DWS Invest Latin American Equities, a sub-fund of the SICAV DWS Invest

Share class A2 Security code: DWS1JN ISIN: LU0813337184

Management Company: DWS Investment S.A., a member of the Deutsche Bank Group.

Objectives and investment policy

The objective of the investment policy is to achieve sustained capital appreciation that exceeds the benchmark (MSCI EM Latin America 10/40 Index (EUR)). In order to achieve this, the fund invests primarily in equities of issuers that have their registered office in Latin America or conduct their principal business activity in Latin America or which, as holding companies, hold primarily interests in companies registered in Latin America. In this context, the selection of individual investments is the responsibility of the fund management. The fund is oriented to the benchmark. It does not track it exactly but attempts to exceed its performance and can therefore deviate substantially - both positively and negatively - from the benchmark. The fund is subject to various risks. A more detailed description of risks can be found under 'Risks' in the sales prospectus. The currency of DWS Invest Latin American Equities is EUR, the currency of the A2 share class is USD. Returns and gains are not distributed but are reinvested in the fund. You may request the redemption of shares on each valuation day. The redemption may only be suspended in exceptional cases taking into account your interests as an investor.

Risk and reward profile

The calculation of the risk and reward profile is based on simulated data that cannot be used as a reliable indicator for the future risk profile. This risk indicator is subject to changes; the classification of the fund may change over time and cannot be guaranteed. Even a fund that is classified in the lowest category (category 1) does not represent a completely risk-free investment. The fund is classified in category 7 because its share price may fluctuate very strongly and the likelihood of both losses and gains may therefore be very high. The following are key risks for the fund and are not covered adequately by the risk and reward profile:

The fund is subject to increased operational risks and risks in relation to holding the securities. The fund's access to the assets held may be removed, to its detriment, partially or in full, in the event of insolvency, infringement of due diligence, or improper conduct on the part of the Custodian. The fund invests a substantial portion of its assets in one region. Concentrating on one region poses the risk that the fund may be very strongly influenced by the economic and political conditions in the respective region. The fund is impacted to a greater extent by developments than a broadly diversified fund.
