OBJECTIVES AND INVESTMENT POLICY

Investment objective

The Fund seeks to increase the value of your investment over time through capital growth.

Investment policy

Under normal market conditions, the Fund typically invests at least 80% of its assets in equity securities of companies anywhere in the world, including emerging markets. These companies may be of any market capitalization and industry.

The Investment Manager uses fundamental research to build a relatively concentrated, high conviction portfolio of securities that it believes offer attractive returns compared to the general equities market.

The Investment Manager screens for companies whose activities or corporate involvement do not comply with environmental, social and governance (ESG) criteria and sells or avoids buying all companies identified in this screening process.

The Fund may be exposed to any currency.

The Fund uses derivatives for hedging (reducing risks), efficient portfolio management and other investment purposes.

MSCI All Country World Index (ACWI) used for performance comparison.

The Fund is actively managed and the Investment Manager is not constrained by its benchmark. Please see the Fund's prospectus for more information.

RISK AND REWARD PROFILE

What does this risk indicator mean?

This synthetic risk and reward indicator (SRRI) scale rating indicates how the Fund may perform and the risk of losing some or all of your capital. Generally the potential for higher gains also means a larger risk of losses. The lowest category does not mean a risk free investment.

The above rating is an estimate, not a guarantee. It is calculated using industry-standard methods and is based on medium-term volatility (how sharply the Fund's actual or estimated share price has gone up and down over five years).

Historical data may not be a reliable indication of the future risk profile of this Fund. The risk and reward category for this Fund is not guaranteed to remain unchanged and may shift over time.

Why is this Fund in this category?

The Fund is not guaranteed in capital. The Fund is invested in equity securities that can face sharp variations up or down and that can generate significant gains or losses.

Risks materially relevant to the Fund but not adequately captured by the SRRI:

The rating does not reflect the possible effects of unusual market conditions or large unpredictable events, which could amplify everyday risks and could trigger other risks, such as:

Counterparty risk: If an entity with which the Fund does business becomes insolvent, payments owed to the Fund could be delayed, reduced, or eliminated.

Liquidity risk: Certain securities could become hard to buy or to sell at a desired time or price.
