# BNY Mellon Global Real Return Fund (GBP)

## INVESTMENT MANAGER

Newton Investment Management: Newton aims to deliver outcomes for its clients across active equities, income, absolute return, multi-asset, thematic and sustainable strategies. Its capabilities are driven by its global investment research platform which harnesses a breadth of both fundamental and quantitative research.

## INVESTMENT OBJECTIVE

To achieve a total return in excess of a cash benchmark over an investment horizon of 3-5 years. However, a positive return is not guaranteed and a capital loss may occur.

## PERFORMANCE BENCHMARK

The Fund will measure its performance against SONIA (30-day compounded) + 4% per annum (the "Cash Benchmark"). The Cash Benchmark is used as a target against which to measure the performance of the Fund over 5 years before fees.

SONIA (Sterling Overnight Index Average) is an interest rate benchmark. SONIA is based on actual transactions and reflects the average of the interest rates that banks pay to borrow sterling overnight from other financial institutions and other institutional investors.

The Fund is actively managed, which means the Investment Manager has discretion over the selection of investments, subject to the investment objective and policies disclosed in the Prospectus.
