### Past performance is no guarantee of future performance.

The value of an investment and the income from it can fall as well as rise as a result of market and currency fluctuations and you may not get back the amount originally invested. For further information on risks please refer to the Fund's KIID/KID and/or the Prospectus. Investing in companies in emerging markets involves higher risk than investing in established economies or securities markets. Emerging Markets may have less stable legal and political systems, which could affect the safe-keeping or value of assets. The Fund's investment include shares in small-cap companies and these tend to be traded less frequently and in lower volumes than larger companies making them potentially less liquid and more volatile.

NAV of Share Class A in GBP, net income reinvested, net of fees. The A GBP Class was launched on 30 September 2011. Performance of other share classes may vary and is available on request.

\*Annualised since launch. \*\*Refers to the fund's ranking in a peer group of funds made up from all funds classified as Asia Pacific ex Japan, by either the Investment Association (IA) or Lipper Global. Funds included may be domiciled in the UK, Ireland, or Luxembourg.

Fund manager’s commentary

- Following a downturn in sentiment, Chinese markets rebounded, with key holding Haidilao exceeding expectations through strong profits and a commitment to capital return
- The overweight position in Indonesia proved successful, with both AKR delivering strong results and Cimory achieving impressive profit growth despite a challenging consumer environment
- Despite ongoing macroeconomic challenges, most portfolio companies are demonstrating pathways to profitable growth

March 2024 was a benign month for equities in Asia, particularly after a long period of gloom arising from concerns about China - it reflects a rebound from levels that looked overly pessimistic. The fund outperformed the benchmark in the period.

There is no denying that we can see glimmers of stability in a cross-section of the Chinese economy. Take Haidilao, the hot-pot restaurant chain (one of our largest holdings), which had spectacular profits and increased their payout to 92% - a complete surprise to the market. I did not expect management to signal this commitment to capital management, but as I have mentioned before, post-Covid, several well-managed companies in China have embarked on restructuring costs and are now intent on returning capital if cash flows are supportive. This was one of the driving reasons for owning Haidilao.

The rest of the region is seeing some relief from lower inflation (though early April sees a rise in commodities, especially oil) and the potential for lower rates. Indonesia (where the fund has a significant overweight position) is a case in point. AKR (the fund’s largest position) delivered stellar results as expected. But Cisarua Mountain Dairy (Cimory), a dairy and snack brand, achieved admirable profit growth through resilience and nimbleness. In a poor consumer market (low-income growth, high inflation), Cimory had market share gains driven by innovation and expansion of distribution. Factors that instil confidence in the long-term viability of the business

Technology stocks have taken a breather, yet Samsung Electronics and TSMC powered ahead in March. Samsung, a laggard, also had good results, though a low base last year helped. Geopolitics is front and centre of markets, while the Federal Reserve might have indicated either a delay or postponement in cutting rates. Overall, macroeconomic turbulence is here to stay, but most of our portfolio companies are demonstrating pathways to profitable growth.
