---	---	---	---	---	---	---

The value of an investment in the Fund can go up or down. When you sell your shares they may be worth less than you paid for them.

The risk/reward rating above is based on medium-term volatility. In the future, the Fund's actual volatility could be higher or lower and its rated risk/reward level could change.

The lowest category does not mean risk free.

The Fund's risk level reflects the following:

- The Fund focuses on a single region
- As a category shares are, in general, more volatile than either bonds or money market instruments
- Fluctuations in exchange rates may cause the value of your investment to rise or fall

The rating does not reflect the possible effects of unusual market conditions or large unpredictable events. Under normal market conditions the following risks may apply:

**Counterparty risk** The Fund could lose money if a counterparty with which it transacts becomes unwilling or unable to meet its obligations to the Fund.

**Focus risk** The Fund's value may fall where it has concentrated exposure to an issuer or type of security that is heavily affected by an adverse event.

**Liquidity risk** Certain securities could become hard to value or sell at a desired time and price.

**Management risk** Investment management techniques that have worked well in normal market conditions could prove ineffective or detrimental at other times.

The full list of the Fund's risks are contained in the "Investment and Risk Considerations" section of the Fund's prospectus.
