

db x-trackers MSCI PAKISTAN IM INDEX UCITS ETF

Share Class: 1C (ISIN: LU0659579147), (WKN: DBX0KK), (Currency: USD)

a sub fund of db x-trackers. The Fund is managed by Deutsche Asset & Wealth Management Investment S.A., part of the Deutsche Bank Group.

Objectives & Investment Policy

The aim is for your investment to reflect the performance of the MSCI Pakistan Investable Market Total Return Net Index (Index) which is designed to reflect the performance of the listed shares of certain companies from Pakistan.

The companies making up the Index are large, medium and small sized companies based on the combined value of a company's readily available shares as compared to other companies. A company's weighting in the Index depends on its relative size. The

Index is calculated on a total return net basis which means that all dividends and distributions by the companies are reinvested in the shares after tax. The Index is reviewed and rebalanced at least quarterly.

To achieve the aim, the Fund will enter into a financial contract (derivative) with Deutsche Bank to swap most subscription proceeds for the return on the Index.

No dividends will be paid on your shares.

You may redeem your investment on demand on a daily basis.

Risk and Reward Profile

The risk and reward category is calculated using historical data which may not be a reliable indicator of the Fund's future risk profile.

The risk and reward category may shift over time and is not a target or a guarantee.

The lowest category (i.e. Category 1) does not mean a risk-free investment.

The Fund is in Category 6 because of the high range and frequency of price movements (volatility) of the underlying investments referenced by the Fund.

The following are additional risks not covered by the risk and reward category.

The Fund does not invest directly in the components of the Index and its returns will be dependent on the performance of the derivatives used.

The Fund will enter into a derivative with a counterparty (initially Deutsche Bank). If the counterparty fails to make payments (for example, it becomes insolvent) this may result in your investment suffering a loss.

Deutsche Bank and its related companies may act in several roles in relation to the Fund such as distributor, derivative counterparty and management company which may involve conflicts of interest.

The Fund is not guaranteed and your investment is at risk. The value of your investment may go down as well as up.

The Fund is exposed to less economically developed economies (emerging markets) which may involve greater risks than well developed economies. Political unrest and economic downturn may be more likely and will affect the value of your investment.

The Fund is exposed to stock market movements in a single country or region which may be adversely affected by political or economic developments, government action or natural events that do not affect a fund investing in broader markets.

The MSCI indexes are the exclusive property of MSCI Inc. (MSCI) and may not be reproduced or extracted and used for any other purpose without MSCI's consent. The Fund is not sponsored, endorsed, or promoted by MSCI, and MSCI bears no liability with respect to the Fund or any index on which such Fund is based. The MSCI indexes are provided without any warranties of any kind.

The financial contract (derivative) used to gain exposure to the Index may be adjusted to reflect certain expenses in relation to taxes and/or buying, selling, borrowing, financing or custody costs associated with the counterparty's hedging position. These index replication costs may lead to your investment suffering losses. More information in relation to risks in general may be found in the "Risk Factors" section of the prospectus.
