Investment Objective and Policy

To provide capital growth primarily through investment in securities of companies active in the energy sector.

Risk Considerations

Investments in equities are subject to market risk and, potentially, to currency exchange rate risk. This fund may use financial derivative instruments as a part of the investment process. This may increase the fund's price volatility by amplifying market events.

Performance over 5 years (%)

Past performance is no indication of future fund performance. This depends on the trends in markets, investment returns and exchange rates (if relevant), and how successful the asset manager is in implementing the investment policy. The performance shown does not take account of any commissions and costs charged when subscribing and redeeming units. Prices of shares and the income from them may fall as well as rise and investors may not get back the amount originally invested.

All fund performance data are on a NAV to NAV basis, net income reinvested. Data is not available for the time periods with no % growth stated. In case a share class is created after the fund's launch date, a simulated past performance is used, based upon the performance of an existing share class within the fund, taking into account the difference in the ongoing charges and the portfolio transaction costs, and including the impact of any performance fees if applicable.

All benchmark data is presented in the base currency of the fund (US Dollars).

Some performance differences between the fund and the benchmark may arise because the fund performance is calculated at a different valuation point from the benchmark.

The Schroder ISF Global Energy fund was launched in June 2006 to accommodate a transfer of shareholders from the Schroder Energy Hong Kong Unit Trust (launched on 30/09/1987) to the Schroder ISF SICAV. Prior to June 2006 the fund uses the track record of the Schroder Energy Hong Kong Unit Trust as a proxy performance track record.

In January 2008, the benchmark of the Fund changed from the MSCI All Countries World Energy Index to the MSCI World Energy Sector Net TR Index. The previous benchmark performance has been kept and chain linked to the new benchmark. The since launch performance of the benchmark cannot be shown as it did not exist at the fund's launch date.
