- **Credit risk** - the failure of a counterparty or an issuer of a financial asset held within the Portfolio to meet its payment obligations will have a negative impact on the Portfolio.
- **Derivatives risk** - derivative instruments are highly sensitive to changes in the value of the underlying asset that they are based on. Certain derivatives may result in losses greater than the amount originally invested.
- **Counterparty risk** - a party that the Portfolio transacts with may fail to meet its obligations which could cause losses.
- **High yield risk** - high-yield instruments, meaning investments which pay a high amount of income generally involve greater credit risk and sensitivity to economic developments, giving rise to greater price movement than lower yielding instruments.
- **Sustainability risk** - an environmental, social or governance event or condition that could cause the value of the portfolio to go down. Examples of sustainability risks include physical environmental risks, climate change transition risks, supply chain disruptions, improper labour practices, lack of board diversity and corruption.
- **Mortgage-backed securities (“MBS”) and asset-backed securities (“ABS”) risk** - the mortgages backing MBS and assets backing ABS may be repaid earlier than required, resulting in a lower return.
- **For more detailed information on the risks associated with an investment in the Portfolio, please refer to the section in the Prospectus entitled “Risk Considerations” and discuss with your professional advisers.**
