⁽¹⁾Sub-Fund changed its name from AQR Sustainable Corporate Arbitrage UCITS Fund on 24 August 2023.

⁽²⁾Share class was closed during the period.

⁽³⁾Class name changed from Class IAE1 effective 1 July 2023 after NAV production.

1. General Information

(a) The Company

AQR UCITS Funds (the "Company") is an investment company incorporated on 12 December 2011 under Luxembourg laws, as a Société d'Investissement à Capital Variable ("SICAV") for an unlimited period of time. The Company is governed by the provisions of Part I of the Law of 17 December 2010, as amended, governing Undertakings for Collective Investments (the "Law"). The Articles of the Company were published in the Memorial C, Recueil Spécial des Sociétés et Associations of the Grand Duchy of Luxembourg on 25 January 2012 and the Company is registered with the Luxembourg Trade and Companies' Register under the number B 165881.

The Company is structured as an umbrella fund designed to offer investors access to a variety of investment strategies through a range of separate sub-funds (the "Sub-Funds"). Each Sub-Fund maintains a separate portfolio of investment securities, cash and other assets. Separate classes of shares are issued within each Sub-Fund. The Board of Directors (the "Directors") may authorise the creation of additional Sub-Funds and classes of shares in the future.

The Directors have appointed FundRock Management Company S.A. as the management company (the "Management Company"). The Management Company has appointed (by way of delegation) AQR Capital Management, LLC as the investment manager of the Company (the "Investment Manager"). The Investment Manager invests the assets of each of the active Sub-Funds pursuant to their respective investment objectives and policies.

The Investment Manager appointed AQR Arbitrage, LLC, a Delaware limited liability company and affiliate of the Investment Manager, as a sub-investment manager (the "Sub-Investment Manager") to AQR Corporate Arbitrage UCITS Fund (formerly known as AQR Sustainable Corporate Arbitrage UCITS Fund). The Sub-Investment Manager performs research and investment management services in respect of the Sub-Fund's strategies and is compensated directly by the Investment Manager pursuant to a sub-investment manager agreement. None of the fees related to the services provided by the Sub-Investment Manager are charged to the Sub-Fund.

The Investment Manager is subject to the Securities and Exchange Commission's amended Rule 206(4)-2 under the Investment Advisers Act of 1940 (the "Act"). The Investment Manager did not identify any United States of America investors in the Company for the period ended 30 September 2023 and as such no reconciliation is required between generally accepted accounting principles in the United States of America and generally accepted accounting principles in the United States of America and generally accepted accounting principles in the United States of America and generally accepted accounting principles in the United States of America and generally accepted accounting principles in the United States of America and generally accepted accounting principles in the United States of America and generally accepted accounting principles in the United States of America and generally accepted accounting principles in the United States of America and generally accepted accounting principles in the United States of America and generally accepted accounting principles in the United States of America and generally accepted accounting principles in the United States of America and generally accepted accounting principles in the United States of America and generally accepted accounting principles in the United States of America and generally accepted accounting principles in the United States of America and generally accepted accounting principles in the United States of America and generally accepted accounting principles in the United States of America and generally accepted accounting principles in the United States of America and generally accepted accounting principles in the United States of America and generally accepted accounting principles accepted ac

(b) The Sub-Funds

As at 30 September 2023, the Company consists of eight active Sub-Funds:

Sub-Fund	Launch Date
AQR Alternative Trends UCITS Fund	14 February 2023
AQR Corporate Arbitrage UCITS Fund ⁽¹⁾	3 June 2021
AQR Global Risk Parity UCITS Fund	28 August 2012
AQR Managed Futures UCITS Fund	1 October 2014
AQR Style Premia UCITS Fund	1 October 2014
AQR Sustainable Delphi Long-Short Equity UCITS Fund	26 October 2018
AQR Sustainable Emerging Relaxed Constraint Equity UCITS Fund	2 May 2019
AQR Systematic Total Return UCITS Fund	1 February 2017

⁽¹⁾Sub-Fund changed its name from AQR Sustainable Corporate Arbitrage UCITS Fund on 24 August 2023.

The investment objective for each Sub-Fund is set out in the relevant Supplement to the Prospectus.

1. General Information (continued)

(c) The Shares

Each Sub-Fund may offer more than one class of shares. Each class of shares may have different features, including but not limited to subscription, redemption, minimum holding, fee structure, currency and dividend policy. Within each Sub-Fund, individual classes of shares may have a currency of denomination that may differ from the reference currency of the Sub-Fund. Subscriptions and redemptions that are recognised in the current period but are received or paid after the period end are reflected as subscriptions receivable and redemptions payable, respectively, in the Statements of Assets and Liabilities. The Investment Manager may enter into certain transactions to hedge a Sub-Fund's exposure to foreign exchange risk where classes of shares are denominated in a currency other than the reference currency of the respective Sub-Fund. The classes available as at 30 September 2023 for each Sub-Fund are set out in the relevant Supplement to the Prospectus.

2. Significant Accounting Policies

(a) Presentation of the Financial Statements

The financial statements of the Company are prepared in accordance with Luxembourg legal and regulatory requirements relating to Undertakings for Collective Investment Funds. The combined accounts of the Company are maintained in Euro ("EUR"), the reference currency of the Company. The financial statements of the Sub-Funds are expressed in U.S. Dollar ("USD"), the reference currency of the Sub-Funds.

(b) Combined Financial Statements

The Combined Statements of Assets and Liabilities is the sum of the Statements of Assets and Liabilities of each Sub-Fund converted, if applicable, into the reference currency of the Company using the exchange rate prevailing at period end. The Combined Statements of Operations and the Combined Statements of Changes in Net Assets are the sum of the Statements of Operations and the Statements of Changes in Net Assets of each Sub-Fund converted, if applicable, into the reference currency of the Company using the average exchange rate for the period.

(c) Valuation of Investments

All securities and other investments are recorded at their estimated fair value, as described in Note 5.

(d) Swing Pricing

A Sub-Fund may suffer a reduction in the Net Asset Value ("NAV") per share (a "dilution") due to investors buying or selling shares in a Sub-Fund at a price that does not reflect dealing and other costs (such as taxes) that arise when security trades are undertaken by the Investment Manager or any sub-investment manager, to accommodate cash inflows or outflows.

In order to counter this impact, the Management Company may adopt a swing pricing mechanism to protect the interests of shareholders in the Sub-Fund. If on any valuation day, the aggregate net transactions in shares of a Sub-Fund exceed a pre-determined threshold (the "Threshold"), the NAV per share may be adjusted upward or downward to reflect the dealing and other costs attributable to the net inflows and net outflows, respectively. The extent of the price adjustment (the "Factor") will be set by the Management Company to reflect an approximation of the dealing and other costs which would be incurred on the effective acquisition or disposal of assets in the Sub-Fund. The Factor and the Threshold will be reviewed on a periodic basis by the Management Company. Under exceptional circumstances the Directors may, in the interest of shareholders, decide to temporarily increase the maximum swing Factor for each relevant Sub-Fund. Please refer to the most recent Prospectus for details on swing pricing mechanisms.

2. Significant Accounting Policies (continued)

(d) Swing Pricing (continued)

In accordance with the Prospectus, swing pricing is in effect during the period ended 30 September 2023 in the following Sub-Funds:

Sub-Fund	Maximum Factor
AQR Alternative Trends UCITS Fund	0.5%
AQR Corporate Arbitrage UCITS Fund ⁽¹⁾	2.0%
AQR Sustainable Emerging Relaxed Constraint Equity UCITS Fund	0.5%

⁽¹⁾Sub-Fund changed its name from AQR Sustainable Corporate Arbitrage UCITS Fund on 24 August 2023.

Swing pricing may be included in proceeds from subscriptions of shares or payments for redemptions of shares in the Statements of Changes in Net Assets, if applicable. The NAV per share as disclosed in the Share Class Information represents the published NAV per share.

There was no swing pricing applied to the NAV per share as at 30 September 2023.

(e) Cash

Cash comprises USD and foreign currency deposits held at a custodian bank which may exceed insured limits. The Sub-Funds are subject to risk to the extent that the institution may be unable to fulfill its obligations.

(f) Due from/(to) Broker(s)

Due from/(to) broker(s) represent(s) cash balances pledged to, or cash balances received from, the Sub-Funds' prime brokers and counterparties, including cash held for securities trading, as well as cash pledged or received as collateral at counterparties for over-the-counter ("OTC") derivative transactions. The Sub-Funds are subject to credit risk should the counterparties be unable to meet their obligations to the Sub-Funds.

The table below summarises the net cash collateral that is pledged/(received) at each relevant broker for each Sub-Fund as at 30 September 2023. The amounts below do not include any non-cash collateral.

Sub-Fund	Broker ⁽¹⁾	Collateral for OTC Derivative Transactions

⁽²⁾Includes unsettled cash on OTC derivative transactions.

⁽³⁾A portion of the collateral is held in a tri-party account.

⁽⁴⁾Sub-Fund changed its name from AQR Sustainable Corporate Arbitrage UCITS Fund on 24 August 2023.

(g) Deposits with/(from) Brokers for Exchange-Traded and Centrally Cleared Derivatives

Upon entering into an exchange-traded or centrally cleared derivative contract, a Sub-Fund is required to pledge cash or securities as collateral to a central clearinghouse ("CCP"), through a broker, in accordance with the initial margin requirements of the CCP. At period end, the balances of the initial margin requirements at each broker, excluding the value of any securities pledged as collateral, are recorded as deposits with/(from) brokers for exchange-traded and centrally cleared derivatives in the Statements of Assets and Liabilities. Any security that has been pledged as collateral is identified as an asset in the Statements of Assets and Liabilities as a component of investments, at fair value. As at 30 September 2023, there were no securities pledged as collateral.

As at 30 September 2023, the Sub-Funds pledged/(received) collateral as follows:

Sub-Fund	Broker ⁽¹⁾	Deposits with/(from) Broker
	CITG	\$26,360,777
AQR Alternative Trends UCITS Fund	JPLL	2,466,365
	JPPC	1,497,379

⁽¹⁾The counterparty abbreviations are defined in the Schedules of Investments.

⁽²⁾Sub-Fund changed its name from AQR Sustainable Corporate Arbitrage UCITS Fund on 24 August 2023.

(h) Foreign Currency Translation

Any value not expressed in the reference currency of the relevant Sub-Fund shall be converted into the reference currency of the relevant Sub-Fund at the prevailing exchange rate that the Directors shall determine to be appropriate.

Income and expenses expressed in currencies other than the reference currency of the respective Sub-Fund are converted at exchange rates prevailing at the transaction date. The acquisition cost of securities expressed in a currency other than the reference currency of the respective Sub-Fund is translated at the exchange rates prevailing on the date of purchase. Assets and liabilities expressed in currencies other than the reference currency of the respective Sub-Fund is translated at the exchange rates prevailing on the date of purchase. Assets and liabilities expressed in currencies other than the reference currency of the respective Sub-Fund are converted at exchange rates prevailing at period end. China A shares are denominated in Chinese Yuan Onshore ("CNY") and fair value, as well as cash flow activity, are converted into USD using the applicable Chinese Yuan Offshore ("CNH") exchange rate.

The respective Sub-Fund does not separately disclose the portion of the results of operations arising from changes in the foreign exchange rates on investments and derivatives from the fluctuations that result from changes in the market prices of investments and derivatives held or sold during the period. Accordingly, such foreign currency gains/(losses) are included in the applicable reported net realised gain/(loss) on investments and derivatives and net change in unrealised appreciation/(depreciation) on investments and derivatives in the Statements of Operations.

Net realised gain/(loss) on foreign currency transactions recorded in the Statements of Operations arise from the disposition of foreign currency, and the difference between the amount of dividends, interest and foreign withholding taxes recorded on each Sub-Fund's books on the transaction date and the USD equivalent of the amounts actually

1

Notes to the Financial Statements as at 30 September 2023 (Unaudited) (continued)

2. Significant Accounting Policies (continued)

(h) Foreign Currency Translation (continued)

received or paid. Net changes in unrealised appreciation/(depreciation) on foreign currency translation reported in the Statements of Operations arise from changes (due to the changes in the exchange rate) in the value of foreign currency and assets and liabilities (other than investments and derivatives) denominated in foreign currencies, which are held at period end.

The following exchange rates (against USD) as at 30 September 2023 were used to convert assets and liabilities denominated in currencies other than the reference currency of the Sub-Funds:

USD =	3.673000 AED 1.544640 AUD	_	United Arab Emirates Dirham Australian Dollar
	5.009200 BRL	_	Brazilian Real

2. Significant Accounting Policies (continued)

(h) Foreign Currency Translation (continued)

The following exchange rate (against EUR) is used to calculate the combined total in the Combined Statements of Assets and Liabilities for all Sub-Funds.

1 EUR = 1.058000 USD

The following average exchange rate (against EUR) is used to calculate the combined total in the Combined Statements of Operations and in the Combined Statements of Changes in Net Assets for all Sub-Funds.

1 EUR = 1.088394 USD

(i) Investment Transactions and Related Income and Expense

Investment transactions are accounted for on a trade date plus one accounting basis (the next business day after the order to buy or sell is executed). Realised gains and losses are calculated using the specific identification cost method and include transaction costs. Interest income/(expense), net of withholding tax, if any, is recorded on an accrual basis using the effective interest method, which results in coupon interest being adjusted for amortisation of premiums and accretion of discounts, when applicable. Dividend income/(expense), net of withholding tax, if any, is recorded on the ex-dividend date or when a Sub-Fund first learns of the ex-dividend date notification. The Sub-Funds may file withholding tax reclaims in certain jurisdictions to recover a portion of amounts previously withheld. Interest purchased and interest sold on bonds are included in interest receivable and interest payable, respectively, in the Statements of Assets and Liabilities. For inflation-linked bonds, interest income/(expense) is earned on the principal amount and adjusted for the changes in the relevant consumer price index. As governed by the relevant master agreement, interest income may be earned by a Sub-Fund if a counterparty charges interest on collateral posted directly to a Sub-Fund.

The Sub-Funds record distributions received in excess of income from underlying investments as a reduction of cost of investments and/or realised gains. Such amounts are based on estimates (if actual amounts are not available) and actual amounts of income, realised gains and returns of capital may differ from the estimated amounts. The Sub-Funds adjust the estimated amounts of the components of distributions (and consequently net investment income) as necessary once the issuers provide information about the actual composition of the distributions.

(j) Multi-Class Operations

In calculating the NAV per share of each class of shares, income, non-class specific expenses, realised and unrealised gains and losses are allocated daily to each class of shares based on the proportion of net assets of each class at the beginning of each day. Each Sub-Fund is charged for those expenses that are directly attributable to that Sub-Fund. Company level expenses are allocated among the Sub-Funds based on the ratio of average net assets or another reasonable methodology.

3. Investments and Other Securities

(a) Convertible Securities

Certain Sub-Funds invest in preferred stocks and fixed income securities which are convertible into common stock. Convertible securities may be converted either at a stated price or rate within a specified period of time into a specified number of shares of common stock. By investing in a convertible security, the Sub-Funds may participate in any capital appreciation or depreciation of a company's stock, but to a lesser degree than if they had invested in that company's common stock. Convertible securities rank senior to common stock in a corporation's capital structure and, therefore, entail less risk than the corporation's common stock. For fixed income convertible securities, the premiums attributable to the conversion feature are not amortised.

3. Investments and Other Securities (continued)

(b) Inflation-Indexed Bonds

Certain Sub-Funds may invest in inflation-indexed bonds which are adjusted for inflation through periodic increases or decreases in the security's interest accruals, face amount, or principal redemption value, by amounts corresponding to the rate of inflation as measured by an index.

(c) Repurchase Agreements

Certain Sub-Funds may enter into repurchase agreements. In a repurchase agreement, the relevant Sub-Fund who takes possession of an underlying debt obligation (collateral) is subject to an obligation of the seller to repurchase, and the relevant Sub-Fund to resell, the obligation at an agreed-upon price and time. A repurchase agreement is considered a short-term investment and is carried at its contractual amounts, which approximates fair value. Interest earned is recorded as interest income on repurchase agreements in the Statements of Operations. In periods of increased demand for collateral, the Sub-Funds may pay a fee for receipt of collateral, which would result in an interest expense to the relevant Sub-Fund. Interest expense related to repurchase agreements is recorded as interest in the Statements of Operations. The total repurchase agreements outstanding at period end, if any, are disclosed in each Sub-Fund's Schedule of Investments.

Master repurchase agreements govern repurchase transactions relating to government obligations between the Sub-Fund and select counterparties. Master repurchase agreements maintain provisions for initiation, income payments, events of default, and maintenance of collateral. The underlying financial assets for all repurchase agreements are held in safekeeping at the Sub-Funds' depositary or designated sub-custodians under tri-party repurchase agreements. The fair value of the collateral received for a repurchase agreement must be equal to or exceed the total amount of the repurchase obligations and any accrued interest. The underlying financial assets for repurchase agreements entered into by the Sub-Funds are principally U.S. and highly rated non-U.S. government obligations. The daily value of securities to be resold is monitored, and additional collateral is obtained, where appropriate, to protect against credit exposure.

The exposure obtained through the use of repurchase agreements and the identity of the counterparties as at period end, if any, are disclosed in each Sub-Fund's Schedule of Investments. The type and amount of collateral received for repurchase agreements and information relating to returns on repurchase agreements are disclosed in Additional Information for Shareholders under Section 1 - Information Related to Security Financing Transactions and Total Return Swap Contracts.

(d) Special Purpose Acquisition Companies

Certain Sub-Funds may invest in common stock, rights, units, warrants, and other securities of Special Purpose Acquisition Companies ("SPACs") or similar special purpose entities that pool funds to seek potential acquisition opportunities. The securities of a SPAC are often issued in "units" that include one share of common stock and one right or warrant (or partial right or warrant) conveying the right to purchase additional shares or partial shares. Unless and until a transaction is completed, a SPAC generally invests its assets (less a portion retained to cover expenses) in U.S. government securities, money market funds and cash. If an acquisition that meets the requirements for the SPAC is not completed within a pre-established period of time the invested funds are returned to the entity's shareholders, less certain permitted expenses, and any rights or warrants issued by the SPAC may expire worthless. Because SPACs and similar entities have no operating history or ongoing business other than seeking acquisitions, the value of their securities is particularly dependent on the ability of the entity's management to identify and complete a suitable acquisition. Some SPACs may pursue acquisitions only within certain industries or regions, which may increase the volatility of their securities' prices.

(e) Structured Notes

Certain Sub-Funds may invest in structured notes which are freely transferable, linked to the performance of another financial instrument, and do not embed any derivative element. The structured notes will provide exposure to an investment fund managed by the Investment Manager, which invests in commodity-related financial instruments, are expected to be correlated with sectors such as metal, energy and agricultural, and may employ leverage.

4. Derivative Instruments and Activities

(a) Forward Foreign Exchange Contracts

Certain Sub-Funds buy and sell forward foreign exchange contracts, which are agreements between two parties to buy and sell currencies at a set price on a future date. These contracts are used to protect against a decline in value relative to the USD of the currencies in which portfolio securities are denominated or quoted (or an increase in the value of a currency in which securities a Sub-Fund intends to buy are denominated, when a Sub-Fund holds cash reserves and short-term investments), to hedge the exposure to foreign currency risk where classes of shares are denominated in currencies other than USD, or for other investment purposes. The USD value of forward foreign exchange contracts is determined using current forward currency exchange rates supplied by an independent pricing service. The fair value of the contract will fluctuate with changes in currency exchange rates. The contract is marked to market daily and the change in fair value is recorded as a net change in unrealised appreciation/(depreciation) on forward foreign exchange contracts is recorded in the Statements of Operations. When the contract is closed, a net realised gain/(loss) on forward foreign exchange contracts is recorded in the Statements of Operations which represents the difference between the value of the forward foreign exchange contract at the time it was opened and the value at the time it was closed.

The Sub-Funds could be exposed to risk if the value of the currency changes unfavourably, if the counterparties to the contracts are unable to meet the terms of their contracts or if the Sub-Funds are unable to enter into a closing position. Risks may exceed amounts recognised in the Statements of Assets and Liabilities. Non-deliverable forward foreign exchange contracts are settled with the counterparty in USD without the delivery of foreign currency. Forward foreign exchange contracts outstanding at period end, if any, are disclosed in each Sub-Fund's Schedule of Investments.

(b) Futures Contracts

Certain Sub-Funds invest in futures contracts as part of their primary investment strategy and to equitise their cash flows. Investments in futures may increase or decrease exposure to a particular market. In the event of a bankruptcy or insolvency of a futures commission merchant that holds margin on behalf of the Sub-Funds, the Sub-Funds may not be entitled to the return of all of the margin owed to the Sub-Funds, potentially resulting in a loss. A change in fair value of an open futures contract is recorded in the Statements of Operations as a net change in unrealised appreciation/(depreciation) on futures contracts. When futures contracts are closed or expire, a net realised gain/(loss) on futures contracts is recorded in the Statements of Operations which represents the difference between the value of the futures contracts at the time they were opened and the value at the time they closed or expired.

The use of long futures contracts subjects the Sub-Funds to risk of loss in excess of variation margins in the Statements of Assets and Liabilities. The use of short futures contracts subjects the Sub-Funds to unlimited risk of loss. Futures contracts outstanding at period end, if any, are disclosed in each Sub-Fund's Schedule of Investments.

(c) Swap Contracts

Certain Sub-Funds engage in various swap transactions to manage risks within their portfolio or as an alternative to direct investments. Swap transactions may be privately negotiated in the OTC market where payments are settled through direct payments between the Sub-Fund and the counterparty. By contrast, certain swap transactions are subject to mandatory central clearing ("centrally cleared swaps"). These swap contracts are executed through a derivatives clearing member ("DCM"), acting in an agency capacity, and submitted to a CCP, in which case all payments are settled with the CCP through the DCM.

A Sub-Fund's use of swap contracts may create additional risks beyond those that would exist if the Sub-Fund invested in the underlying positions directly, including: market risk related to unfavourable changes in interest rates or in the price(s) of the underlying security(ies); credit risk related to the counterparty's failure to perform under contract terms; and liquidity risk related to the lack of a liquid market for the swap contracts, which may limit the ability of a Sub-Fund to close out its position(s).

4. Derivative Instruments and Activities (continued)

(c) Swap Contracts (continued)

(i) Credit Default Swap Contracts

Certain Sub-Funds enter into credit default swap contracts to provide a measure of protection against risk of loss following a default, or other credit event in respect of issuers within an underlying index or a single issuer, or to gain credit exposure to an underlying index or issuer. In a credit default swap contract, the protection buyer typically makes an upfront payment and a periodic stream of payments to a counterparty, the protection seller, in exchange for the right to receive a contingent payment upon the occurrence of a credit event on the reference obligation or all other equally ranked obligations of the reference entity. Credit events are contract specific but may include bankruptcy, failure to pay, restructuring and obligation acceleration. The credit default swap contracts are marked to market daily and the change in fair value, if any, is recorded as a net change in unrealised appreciation/(depreciation) on swap contracts in the Statements of Operations. Upon the occurrence of a credit event, the difference between the par value and fair value of the reference obligation, net of any proportional amount of the upfront payment, is recorded as net realised gain/(loss) on swap contracts in the Statements of Operations.

Implied credit spreads are used to determine the value of credit default swap contracts and reflect the cost of buying/selling protection, which may include upfront payments made to enter into the contract. Therefore, higher spreads indicate a greater likelihood that a seller will be obligated to perform (i.e. make a payment) under the swap contract. Implied credit spreads for credit default swap contracts on credit indexes are linked to the weighted average spread across the underlying reference obligations included in a particular index.

The Sub-Fund's risk of loss associated with these instruments may exceed their value, as recorded in the Statements of Assets and Liabilities. A Sub-Fund's maximum risk of loss from counterparty risk, either as the protection seller or as the protection buyer, is the fair value of the contract. This risk may be mitigated by having a master netting arrangement between the specific Sub-Fund and the counterparty. The CCP acts as the counterparty to each centrally cleared swap transaction, therefore credit risk is limited to the failure of the clearinghouse. Where a Sub-Fund is a seller of protection, the maximum potential amount of future payments the Sub-Fund may be required to make is equal to the notional amount of the relevant credit default swap contract. In certain circumstances, a Sub-Fund may enter into offsetting credit default swap contracts which would mitigate its risk of loss. Credit default swap contracts outstanding at period end, if any, are disclosed in each Sub-Fund's Schedule of Investments.

(ii) Interest Rate Swap Contracts

Certain Sub-Funds enter into interest rate swap contracts as part of their investment strategy. Interest rate swap contracts generally involve agreements to exchange fixed and floating payment obligations, without the exchange of the underlying notional amounts. Interest rate swap agreements are privately negotiated in the OTC market or may be executed in a multilateral or other trade facility platform, such as a registered exchange (centrally cleared swaps). Periodic payments (received)/paid by the Sub-Funds are recorded as net realised gain/(loss) on swap contracts in the Statements of Operations. Interest rate swap contracts are marked to market daily and the change in fair value is recorded as a net change in unrealised appreciation/(depreciation) on swap contracts in the Statements of Operations. The Sub-Funds' risk of loss associated with these instruments may exceed their value, as recorded in the Schedule of Investments. Non-deliverable interest rate swap contracts are settled with the counterparty in USD without the delivery of foreign currency. Centrally cleared interest rate swap contracts may have forward effective dates. The amortisation of the upfront premiums (if applicable) and payments related to these swap contracts begin on the effective date of the contract. Interest rate swap contracts outstanding at period end, if any, are disclosed in each Sub-Fund's Schedule of Investments.

(iii) Total Return Swap Contracts

Certain Sub-Funds invest in total return swap contracts to obtain leverage or obtain exposure to the returns of the underlying referenced instrument without actually owning the underlying position. Total return swap contracts are two-party contracts that generally obligate one party to pay the positive return and the other party to pay the negative return on a specified reference security, security index or index component during the

4. Derivative Instruments and Activities (continued)

(c) Swap Contracts (continued)

(iii) Total Return Swap Contracts (continued)

period of the swap. Total return swap contracts are marked to market daily based on the value of the underlying reference entity and the change in fair value, if any, is recorded as a net change in unrealised appreciation/(depreciation) on swap contracts in the Statements of Operations. Total return swap contracts normally do not involve the delivery of securities or other underlying assets. If the other party to a total return swap defaults, the Sub-Fund's risk of loss consists of the net amount of payments that such Sub-Fund is contractually entitled to receive, if any. The use of long total return swap contracts subjects the Sub-Funds to risk of loss in excess of the amounts shown in the Statements of Assets and Liabilities. The use of short total return swaps subjects the Sub-Funds to unlimited loss. Periodic payments received or paid by the Sub-Funds are recorded as net realised gain/(loss) on swap contracts in the Statements of Operations. Total return swap contracts outstanding at period end, if any, are disclosed in each Sub-Fund's Schedule of Investments.

(iv) Total Return Basket Swap Contracts

Certain Sub-Funds may enter into a total return basket swap agreement to obtain exposure to a portfolio of long and/or short securities. Under the terms of the agreement, the swap is designed to function as a portfolio of direct investments in long and short equity or fixed income positions. The notional value of each component represents the fair value at period end. The Sub-Funds have the ability to trade in and out of long and short positions within the swap and will receive all of the economic benefits and risks equivalent to direct investments in these positions such as: capital appreciation/(depreciation), corporate actions, dividends and interest received and paid, all of which are reflected in the swap value. The swap value also includes financing charges and credits related to the notional values of the long and short positions and cash balances within the swap. Finance charges and credits are based on defined market rates plus or minus a specified spread. Positions within the swap are reset periodically, and financing costs are reset monthly. During a reset, any realised gains/(losses) from positions, income, proceeds from corporate actions and accrued financing costs may become available for cash settlement between the Sub-Funds and the swap counterparty. Prior to the reset, these amounts are included as a component of the fair value in net cash and other receivables/(payables). Cash settlement in and out of the swap may occur at a reset date or any other date, at the discretion of the Sub-Funds and the counterparty, over the life of the agreement, and is generally determined based on limits and thresholds established as part of the master agreement between the Sub-Funds and the counterparty. The maturity dates are measured from the commencement of investment in each underlying portfolio swap position. A change in the fair value of a total return basket swap contract is recorded as a net change in unrealised appreciation/(depreciation) on swap contracts in the Statements of Operations. Cash settlements between a Sub-Fund and the counterparty are recorded as net realised gain/(loss) on swap contracts in the Statements of Operations. Total return basket swap contracts outstanding at period end, if any, are disclosed in each Sub-Fund's Schedule of Investments.

(d) Master Futures Client Account Agreements

Master Futures Client Account Agreements including an Addendum for Cleared Derivatives ("FCM Master Agreements") govern exchange-traded futures transactions, exchange-traded options transactions and centrally cleared derivative transactions which are cleared through CCPs. On a daily basis, a CCP clears trades that it has received from brokers that are clearing members of the respective CCP and are registered as swap/futures commission merchants with the Commodity Futures Trading Commission (CFTC), or other applicable regulator. The relevant Sub-Funds therefore interface with these brokers in order to trade exchange-traded or centrally cleared derivatives.

Upon entering into an exchange-traded or centrally cleared derivative contract a Sub-Fund may pledge cash and/or securities to a trading account as collateral to a CCP, through a broker, in accordance with the initial margin requirements of the CCP. Exchange-traded and centrally cleared derivative contracts are revalued at least daily, and as such, the net appreciation or depreciation of the derivative contracts causes the value of the respective trading account to move either above or below the initial margin requirement. In accordance with the FCM Master Agreements, on a daily basis each relevant Sub-Fund will pay or receive cash in an amount that will bring the total value of each trading account back in line with the respective initial margin requirement. Such receipts or payments

4. Derivative Instruments and Activities (continued)

(d) Master Futures Client Account Agreements (continued)

of cash are known as variation margin. Variation margin is determined separately for exchange-traded futures and centrally cleared swaps and cannot be netted. The movement of variation margin between each relevant Sub-Fund and the respective brokers usually occurs the morning after the close of a trading session, and therefore at the end of each day, the total value of a trading account is greater or less than the initial margin requirement by an amount equal to the current day's net change in unrealised appreciation or depreciation of the derivative contracts. At reporting period end, the amount that will be paid to, or received from the relevant brokers, on the morning after the close of a trading session is reflected as a variation margin receivable or variation margin payable on exchange-traded and centrally cleared derivatives, as applicable, in the Statements of Assets and Liabilities.

(e) ISDA Master Agreements

International Swaps and Derivatives Association, Inc. Master Agreements and Credit Support Annexes ("ISDA Master Agreements") govern OTC derivative transactions entered into between a Sub-Fund and a counterparty. ISDA Master Agreements maintain provisions for general obligations, representations, netting of settlement payments, agreements to deliver supporting documents, collateral transfer and events of default or termination. ISDA Master Agreements contain termination events applicable to the relevant Sub-Fund or the counterparty. Such events may include a decline in the relevant Sub-Fund's capital below a specified threshold over a certain period of time or a decline in the counterparty is long term and short-term credit ratings below a specified level, respectively. In each case, upon occurrence, the other party may elect to terminate early and cause settlement of all OTC swap and foreign exchange contracts outstanding, including the payment of any losses and costs resulting from such early termination, as reasonably determined by the terminating party. Any decision by a party to elect early termination could impact a Sub-Fund's future derivative activity.

Collateral pledged by a Sub-Fund for OTC derivatives pursuant to an ISDA Master Agreement is segregated by the Sub-Fund's custodian and identified as an asset in the Statements of Assets and Liabilities either as a component of investments, at fair value (securities) or in due from brokers (cash). Segregation of the Sub-Fund's collateral in the custodian account helps mitigate counterparty risk.

Collateral posted for the benefit of a Sub-Fund for OTC derivatives pursuant to an ISDA Master Agreement is held by a custodian of the Sub-Fund. Cash collateral received is reflected as a liability within due to brokers in the Statements of Assets and Liabilities.

5. Fair Value Measurement

(a) Investment Valuation Policies

The NAV per share of each class within a Sub-Fund is computed by dividing the total current value of the assets of the Sub-Fund attributable to a class, less class liabilities, by the total number of shares of that class of the Sub-Fund outstanding at the time the computation is made. The frequency of the NAV per share computation of each class within a Sub-Fund is in accordance with each Sub-Fund's relevant Supplement to the Prospectus. In addition, the NAV per share of each class within a Sub-Fund may be calculated on any other day or suspended as the Directors may determine as long as shareholders are notified in advance. For purposes of calculating the NAV, portfolio securities and other financial derivative instruments are valued using valuation methods as adopted by the Directors.

The Directors have delegated responsibility for applying approved valuation policies to the Investment Manager, subject to oversight by the Directors. The Investment Manager has established a Valuation Committee (the "VC") whose function is to administer, implement and oversee the continual appropriateness of valuation approaches applied and the determination of adjustments to the fair valuation of portfolio securities and other financial derivative instruments in good faith after consideration of market factor changes and events affecting issuers. The Investment Manager performs a series of activities to provide reasonable assurance of the accuracy of prices including: (i) periodic vendor due diligence meetings, review of approaches and techniques, new developments and processes

5. Fair Value Measurement (continued)

(a) Investment Valuation Policies (continued)

at vendors, (ii) review of daily comparison of security valuation versus prior day for all securities that exceeded established thresholds, (iii) review of third party model prices against internal model prices, and (iv) review the results of back testing.

Where market-based valuations are readily available, fair value is generally determined on the basis of official closing prices, last trade, or evaluated quotations obtained from pricing services. Where market quotations are not readily available, or if an available market quotation is determined not to reflect fair value, securities or financial derivatives are valued at fair value, as determined in good faith by the VC in accordance with the valuation procedures approved by the Directors. Using fair value to price a security may require subjective determinations about the value of a security that could result in a value that is different from a security's most recent closing price and from the prices used by other funds to calculate their net assets. It is possible the estimated values may differ significantly from the values which would have been used had an active market for the investments existed. These differences could be material.

The Sub-Fund with fair valued securities as at 30 September 2023 is as follows:

Sub-Fund	Number of Fair Valued Securities	Fair Value	Absolute Value	Fair Value as a Percent of Net Assets
AQR Corporate Arbitrage UCITS				
Fund ⁽¹⁾	2	\$-	\$-	-

⁽¹⁾Sub-Fund changed its name from AQR Sustainable Corporate Arbitrage UCITS Fund on 24 August 2023.

(b) Valuation Techniques

The following inputs and techniques may be used by the Sub-Funds to value the portfolio securities and other financial derivative instruments held by the Sub-Funds:

Investments in other investment funds that do not have readily determinable fair values are fair valued using their net asset value per share. The investment objective of these other investment funds is to maintain liquidity, preserve capital and generate positive returns. Withdrawals may be made from the other investment funds daily.

Securities listed on a recognised stock exchange or dealt on any other regulated market that operates regularly and is open to the public, are valued at the last sale price or official market closing price (4PM Central European Time) on the primary exchange, or composite on which the instrument is traded before the NAV of each Sub-Fund is calculated on a valuation date.

In accordance with procedures adopted by the Directors, certain Sub-Funds may apply daily fair value factors, furnished by an independent pricing service, to certain equity securities that are solely traded on a foreign exchange in the Asian markets to account for the market movement between the close of the foreign market and when the NAV of each Sub-Fund is calculated, unless the Directors determine that the use of another valuation methodology is appropriate. The pricing service uses statistical analysis and quantitative models to adjust local market prices using factors such as subsequent movement and changes in the pricing of indices, american depositary receipts, futures contracts and exchange rates in other markets in determining fair value as at the time that the Sub-Funds calculate their NAV.

Fixed income securities (other than certain short-term investments maturing in 60 days or less) and other investments that trade in markets that are not considered to be active, are valued based on quoted market prices, dealer quotations or alternative pricing sources. These include certain U.S. government and sovereign obligations, most government agency securities, investment-grade corporate bonds, money market funds and less liquid listed equities. Corporate and sovereign bonds and other fixed income instruments are valued at estimated fair value using the latest mid prices or evaluated quotations furnished by independent pricing services, as well as evaluated quotations from counterparties and other market participants. Evaluated quotes are based on a matrix system, which may consider such factors as quoted prices for identical or similar assets, yields, maturities and ratings and

5. Fair Value Measurement (continued)

(b) Valuation Techniques (continued)

are not necessarily reliant on quoted prices. Certain other short-term investment funds are valued using quotations furnished by independent pricing services, as well as quotations from the underlying fund managers, transfer agents or administrators. Structured notes are valued daily using the prices supplied by Crestbridge Fund Administrators Limited (the "Calculation Agent") and are based on the net asset value per share of the underlying investment fund.

Futures contracts that are listed on national exchanges and are freely transferable are valued at fair value based on their last sales price on the date of determination on the exchange that constitutes the principal market. Centrally cleared swaps listed or traded on a multilateral trade facility platform, such as a registered exchange, are valued on a daily basis using quotations provided by an independent pricing service.

OTC derivatives, including forward contracts and swap contracts, are valued by the Sub-Funds using observable inputs, such as quotations provided by an independent pricing service, the counterparty, dealers or brokers, whenever available and considered reliable.

The value of each total return swap contract or total return basket swap contract is derived from a combination of (i) the net value of the underlying positions, which are valued daily using the last sale or closing price on the principal exchange on which the securities are traded; (ii) financing costs; (iii) the value of dividends or accrued interest; (iv) cash balances within the swap; and (v) other factors, as applicable.

The fair value of forward foreign exchange contracts is determined using current forward currency exchange rates supplied by an independent pricing service.

Each Sub-Fund values the repurchase agreements it has entered based on the respective contract amounts, which approximate fair value.

6. Fees and Expenses

(a) Investment Management Fee

The Sub-Funds pay to the Investment Manager an annual fee (the "Investment Management Fee") calculated as a percentage of the average daily NAV of each class. The fee is accrued daily and payable monthly in arrears at the applicable rate (the "Investment Management Fee Rate") specified in the Supplements to the Prospectus. The Investment Manager may from time to time, at its sole discretion, and out of its own resources decide to reduce/waive or rebate all or a portion of the Investment Management Fee.

(b) Performance Fee

The Investment Manager may also be entitled to receive a performance fee (the "Performance Fee") from certain Sub-Funds, the details of which are set out in both the General Section and the relevant Supplement to the Prospectus. The Investment Manager may from time to time, at its sole discretion, and out of its own resources decide to reduce/waive or rebate part or all of the Performance Fee. The Performance Fee is calculated and accrued daily and will generally be paid to the Investment Manager within 14 business days of the month end in which the Performance Fee is crystallised.

The Performance Fee, if any, will be calculated and, if warranted, crystallised at the end of each twelve-month period ending on 31 March of each year (the "Calculation Period"). For Sub-Funds or classes of shares launched during the period, the Performance Fee will be crystallised for the first time at the end of a Calculation Period which is at least twelve months from the date of the creation of the Sub-Fund or class of shares. In addition, if shares are redeemed from certain Sub-Funds as at a date other than 31 March, a Performance Fee (if accrued as at the date of such redemption) shall be crystallised in respect of the shares being redeemed. Furthermore, for the purposes of the calculation of the Performance Fee, a transfer of shares will, unless determined otherwise by the Directors, be treated as if there was a redemption of such shares by the transferor and a subscription (at the most recent price) for such shares by the transferee on the date of the transfer. However, a transfer within the same share class will

6. Fees and Expenses (continued)

(b) Performance Fee (continued)

not be treated as a redemption and subscription where the relevant transfer of shares will not result in a change in the beneficial ownership of the shares. Crystallised Performance Fee shall remain in the relevant class (but shall not participate in subsequent gains and losses of the relevant class) until paid to the Investment Manager, and shall not be used or made available to satisfy redemptions or pay any fees and expenses of the relevant class.

For the period ended 30 September 2023, the Performance Fee charged per share class were:

Sub-Fund	Performance Fee Attributable to the Share Class	Performance Fee as a Percent of Average Share Class NAV

(1) Sub-Fund changed its name from AQR Sustainable Corporate Arbitrage UCITS Fund on 24 August 2023.

⁽²⁾Class name changed from Class IAE1 effective 1 July 2023 after NAV production.

 $^{\rm (3)}{\rm Share}$ class was closed during the period.

The Performance Fee charged represents accrued Performance Fee as of 30 September 2023 and any crystallised Performance Fee in respect of shares redeemed for the period ended 30 September 2023. Share class of certain Sub-Funds not subject to Performance Fee or which did not incur Performance Fee for the period ended 30 September 2023 are not included in the above table.

(c) Administrative and Operating Fees

Each Sub-Fund accrues certain fees and expenses connected with the establishment, management and operation of the Company, the Sub-Fund and each class of shares (the "Administrative and Operating Fees"). The Administrative and Operating Fees include, but are not limited to, the Management Company fees, the global distribution fees, the expenses paid to the Directors, auditors, legal advisers, regulator, administrator, custody and depositary bank, as well as organisational expenses. The Administrative and Operating Fees exclude expenses directly related to the Investment Management Fee, the Performance Fee, the subscription tax ("taxe d'abonnement") and any expenses associated with a Sub-Fund's trading program, including brokerage commissions and any withholding or transfer taxes. Please refer to the Prospectus for additional details on the fees and expenses that are considered Administrative and Operating Fees.

6. Fees and Expenses (continued)

(d) Organisational Costs and Expenses

The total organisational costs and expenses of establishing each new Sub-Fund will be payable and borne by the relevant Sub-Fund. These costs and expenses for the Sub-Fund may, at the discretion of the Directors, be amortised on a straight-line basis over a period of up to 5 years. The Directors may, in their absolute discretion, shorten the period over which such costs and expenses are amortised. It is expected that such accounting treatment will not be material to the financial statements of the Sub-Funds.

(e) Expense Arrangements

All expenses are recognised in the Statements of Operations on an accrual basis. Each class of a Sub-Fund is subject to either a total expense ratio ("TER") or an expense cap ("Expense Cap").

Total Expense Ratio

In a class of a Sub-Fund that is subject to a TER, the actual Administrative and Operating Fees allocated to the class, expressed as a percentage of the NAV of the class, is evaluated against a rate specified in the relevant Supplement to the Prospectus (the "Administrative and Operating Fee Rate"). In the event that the actual Administrative and Operating Fees exceed the respective Administrative and Operating Fee Rate of a class subject to a TER, the Investment Manager reduces the Investment Management Fee by the amount of the excess. The Investment Manager will reimburse the Sub-Fund to the extent that the actual Administrative and Operating Fees allocated to a certain class exceed the relevant Administrative and Operating Fees Rate by more than the Investment Management Fee applicable to such class. The expenses reimbursed by the Investment Manager are recorded as reimbursement of expenses in the Statements of Operating Fee Rate of a class subject to a TER, the excess is paid to the Investment Manager as additional Investment Management Fee. Please refer to the most recent Supplement to the Prospectus for applicable Administrative and Operating Fee Rate of the relevant share classes subject to a TER of each Sub-Fund.

Expense Cap

In any class of a Sub-Fund that is not subject to a TER, the Administrative and Operating Fees are subject to an Expense Cap. In these cases, the Administrative and Operating Fees borne by the applicable class of a Sub-Fund will be the lower of the actual expenses incurred by the Sub-Fund and the maximum rate detailed in the relevant Supplement to the Prospectus.

In a class of a Sub-Fund that is subject to an Expense Cap, the combination of Investment Management Fee, the actual Administrative and Operating Fees and the taxe d'abonnement allocated to the class (the "Total Expense"), expressed as a percentage of the NAV of the class, is similarly evaluated against the applicable Expense Cap specified in the relevant Supplement to the Prospectus. In the event the actual Total Expense exceeds the respective Expense Cap, the Investment Manager reduces the Investment Management Fee by the amount of the excess. In the event the actual Total Expense exceeds the respective Expense Cap by more than the Investment Manager reimburses the amount of the excess. The expenses reimbursed by the Investment Manager are recorded as reimburses the amount of the excess. The expenses reimbursed by the actual Total Expense is less than the relevant Expense Cap, there is no adjustment made to the Investment Management Fee. Please refer to the most recent Supplement to the Prospectus for the applicable Expense Cap for relevant share classes of each Sub-Fund.

7. Taxation

Under present Luxembourg law, the Company is not subject to any taxes in Luxembourg on income or capital gains, nor are dividends distributed by the Company liable to any withholding tax. The Company is, however, liable in Luxembourg for a taxe d'abonnement up to a rate of 0.05% per annum based on the NAV attributed to each class of shares at the end of the relevant quarter, calculated and paid quarterly. Institutional investors classes of shares are subject to the reduced rate of 0.01% per annum.

7. Taxation (continued)

Each Sub-Fund may be subject to taxation on income, capital gains on investments or currency repatriation in certain jurisdictions in which each Sub-Fund invests, a portion of which may be recoverable. It is the policy of each Sub-Fund to accrue for any such taxes on dividends and interest when the dividend is declared, interest is earned, or capital gains are earned. Each Sub-Fund will accrue such taxes and reclaims as applicable, based upon their current interpretation of tax rules and regulations that exist in the markets in which they invest.

No tax is payable on realised or unrealised capital appreciation of the assets of the Company in the Grand Duchy of Luxembourg. The regular income of the Company from some of its securities, as well as interest earned on cash deposits in certain countries, may be subject to non-recoverable withholding taxes at varying rates.

For the period ended 30 September 2023, the amount of withholding tax expense incurred by each Sub-Fund on transferable securities (excluding OTC, exchange-traded and centrally cleared derivatives) is as follows:

Sub-Fund	Withholding Tax Expense
AQR Corporate Arbitrage UCITS Fund ⁽¹⁾	\$88,557
AQR Global Risk Parity UCITS Fund	63,439
AQR Sustainable Emerging Relaxed Constraint Equity UCITS Fund	1,614,154

⁽¹⁾Sub-Fund changed its name from AQR Sustainable Corporate Arbitrage UCITS Fund on 24 August 2023.

8. Distribution Policy

The Directors reserve the right to introduce a distribution policy that may vary between Sub-Funds and different classes of shares in issue.

In line with the Prospectus, the portion of the period's net income corresponding to accumulation shares will not be paid to shareholders and instead will be capitalised in the relevant Sub-Fund for the benefit of the accumulation shares.

Shareholders should note that, where the dividend rate is in excess of the investment income of the class of shares, dividends will be paid out of the capital attributed to the class of shares, as well as from realised and unrealised capital gains. This may be tax inefficient for investors in certain countries. Investors should consult their local tax adviser about their own position.

On 24 April 2023, the Directors resolved to distribute dividends for certain classes of shares of AQR Alternative Trends UCITS Fund.

9. Transaction Costs

As at 30 September 2023, certain Sub-Funds incurred transaction costs related to the purchases and sales of transferable securities (excluding fixed income securities and OTC, exchange-traded and centrally cleared derivatives) as follows:

Sub-Fund	Transaction Costs
AQR Corporate Arbitrage UCITS Fund ⁽¹⁾	\$87,197
AQR Global Risk Parity UCITS Fund	98,322
AQR Sustainable Emerging Relaxed Constraint Equity UCITS Fund	1,177,026

⁽¹⁾Sub-Fund changed its name from AQR Sustainable Corporate Arbitrage UCITS Fund on 24 August 2023.

The transaction costs include broker commission fees, settlement fees and other charges. Those fees are included in the cost of the securities and recorded in the Statements of Operations under the caption net realised gain/(loss) on investments and net change in unrealised appreciation/(depreciation) on investments.

9. Transaction Costs (continued)

Not all transaction costs are separately identifiable. For fixed income securities, forward foreign exchange contracts and other derivative contracts, transaction costs are included in the purchase and sales prices and therefore cannot be disclosed separately.

10. Changes in Investment Portfolio

A copy of the changes in the investment portfolio for each Sub-Fund during the period ended 30 September 2023 is available, free of charge, at the registered office of the Company and the Swiss Representative.

11. Risks and Concentrations

In the normal course of business, the Sub-Funds trade financial instruments and enter into financial transactions where risk of potential loss exists due to changes in the market (market risk). The Sub-Funds' investments in financial derivatives and other financial instruments may expose the Sub-Funds to various elements of market risks which include interest rate, foreign currency and equity risks.

Geopolitical and other events, including war, terrorism, natural disasters, economic uncertainty, trade disputes, extreme weather and climate-related events, public health crises including pandemics and related geopolitical events have led, and in the future may lead, to increased market volatility, which may disrupt the U.S. and world economies and markets and may have significant adverse direct or indirect effects on the Sub-Funds and their investments. Certain foreign companies may be subject to sanctions, embargoes, or other governmental actions that may impair or otherwise limit the ability to invest in, receive, hold or sell the securities of such companies. These factors may affect the value of investments in those companies. Although multiple asset classes may be affected by a market disruption, the duration and effects may not be the same for all types of assets.

Each Sub-Fund manages market risk by establishing limits as to the types and degrees of risk that may be undertaken. Additionally, each Sub-Fund monitors the fluctuations in its value and compares these fluctuations to its established limits.

The investment techniques and strategies utilised by the Sub-Funds, including investments made on a shorter-term basis or in derivative instruments or instruments with a maturity of one year or less at the time of acquisition, may result in frequent portfolio trading and high portfolio turnover. High portfolio turnover rates will cause the Sub-Funds to incur higher levels of brokerage fees and commissions, which may reduce performance, and may cause higher levels of current tax liability to shareholders in the Sub-Funds.

Certain Sub-Funds may invest in developing market debt securities, foreign exchange instruments and equities. Developing markets are riskier than more developed markets because they tend to develop unevenly and may never fully develop. Investments in developing markets may be considered speculative. Developing markets are more likely to experience hyperinflation and currency devaluations. In addition, many developing markets have far lower trading volumes and less liquidity than developed markets.

Certain Sub-Funds may invest in shares of companies that are registered in the People's Republic of China ("PRC"). Although it is intended for the Sub-Funds to be well diversified in terms of the number of holdings and the number of issuers that the Sub-Funds may invest in, these Sub-Funds are subject to concentration risk and are therefore susceptible to fluctuations in value resulting from adverse conditions in PRC. Investment in securities of PRC companies involves a greater degree of risk than is usually associated with companies in major securities markets in developed countries including risks of nationalisation or expropriation of assets, government control and intervention, regulatory risk, legal risk, accounting risk and settlement risk.

Interest rate risk is the risk that fixed income securities will decline in value because of changes in interest rates. Certain Sub-Funds may lose money if short-term or long-term interest rates rise sharply or otherwise change in a manner not anticipated. Convertible securities and non-convertible income producing securities are subject to certain risks, including (i) if interest rates go up, the value of convertible securities and non-convertible income producing securities in the Sub-Fund's portfolio generally will decline; (ii) during periods of declining interest rates,

11. Risks and Concentrations (continued)

the issuer of a security may exercise its option to prepay principal earlier than scheduled, forcing the Sub-Funds to reinvest in lower yielding securities (call or prepayment risk); and (iii) during periods of rising interest rates, the average life of certain types of securities may be extended because of slower than expected principal payments (extension risk).

Currency risk arises from the possibility that fluctuations in foreign exchange rates will affect the value of cash balances held in foreign currencies and foreign denominated financial instruments. In addition, if the Sub-Funds use forward foreign exchange contracts, the Sub-Funds may be exposed to the risk that foreign currency exchange rates change unfavourably. Currency rates in foreign countries may fluctuate significantly over short periods of time for a number of reasons.

The fair values of equities, such as common stocks and preferred securities or equity related investments such as futures, may decline due to general market conditions which are not specifically related to a particular company. They may also decline due to factors which affect a particular industry or industries. Each Sub-Fund may invest in illiquid investments and may experience difficulty in selling those investments in a timely manner at the price that it believes the investments are worth. Prices may fluctuate widely over short or extended periods in response to company, market or economic news. Markets also tend to move in cycles, with periods of rising and falling prices. This volatility may cause the Sub-Funds to experience significant gains or losses over short periods of time. If there is a general decline in the securities and other markets, the Sub-Funds may experience a loss, regardless of the individual results of the securities and other instruments in which the Sub-Funds invest.

Each Sub-Fund may be exposed to the risk that one or more securities in its portfolio will decline in price, or fail to pay interest or principal when due, because the issuer of the security experiences a decline in its financial status (credit risk). Each Sub-Fund may be exposed to the risk that an institution or other entity with which the relevant Sub-Fund has unsettled or open transactions will default (counterparty credit risk). These risks are measured by the loss each Sub-Fund would record if the issuer of a security, a major financial institution or other counterparties, failed to perform pursuant to terms of their obligations.

In the normal course of business, the Sub-Funds may enter into agreements with certain counterparties for derivative transactions. Each Sub-Fund's derivative agreements may contain provisions that require it to maintain a predetermined level of net assets, and/or provide limits regarding the decline of the net assets over specified time periods. If a certain Sub-Fund was to violate such provisions, the counterparties to the derivative instruments could request immediate payment or demand immediate collateralisation on derivative instruments in net liability positions. If such events are not cured by the Sub-Fund, or waived by the counterparties, the counterparties may decide to curtail or limit extension of credit, and the Sub-Fund may be forced to unwind its derivative positions which may result in material losses.

Each Sub-Fund may utilise substantial leverage in its investment program. Such leverage may take the form of trading on margin and/or investing in derivative instruments that are inherently leveraged. There is no guarantee that each Sub-Fund's borrowing arrangement or other arrangements for obtaining leverage will continue to be available, or if available, will be available on terms and conditions acceptable to the respective Sub-Fund. Unfavourable economic conditions also could increase funding costs, limit access to the capital markets or result in a decision by lenders not to extend credit to certain Sub-Funds. In addition, a decline in fair value of a certain Sub-Fund's assets may have particular adverse consequences in instances where it has borrowed money based on the fair value of its assets. A decrease in fair value of its assets may result in the lender (including derivative counterparties) requiring a certain Sub-Fund to post additional collateral or otherwise sell assets at a time when it may not be in the Sub-Fund's best interest to do so.

The Investment Manager relies heavily on quantitative models and information and traditional and non-traditional data supplied by third parties. When models and data prove to be incorrect or incomplete, including because data is stale, missing or unavailable, any decisions made in reliance thereon may expose the Sub-Funds to potential risks. Such models may produce unexpected results, which can result in losses for the Sub-Funds.

11. Risks and Concentrations (continued)

As at 30 September 2023, there were shareholders of certain Sub-Funds who individually owned greater than 10% of the respective Sub-Fund's net assets. If any of these shareholders were to submit a redemption request, the respective Sub-Fund may be forced to dispose of investments during inopportune market conditions which could result in losses. Significant redemptions by shareholders may also impact each Sub-Fund's liquidity and the Directors may temporarily suspend or defer the redemption of shares and/or the determination of the NAV in such instances.

Periodically, each Sub-Fund may be a party to legal actions arising in the ordinary course of business. The Sub-Funds are currently not subject to any actions that either individually or in the aggregate are expected to have a material impact on their results of operations or financial condition.

12. Subsequent Events

The Directors of the Company have evaluated subsequent events for the Sub-Funds and determined that there are no material events which would require accrual or disclosure through the date of issuance of this report.

AQR UCITS FUNDS

Additional Information for Shareholders (Unaudited)

1. Information Related to Security Financing Transactions and Total Return Swap Contracts

(a) Security Financing Transactions and Total Return Swap Contracts by Counterparty

The table below summarises, by counterparty, each type of security financing transactions and total return swap contracts with respect to outstanding transactions as at 30 September 2023. Certain Sub-Funds held outstanding transactions in total return swap contracts, including total return basket swap contracts ("TRS Contracts") and repurchase agreements ("Repo's") as at 30 September 2023. The value of TRS Contracts consists of the unrealised appreciation/(depreciation) on total return swap contracts, if any.

AQR Systematic Total Return UCITS Fund	Repo's	United States Treasury	United States Treasury Notes	186,698,000	USD	164,527,359
	Total			210,320,200		191,311,009

⁽¹⁾Non-cash collateral is valued using available market prices and taking into account appropriate discounts determined by the Investment Manager based on its haircut policy. The minimum haircut applied for the collateral received as at 30 September 2023 is 2%.

AQR UCITS FUNDS

Additional Information for Shareholders (Unaudited) (continued)

1. Information Related to Security Financing Transactions and Total Return Swap Contracts (continued)

(c) Type, Maturity, Quality and Currency of Collateral

As at 30 September 2023, certain Sub-Funds held cash and non-cash collateral all in segregated accounts, at one or more counterparties, in relation to outstanding transactions. Cash collateral is held at the counterparty of the outstanding transactions and is disclosed under the appropriate counterparty in Note 2(f) Due from/(to) Broker(s) along with unsettled cash balances. The non-cash collateral consists of high quality, highly liquid, U.S. Treasury Obligations having investment grade rating of AAA. Non-cash collateral on OTC derivatives is held at JPMC⁽¹⁾ and non-cash collateral on Repo's is held at SSBT⁽¹⁾.

The maturity and currency of the cash collateral pledged/(received) are as follows:

			Cash Collateral Pledged		Cash Collateral Received		
Sub-Fund	Maturity Tenor	Currency	OTC Derivatives ⁽²⁾	Repo's	OTC Derivatives ⁽²⁾	Repo's	Total

⁽¹⁾Sub-Fund changed its name from AQR Sustainable Corporate Arbitrage UCITS Fund on 24 August 2023.

All outstanding transactions are settled and cleared bilaterally.

(e) Data on Re-use of Collateral

Non-cash collateral received by a Sub-Fund may not be sold, re-invested or pledged. Cash collateral received may be reinvested in line with the Prospectus. No cash collateral received for outstanding transactions has been reinvested during the period ended 30 September 2023.

1. Information Related to Security Financing Transactions and Total Return Swap Contracts (continued)

(f) Returns on Security Financing Transactions and OTC Derivatives

All returns from securities financing transactions and OTC derivatives will accrue to the Sub-Funds and are not subject to any return sharing agreements with the Investment Manager or any other third parties. For TRS Contracts, transaction costs are not separately identifiable as they are included in the purchase and sales price upon entering and exiting. For Repo's, direct and indirect costs are not separately identifiable and are deducted from the interest income received from the counterparties.

Returns for TRS Contracts are reported as net realised gain/(loss) on swap contracts and net change in unrealised appreciation/(depreciation) on swap contracts in the Statements of Operations.

Interest income earned on Repo's is reported as interest income on repurchase agreements in the Statements of Operations.

2. Total Net Expense Ratio

The Total Net Expense Ratio ("TNER") is the total expenses paid by the Sub-Fund in the preceding 12 months against its average net assets. For any class that has been launched or closed during the preceding 12 months to 30 September 2023, the TNER has been annualised. The TNER disclosed in the following table has been presented before and after the impact of Performance Fee, if any. Performance Fee is expressed as a percentage of the average net assets and has not been annualised. The TNER were calculated in accordance with the applicable Asset Management Association Switzerland ("AMAS") guidelines.

For each Sub-Fund, the TNER before Performance Fee, the Performance Fee and the TNER after Performance Fee for each class of shares in issue, at any time, during the reporting period from 1 April 2023 to 30 September 2023, are presented in the following table:

Sub-Fund ⁽¹⁾	Classes of Shares	TNER before Performance Fee as at 30 September 2023	Performance Fee as at 30 September 2023	TNER after Performance Fee as at 30 September 2023
	Class IAE1 ⁽²⁾	1.67%	2.08%	3.75%
	Class IAG1 ⁽²⁾	1.67%	1.54%	3.21%
	Class IAG2 ⁽²⁾	1.37%	1.81%	3.18%
	Class IAU1 ⁽²⁾	1.67%	1.78%	3.45%
AQR Alternative Trends	Class IAU2 ⁽²⁾	1.37%	1.26%	2.63%
UCITS Fund	Class IDE3 ⁽²⁾	1.05%	0.51%	1.56%

⁽¹⁾Certain TNER disclosed in the above table may vary from the TNER charged to the Sub-Fund and disclosed in the relevant Supplement to the Prospectus due to particular situations arising in the calculation such as annualisation of classes of shares opened or closed during the period, classes of shares with relatively small average NAV and/or updates made to certain components of the TNER during the period.

⁽²⁾Share class is subject to an expense cap, please refer to the Prospectus.

⁽³⁾Sub-Fund changed its name from AQR Sustainable Corporate Arbitrage UCITS Fund on 24 August 2023.

⁽⁴⁾Share class was closed during the period.

⁽⁵⁾Class name changed from Class IAE1 effective 1 July 2023 after NAV production.

⁽⁶⁾Investment management fee and/or administrative and operating fee rates have changed during the period. Please refer to the most recent Supplement to the Prospectus for the latest investment management fee and/or administrative and operating fee rates.

⁽⁷⁾Performance Fee rates have changed during the period. Please refer to the most recent Supplement to the Prospectus for the latest Performance Fee rates.
