

HSBC Global Investment Funds

INDIA FIXED INCOME

Monthly report 31 January 2024 | Share class EC

Investment objective

The Fund aims to provide long term capital growth and income by investing in a portfolio of Indian bonds and other similar securities.

Investment strategy

The Fund is actively managed and is not constrained by a benchmark. In normal market conditions, the Fund will invest at least 90% of its assets in Indian rupee denominated investment grade bonds, non-investment grade bonds and unrated bonds issued by government and corporate entities; investment grade, non-investment grade and unrated bonds issued by government, government-related entities and companies that are based in or carrying out the larger part of their business in India that are denominated in other currencies; cash and money market instruments; and other financial instruments such as structured products. The Fund may be subject to a limit on its investments in India. Where this is the case the Fund may invest in non-INR denominated fixed income securities or derivatives. The Fund may invest up to 100% in bonds issued by the Indian government and government-related entities. The Fund may invest up to 20% in cash and money market instruments. The Fund may invest up to 10% in contingent convertible securities and up to 10% in other funds. See the Prospectus for a full description of the investment objectives and derivative usage.

Main risks

- The value of investments and any income from them can go down as well as up and you may not get back the amount originally invested.
- Investing in assets denominated in a currency other than that of the investor's own currency exposes the value of the investment to exchange rate fluctuations
- The Fund invests in bonds whose value generally falls when interest rates rise. This risk is typically greater the longer the maturity of a bond investment and the higher its credit quality. The issuers of certain bonds, could become unwilling or unable to make payments on their bonds and default. Bonds that are in default may become hard to sell or worthless.

Share class details

Key metrics

NAV per share	USD 12.36
Performance 1 month	0.42%
Yield to maturity	7.31%

Fund facts

UCITS V compliant	Yes
UK reporting fund status (UKRS)	Yes
ISA eligible	Yes

Risk disclosures

- The Fund may invest in Emerging Markets, these markets are less established, and often more volatile, than developed markets and involve higher risks, particularly market, liquidity and currency risks.
- Derivatives may be used by the Fund, and these can behave unexpectedly. The pricing and volatility of many derivatives may diverge from strictly reflecting the pricing or volatility of their underlying reference(s), instrument or asset.
- Investment Leverage occurs when the economic exposure is greater than the amount invested, such as when derivatives are used. A Fund that employs leverage may experience greater gains and/or losses due to the amplification effect from a movement in the price of the reference source.
- Where overseas investments are held the rate of currency exchange may cause the value of such investments to go down as well as up.
- Further information on the potential risks can be found in the Key Information Document (KID) and/or the Prospectus or Offering Memorandum.

Important information
