Fund Description

Lazard's Emerging Markets Equity Fund aims to outperform the MSCI Emerging Markets Index with lower than index levels of volatility. The Fund typically invests in equity securities of companies located in countries included in the MSCI Emerging Markets Index with over \$300 million in market cap, and which are of sufficient liquidity, though we generally focus on those names greater than \$3 billion. Companies not domiciled in the emerging markets but that derive more than 50% of their net assets and/or sales from emerging-market countries are also included in our initial universe.

Glossary

Active Share measured as a percentage, active share is the degree of deviation in holdings between a portfolio and its benchmark. Active share of a portfolio is calculated as half the sum of the absolute active weights of all securities in a portfolio and its benchmark. For portfolios without shorts, the statistic ranges from 0% (index tracker) to 100% (no overlap with index). The higher the number, the more "active" the manager is.

Alpha represents the return of a portfolio that is attributable to the manager's investment decisions.

Beta measures a fund's sensitivity to movements in the overall market.

EPS represents the fiscal period earnings per share (EPS) for the period.

Information ratio represents the value added by the manager (excess return) divided by the tracking error.

The **Ongoing Charges** represent the ongoing costs to the fund from one year to the next which includes but is not limited to the fund's annual management fees, professional fees, audit fees, custody fees and custody transaction fees. It
