

## Key investor information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

## DWS Invest Convertibles, a sub-fund of the SICAV DWS Invest

Share class FC (CE) Security code: DWS1BT ISIN: LU0740833669

Management Company: DWS Investment S.A., a member of the DWS Group.

## Objectives and investment policy

The objective of the investment policy is to generate an above-average return in Euros. In order to achieve this, the fund invests globally in convertible and warrant-linked bonds from domestic and foreign issuers denominated in or hedged against the euro. The selection of individual investments is at the discretion of the fund management. The currency of the sub-fund is EUR, the currency of the share class is EUR. Returns and gains are not distributed but are reinvested in the fund. You may request the redemption of shares on each valuation day. The redemption may only be suspended in exceptional cases taking into account your interests as an investor.

## Risk and reward profile

The calculation of the risk and reward profile is based on historical data that cannot be used as a reliable indicator for the future risk profile. This risk indicator is subject to changes; the classification of the fund may change over time and cannot be guaranteed. Even a fund that is classified in the lowest category (category 1) does not represent a completely risk-free investment. The fund is classified in category 4 because its share price fluctuates and the likelihood of both losses and gains may therefore be relatively high. The following risks could be of particular significance for the fund. These risks can impair the performance of the fund and thus impact negatively on the net asset value per unit and on the capital invested by the investor. The unit value may at any time fall below the purchase price paid by the client.

The fund concludes derivative transactions with various contractual partners to a significant extent. A derivative is a financial instrument whose value depends on the development of one or more underlyings. Due to its structure (e.g. due to leverage), it may have a stronger impact on the fund than is the case if an underlying instrument is acquired directly. The fund invests in equities. Equities are subject to strong price fluctuations and thus also to the risk of price decreases. The fund invests in convertible and warrant-linked bonds. Convertible and warrant-linked bonds embody the right to convert the bond into equities or to acquire equities. The performance of the value of the convertible and warrant-linked bonds is therefore dependent on the price performance of the equity as the underlying. The risks of the performance of the underlying equities can therefore impact on the performance of the convertible and warrant-linked bonds. The fund invests in bonds, the value of which depends on whether the issuer is able to afford its payments. The deterioration of credit quality (ability and willingness to repay) may have an adverse affect on the value of the bond. A more detailed description of risks and other general information can be found under "Risk warnings" in the sales prospectus.

## Charges

The costs and fees borne by you are used for the management, administration and custody of the fund, as well as for its distribution and marketing. These costs restrict the potential growth of your investment.

The current costs specified here were incurred in the fiscal year of the fund, which ended on 31.12.2018. They may change from year to year. The current costs do not include the performance-based fee and the transaction costs. Additional information on costs can be found under "Costs" in the sales prospectus. Shares may in many cases be exchanged for shares in another asset class of the same or another DWS Invest SICAV sub-fund subject to various conditions. Details can be found in the "Exchange of shares" section of the sales prospectus.

## Past performance

Past performance is not a reliable indicator of future performance. All costs and fees that were withdrawn from the FC (CE) share class of DWS Invest Convertibles were deducted during the calculation. The FC (CE) share class of DWS Invest Convertibles was launched in 2012. The performance was calculated in EUR.
