Key Risks: All financial investments involve an element of risk. Therefore, the value of your investment and the income from it will vary and your initial investment amount cannot be guaranteed. The fund invests a large portion of assets which are denominated in other currencies; hence changes in the relevant exchange rate will affect the value of the investment. The fund may invest in smaller company shares which can be more unpredictable and less liquid than those of larger company shares. Compared to more established economies, the value of investments in developing Emerging Markets may be subject to greater volatility due to differences in generally accepted accounting principles or from economic or political instability. The fund can invest in mining shares which typically experience above average volatility when compared to other investments. Trends which occur within the general equity market may not be mirrored within mining securities.

TOP COUNTRIES (%)

Geographic exposure relates principally to the domicile of the issuers of the securities held in the product, added together and then expressed as a percentage of the product's total holdings. However, in some instances it can reflect the country where the issuer of the securities carries out much of their business.

MARKET CAPITALISATION (%)

GLOSSARY

Market Capitalisation: is the total value of the shares issued by a company which trades on the stock exchange.

Ongoing Charge: is a figure representing all annual charges and other payments taken from the fund.

Price to Book Ratio: represents the ratio of the current closing price of the share to the latest quarter's book value per share.

Price to Earnings (TTM) Ratio: represents the ratio of the market price per share of a company to the company's earnings per share for a twelve-month period (usually the last 12 months or trailing twelve months (TTM)).

Quartile Rank: categorises a fund into four equal bands based on their performance over a specified period within the relevant Morningstar's sector. The top or first quartile contains the top 25% of funds, through to the bottom or 4th quartile which contains the bottom 25% of funds.

SRRI: is a value based on the volatility of the fund, which gives an indication of the overall risk and reward profile of the Fund.

Performance Fee: is charged on any returns that, subject to a High Water Mark, the Fund achieves above its performance fee benchmark. Please refer to the Prospectus for further information.
