This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

First Sentier Global Credit Sustainable Climate Fund Class III (Accumulation) USD

a sub-fund of First Sentier Investors Global Umbrella Fund plc (the Company)

ISIN IE00B86N7D09

First Sentier Investors (Ireland) Limited, the Management Company

Objectives and investment policy

Objectives: The Fund aims to achieve a total investment return from income and capital appreciation, while seeking additionally to make a positive contribution to a positive climate change outcome in accordance with achieving the long term global warming objectives of the Paris Agreement.

Policy: The Fund mainly invests in fixed income securities (investments which provide a certain level of income or interest) issued primarily by companies around the world. The Fund aims to achieve its objective while managing credit risks through the careful selection and monitoring of fixed income securities together with broad diversification. The Fund seeks investments that have the potential to contribute positively to a positive climate change outcome in accordance with achieving the long term global warming objectives of the Paris Agreement and will not invest in companies or credit securities that do not meet these objectives. The Fund may invest in investment grade (seen as being higher quality) fixed income securities. However, the Fund may also invest in fixed income securities with low or no credit rating. The Fund's performance will reference the ICE Global Corporate Paris-Aligned Index (USD hedged). The Fund is actively managed meaning that the Investment Manager uses its expertise to select

investments rather than tracking the allocation of the performance of a benchmark.

The Fund will also invest in derivatives (instruments whose value is determined by changes in the value of the underlying assets they represent) to manage interest rate risk, currency risk, credit risk as well as to seek to improve the performance of the Fund.

You can buy and sell shares in the Fund on any dealing day. A dealing day is generally defined as a day on which Irish banks and, if applicable, the relevant stock exchange(s) are open for business. Exceptions are noted on the FSI website. As long as we receive your instruction before 10 am (Irish time) on a dealing day, shares will be bought and sold at that day's price.

The Fund will not pay any income out; instead any income will be reflected in the value of your shares.

Recommendation: This Fund may not be appropriate for investors who plan to withdraw their money within five years.

Risk and reward profile

Lower Risk Higher Risk
← Potentially Lower Rewards Potentially Higher Rewards →

- The synthetic risk reward indicator (the SRRI) rating is not a measure of the risk of you losing the entire value of your investment but describes how much the value of the share class has gone up and down in the past. Where a share class has not yet launched, the SRRI is calculated using representative data.
- The SRRI rating is based on historical data which may not be a reliable indication of the future risks and rewards of the share class.
- We cannot guarantee that the rating of the share class will remain the same; it may change over time.
- Even the lowest rating 1 does not mean a risk free investment.
- On a scale of 1 (less risky) to 7 (more risky), this share class has a rating of 3 due to its past performance (or representative data) and the nature of its investments.
- Categories 1-2 indicate a low level of historical fluctuations, 3-5 a medium level, and 6-7 a high level.

- Risk is taken in order to make a higher potential return; the more risk a fund takes, the higher the potential return but the greater the risk of loss.

- The value of the Fund and its return is not guaranteed and may fall as well as rise. You may get back significantly less than you originally invested.

Material risks not adequately captured by the SRRI:

- **Interest rate risk:** bond prices have an inverse relationship with interest rates such that when interest rates rise, bonds may fall in value. Rising interest rates may cause the value of your investment to fall.
- **Credit risk:** the issuers of bonds or similar investments that the Fund buys may get into financial difficulty and may not pay income or repay capital to the Fund when due.
- **Derivative risk:** derivatives are sensitive to changes in the value of the underlying asset(s) and/or the level of the rate(s) from which they derive their value. A small movement in the value of the assets or rates may result in gains or losses that are greater than the amount the Fund has invested in derivative transactions, which may have a significant impact on the value of the Fund.
- **Below investment grade debt securities risk:** below investment grade debt securities are speculative and involve a greater risk of default and price changes than investment grade debt securities. In periods of general economic difficulty, the market prices of these types of securities may decline significantly.

For further information on risks, please refer to the Risk Factors section in the Company's prospectus.

Charges for this Fund

The charges are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest	
Entry charge	5.00%
Exit charge	N/A
This is the maximum that might be taken out of your money before it is invested.	
Charges taken from the fund over a year	
Ongoing charge	0.54%
Charges taken from the fund under certain specific conditions	
Performance fee	N/A

The entry and exit charges shown are the maximum you will need to pay. In some cases you might pay less - you can find out the actual entry and exit charges from your financial adviser.

The ongoing charges figure shown here is an estimate of the charges and may vary from year to year. An estimate is being used following our periodic reassessment with effect from 29th February 2024. The figure excludes portfolio transaction costs which are paid from assets of the Fund and performance fees, if any. The next Company annual report for the financial year will include details on the exact charges made.

The fees and expenses are charged against the capital of the Fund. Deducting expenses from capital reduces the potential for capital growth.

There are fees for switching between sub-funds. The fee for switching into the Fund is 1%.

Further information can be found in the Buying, Selling, Converting and Switching Shares section of the Company's prospectus.
