Benchmark	Refinitiv CV Gl. Focus (TR) (USD-Hgd)

Investment Policy

The objective of the fund is to outperform the Refinitiv Global Focus Convertible Bond Index over a full market cycle by investing in a high-conviction portfolio of fundamentally undervalued convertible securities worldwide. Over the cycle, the fund aims to deliver an alpha of 1.5%–2.5% annually while preserving a balanced risk profile comparable to that of the benchmark or an average balanced multi-asset-class portfolio. The fund is built on an entirely bottom-up driven investment process and a disciplined focus on intrinsic value, which are crucial to delivering sustainable long-term returns. Currency risks are fully hedged into the respective share class currency.

Potential Risks

The Fund's risk and reward profile does not reflect the risk inherent in future circumstances that differ from what the Fund has experienced in the recent past. This includes the following events which are rare but can have a large impact.

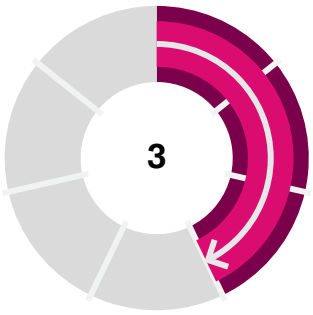

- Credit risk: Issuers of assets held by the Fund may not pay income or repay capital when due. The Fund's investments have considerable credit risk.
- Liquidity risk: Assets cannot necessarily be sold at limited cost in an adequately short timeframe. The Fund's investments may be prone to limited liquidity. The Fund will endeavor to mitigate this risk by various measures.
- Counterparty risk: Bankruptcy or insolvency of the Fund's derivative counterparties may lead to payment or delivery default.
- Event risk: In the case a trigger event occurs contingent capital is converted into equity or written down and thus may loose substantially in value.
- Operational risk: Deficient processes, technical failures or catastrophic events may cause losses.
- Political and Legal risks: Investments are exposed to changes of rules and standards applied by a specific country. This includes restrictions on currency convertibility, the imposing of taxes or controls on transactions, the limitations of property rights or other legal risks. Investments in less developed financial markets may expose the Fund to increased operational, legal and political risk.
- Sustainability risks: Sustainability risks are environmental, social or governance events or conditions that can have a material negative effect on the return, depending on the relevant sector, industry and company exposure.

The product's investment objectives, risks, charges and expenses, as well as more complete information about the product, are provided in the prospectus (or relevant offering document), which should be read carefully before investing.

Investors may lose part or all of their invested amount.
The full offering documentation including complete information on risks may be obtained free of charge from a Credit Suisse client advisor, representative, or, where applicable, via Fundsearch (credit-suisse.com/fundsearch).
The investment promoted in this marketing material concerns the acquisition of units or shares in a fund and not of any underlying assets. The underlying assets are owned by the fund only.

[2] The risk indicator assumes you keep the Product for 5 years. The actual risk can vary significantly if you redeem at an early stage and you may get back less. The Summary Risk Indicator is a guide to the level of risk of this Product compared to other products. It shows how likely it is that the Product will lose money because of movements in the markets. Be aware of currency risk if your reference currency differs from the currency of the Product. You may receive payments in a different currency, so the final return you will get depends on the exchange rate between the two currencies. Investors shall note that the Product may be exposed to further risks such as operational, counterparty, political, sustainability and legal risks that are not included in the Summary Risk Indicator. This Product does not include any protection from future market performance so you could lose some or all of your investment.

Performance review

The fund posted its best relative month since its launch in 2009. Although markets are normalizing from several shocks (pandemic, supply chain disruptions, rising inflation, and wars) and interventions by governments and central banks, higher interest rates and increased volatility do not seem to be leveling off. In such a volatile environment, the fund's high-conviction approach and focus on the fundamental value of an investment paid off, with the acquisition of several undervalued securities over the last year that have recently appreciated in price. However, avoiding some, in our view, overvalued companies also made a contribution to the pleasing relative performance year-to-date. The largest absolute contributors for the month were positions in the convertible bonds (CBs) of Li Auto (68 bps), Safran (31 bps), and Idorsia (19 bps), where the respective stocks gained 44%, 11%, and 43%. While Li Auto (a leading EV manufacturer in China) was able to expand its market share over the last quarter despite increasing competition, Safran continued to execute well and confirmed a positive outlook for 2024 across its business lines. Idorsia (one of our deep-value investments) finally secured financing as part of a collaboration deal with Viatris, giving them more time to break even and put the company on a stable footing. The worst absolute contributors were Wolfspeed (-17 bps), Exact Sciences (-10 bps), and SSR Mining (-10 bps), where the respective stocks fell 12%, 7%, and 9%. The former two companies posted disappointing earnings with the fundamental cases being largely unchanged, while SSR Mining has been hit by a landslide at its Copler gold mine in Turkey. During the month and as part of our regular rebalancing, the fund exited seven investments and started nine new positions in CBs which we see as fundamentally undervalued. As of month-end, the fund had an ESG (environmental, social, governance) rating of A, an underweight in ESG laggards (B and CCC ratings), and roughly a third of the emissions intensity of the benchmark index. With an average market delta (equity sensitivity) of around 55%, the fund continues to offer a balanced risk/reward profile and exposure to a concentrated high-conviction portfolio of convertible bonds.

Market Review

The Goldilocks scenario of a relatively robust economy and no negative surprises on the inflation front encouraged investors to buy into the bull story for equities so far this year. Reassuring US personal consumption expenditures data (PCI) keeps hopes alive that lower rates are possible as early as the next quarter. It's worth mentioning that the February equity rally was exceptionally broad-based and went far beyond the so-called "magnificient seven." The Russell 2000, representing US small- & mid-cap stocks, advanced as much as 5.7% last month. Global convertible bonds (CBs), as measured by Refinitiv, benefited from this development and advanced between 0.7% and 1.3% depending on the subindex. Meanwhile, the primary market has recently gained traction especially in the US, where we saw some high-profile issues from Lyft (USD 460 mn), Super Micro Computer (USD 1.725 bn), or Global Payments (USD 2 bn), but also in Japan where Kansai Paint (JPY 100 bn) , Daiwa House Industry (JPY 200 bn), and most recently Ibiden (JPY 70 bn) tapped the CB market. While the primary market has been strong for corporate credit already since the start of the year, in terms of performance it has been rather lukewarm as positive carry and tighter spreads were mostly erased by higher rates. Meanwhile, crude oil (WTI) finished the month slightly up at USD 78/bbl and Gold proved quite resilient so far this year in spite of a stronger greenback (DXY: +2.8% YTD).

ESG Approach

This fund promotes environmental, social and governance (ESG) characteristics (within the meaning of Art. 8 of Regulation (EU) 2019/2088 on sustainability-related disclosures in the financial services sector). It applies the CSAM Sustainable Investing Policy (www.credit-suisse.com/esg), including norms-based, values-based and business conduct exclusions, to combine ESG factors with traditional financial analysis to calculate a CSAM ESG signal, which serves as the basis for a bottom-up security selection process. For further information about the ESG investment criteria and the sustainability-related aspects of the fund please consider the legal and regulatory documents of the fund (such as, e.g., the prospectus) and visit www.credit-suisse.com/esg. In addition to sustainability-related aspects, the decision to invest in the fund should take into account all objectives and characteristics of the fund as described in its prospectus, or in the information which is to be disclosed to investors in accordance with applicable regulations.

Certain data points are provided for mere transparency purposes and are not linked to a specific ESG investment process, nor to CSAM ESG methodology. For details about the fund's ESG decision-making process, please refer to the fund's prospectus.

ESG Characteristics

ESG Benchmark	Exclusion Criteria	ESG Integration	Active Ownership[5]	Sustainable Investment Objective
☐	☑	☑	☑	☐

ESG Overview

According to MSCI methodology. Fund performance against benchmark: Refinitiv CV Gl. Focus (TR) (USD-Hgd).

	Portfolio	Benchmark
ESG Rating	A	A
ESG Quality score	6.78	6.22
Environmental score	6.04	5.67
Social score	4.99	4.80
Governance score	6.00	5.79
Coverage for Rating/Scoring	92.90%	99.00%
Weighted Average Carbon Intensity (Tons of CO2e/$M sales)	112.89	321.63
Coverage for Carbon Intensity	91.87%	99.58%

Note: The total carbon intensity figure shown in this section may be higher than the total in the breakdown graph. This is because the figure is normalized, and actual weights are inflated because of limited data coverage. For further information on the MSCI methodology for the above listed ESG data points, please refer to the glossary.

Top 10 issuers

In terms of the fund's total economic exposure. Certain data points disclosed in this table are provided for mere transparency purposes and are not linked to a specific ESG investment process, nor to CSAM ESG methodology. For details about the fund's ESG decision-making process, please refer to the fund's prospectus. Sources: MSCI and proprietary fixed income ESG signal

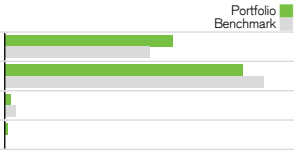

Issuer short name[6]	Weight in portfolio	GICS sector underlying	MSCI ESG Rating	Fixed income ESG Signal	Controversy flag	Carbon intensity (tCO2e / $M sales)

Not ratable	2.43	0.00
No data coverage	6.12	1.00

Note: For further information on MSCI's ESG rating methodology and the difference between categories "not ratable" and "no data coverage", please refer to the glossary.

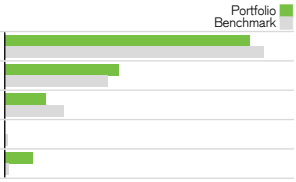

[5] Active Ownership is part of the fund's strategy to act in the best interests of its investors and to preserve and optimize the long-term value of their investments. To promote best practices and to ensure that the investee companies are sustainable and successful in the long term, Active Ownership is designed to influence the investee companies on two levels: first, through proxy voting, and second, through engagement. In the case of investments in other funds (Target Funds), the fund has no or only limited ability to exercise Active Ownership on the Target Fund, resp. on the Target Funds' investee companies.

[6] The individual entities and/or instruments mentioned on this page are meant for illustration purposes only and are not intended as a solicitation or an offer to buy or sell any interest or any investment.

Asset breakdown by ESG controversy flag

In % of fund total economic exposure to investee companies. Fund performance against benchmark: Refinitiv CV Gl. Focus (TR) (USD-Hgd). Source: MSCI

	Portfolio	Benchmark
Green	54.42	60.61
Yellow	25.34	24.11
Orange	9.11	13.90
Red	-	0.39
No data coverage	6.12	1.00

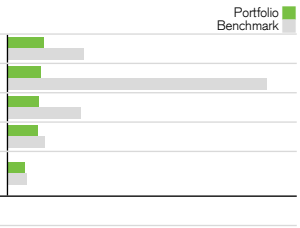

Note: Exposure to investee companies represents 94.98% of portfolio weight for this share class. MSCI only provides data on ESG controversies for corporate issuers. Any remaining instruments (e.g., government bonds) are excluded from this breakdown. For further information on MSCI's ESG controversy flag methodology, please refer to the glossary.

Carbon emission intensity contribution by GICS sector underlying

Tons of CO2 equivalent emission intensity (GHG scopes 1 & 2) per $m sales, by GICS sector underlying split. Fund performance against benchmark: Refinitiv CV Gl. Focus (TR) (USD-Hgd). Source: MSCI

	Portfolio	Benchmark
Industrials	25.33	52.72
Utilities	22.95	178.25
Materials	21.49	50.66
Others	21.19	25.52
Information Technology	12.24	13.14
Total	**103.19**	**320.29**

Note: Security weighted data coverage is 91.87% for the portfolio. The total shown in this section may be lower than the one in the 'ESG Overview' section. This is because the figures in this breakdown are not normalized and use the actual weights. For further information on the Carbon emission intensity, please refer to the glossary.

Glossary

Accumulating	Indicates a regular reinvestment of the dividends received in the portfolio itself
Alpha	A measurement of the performance of an investment against a market index used as a benchmark.
Bond floor	Denotes how far the portfolio is from the lowest value that convertible bonds can fall to, which is calculated by adding the discounted present value of the coupons and the redemption value.
Carbon emission intensity	The weighted average emissions intensity, which is provided by MSCI ESG, divides the Scopes 1 & 2 emissions in tons of CO2-equivalent by million $ sales. Intensities are broken down by GICS sector underlying and are security weighted.
Delta	A ratio comparing the change in the price of an asset, usually a marketable security, to the corresponding change in the price of its derivative.
ESG aware	This product undertakes investments that explicitly assess and integrate the sustainability characteristics of companies in the investment process.
ESG benchmark	A ticked 'ESG benchmark' box reflects that the ESG section in this document compares the ESG performance of the portfolio with an ESG index. In case the box is not ticked, this means that the ESG section in this document compares the ESG performance of the portfolio with a non-ESG index or that no comparison is performed due to a lack of a recognized benchmark. The investor shall read the legal documentation of the Fund to understand how the benchmark is used. In any case, a ticked 'ESG benchmark' box does not mean that the ESG benchmark is used to attain the ESG strategy of the fund.
ESG Controversy Flag	ESG Controversy Flag is designed to provide timely and consistent assessments of ESG controversies involving publicly traded companies and fixed income issuers. A controversy case is typically a one-off event such as an environmental oil spill, an accident, or allegations such as safety issues in a production facility. Controversy flags can be red, orange, yellow or green. Red indicates that a company is involved in one or more very severe controversies. Orange indicates that a company has been involved in one or more recent severe structural controversies that are ongoing. Yellow indicates that the company is involved in severe-to-moderate level controversies. Green indicates that the company is not involved in any major controversies. For further information on the methodology, please refer to www.msci.com/our-solutions/esg-investing/.
ESG Quality score	The ESG Quality score, based on MSCI ESG scores of underlyings, is measured on a scale from 0 (very poor) to 10 (very good). It does not correspond directly to the underlying Environment, Social and Governance Pillar scores. The Pillar scores are derived on an absolute basis, while the portfolio ESG Quality score is adjusted by MSCI to reflect the industry-specific level of ESG risk exposure. As Pillar scores are absolute, and the portfolio ESG Quality score is relative, the first cannot be averaged to derive the latter. The coverage rate is security weighted.
Issuer ESG Rating	Company and Government ESG Ratings, which are provided by MSCI ESG, are measured on a scale from AAA (highest rating) to CCC (lowest rating). Company ESG Ratings are based on the issuer's exposure to industry specific ESG risks and its ability to mitigate those risks relative to peers. Company ESG Ratings are calculated on an industry relative basis while the underlying individual E, S and G Ratings are absolute. Hence, the ESG Rating cannot be seen as an average of the individual E, S and G Ratings. Government ESG Ratings identify a country's exposure to and management of ESG risk factors and explain how these factors might impact the long-term sustainability of its economy. They are derived from 0-10 scores on underlying factors in the E, S and G pillars. For further information on the MSCI methodology, please refer to www.msci.com/our-solutions/esg-investing/.
Ex post	Refers to metrics based on historical data
GICS	Global Industry Classification Standard
Greenhouse gas (GHG) emissions	Scope 1 emissions are generated by a company directly from owned or controlled sources such as the burning of fuels (stationary or mobile), industrial processes, etc. Scope 2 emissions are indirect emissions, primarily those associated with the electricity consumed by a company. Scope 3 emissions are all other indirect emissions associated with a company's operations, such as business travel, waste generated, and products both upstream (in the supply chain) and downstream (use of the products and end of life). Scope 3 emissions typically account for the largest proportion of a company's emissions.
Information ratio	This statistic measures how much a fund's out-performance may be attributed to manager skill as oppose to market movement. A high Information Ratio infers more manager skill than a low value would suggest.
ITD	Inception-to-date
Maximum drawdown	Represents the worst possible result (in percentage terms) that occurred during the period being analyzed.
MTD	Month-to-date
MSCI	MSCI refers to the external data provider MSCI ESG Research LLC and/or its affiliates.
MSCI ESG Methodology	For further information on the methodology applied to assess the ESG characteristics of the investments, please refer to www.msci.com/our-solutions/esg-investing/
NAV	Net Asset Value
Not ratable / No data coverage	Where MSCI considers an asset type for ESG analysis but data on an economic exposure is unavailable due to a lack of data from the data vendor, the investment falls under the category "No data coverage". Where MSCI considers an asset type out of scope for ESG analysis (e.g. Cash, Currency), the economic exposure falls under the category "Not ratable". For further information regarding excluded asset types, please refer to www.msci.com/our-solutions/esg-investing.
Ongoing Charges	The calculation of the ongoing charge is based on the Committee of European Securities Regulators/10-674 Directive. For a maximum of 12 months from fund fiscal year end and since inception, the ongoing charges figure is based on estimated expenses. After that, the ongoing charges correspond to the TER of the last annual report. It excludes performance fees and portfolio transaction costs, except in the case of an entry/exit charge paid by the fund when buying or selling shares/units in another collective investment undertaking.
Portfolio/Benchmark ESG Rating	Discrepancies may exist between the portfolio-level ESG Rating calculated by CSAM applying the MSCI methodology (provided in this factsheet) and the ESG Ratings displayed by other providers (e.g., MSCI ESG fund ratings). There are three main reasons for these potential deviations: (1) CSAM uses updated month-end holdings data as basis for its calculation, (2) CSAM consistently uses underlying issuer data where applicable (e.g., equity issuer in case of a convertible bond), and (3) look-through approach for target funds applied by CSAM. The coverage rate is security weighted. For further information on the MSCI methodology, please refer to www.msci.com/oursolutions/esg-investing/.
Proprietary fixed income ESG Signal	For risk management purposes, the investment manager integrates ESG factors into the security analysis to develop a proprietary waterfall combining ESG ratings of multiple data providers. External data sources considered are Lucror, MSCI, Sustainalytics, Inrate, Clarity AI and Refinitiv. The rating can yield a "positive", "neutral" or "negative" ESG signal. Where the external providers do not make the necessary data on the issuer available, the ESG signal cannot be computed, and these investments fall into the category "not rated". The proprietary methodology applied by the investment manager is not subject to third party assurance.
QTD	Quarter-to-date
Rating	A measure of creditworthiness of a financial instrument (e.g. bond) or their issuer (e.g. corporate or sovereign). They are published by credit rating agencies and can be combined into a single representative metric.
Sustainable Finance Disclosure Regulation (SFDR)	Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on sustainability-related disclosures in the financial services sector
Sustainable investment objective	Where the 'sustainable investment objective' box is ticked, this means that the product implements CSAM investment strategies that allocate capital into companies that offer solutions to society's challenges and meet a sustainable investment objective. The sustainable investment objective is achieved through a dedicated investment process focusing on investments in themes and sectors whose economic activities address specific ESG challenges. An unticked box reflects that the product does not aim to meet a sustainable investment objective.
TNA	Total Net Assets
Tracking error	Measure of the deviation of the return of a fund compared to the return of a benchmark over a fixed period of time.
WAL	Weighted Average Life: the average length of time that each unit of unpaid principal is expected to remain outstanding.
YTD	Year-to-date

Warning statements

Asset breakdown	Indicative allocation may change over time. All holdings are shown strictly for information purposes only and do not constitute investment recommendations of Credit Suisse. Please note that this does not constitute an offer or a solicitation to buy or sell any interest or any investment.
Swinging Single Pricing	For more details, please refer to the relevant chapter "Net Asset Value" of the fund's prospectus

Warning statements

Performance start date	Performance calculation and presentation start with the first full month of an invested strategy. This can lead to a difference in launch and performance start dates.
PRIIP SRI	The Summary Risk Indicator is a guide to the level of risk of this Product compared to other products. It shows how likely it is that the Product will lose money because of movements in the markets.

ESG Notes

The figures contained in this section are not audited. Where ESG related information, statements and scorings are made in this document, CS may have, partially or entirely, relied on publicly available information, internally developed data and/or information obtained from other third-party sources which CS believes to be reliable. CS' ability to verify such ESG objectives may be limited by the reliability of the data available in respect of the underlying assets and the status of the regulations in relation to tracking and providing such data. CS has not independently verified any information obtained from these public and third-party sources and cannot make any representations or warranties as to its accuracy, completeness or reliability. It is possible that the data from ESG data providers may be incorrect, unavailable, or not fully updated. This is especially true where CS has limited access to data from external parties regarding the underlying elements of an investment, for example due to a lack of look-through data. Such data gaps could result in an incorrect assessment of a sustainability practice and/or related sustainability risks and opportunities. Investors shall not use the ESG data provided in this document for the sake of meeting their own regulatory disclosure or reporting requirements. CS cannot make any guarantee about the content or completeness of such ESG disclosures, which remain subject to change and cannot be relied upon. In particular, CS shall not be liable for any errors or omissions in connection with any ESG data herein, or for any direct, indirect, special, punitive, consequential or any other damages (including lost profits). In the absence of a standardized, industry-wide ESG classification system, CS has developed its own ESG framework (the "CS Sustainable Investment Framework"). Therefore, investors should note that the ESG classification of the fund reflects CS' opinion and is based on the CS Sustainable Investment Framework which classification may vary from the classification made by third parties. The fact that a fund follows the CS Sustainable Investment Framework does not necessarily mean that it meets the investors overall investment objectives, nor their sustainability preferences. Given that sustainability regulations and guidelines are still developing, CS may need to review certain ESG classifications/descriptions as industry practices change and as more regulatory guidance becomes available. The ESG-performance of a portfolio might also differ from its financial performance and CS cannot make any representation as to the correlation between financial and ESG performance. Sustainability-related practices also differ by region, industry and ESG issue and are continually evolving. Consequently, sustainability-related practices may change over time. Similarly, new local sustainability requirements may result in additional compliance costs, disclosure obligations or other restrictions on the fund. CS' view on the appropriate classification may also evolve over time, including in response to regulatory guidance or changes in industry approach to classification.
