General risks

- The value of the funds and the income from them is not guaranteed and may fall as well as rise. You may get back less than you originally invested.
- Past performance is not a guide to future performance.

What are the risks specific to this fund?

- There is no guarantee that investors will get back the invested amount given that the value of investments is subject to market conditions and therefore may go down as well as up.
- The performance of the value of the Company and its funds is primarily a comparison of the net asset values per Share at the beginning and the end of a particular period of time. Hence, an investor in order to assess the actual performance of his investment in the Company must deduct from the performance declared at a certain time any subscription fee paid by him when making his investment in the Company.
- The value of an investment in the Company will be affected by fluctuations in the value of the currency of denomination of the relevant fund's Shares against the value of the currency of denomination of that fund's underlying investments. Adverse fluctuations in currency exchange rates can result in a decrease in return and in a loss of capital.
- The Horizon Pan European Smaller Companies Fund may use techniques and instruments for hedging purposes only to protect portfolios against currency fluctuation, market movements and interest rates risks. The use of any of these derivative instruments will not reach a volume which could endanger the spirit of the investment policy.
- Securities of smaller companies may be less liquid than the securities of larger companies, as a result of inadequate trading volume or restrictions on trading. Securities in smaller companies may possess greater potential for capital appreciation, but also involve risks, such as limited product lines, markets and financial or managerial resources. Trading in such securities may be subject to more abrupt price movements than trading in the securities of larger companies.
- Investors should note that in certain market conditions, securities held by the Horizon Pan European Smaller Companies Fund may not be as liquid as they would be in normal circumstances. If a security cannot be sold in a timely manner then it may be harder to attain a reasonable price and there is a risk that the price at which the security is valued may not be realisable in the event of sale. The Horizon Pan European Smaller Companies Fund may therefore be unable to readily sell such securities.
- This fund is designed to be used only as one component in several in a diversified investment portfolio. Investors should consider carefully the proportion of their portfolio invested into this fund.
