INVESTMENT STRATEGY

Our strategies are based on investing in companies with low price/earnings, high dividend yields, and dividend and earnings growth, which have generated strong risk-adjusted returns relative to the market over the long-term. Therefore, we look for:

Value

The Fund applies a disciplined, value approach by investing in large capitalization companies with low price/earnings ratios and strong prospects for long-term earnings growth.

Dividend yield

The Fund seeks to invest in companies with above-average dividend yields when compared to the benchmark.

Dividend growth

The Fund seeks high quality companies which may stand to benefit from specific catalysts driving strong dividend growth.

Past performance is not a reliable guide to future performance. The value of investments and the income from them can go down as well as up, and you may not get back your original investment. Funds investing in shares may be more volatile than those investing into other assets, such as cash or bonds and the returns received will be dependent upon market conditions, exchange rates and the tax circumstances of the investor.
