

KEY INVESTOR INFORMATION

This document provides you with the key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

Trojan Fund (Ireland), Class O USD Income, a fund within Trojan Funds (Ireland) plc (ISIN: IE00B6SBBX64)

The fund is managed by Link Fund Manager Solutions (Ireland) Limited.

Objectives and Investment Policy

Objective

The fund seeks to achieve growth in capital, ahead of inflation (UK Retail Prices Index), over the longer term (5 to 7 years).

Investment Policy

The fund has flexibility to invest in a wide range of instruments including government and public securities, shares and securities which represent rights in such shares, money market instruments, investment funds, cash, cash equivalents, indices and deposits. Exposure to these asset classes can also be achieved by investing in other funds. The fund may also seek indirect exposure to precious metals.

Essential features of the fund:

- The fund will invest in a variety of asset classes. The fund has no specific target market, asset class or geographic sector.
- You can buy and sell shares in the fund each business day.
- This class of shares in the fund aims to distribute available income every six months.
- Derivatives (a contract the value of which depends on the value of one or more underlying assets) may be used to manage the risk profile of the fund, reduce cost or generate additional capital or

income. Currency hedging arrangements may be used to reduce the risk of currency movements in the value of overseas investments held by the fund.

- Recommendation: This fund may not be appropriate for investors who plan to withdraw their money within 5 years.
- The fund is actively managed. The fund has the discretion to invest in the investments as described above with no need to adhere to a particular benchmark.

Risk and reward profile

- This indicator shows how much a fund has risen and fallen in the past, and therefore how much a fund's returns have varied. It is a measure of a fund's volatility. The higher a fund's past volatility the higher the number on the scale and the greater the risk that investors in that fund may have made losses as well as gains. The lowest number on the scale does not mean that a fund is risk free.
- The fund has been classed as 4 because its volatility has been measured as average.
- This indicator is based on historical data and may not be a reliable indication of the future risk profile of this fund.
- The risk and reward profile shown is not guaranteed to remain the same and may shift over time.

- Position / Market Risk: The investments of the fund are subject to normal market fluctuations and the risks inherent in investment in securities markets and there can be no assurance that the value of the relevant securities will go up in value or that the investment objective will be achieved.
- Financial Techniques Impact: The fund may use derivatives to generate additional capital or income. A movement in the value of a derivative's underlying asset may have a much larger negative impact on the value of the fund than if the fund were to hold the underlying investment itself.
- Debt securities are affected by trends in interest rates and inflation. If interest rates go up the value of capital may fall and vice versa. Inflation may also decrease the real value of capital. The value of a debt security is also affected by its credit rating.
- Counterparty Risk: As the fund may enter into currency hedging arrangements there is a risk that other parties may fail to meet their obligations. This may lead to delays in receiving amounts due to the fund, and the fund receiving less than is due or receiving nothing.
- Currency Risk: As the fund invests in securities which are not in the base currency, movements in exchange rates may, when not hedged, cause the value of your investment to increase or decrease.
- Commodities Risk: Investments which derive value from commodities can rise or fall as the value of such commodities fluctuate and consequently the value of such investments can be significantly affected (both negatively and positively) by world events, trade controls, worldwide competition, political and economic conditions, international energy conservation, the success of exploration projects, tax and other government regulations.
- For full details of the fund's risks, please see the prospectus which may be obtained from the address in 'Practical Information' below.

Charges for this fund

The charges you pay are used to pay the costs of running the fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest	
Entry Charge	5%
This is the maximum that might be taken out of your money before it is invested.	
Exit Charge	None
Charges taken from the Sub-Fund over the year	
Ongoing Charges	1.11%
Charges taken from the Sub-Fund under certain specific conditions	
Performance Fee	None

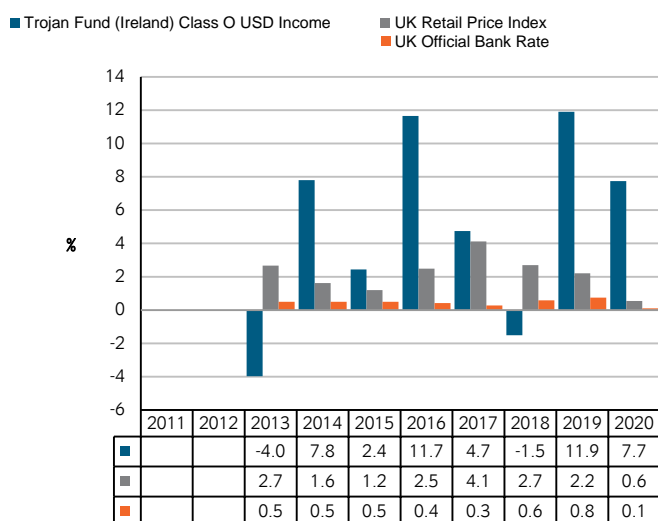

The entry charge shown is a maximum figure. In some cases investors may pay less. You can find out the actual charges from your financial advisor or distributor.

The ongoing charges figure, which may vary from year to year, is based on expenses as at 31 December 2020. They exclude portfolio transaction costs, except in the case of an entry/exit charge paid by the fund when buying or selling units in another collective undertaking. The fund's annual report will include detail on the charges made.

You may also be charged a dilution levy to cover dealing costs incurred by the fund when it buys or sells investments on your entry to or exit from the fund.

For more information about charges, please see the sections of the prospectus and the relevant supplement to the prospectus headed 'Fees and Expenses', each of which may be obtained free of charge from the addresses in 'Practical Information' below.

Past Performance

- Past performance is not a guide to future performance.
- The past performance in the chart shown opposite is net of tax and charges but excludes the entry charge that may be paid on the purchase of an investment.
- The fund and share class launched in February 2012. It was a feeder fund of Trojan Fund, a UK UCITS, from June 2014 until 29 March 2019.
- Performance is calculated in US Dollars.
- The UK Retail Prices Index has been selected as the fund's target return benchmark as the fund aims to achieve a return (the money made or lost on an investment) that is above the rate of inflation. The UK Retail Prices Index is used to measure the rate of inflation.
- The UK Official Bank Rate is used as a comparator which may assist investors in evaluating the fund's performance when compared with returns available from cash.
- Other performance comparators may be used and are available upon request.
