## Risk Warnings

For complete information on risks, refer to the legal documents. The value of investments and any income will fluctuate (this may partly be the result of exchange rate fluctuations) and investors may not get back the full amount invested.

## Fund Strategy

The fund manager uses a bottom up research process to focus on high quality companies with sustainable competitive advantages, particularly those with strong intangible values which generate healthy cash flows. Specifically, the team believes that companies with, including but not limited to, strong brands, technology and customer loyalty can offer compelling long-term investment returns when purchased at attractive prices. These values embedded within a robust business franchise are difficult to create or replicate, and allow companies to sustain a competitive advantage. The effective use of intangibles can generate strong free cash flow and increase enterprise value.

Past performance does not predict future returns. Data points are as at month end.

### Exclusion Framework

The Fund embeds an exclusionary framework to specific activities based on UN Global Compact, severe governmental sanctions, revenue thresholds for certain activities linked to environmental and/or social criteria, as well as ensuring that companies follow good governance practices. The list of activities and their thresholds are listed below:

\*At Invesco we continuously monitor any applicable sanctions, including those imposed by the UN/US/EU and UK. These sanctions may preclude investments in the securities of various governments/regimes/entities and as such will be included in our compliance guidelines and workflows (designed to ensure compliance with such sanctions). The wording of international sanctions is something that we pay particular attention to as there are occasions where sanctions can exist in limited form, for example allowing investments in the secondary market. In addition to sanctions targeting entire countries, there are other thematic regimes, which may focus for example on human rights, cyber attacks, terrorist financing and corruption, which may apply to both individuals and/or entities/corporations.

Any investment decision should take into account all the characteristics of the fund as described in the legal documents. For sustainability related aspects, please refer to: <https://www.invescomanagementcompany.lu>.

At Invesco we have looked to put in place minimum safeguards across multiple sub-funds of Invesco Funds (as listed above) to allow them to meet Article 8 requirements of the SFDR Regulation as of 2 November 2021. To be classified as a so-called Article 8 product, the sub-funds need to promote, among other things, environmental and/or social characteristics while also ensuring that investee companies follow good governance practices. In order to meet such requirements, it was determined that we would look to exclude certain activities based on certain thresholds, which may be updated from time to time. For further details please refer to the website of the management company at <https://www.invescomanagementcompany.lu>.

As noted above this is a proprietary framework developed by Invesco in line with Article 8 requirements of the Regulation (EU) 2019/2088 on sustainability. The framework is developed, maintained and monitored by Invesco. In order to assess companies against the noted criteria, Invesco uses a combination of Sustainalytics and ISS (Institutional Shareholder Services) to assess compliance, however, this can be supplemented with other service providers where appropriate. While there is a broad coverage across the various systems, there is no one system that has complete coverage of the entire investment universe. As a result, investment teams will be responsible for conducting an assessment of companies for which data is not available, under the appropriate supervision and oversight of our investment compliance and ESG teams.
