KEY DATES

Fund launch	28 Apr 2006
Close of financial year	31 Dec

Performance data covering periods prior to share class launch include synthetic returns calculated using the fund's primary share class, adjusted to reflect the annual management charge of the Euro W share class. The data assumes that all other charges are consistent. Synthetic results do not represent actual investment returns nor costs and are not a reliable indicator of future performance. Performance data covering the period since share class launch is a record of actual returns achieved.

KEY RISKS ASSOCIATED WITH THIS FUND

- There is no guarantee that the Fund will achieve its objective.
- This Fund invests in international markets which means it is exposed to changes in currency rates which could affect the value of the Fund.
- The Fund will use derivatives to generate returns as well as to reduce costs and/or the overall risk of the Fund. Using derivatives can involve a higher level of risk. A small movement in the price of an underlying investment may result in a disproportionately large movement in the price of the derivative investment.
- Investments in bonds are affected by interest rates and inflation trends which may affect the value of the Fund.
- The Fund holds bonds with a low credit rating that have a greater risk of default. These investments may affect the value of the Fund
- The Fund invests in emerging markets. These markets have additional risks due to less developed market practices.
- The Fund takes its charges from the income of the Fund in the first instance. The impact of Fund charges may be material on the value of any income you receive from your investment. There is potential for capital erosion if insufficient income is generated by the Fund to cover these charges.
- Certain share classes are denominated in a different currency from the base currency (i.e. the reporting currency) of the Fund. Changes in the exchange rate between the share class currency and the base currency may affect the value of your investment.
- Certain share classes use techniques to try to reduce the effects of changes in the exchange rate between the share class currency and the base currency of the Fund. These techniques may not eliminate all the currency risk.
- A complete description of risk factors is set out in the Prospectus in the section entitled "Risk Factors".
