

Schroder International Selection Fund China Local Currency Bond

I Accumulation USD | Data as at 31.03.2020

Fund objectives and investment policy

The fund aims to provide capital growth and income in excess of the iBoxx ALBI China Onshore index after fees have been deducted over a three to five year period by investing in bonds denominated in onshore RMB (CNY). The fund is actively managed and invests at least two-thirds of its assets in bonds and money market instruments denominated in or hedged back to onshore RMB (CNY). These instruments may be issued outside or inside of mainland China by governments, government agencies, supranationals and companies which may or may not be established or incorporated in mainland China across sectors and credit quality. The Fund may also invest in bonds denominated in offshore RMB (CNH). The fund may invest directly in mainland China through RQFII schemes or QFII related schemes supervised by the China Securities Regulatory Commission and regulated markets (including the CIBM via Bond Connect). The fund may invest up to 30% of its assets in securities that have a below investment grade credit rating (as measured by Standard & Poor's or any equivalent grade of other credit rating agencies). The fund may also invest directly or indirectly in other securities (including other asset classes), countries, regions, industries or currencies, investment funds, warrants and money market investments, and hold cash. The fund may use derivatives, long and short, with the aim of achieving investment gains, reducing risk or managing the fund more efficiently.

Relevant risk as associated with this Fund are shown overleaf and should be carefully considered before making any investment.

Share class performance

Cumulative performance	1 month	3 months	YTD	1 year	3 years	5 years	Since inception
Share class (Net)	-0,5	1,7	1,7	0,5	14,6	10,6	17,9
Target	-0,1	2,0	2,0	1,1	16,0	11,8	18,7

Discrete yearly performance	Mar 15 - Mar 16	Mar 16 - Mar 17	Mar 17 - Mar 18	Mar 18 - Mar 19	Mar 19 - Mar 20
Share class (Net)	0,1	-3,5	11,9	1,8	0,5
Target	-0,1	-3,6	13,2	1,2	1,1

Calendar year performance	2015	2016	2017	2018	2019
Share class (Net)	-2,7	-2,6	7,9	2,6	3,3
Target	-3,2	-1,9	8,8	2,8	3,0

Performance over 5 years (%)

Past performance is not a reliable indicator of future results, prices of shares and the income from them may fall as well as rise and investors may not get back the amount originally invested.

Exchange rate movements may cause the value of investments to fall as well as rise. The performance shown does not take account of any commissions, entry or exit charges.

Source: Morningstar, bid to bid, net income reinvested, net of fees. The fund's performance should be assessed against its target benchmark being to exceed the iBoxx ALBI China Onshore index. The majority of the fund's investments may be components of the benchmark. The investment manager invests on a discretionary basis and is not limited to investing in accordance with the composition of the benchmark. The investment manager will invest in companies or sectors not included in the benchmark in order to take advantage of specific investment opportunities. On 13/06/2019 Schroder ISF RMB Fixed Income changed its name to Schroder ISF China Local Currency Bond. The investment objective also changed on this date.

The fund is not managed with reference to a benchmark but its performance may be measured against one or more.

Schroder International Selection Fund China Local Currency Bond

I Accumulation USD | Data as at 31.03.2020

5 year return of USD 10.000

Past Performance is not a guide to future performance and may not be repeated.

The value of investments and the income from them may go down as well as up and investors may not get back the amounts originally invested. Exchange rate changes may cause the value of any overseas investments to rise or fall.

The chart is for illustrative purposes only and does not reflect an actual return on any investment.

Returns are calculated bid to bid (which means performance does not include the effect of any initial charges), net income reinvested, net of fees.

Risk considerations

Credit risk: A decline in the financial health of an issuer could cause the value of its bonds to fall or become worthless.

Liquidity risk: In difficult market conditions, the fund may not be able to sell a security for full value or at all. This could affect performance and could cause the fund to defer or suspend redemptions of its shares.

Operational risk: Operational processes, including those related to the safekeeping of assets, may fail. This may result in losses to the fund.

High yield bond risk: High yield bonds (normally lower rated or unrated) generally carry greater market, credit and liquidity risk.

Concentration risk: The fund may be concentrated in a limited number of geographical regions, industry sectors, markets and/or individual positions. This may result in large changes in the value of the fund, both up or down.

Derivatives risk – Efficient Portfolio Management and Investment Purposes: Derivatives may be used to manage the portfolio efficiently. A derivative may not perform as expected, may create losses greater than the cost of the derivative and may result in losses to the fund. The fund may also materially invest in derivatives including using short selling and leverage techniques with the aim of making a return. When the value of an asset changes, the value of a derivative based on that asset may change to a much greater extent. This may result in greater losses than investing in the underlying asset.

Onshore renminbi currency risk: The fund can be exposed to different currencies. Changes in foreign exchange rates could create losses. Currency control decisions made by the Chinese government could affect the value of the fund's investments and could cause the fund to defer or suspend redemptions of its shares.

Interest rate risk: The fund may lose value as a direct result of interest rate changes.

Emerging Markets & Frontier risk: Emerging markets, and especially frontier markets, generally carry greater political, legal, counterparty, operational and liquidity risk than developed markets.

Counterparty risk: The fund may have contractual agreements with counterparties. If a counterparty is unable to fulfil their obligations, the sum that they owe to the fund may be lost in part or in whole.

Performance risk: Investment objectives express an intended result but there is no guarantee that such a result will be achieved. Depending on market conditions and the macro economic environment, investment objectives may become more difficult to achieve.

IBOR: The transition of the financial markets away from the use of interbank offered rates (IBORs) to alternative reference rates may impact the valuation of certain holdings and disrupt liquidity in certain instruments. This may impact the investment performance of the fund.

Synthetic risk & reward indicator (SRRI)

LOWER RISK

Potentially lower reward

HIGHER RISK

Potentially higher reward

The risk category was calculated using historical performance data and may not be a reliable indicator of the fund's future risk profile. The fund's risk category is not guaranteed to remain fixed and may change over time. A fund in the lowest category does not mean a risk-free investment. The fund is in this category because it can take higher risks in search of higher rewards and its price may rise and fall accordingly.

Risk statistics & financial ratios

	Fund	Target
Annual volatility (%) (3y)	5,4	5,2
Effective duration (years)	6,8	-
Current yield (%)	3,4	-
Yield to maturity	2,6	-
