INVESTMENT OBJECTIVE

The sub-fund invests at least two-thirds of its total assets in the shares of companies whose main business and/or registered office is in Japan. The sub-fund seeks to grow the capital invested by optimising the alpha-generating potential with a 130/30 management approach, i.e. by combining a long strategy on 130% of total assets with a short strategy on 30%. Net exposure is maintained at 100%.

RISK FACTORS TO CONSIDER BEFORE INVESTING

The value of investments and any income from them can fall as well as rise and you may not get back the amount originally invested. Investments are also subject to other risks such as: currency risk (the value of investments may be impacted by currency exchange rate fluctuations); volatility risk (price fluctuations), which may be particularly relevant in sector- or country-specific funds or in funds investing in emerging markets or in high-yield (lower quality) bonds; counterparty risk (the risk that the counterparty to a transaction is unable to fulfill their obligations), which may be particularly relevant in funds using derivative instruments and structured products; liquidity risk (the risk that the fund may not be able to sell assets from the fund's portfolio quickly), potentially resulting in cash not being available to reimburse redeeming investors in a timely manner, which may be particularly relevant in money market funds or in funds of hedge funds.
