Fund Features

The investment objective of Storm Fund II – Storm Bond Fund (the "Sub-Fund") is to generate the best possible risk-adjusted return on invested capital. The Sub-Fund invests in corporate bonds, which may focus on High Yield bonds located in the Nordic market. An initial screening of the market based on relative-pricing is followed by a detailed company analysis of the individual issuers. The analysis consists of a bottom-up financial analysis, a scenario analysis, ESG-considerations, diligence of loan agreement and management/ownership analysis. The Sub-Fund's research driven approach focuses on identifying value through cash flow and debt service capacity, capital structure sustainability, track-record and the company's market position. The Sub-Fund aims to invest in a well-diversified portfolio through number of holdings and across sectors. The Sub-Fund is actively managed and the investment objective and strategy does not refer to a benchmark. The Investment Manager strives to achieve high returns from a combination of coupon payments and capital appreciation. The fund manager will consider any risks related to sustainability (environmental, social and governance aspects) when making investment decisions as well as on an ongoing basis during the life of an investment. However, no assurance can be given that the stated investment objectives will be met.

Performance

Explanations and modeling; assumption: an investor wishes to purchase units for EUR 1,000.00. With a maximum sales charge of 3.00%, the investor has to pay EUR 1,030.00. The gross performance (BVI method) includes all costs incurred at the fund level, the net performance also includes the sales charge; additional costs may be incurred at the investor level (e.g. custody costs). Since the sales charge is only levied in the first year, the net/gross amount shown is different only in this year. Past performance is not a reliable indicator of future performance.
