1.9 (where 1=best, 5=worst).

- **Carbon Intensity:** The Sub-Fund's asset weighted average carbon intensity has successfully and consistently been at least 25% lower than the asset weighted average carbon intensity of the Benchmark as set out below:

	(Asset) Weighted Average carbon intensity (tonnes/USDm Sales)	
Carbon Intensity	Fund	Index
Scope 1&2	65	122
Coverage (reported/estimated) (%)	94 (82/12)	97 (88/9)
Renormalised	69	126

- **Exclusion policy:** The Sub-Fund has successfully and consistently met its exclusion policy as outlined in the Sub-Fund's supplement and the annex to the Sub-Fund's supplement.

No derivatives (FDI) were used during the Reference Period to meet the environmental or social characteristics of the Sub-Fund.

● ***...and compared to previous periods?***

No comparison for previous periods is available at the date of this periodic report.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

The objective of the SFDR Sustainable Investments the Sub-Fund partially made was to achieve positive environmental and/or social impacts.

The Sub-Fund's SFDR Sustainable Investments contributed to environmental or social objectives by investing in:

Use of Proceeds Impact Bonds: The proceeds were applied to finance or re-finance in part or in full projects with positive environmental and/or social impacts using the UN SDGs as a guide to environmental targets. These SFDR Sustainable Investments contributed to varying extents to one or more of the following UN SDGs (which, for the purposes of this section, are also considered by the Investment Manager to equate to environmental objectives) :

- Affordable and clean energy
- Industry innovation and infrastructure
- Sustainable cities and communities
- Responsible consumption and production

- Climate action
- Life below water
- Life on land

These SFDR Sustainable Investments also contributed to varying extents to one or more of the following UN SDGs (which, for the purposes of this section, are also considered by the Investment Manager to equate to social objectives) :

- No Poverty
- Zero Hunger
- Good health & wellbeing
- Quality Education
- Gender Equality
- Clean water and sanitation
- Decent work and economic growth
- Reduced inequalities

Debt securities issued by Impact Issuers: At least 20% of these investments revenue streams were linked to positive environmental and/or social impacts using the UN SDGs as a guide to environmental targets. These SFDR Sustainable Investments contributed to varying extents to one or more of the following UN SDGs (which, for the purposes of this section, are also considered by the Investment Manager to equate to environmental objectives) :

- Affordable and clean energy
- Industry innovation and infrastructure
- Sustainable cities and communities
- Responsible consumption and production
- Climate action

These SFDR Sustainable Investments also contributed to varying extents to one or more of the following UN SDGs (which, for the purposes of this section, are also considered by the Investment Manager to equate to social objectives) :

- No Poverty
- Good health & wellbeing
- Gender Equality
- Clean water and sanitation
- Decent work and economic growth
- Reduced inequalities
- Peace and justice strong institutions

The Sub-Fund's investments determined by the Investment Manager to be SFDR Sustainable Investments underlying this Sub-Fund did not contribute to the environmental objectives set out in Article 9 of the EU Taxonomy Regulation.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

From the beginning of the Reference Period as at 1 January 2022 to 31 July 2022, the Investment Manager ensured the Sub-Fund's investments determined by the Investment Manager to be SFDR Sustainable Investments, did not cause significant

harm to any environmental or social sustainable investment objective in the following manner:

- **Use of Proceeds Impact Bonds** – each Use of Proceeds Impact Bond was determined to not be in breach of the Investment Manager’s assessment framework which incorporated “do no significant harm” analysis. This included analysis to understand the sustainability profile of the issuer and check if processes were in place to identify, manage and mitigate ESG related risks associated with Use of Proceeds Impact Bonds.
- **Impact Issuers** – Impact Issuers were not categorised by Investment Manager as “strongly misaligned” to the UN SDGs on the basis of then available data collected and analysed by the Investment Manager for strong misalignment to the UN SDGs.

During the period from 01 January 2022 to 31 July 2022, the Investment Manager’s analysis of “do no significant harm” relied on availability of information and data, and where such information was not available or was incomplete, the Investment Manager’s analysis of “do no significant harm” was necessarily limited.

From 1 August 2022 to the Sub-Fund’s year end date of 31 December 2022, the Sub-Fund’s investments determined by the Investment Manager to be SFDR Sustainable Investments did not cause significant harm to any environmental or social sustainable investments objective as they were not in breach of the PAIs thresholds set by the Investment Manager.

— — *How were the indicators for adverse impacts on sustainability factors taken into account?*

From the beginning of the Reference Period 1 January 2022 to 31 July 2022, indicators for adverse impacts were taken into account through, for example:

- Exclusion lists covering controversial weapons, UN Global Compact violators, coal mining and coal power generation
- A carbon intensity limit and a carbon tilt.

From 1 August 2022 to the Sub-Fund’s year end date of 31 December 2022, the indicators for adverse impacts in Table 1 of Annex 1 and any relevant indicators in Tables 2 and 3 of that Annex were taken into account as follows in respect of the Sub-Funds SFDR Sustainable Investments:

The Sub-Fund took into account the following PAIs from

- **Table 1 of Annex I of the Commission Delegated Regulation:**
 1. GHG Emissions: Scope 1, 2 and 3
 2. Carbon Footprint: Scope 1, 2 and 3
 3. GHG Intensity of Investee Companies: Scope 1, 2 and 3
 4. Exposure to companies active in the fossil fuel sector
 5. Share of non-renewable energy consumption and production
 6. Energy consumption intensity per high impact climate sector: NACE A, B, C, D, E, F, G, H and L
 7. Activities negatively affecting biodiversity-sensitive areas
 8. Emissions to water
 9. Hazardous waste and radioactive waste ratio

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
11. Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises
12. Unadjusted gender pay gap
13. Board gender diversity
14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons, and biological weapons).

From 1 August 2022 to the Sub-Fund's year end date of 31 December 2022, the Sub-Fund took into account the above PAIs, in the following manner and solely in respect of its SFDR Sustainable Investments:

- PAI thresholds were set by the Investment Manager at an issuer and/or Sub-Fund level where applicable in relation to the instrument held by the Sub-Fund. The PAI thresholds were only applied to the Sub-Fund's corporate and sovereign holdings.
- The Investment Manager measured the performance of the issuer and/or the Sub-Fund, as applicable, against the PAI thresholds at the time of investment and on an ongoing basis during the above period using data obtained from the Investment Manager's designated third-party data provider.

There were no breaches of such PAI thresholds set by the Investment Manager.

The Investment Manager was dependent upon information and data from third party data providers in order to be able to consider principal adverse impacts on sustainability factors. The availability and quality of such data impacted the extent to which each such PAI could be considered. In particular, the lack or incomplete reporting of metrics by some issuers meant that there was limited data on some adverse indicators. As such for some of the mandatory PAIs, data coverage was low. The Investment Manager's analysis of adverse indicators relied on this third-party information and data, and where such information was not available or was incomplete, the Investment Manager's analysis of adverse indicators was necessarily limited. As the data availability improves over time, it is expected that PAIs can be applied to a greater portion of the Investment Manager's investable universe. This will allow for enhanced insight into the adverse impacts caused by issuers.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, including the principles and rights set out in the eight fundamental conventions identified in the Declaration of the International Labour Organisation on Fundamental

Principles and Rights at Work and the International Bill of Human Rights (the “Responsible Business Practices”) collectively cover a broad range of areas of responsible business, including labour rights, consumer protection and support for internationally recognised human rights within a company’s or issuer’s sphere of influence.

The Sub-Fund’s investments determined by the Investment Manager to be SFDR Sustainable Investments were considered aligned with the Responsible Business Practices as each issuer passed a broad controversy screen provided by a third party which either directly covered one or more of the Responsible Business Practices or was considered an appropriate proxy for one or more of the Responsible Business Practices. The Investment Manager was dependant on the information and data available to such third party in order to complete the broad controversy screen. It should be noted, that the availability and quality of data may have impacted the screening process.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Sub-Fund considered the above mentioned PAIs to the extent practicable as described in the response to the above question “*How were the indicators for adverse impact on sustainability factors taken into account?*” as well as the following additional PAIs:

- **Table 2 of Annex I of the Commission Delegated Regulation:**
 4. Investments in companies without carbon emission reduction initiatives
- **Table 3 of Annex I of the Commission Delegated Regulation:**
 16. Cases of insufficient action taken to address breaches of standards of anti-corruption and anti-bribery:

- PAI thresholds were set by the Investment Manager at an issuer and/or Sub-Fund level where applicable to the instrument held. The PAI thresholds were only applied to the Sub-Fund's corporate and sovereign holdings which were considered by the Investment Manager to be SFDR Sustainable Investments.
- The Investment Manager measured the performance of the issuer and/or the Sub-Fund, as applicable, against these thresholds at the time of investment and on an ongoing basis during the above period using data obtained from the Investment Manager's designated third-part data provider.

There were no breaches of such PAI thresholds set by the Investment Manager. The Investment Manager was dependent upon information and data from third party data providers in order to be able to consider principal adverse impacts on sustainability factors. The availability and quality of such data impacted the extent to which each such PAI could be considered. In particular, the lack or incomplete reporting of metrics by some issuers meant that there was limited data on some adverse indicators. As such for some of the mandatory PAIs, data coverage was low. The Investment Manager's analysis of adverse indicators relied on this third-party information and data, and where such information was not available or was incomplete, the Investment Manager's analysis of adverse indicators was necessarily limited. As the data availability improves over time, it is expected that PAIs can be applied to a greater portion of the Investment Manager's investable universe. This will allow for enhanced insight into the adverse impacts caused by issuers.

What were the top investments of this financial product?

The Sub-Fund's top 15 investments have been selected on the basis of the investments accounting for the largest proportion of the Sub-Fund's overall investments during the Reference Period, calculated as an average at 3 monthly intervals since the beginning of the Reference Period so as to best reflect the representation of the Sub-Fund's top 15 investments across the Reference Period.

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is:
01 January 2022 to
31 December 2022

#	Largest investments	Sector	% Assets	Country

What was the proportion of sustainability-related investments?

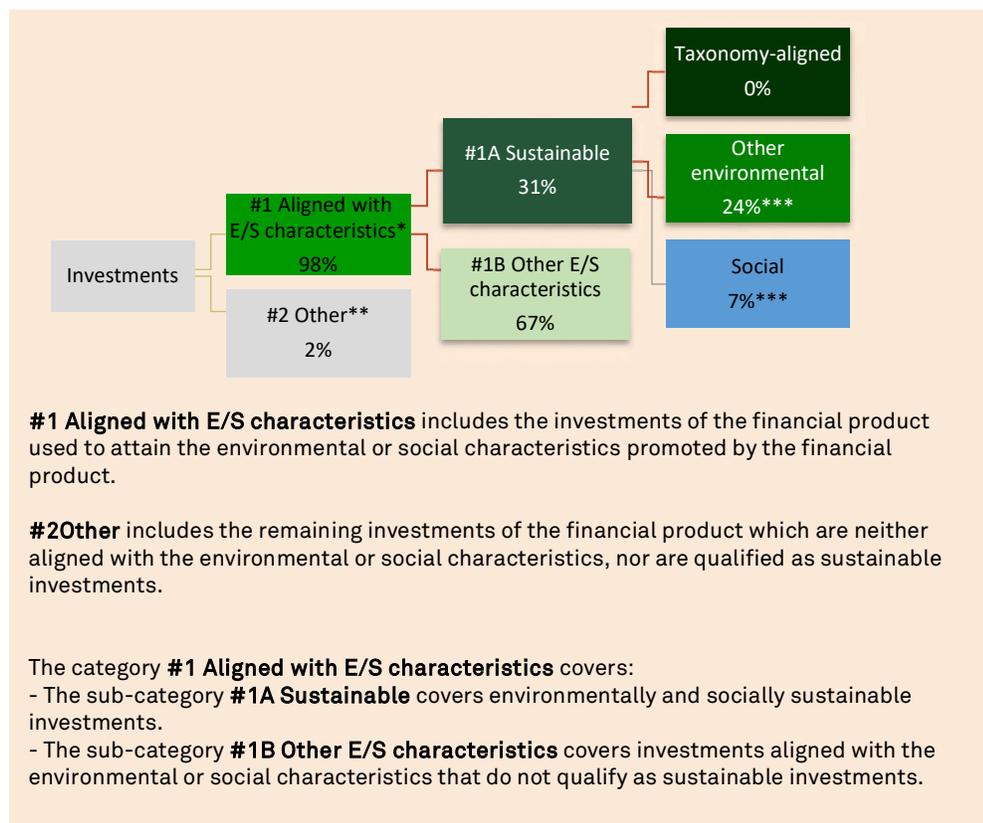

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

The Sub-Fund promoted environmental or social characteristics during the Reference Period using an exclusionary approach and allocations to certain SFDR Sustainable Investments, higher scoring issuers and lower carbon intensity issuers.

The figure in #1 represents a combination of both approaches. The allocation to SFDR Sustainable Investments is referenced in #1A. The figure in #1B below represents the proportion of the portfolio that is not considered by the Investment Manager to be SFDR Sustainable Investments but has excluded certain types of investments as detailed in the binding elements of the investment strategy outlined in the supplement and therefore such proportion of the portfolio was aligned with the environmental or social characteristics promoted by the Sub-Fund through the absence of those investments.

It should be noted that the percentages in this section as outlined in the diagram below are provided as at 31 December 2022 and do not necessarily reflect the position as at other points during the Reference Period (which may be materially higher or lower).

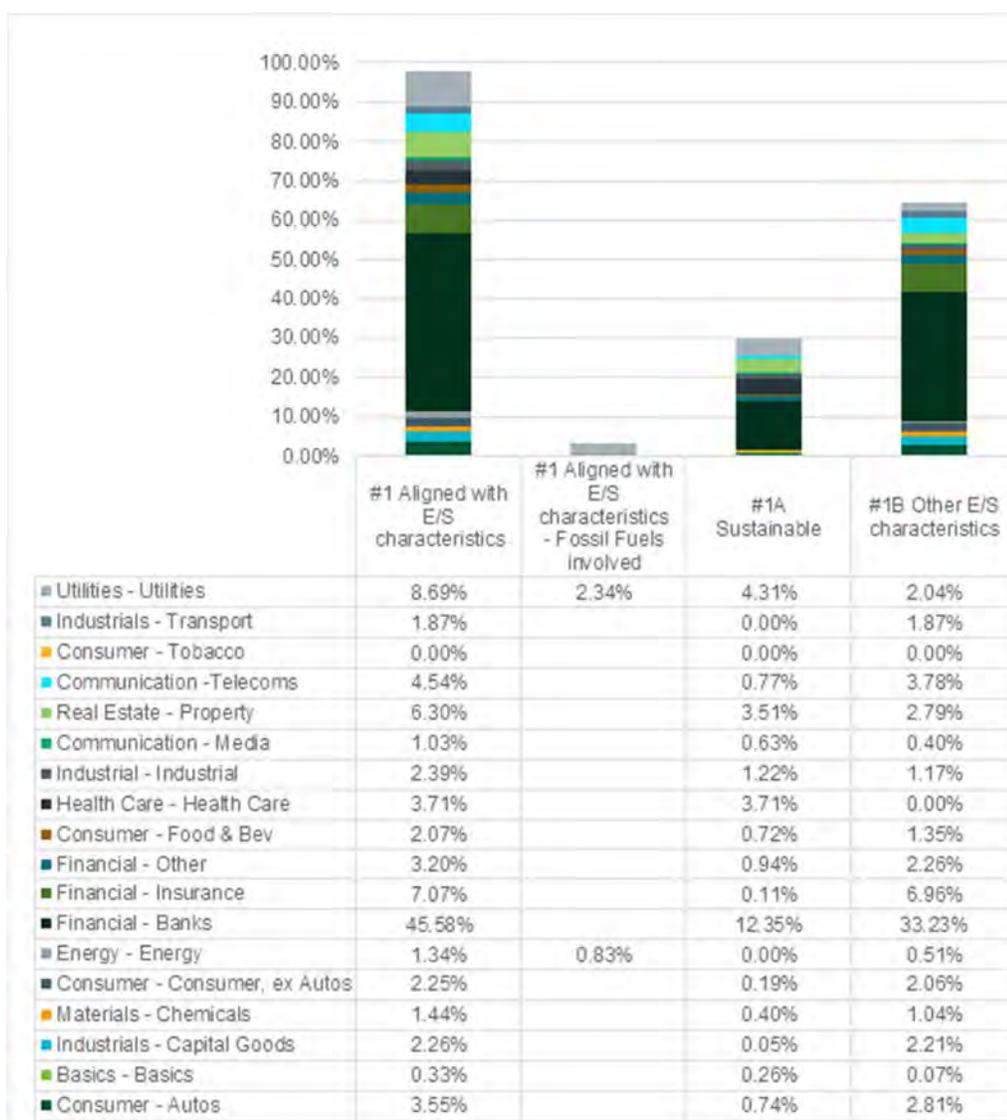

* The Investment Manager was dependent upon information and data from third party data providers in order to be able to consider alignment with some of the E/S characteristics. In particular, the lack or incomplete reporting of metrics by some investments meant that there was only limited data on such investments. As such, for some of the Sub-Fund's investments, data coverage (such as for carbon footprint) was very low and in the absence of relevant data, such investments were assumed by the Investment Manager to be aligned with E/S characteristics.

** #2Other contains investments that do not align with E/S characteristics promoted by the fund i.e., cash, derivatives (FDI) for hedging and collective investment schemes (CIS) for liquidity purposes. For further detail please see the question below **“What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?”**.

*** As at 31 December 2022, 7% of the NAV made by the Sub-Fund contributed to both an environmental and social objective. However, it is the Investment Manager's understanding that for each SFDR Sustainable Investment, SFDR requires consideration of one single environmental or social objective. Therefore, where any SFDR Sustainable Investment held by the Sub-Fund contributed to both an environmental and social objective, such SFDR Sustainable Investment has been included under “Environmental” in the diagram above .

● ***In which economic sectors were the investments made***

As at 31 December 2022, the Sub-Fund had mostly been exposed to the Financials - Banks and the Utilities sectors, as well as the Financials - Insurance and the Property sectors, as illustrated below.

The above figures are provided as at 31 December 2022 only and do not necessarily reflect the position as at other points during the Reference Period.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

0%

The Sub-Fund’s SFDR Sustainable Investments with an environmental objective held by the Sub-Fund were not aligned with the EU Taxonomy during the Reference Period.

The assessment of whether these investments complied with the EU Criteria for Environmentally Sustainable Economic Activities was not subject to an assurance provided by one or more auditors or a review by one or more third parties.

● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

- Yes:
 - In fossil gas In nuclear energy
- No

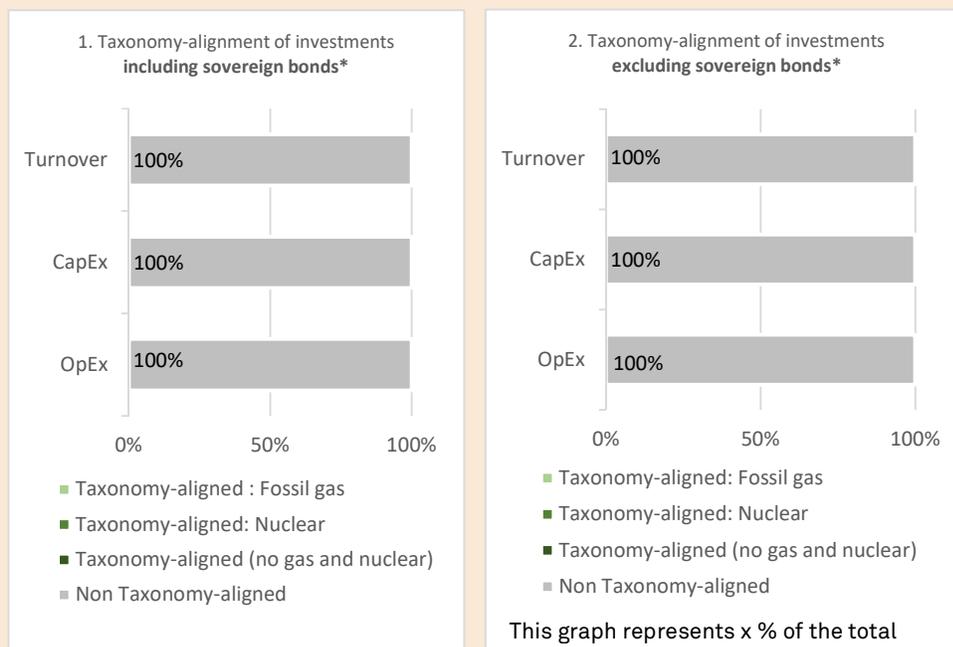

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy related economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules. **Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective. **Transitional activities are** activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

* For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures

What was the share of investments made in transitional and enabling activities?

0%

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

No comparison for previous periods is available at the date of this periodic report.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

100% of the of SFDR Sustainable Investments with an environmental objective were not aligned with the EU Taxonomy as at 31 December 2022.

The Sub-Fund invested in SFDR Sustainable Investments with an environmental objective in economic activities that were not EU Taxonomy-aligned because evidence of EU Taxonomy alignment is dependent on the availability of accurate, detailed and complete data on the investee companies to which the Sub-Fund has exposure. As at the date of this annex, such information is not necessarily readily available from public disclosures by investee companies. While data availability is improving and is expected to improve over time, the data currently available is limited and varies between investee companies.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

While the Sub-Fund does not commit to investing a minimum percentage of its Net Asset Value in socially sustainable investments, the Sub-Fund invested 7%* of its Net Asset Value in SFDR Sustainable Investments with a social objective, as at 31 December 2022. .

*This percentage figure is provided as at 31 December 2022 only and does not necessarily reflect the position as at other points during the Reference Period.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

Investments included under "#2 Other" were:

- Liquid and near-cash assets including cash held or used for ancillary liquidity purposes
- Collective Investment Schemes (CIS) that were specifically used for liquidity purposes
- Derivatives (FDI) that were specifically used for hedging purposes.

No minimum environment or social safeguards were considered for these investments.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The actions taken to meet the environmental and/or social characteristics during the reference period are:

- The Investment Manager:
 - a) Invested in Use of Proceeds Impact Bonds and Impact Issuers, each of which were considered to be “SFDR Sustainable Investments” (as determined by the Investment Manager).
 - b) Ensured the Sub-Fund’s asset-weighted overall ESG rating, as determined by the Investment Manager, was not weaker than the asset-weighted overall ESG rating of the Bloomberg Barclays Euro Aggregate Corporate Total Return Index (the “Benchmark”) at any point during the Reference Period.
 - c) Ensured the Sub-Fund’s asset weighted average carbon intensity was at least 25% lower than the asset weighted average carbon intensity of the Benchmark
 - d) Employed an exclusion policy as outlined in the Sub-Fund’s supplement and the annex to the Sub-Fund’s supplement

These binding elements of the Sub-Fund were coded into the trading systems and used to monitor the environmental and social characteristics promoted during the reference period.
- The following internal control mechanisms were used by the Investment Manager for such monitoring during the Reference Period:
 - Pre-trade warnings appeared in the trade system prior to trading to inform portfolio managers of a prohibition or limit.
 - Post-trade warnings were also reviewed by the monitoring team and escalated as appropriate.
 - Oversight of the relevance of criteria used to meet characteristics promoted was provided by the Responsible Investment Group, a governance group within the Investment Manager which has overall oversight of ensuring effective implementation of ESG due diligence at asset class level and for defining adherence criteria for the Investment Managers ‘Responsible Horizons’ strategies. Oversight of internal exclusions lists used to ensure certain binding criteria were met, was provided by the Ratings and Exclusions Group (“REG”), a governance group within the Investment Manager.
- During the Reference Period, no engagement with the issuers in which the Sub-Fund has invested was required or undertaken as a consequence of there being no breaches of any of the binding elements outlined in Sub-Fund’s supplement.

How did this financial product perform compared to the reference benchmark?

Not applicable.

- *How does the reference benchmark differ from a broad market index?*

Not applicable.

- *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?*

Not applicable.

- *How did this financial product perform compared with the reference benchmark?*

Not applicable.

- *How did this financial product perform compared with the broad market index?*

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

ANNEX V

Periodic disclosure for the financial products referred to in Article 9, paragraphs 1 to 4a, of Regulation (EU) 2019/2088 and Article 5, first paragraph, of Regulation (EU) 2020/852

Product name: Responsible Horizons Euro Impact Bond Fund

Legal entity identifier: 2138006IFGV5VYOFVZ45

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainable investment objective

Did this financial product have a sustainable investment objective? *[tick and fill in as relevant, the percentage figure represents the sustainable investments]*

<input checked="" type="radio"/> <input checked="" type="radio"/> <input checked="" type="checkbox"/> Yes	<input type="radio"/> <input type="radio"/> <input type="checkbox"/> No
<input checked="" type="checkbox"/> It made sustainable investments with an environmental objective: 84% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy 	<input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective
<input checked="" type="checkbox"/> It made sustainable investments with a social objective: 9%	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent was the sustainable investment objective of this financial product met?

The sustainable investment objective of this Sub-Fund is to aim to achieve positive environmental and/or social impacts while generating a total return comprised of income and capital growth by investing in a broad range of Euro-denominated debt and debt related securities and related FDI.

The sustainable investment objective of the Sub-Fund was met to the following extent during the reference period from the Sub-Fund launch on 10 January 2022 to 31 December 2022 (the “**Reference Period**”), by investing in **Use of Proceeds Impact Bonds** and **Impact Issuers** which were considered by the Investment Manager to qualify as sustainable investments pursuant to SFDR (“**SFDR Sustainable Investments**”):

- in the case of each such **Use of Proceeds Impact Bond** in which the Sub-Fund was invested, the proceeds raised were aimed to be exclusively applied to finance or re-finance in part or in full projects with positive environmental and/or social impacts that demonstrated a clear alignment, by contributing to varying extents, to the following UN Sustainable Development Goals (“**UN SDGs**”) (which, for the purposes of this section, are also considered by the Investment Manager to equate to environmental objectives) :
 - Affordable and clean energy
 - Industry, innovation and infrastructure
 - Sustainable cities and communities
 - Responsible consumption and production
 - Climate action
 - Life below water
 - Life on land

these SFDR Sustainable Investments also contributed to varying extents to one or more of the following UN SDGs (which, for the purposes of this section, are also considered by the Investment Manager to equate to social objectives)

- No Poverty
 - Zero Hunger
 - Good Health and Wellbeing
 - Quality Education
 - Gender Equality
 - Clean water and sanitation
 - Decent work and economic growth
 - Reduced inequalities
- each such **Impact Issuer** in which the Sub-Fund was invested demonstrated that at least 50% of their revenue streams were linked to positive environmental and/or social activities which contributed to the following UN SDGs (which, for the purposes of this section, are also considered by the Investment Manager to equate to environmental objectives) :
 - Responsible consumption and production
 - Sustainable Cities and Communities
 - Climate Action.
 - these SFDR Sustainable Investments also contributed to varying extents to one or more of the following UN SDGs (which, for the purposes of this section, are also considered by the Investment Manager to equate to social objectives) :
 - Gender Equality
 - Decent Work and Economic Growth
 - Reduced Inequality

The Sub-Fund did not invest in Improving Issuers (as described in the SFDR Annex III) during the Reference Period.

The SFDR Sustainable Investments underlying this Sub-Fund did not contribute to the environmental objectives set out in Article 9 of the EU Taxonomy Regulation.

● ***How did the sustainability indicators perform?***

The following sustainability indicators were used to measure how the sustainable investment objective of the Sub-Fund was attained:

- 1) The Sub-Fund successfully and consistently invested a minimum of 90% of its Net Asset Value during the Reference Period in Use of Proceeds Impact Bonds and Impact Issuers, each of which were considered to be SFDR Sustainable Investments (as determined by the Investment Manager). By way of illustration, as at the Sub-Fund's year end of 31 December 2022, 93% of the Sub-Fund's Net Asset Value in aggregate was invested in such Use of Proceeds Impact Bonds and Impact Issuers. This percentage figure is provided as at 31 December 2022 only and the percentage so invested has varied during the Reference Period (while remaining above the minimum set out in SFDR Annex III at all times during the Reference Period).
- 2) The Impact Issuers and Use of Proceeds Impact Bonds invested in by the Sub-Fund successfully and consistently met the following thresholds as assessed by the Investment Manager:
 - (a) each such Impact Issuer in which the Sub-Fund was invested demonstrated that at least 50% of their revenue streams were aligned to help realise one or more of the 17 UN Sustainable Development Goals ("UN SDGs");
 - (b) in the case of each such Use of Proceeds Impact Bond in which the Sub-Fund was invested, the proceeds raised were aimed to be exclusively applied to finance or re-finance in part or in full projects that demonstrated a clear alignment to helping realise one or more of the 17 UN SDGs.

No derivatives (FDI) were used during the Reference Period to attain the sustainable investment objective of the Sub-Fund.

● ***...and compared to previous periods?***

No comparison for previous periods is available at the date of this periodic report.

● ***How did the sustainable investments not cause significant harm to any sustainable investment objective?***

The Sub-Fund launched on 10 January 2022. During the period from 10 January 2022 to 31 July 2022, the Investment Manager ensured the Sub-Fund's investments determined by the Investment Manager to be SFDR Sustainable Investments did not cause significant harm to any environmental or social objective in the following manner:

Sustainability indicators measure how the sustainable objectives of this financial product are attained.

- **Use of Proceeds Impact Bonds** – each Use of Proceeds Impact Bond was determined to not be in breach of the Investment Manager’s assessment framework which incorporated “do no significant harm” analysis. This included analysis to understand the sustainability profile of the issuer and check if processes were in place to identify, manage and mitigate ESG related risks associated with Use of Proceeds Impact Bonds
- **Impact Issuers** – Impact Issuers were not categorised by Investment Manager as “strongly misaligned” to the UN SDGs on the basis of then available data collected and analysed by the Investment Manager for strong misalignment to the UN SDGs.

During the period from 10 January 2022 to 31 July 2022, the Investment Manager’s analysis of “do no significant harm” relied on availability of information and data, and where such information was not available or was incomplete, the Investment Manager’s analysis of “do no significant harm” was necessarily limited.

From 1 August 2022 to the Sub-Fund’s year end date of 31 December 2022, the Sub-Fund’s investments determined by the Investment Manager to be SFDR Sustainable Investments did not cause significant harm to any environmental or social sustainable investment objective as they were not in breach of the PAIs thresholds set by the Investment Manager.

How were the indicators for adverse impacts on sustainability factors taken into account?

The Sub-Fund launched on 10 January 2022. During the period from 10 January 2022 to 31 July 2022, indicators for adverse impacts were taken into account through, for example:

- Exclusion lists covering controversial weapons, UN Global Compact violators, coal mining and coal power generation
- A carbon intensity limit and a carbon tilt. .

From 1 August 2022 to the Sub-Fund’s year end date of 31 December 2022, the indicators for adverse impacts in Table 1 of Annex 1 and any relevant indicators in Tables 2 and 3 of that Annex were taken into account as follows in respect of the Sub-Fund’s SFDR Sustainable Investments:

- **Table 1 of Annex I of the Commission Delegated Regulation:**
 1. GHG Emissions: Scope 1, 2 and 3
 2. Carbon Footprint: Scope 1, 2 and 3
 3. GHG Intensity of Investee Companies: Scope 1, 2 and 3
 4. Exposure to companies active in the fossil fuel sector
 5. Share of non-renewable energy consumption and production
 6. Energy consumption intensity per high impact climate sector: NACE A, B, C, D, E, F, G, H and L
 7. Activities negatively affecting biodiversity-sensitive areas
 8. Emissions to water
 9. Hazardous waste and radioactive waste ratio

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
11. Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises
12. Unadjusted gender pay gap
13. Board gender diversity
14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons, and biological weapons).

From 1 August 2022 to the Sub-Fund's year end date of 31 December 2022, the Sub-Fund took into account the above PAIs, in the following manner in respect of its SFDR Sustainable Investments:

- PAI thresholds were set by the Investment Manager at an issuer and/or Sub-Fund level where applicable in relation to instrument held by the Sub-Fund. The PAI thresholds were only applied to the Sub-Fund's corporate and sovereign holdings which were considered by the Investment Manager to be SFDR Sustainable Investments.
- The Investment Manager measured the performance of the issuer and/or the Sub-Fund, as applicable, against the PAI thresholds at the time of investment and on an ongoing basis during the above period using data obtained from the Investment Manager's designated third-part data provider.

There were no breaches of such PAI thresholds set by the Investment Manager.

The Investment Manager was dependent upon information and data from third party data providers in order to be able to consider principal adverse impacts on sustainability factors. The availability and quality of such data impacted the extent to which each such PAI could be considered. In particular, the lack or incomplete reporting of metrics by some issuers meant that there was limited data on some adverse indicators. As such for some of the mandatory PAIs, data coverage was low. The Investment Manager's analysis of adverse indicators relied on this third-party information and data, and where such information was not available or was incomplete, the Investment Manager's analysis of adverse indicators was necessarily limited. As the data availability improves over time, it is expected that PAIs can be applied to a greater portion of the Investment Manager's investable universe. This will allow for enhanced insight into the adverse impacts caused by issuers.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, including the principles and rights set out in the eight fundamental conventions identified in the Declaration of the International Labour

Organisation on Fundamental Principles and Rights at Work and the International Bill of Human Rights (the “**Responsible Business Practices**”) collectively cover a broad range of areas of responsible business, including labour rights, consumer protection and support for internationally recognised human rights within a company’s or issuer’s sphere of influence.

The Sub-Fund’s investments determined by the Investment Manager to be SFDR Sustainable Investments pursuant to SFDR were considered aligned with the Responsible Business Practices as each issuer passed a broad controversy screen provided by a third party which either directly covered one or more of the Responsible Business Practices or was considered by the Investment Manager an appropriate proxy for one or more of the Responsible Business Practices. The Investment Manager was dependant on the information and data available to such third party in order to complete the broad controversy screen. It should be

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do not significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

noted that the availability and quality of data may have impacted the screening process.

How did this financial product consider principal adverse impacts on sustainability factors?

The Sub-Fund considered PAIs as part of its DNSH analysis on SFDR Sustainable Investments as described in response to the above question “*How were the indicators for adverse impacts on sustainability factors taken into account?*”.

The Sub-Fund also considered the following PAIs:

- **Table 2 of Annex I of the Commission Delegated Regulation:**
 4. Investments in companies without carbon emission reduction initiatives
- **Table 3 of Annex I of the Commission Delegated Regulation:**

16. Cases of insufficient action taken to address breaches of standards of anti-corruption and anti-bribery

There were no breaches of such PAI thresholds set by the Investment Manager.

What were the top investments of this financial product?

The Sub-Fund's top 15 investments have been selected on the basis of the investments accounting for the largest proportion of the Sub-Fund's overall investments during the Reference Period, calculated as an average at each quarter end during the Reference Period, so as to best reflect the representation of the Sub-Fund's top 15 investments across the Reference Period.

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 10 January 2022 to 31 December 2022.

#	Largest Investments	Sector	% Assets	Country

15	SSE PLC 1.375% 09/04/27	Utility	1.48	Ireland

What was the proportion of sustainability-related investments?

● *What was the asset allocation?*

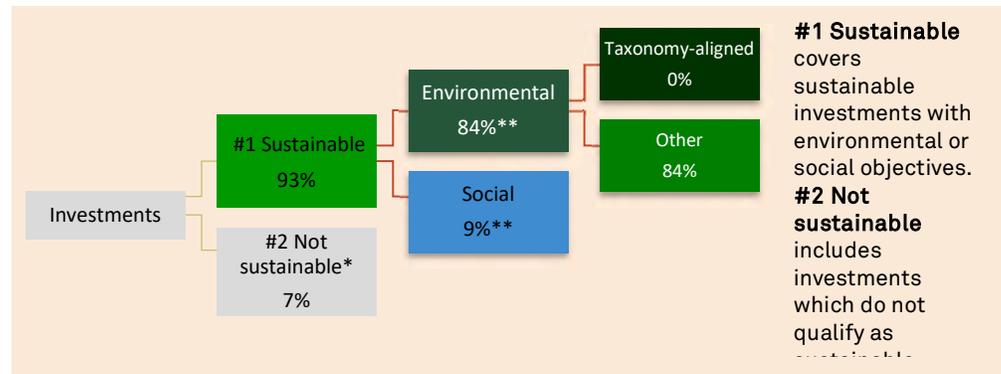

The Sub-Fund had a sustainable investment objective and committed to investing a minimum of 90% of NAV in SFDR Sustainable Investments with an environmental and/or social objective.

By way of illustration, as at 31 December 2022, 93% of the Sub-Fund's Net Asset Value was invested in SFDR Sustainable Investments with an environmental and/or social objective, thus exceeding the minimum outlined in the Sub-Fund's supplement. The allocation to SFDR Sustainable Investments is referenced in #1.

Asset allocation describes the share of investments in specific assets.

It should be noted that the percentages in this section as outlined in the diagram below are provided as at 31 December 2022 and do not necessarily reflect the position as at other points during the Reference Period (which may be materially higher or lower).

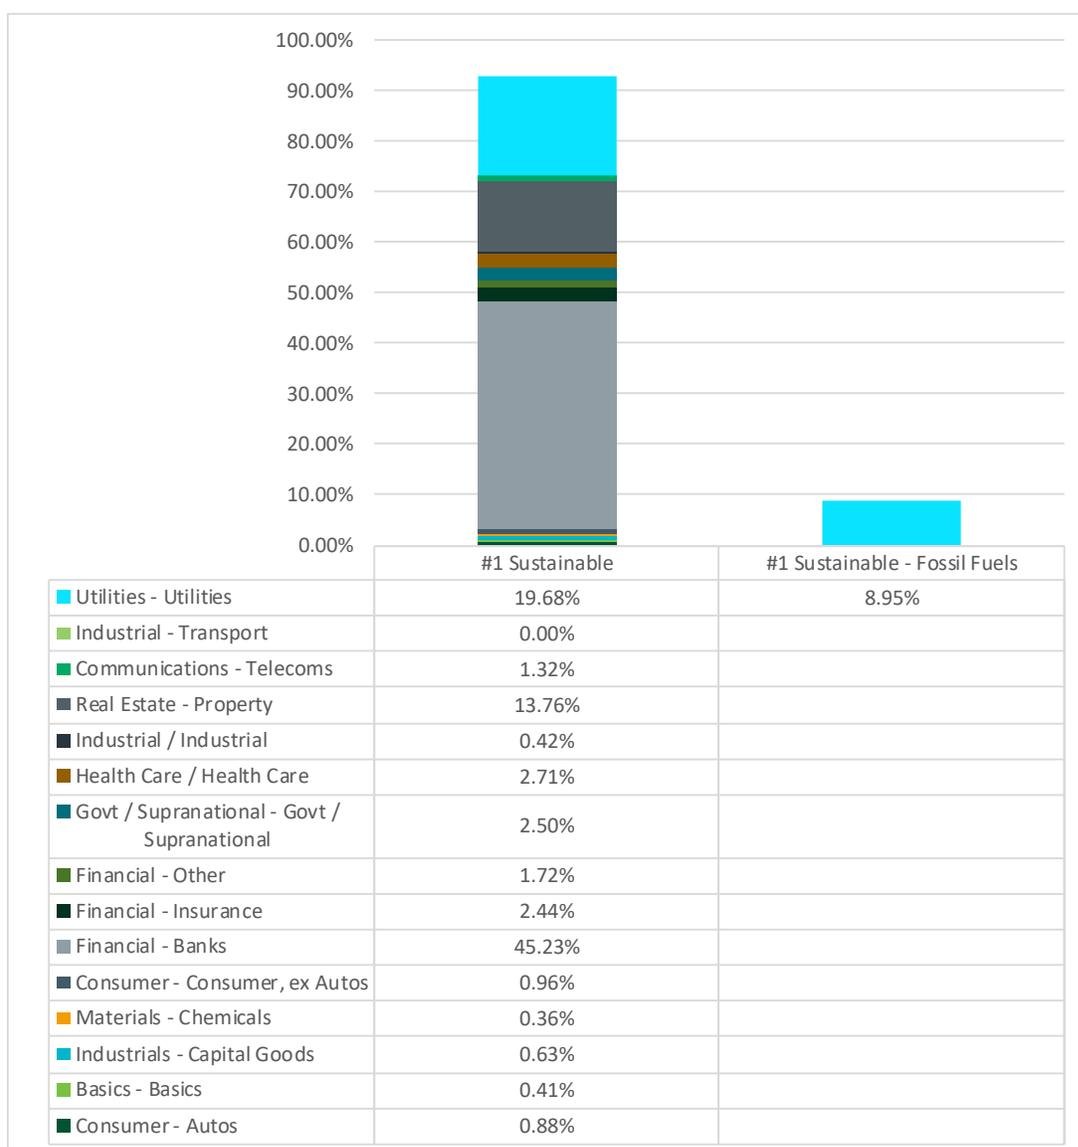

* #2 Not Sustainable contains investments that are not categorised as SFDR Sustainable Investments i.e., cash, derivatives (FDI) for hedging and collective investment schemes (CIS) for liquidity purposes. For further detail please see the question below “**What investments were included under “Not Sustainable”, what was their purpose and were there any minimum environmental or social safeguards?**”.

** As at 31 December 2022, 8% of the SFDR Sustainable Investments made by the Sub-Fund contributed to both an environmental and social objective. However, it is the Investment Manager’s understanding that for each SFDR Sustainable Investment, SFDR requires consideration of one single environmental or social objective. Therefore, where any SFDR Sustainable Investment held by the Sub-Fund contributed to both an environmental and social objective, such SFDR Sustainable Investment has been included under “Environmental” in the diagram above.

● ***In which economic sectors were the investments made?***

As at 31 December 2022, the Sub-Fund had mostly been exposed to the Financial-Banks and the Utility sectors, as well as the Property and the Health Care sectors, as illustrated below.

The above figures are provided as at 31 December 2022 only and do not necessarily reflect the position as at other points during the Reference Period.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

0%

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The Sub-Fund's SFDR Sustainable Investments with an environmental objective held by the Sub-Fund were not aligned with the EU Taxonomy during the Reference Period.

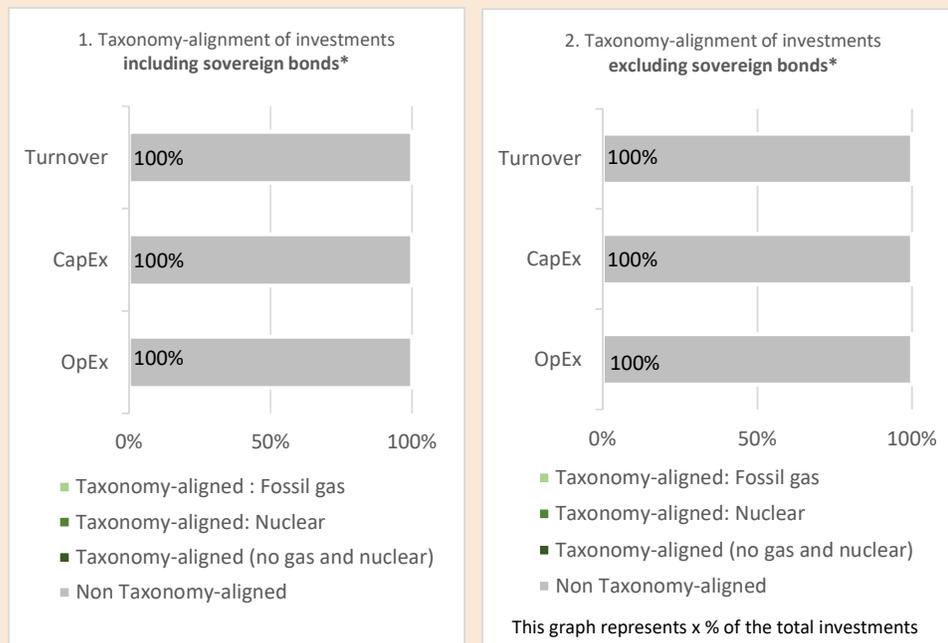

The assessment of whether these investments complied with the EU Criteria for Environmentally Sustainable Economic Activities was not subject to an assurance provided by one or more auditors or a review by one or more third parties.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?**

- Yes:
 - In fossil gas
 - In nuclear energy
- No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy related economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective. **Transitional activities** are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

● ***What was the share of investments made in transitional and enabling activities?***

0%

● ***How did the percentage of investments aligned with the EU Taxonomy compare with previous reference periods***

No comparison for previous periods is available as at the date of this periodic report.

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

100% of SFDR Sustainable Investments with an environmental objective were not aligned with the EU Taxonomy as at 31 December 2022.

The Sub-Fund invested in SFDR Sustainable Investments with an environmental objective in economic activities that were not EU Taxonomy-aligned because evidence of EU Taxonomy alignment is dependent on the availability of accurate, detailed and complete data on the investee companies to which the Sub-Fund has exposure. As of the date of this Annex, such information is not necessarily readily available from public disclosures made by investee companies. While data availability is improving and is expected to improve over time, the data currently available is limited and varies between investee companies.

What was the share of socially sustainable investments?

While the Sub-Fund does not commit to investing a minimum percentage of its Net Asset Value in socially sustainable investments, the Sub-Fund invested 9%* of its Net Asset Value in SFDR Sustainable Investments with a social objective as at 31 December 2022.

*This percentage figure is provided as at 31 December 2022 only and does not necessarily reflect the position as at other points during the Reference Period.

What investments were included under “not sustainable”, what was their purpose and were there any minimum environmental or social safeguards?

Investments included under "#2 Not sustainable" were:

- Liquid and near-cash assets including cash held for ancillary liquidity purposes
- Collective Investment Schemes (CIS) that were used for liquidity purposes

- Derivatives (FDI) used for hedging purposes

No minimum environment or social safeguards were considered for these investments.

What actions have been taken to attain the sustainable investment objective during the reference period?

The actions taken to attain the sustainable investment objective during the Reference Period were as follows:

To achieve positive environmental and/or social impacts while generating a total return comprised of income and capital growth by investing in a broad range of Euro-denominated debt and debt related securities and related FDI, the Sub-Fund invested in Impact Issuers and Use of Proceeds Impact Bonds where:

- a) in the case of each such Use of Proceeds Impact Bond in which the Sub-Fund was invested, the proceeds raised were applied to finance or re-finance in part or in full projects that demonstrated a clear alignment to help realise one or more of the 17 UN SDGs;
- b) each such Impact Issuer in which the Sub-Fund was invested demonstrated that at least 50% of their revenue streams were aligned to help realise one or more of the 17 UN SDGs.

Each applicable security was assessed according to the Investment Manager's assessment framework, which ascertained the level of contribution to the UN SDGs. Two frameworks were deployed for this assessment:

- a) **Use of Proceeds Impact Bonds:** The Investment Manager employed an assessment framework that generally considered the following three components: issuer profile; framework of bond issuance and reporting and transparency
- b) **Impact Issuers:** The Investment Manager assessed issuers using external and/or internal data to determine the revenue alignment of such issuer's products and services with the UN SDGs. Where no external data was available, an assessment was conducted by the Investment Manager's ESG analysts and ratings approved by the Investment Manager's 'Impact Committee'.

The SFDR Sustainable Investments in the Sub-Fund were monitored by the Investment Manager throughout the Reference Period by coding binding elements into trading systems.

The following internal control mechanisms were used by the Investment Manager for such monitoring during the Reference Period:

- Pre-trade warnings appeared in the trade system prior to trading to inform portfolio managers of a prohibition or limit.
- Post-trade warnings were also reviewed by the monitoring team and escalated as appropriate.
- Oversight of the relevance of criteria used to meet the sustainable investment objective of the Sub-Fund was provided by the Responsible Investment Group ("RIG"), a governance group within the Investment Manager which has overall oversight of ensuring effective implementation of ESG due diligence at asset

class level and for defining adherence criteria for the Investment Manager's 'Responsible Horizons' strategies.

How did this financial product perform compared to the reference sustainable benchmark?

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the sustainable objective.

- *How did the reference benchmark differ from a broad market index?*

Not applicable.

- *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the sustainable investment objective?*

Not applicable.

- *How did this financial product perform compared with the reference benchmark?*
