

# Allianz Convertible Bond - IT - EUR

Fund for convertible bonds focusing on Europe

Investors should note that, relative to the expectations of the Autorité des Marchés Financiers, this fund presents disproportionate communication on the consideration of non-financial criteria in its management.

## Investment Objective

The fund invests primarily in convertible bonds with emphasis on securities traded in Europe. Up to 20 % of the fund's assets may be invested in convertible bonds issued in an Emerging Markets country. Stocks may be acquired on exerting conversion, subscription and option rights. The fund's aim is to generate capital growth over the long term. Sustainability aspects are taken into account by the fund management. For more information on the investment strategy, the permissible asset classes, and the sustainability approach, please refer to the sales prospectus.

## Fund Manager

Tristan Gruet  
(since 01/31/2012)

## Performance

### Over 10 Years <sup>1</sup>

### Annual Performance (%) <sup>1</sup>

	Fund	Benchmark <sup>2</sup>
07/31/2013 - 07/31/2014	7.59	7.17
07/31/2014 - 07/31/2015	9.41	10.22
07/31/2015 - 07/31/2016	-2.02	-2.91
07/31/2016 - 07/31/2017	4.26	4.16

## Key Figures

Effective Duration (%)	1.69
Average nominal return (%)	0.94
Yield to worst (%) <sup>10</sup>	2.67
Average rating	BBB+

## Opportunities

- + Interest income on convertible bonds, price gains possible if equity markets rise
- + Potential additional returns from security analysis and active management

## Risks

- Convertible bonds suffer price declines on rising interest rates and - to a certain extent - equity market downturns
- Convertible bonds entail higher risk of volatility, illiquid markets and capital loss than government bonds. The volatility of fund unit prices may be strongly increased.
- No guarantee of success of security analysis and active management

## FOR FUND DISTRIBUTORS AND PROFESSIONAL INVESTORS ONLY

- 1) Calculated at the net asset value, excl. front-end load, distributions reinvested. Calculation according to method as defined by BVI, the German Fund Companies Association. **Any front-end loads reduce the capital employed and the performance.** All performance data since 16/02/1998 of Allianz Convertible Bond - IT - EUR prior to the launch date, 31/01/2012 refer to another investment fund. This does not imply that Allianz Convertible Bond - IT - EUR will experience a similar performance in the future. All share classes/investment funds mentioned above are based on the same investment objectives and strategies as well as risk profiles and fee structures. Past performance does not predict future returns
- 2) Benchmark history: until 28/12/2022 EXANE Europe Convertible Bond Total Return (in EUR), until 31/12/2015 EXANE Europe Convertible Bond Total Return (in EUR)
- 3) SFDR: EU Sustainable Finance Disclosure Regulation. Information accurate at time of publishing.
- 4) The Sharpe ratio states the relationship between the return generated by the fund and the investment risk. The fund's excess return versus the risk-free market rate is compared to volatility. Negative values are not meaningful.
- 5) Volatility measures the fluctuation range of the fund's performance over a specified period of time.
- 6) This is for guidance only and not indicative of future allocation.
- 7) Breakdown based on best available rating for each security. Data published by index provider may differ due to different calculation methodologies.
- 8) If the acquisition of Fund units is subject to a sales charge, up to 100% of such sales charge may be collected by the distributor; the exact amount shall be mentioned by the distributor as part of the investment advisory process. This also applies to any payment by the Management Company of an ongoing distribution fee from the all-in fee to the distributor. The all-in fee includes the expenses previously called management, administration and distribution fees.
- 9) TER generally: Total cost (except transaction costs) charged to the fund during the last financial year. TER for funds-of-funds: The costs incurred by the fund itself (except transaction costs). Since the fund held other investment units ("target funds") in the reporting period, further costs, charges and fees may have been incurred at the level of the target fund.
- 10) Represents the lowest potential yield that an investor could theoretically receive on the bond up to maturity if bought at the current price (excluding the default case of the issuer). The yield to worst is determined by making worst-case scenario assumptions, calculating the returns that would be received if worst-case scenario provisions, including prepayment, call or sinking fund, are used by the issuer (excluding the default case). It is assumed that the bonds are held until maturity and interest income is reinvested on the same conditions. Calculation is before currency hedging. The yield to worst is a portfolio characteristic; in particular, it does not reflect the actual fund income. The expenses charged to the fund are not taken into account. As a result, the yield to worst is not suitable as an indicator of the future performance of a bond fund. Forecasts are not a reliable indicator of future results.

### Disclaimer

Investing involves risk. The value of an investment and the income from it may fall as well as rise and investors might not get back the full amount invested. Investing in fixed income instruments may expose investors to various risks, including but not limited to creditworthiness, interest rate, liquidity and restricted flexibility risks. Changes to the economic environment and market conditions may affect these risks, resulting in an adverse effect to the value of the investment. During periods of rising nominal interest rates, the values of fixed income instruments (including positions with respect to short-term fixed income instruments) are generally expected to decline. Conversely, during periods of declining interest rates, the values of these instruments are generally expected to rise. Liquidity risk may possibly delay or prevent account withdrawals or redemptions. Allianz Convertible Bond is a sub-fund of Allianz Global Investors Fund SICAV, an open-ended investment company with variable share capital organised under the laws of Luxembourg. The value of the units/shares which belong to the Unit/Share Classes of the Sub-Fund that are denominated in the base currency may be subject to an increased volatility. The volatility of other Unit/Share Classes may be different and possibly higher. Past performance does not predict future returns. If the currency in which the past performance is displayed differs from the currency of the country in which the investor resides, then the investor should be aware that due to the exchange rate fluctuations the performance shown may be higher or lower if converted into the investor's local currency.
