BL Emerging Markets, class BC (LU0887931029)

a sub-fund of BL

Management Company: BLI - Banque de Luxembourg Investments

Objectives and investment policy

Objectives

Seeking a capital gain.

Investment policy

This mixed sub-fund invests a minimum of two-thirds of its net assets in shares, debt instruments and money market instruments of issuers based in or exercising a dominant portion of their activities in emerging countries.
The sub-fund invests more than 60% and up to 100% of its net assets in shares at all times.
In order to achieve its objective, the sub-fund may invest a maximum of 10% of its net assets in open-ended investment funds.
In addition, the sub-fund may invest in debt instruments issued or guaranteed by a state or international public bodies other than emerging countries.
The sub-fund may also make use of derivative products for hedging purposes or to optimise the portfolio's exposure.
The investment manager integrates and promotes sustainability factors within his equity investment strategy by applying non-financial data to the issuer valuation model. In terms of bond investments, the investment manager will pay particular attention to ESG criteria by performing an ESG rating of the various issuers based on qualitative and quantitative criteria. Investments are made without any geographical, sector-based or monetary restrictions.

The investments will be mainly made in securities issued in USD, local currencies or EUR. In principle, the foreign-exchange risk is not hedged. However, in exceptional cases and depending on the valuation outlook, certain currencies may be hedged.
Bonds and other equivalent securities may be issued or guaranteed by companies, states or other entities.
The portfolio is actively managed on a discretionary basis without using a reference benchmark.

The reference currency of the sub-fund is expressed in EUR.
The currency of the share class is expressed in USD.

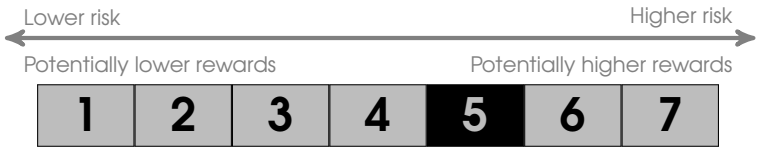

The investor has the right to redeem his shares on demand. The dealing in shares is carried out on each complete bank business day in Luxembourg. The attention of the investor is drawn to the fact that in exceptional circumstances, the possibility for the investor to request the redemption of his shares may be limited or suspended.

These shares are capitalisation shares. Income and capital gains are reinvested.

Recommendation

This fund may not be appropriate for investors who plan to withdraw their money within 10 years.

Risk and reward profile

What does this synthetic indicator mean?

- The shares of class BC are classified in category 5 because the value of the share may be subject to high variations and consequently the risk of loss and the opportunity of gain may be high.
- The risk category has been determined on the basis of historical data and may not be a reliable indication of the future risk profile. The risk and reward category shown does not necessarily remain unchanged and the categorisation of the fund may shift over time.
- The lowest category does not mean a risk-free investment.
- Repayment of the initial investment is not guaranteed.

Which materially relevant risks are not adequately captured by the synthetic indicator?

- The investment in shares bears an issuer risk insofar as the issuing company might go bankrupt. This may result in significant or even total losses of the value of the investments in these instruments.
- The investment in emerging markets exposes the sub-fund to risks related to political, regulatory, financial or fiscal instabilities or uncertainties that may negatively affect the value of the investments or even question the ownership title of the sub-fund. Settlement and delivery systems in these markets may be less well organized which may lead to additional risks (risk of late or cancelled settlement of transactions, losses for the sub-fund due to the default of the counterparty). Certain emerging markets in which the sub-fund may invest, may be of small size. This may result in the risk that the investments of the sub-fund in these markets are more difficult to buy or sell at an adequate price.
- The investment in debt instruments bears a credit risk insofar as the issuer may refuse or be in a position where it is not able to reimburse all or part of the interests or even of the principal due on the debt instruments. This may result in significant or even total losses of the value of the investments in these debt instruments.
- Other risk factors, that an investor shall take into account with regards to his own situation and specific current and future circumstances, may exist.

How can I get more information about the risks of the sub-fund?

Additional information concerning the risks of investment in the sub-fund are indicated in the corresponding section of the prospectus of the fund which is available at the Management Company and on the websites www.blfunds.com and www.bli.lu.
